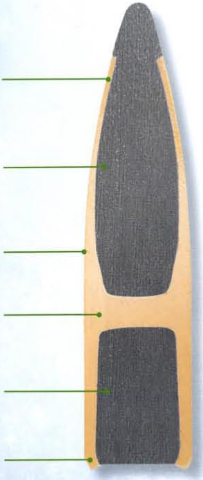
Nosler Partition® Bullets

From the time John Nosler developed it nearly 60 years ago, the Nosler Partition bullet has become the world standard of excellence and value in hunting bullets.

What John knew then, and what the rest of the hunting community has since realized, is that penetration and expansion must both be controlled for a bullet to perform on an animal in virtually every situation. Favored in the game fields around the globe for its superior penetration and bone-crushing stopping power, the Nosler Partition bullet provides a legendary level of accuracy, controlled expansion and weight retention in any caliber, on any game, and in any situation.

Nosler's exclusive impact extrusion method of manufacture, unique dual-core Partition construction and fully tapered jacket result in an extremely versatile bullet that is not only tough enough to withstand the violent impact of high velocity at close range, but will expand reliably at extreme range or on light game.

In any caliber, from .22 through .416, Nosler Partition is arguably the bullet of choice for big game hunting anywhere in the world.



Fully tapered jacket ruptures instantly at the thin jacket mouth, yet the gradual thickening along the bullet's axis controls expansion and curls the jacket uniformly outward at high or low velocities.

Nosler's special lead-alloy, dual-core construction provides superior mushrooming characteristics at virtually all impact velocities.

Every Partition bullet in the Nosler line is engineered with an optimum length, weight and ogive design for maximum in-flight and terminal performance.

Nosler's integral partition supports the expanded mushroom and retains the rear lead-alloy core.

Enclosed rear core retains more than half the original bullet weight for deep penetration.

Special crimp locks in the rear core section add strength to resist deformation under the pressure of heavy magnums.

Nosler Partition-HG™ Handgun Hunting Bullets

Nosler's Partition-HG™ was designed to deliver a high degree of accuracy along with hard-hitting terminal performance from modern hunting handguns. The bullet is manufactured by Nosler's exclusive impact extrusion manufacturing method and features the same dual-core construction pioneered by John Nosler nearly 60 years ago.

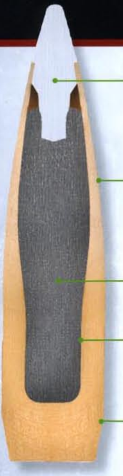
Nosler AccuBond® Bullets

A very serious hunting bullet, designed to Nosler premium performance standards, AccuBond represents the most advanced core-bonding technology to date.

Designed to fly true, penetrate deep and induce devastating damage, without causing extensive barrel fouling, the AccuBond bullet marries Nosler's copper-alloy jacket with its special lead-alloy core through a proprietary bonding process that eliminates voids in the bullet core. Nosler AccuBond truly can bring your hunting to a new level of lethal accuracy—and with it, total confidence.



POLYMER TIP:

Assures accuracy, smooth chambering and eliminates tip damage during recoil. Look for the unique white tip.

TAPERED COPPER ALLOY JACKET:

Lethal penetration and uniform expansion with maximum weight retention and minimal barrel fouling.

LEAD-ALLOY CORE:

Engineered for balanced expansion.

PROPRIETARY BONDING PROCESS:

Eliminates all possibility of component separation.

BOAT TAIL DESIGN:

Increases ballistic coefficient for long-range performance.

AccuBond—the performance benchmark of bonded-core bullets.

Ballistic Gel test shows 100-yard impact velocity of 2900 fps using the 180 gr. Nosler AccuBond in a 300 Win Mag cartridge. The bullet penetrated the entire 24 inches with maximum damage occurring in the first 12 inches.

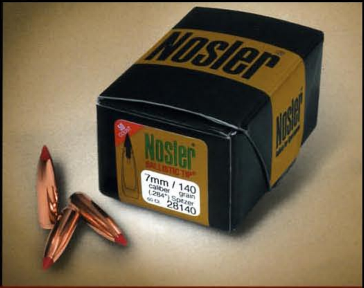
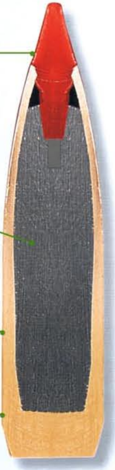
Nosler Ballistic Tip® Hunting Bullets

The more you hunt, the more you realize how unpredictable and unforgiving nature can be—which is why we engineered the Ballistic Tip® Hunting bullet to be very predictable and extremely forgiving. Whether you're after whitetails, blacktails, mulies or pronghorn, Ballistic Tip bullets deliver the kind of accuracy, consistency and down-range punch required for putting down that buck in any situation. The combination of performance and versatility that Nosler has built into these bullets has resulted in nearly 25 years of successful hunts for sportsmen across the country—and around the world. The polycarbonate tip is ballistically engineered together with Nosler's Solid Base® boat tail design to maximize the bullet's ballistic coefficient and provide increased long-range efficiency. Manufactured by Nosler's exclusive impact extrusion method, the Ballistic Tip's unique tapered jacket construction offers true controlled expansion at practical ranges and velocities.



Hunting's Deadliest Deer Bullet



The Ballistic Tip Hunting bullet's streamlined polycarbonate tip, color-coded by caliber, resists deformation in the magazine and initiates expansion upon impact.

Fully tapered jacket and special lead-alloy core allows controlled expansion and optimum weight retention at all practical velocity levels. The heavy jacketed base prevents bullet deformation during firing.

Heavy jacketed base acts as a platform for large diameter mushroom.

Ballistically engineered Solid Base® boat tail configuration combines with the streamlined polycarbonate tip for extreme long-range performance.

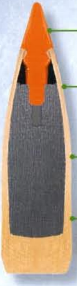
Nosler Ballistic Tip® Varmint Bullets

Nosler
Nosler
20 / 40
52111
Nosler

Nosler Ballistic Tip Varmint bullets thrive on ultra-high velocity loads, yet will go the distance with spectacular results all the way down to the lowest practical velocity levels as well. Fast or slow, near or far, no matter what rifle/cartridge combination you're shooting or what varmint you're shooting at, Nosler Ballistic Tip delivers match-grade accuracy with all the performance characteristics serious varminters are looking for.



Nestled in the jacket mouth is the streamlined polycarbonate tip, color-coded by caliber.

The Ballistic Tip Varmint's ultra-thin jacket mouth assures violent expansion at either end of the velocity scale.

The uniform, gradual thickening of the jacket wall at the bullet's mid-section is designed to keep the Ballistic Tip Varmint together until impact—at any velocity.

The heavy jacket base prevents bullet deformation during firing.

CT® Ballistic Silvertip® Bullets

CT Ballistic Silvertip bullets combine all the features of Nosler Ballistic Tip® hunting or varmint bullets, but with the addition of an advanced Lubalox® external treatment that reduces fouling and creates less barrel wear to promote longer barrel life.

Streamlined polycarbonate tip resists deformation in magazine, provides a streamlined meplat for flat trajectory, and initiates positive expansion on impact with light and medium game.

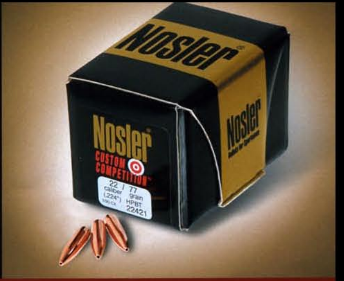
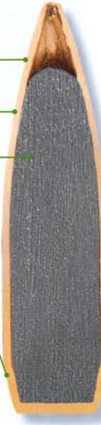
Nosler Custom Competition™ Bullets

Nosler has blended the accuracy of its Custom Competition bullet jackets with its own ultra-precise lead-alloy cores to create the performance standard for .22, 6.5 and .30 caliber match rifle bullets and for .45 caliber match pistol bullets.





Hollow point provides small meplat for reduced drag and increased aerodynamic efficiency.

Custom quality jacket engineered to exhibit unmatched accuracy.

Form-fitted, lead-alloy core for maximum bullet stability and balance.

Pronounced boat tail provides excellent flight characteristics over a range of velocities.

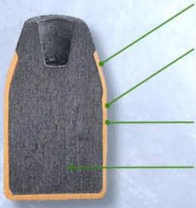
Nosler Sporting Handgun bullets are packaged in boxes of 100 or 250.



Tapered jacket enhances game-taking ability.

Well-defined cannelure holds jacket and core together and permits a tight crimp that eliminates bullet movement within the case.

Extremely concentric, tapered jacket is built for maximum accuracy.

Form-fitted, pure lead core allows for reliable expansion and maximum accuracy across a broad velocity range.

Nosler Partition-HG™ Muzzleloading Sabots

Partition-HG
Nosler

For the black powder enthusiast, the Partition-HG Hunting Sabot provides premium center fire bullet performance at muzzleloader velocities. Incorporating the Partition-HG bullet in a purpose-designed, color-coded sabot, the Partition-HG Sabot is as effective as it is easy to use.

Nosler S.H.O.T.S.™ Muzzleloading Sabots

The Nosler Jacketed Hollow Point Sporting Handgun bullets featured in the S.H.O.T.S. sabots are highly accurate as well as being stoutly constructed for the high velocities associated with muzzleloaders, with an adequate measure of penetration for animals such as antelope and smaller deer.

NoslerCustom® Ammunition.

AMMUNITION
Nosler Custom

At Nosler, we've been custom-loading ammunition for years—not for sale, but for our own personal hunts and for the day-to-day accuracy and ballistics testing process that has always been vital to the manufacturing and quality control of our premium bullet lines. After nearly 60 years of working up the right load, for the right cartridge, using the right powder, the right primer and putting it all together with the right bullet, we've learned what it takes to make ammunition that is not only accurate, but also performs consistently—shot after shot, season after season.

NoslerCustom Ammunition: Truly the Best of the Best

The Nosler Ballistics Lab staff are truly expert handloaders—they know what it takes to make great ammunition. It's their expertise that has gone into the making of NoslerCustom Ammunition. But, it's not just knowledge and special attention that sets this ammunition apart—it's also the quality of the individual components and the matching of these components to extract the very best performance from any particular cartridge. The key is that we are combining the very best components, in the exact amounts, with decades of practical, hands-on experience. And the result is a custom load that can bring your shooting to a new level of consistency—giving you a new level of confidence in your hunting.

Using load data for an individual cartridge that we developed in our own Ballistics Lab, we load each round of NoslerCustom Ammunition with steps not typically taken with factory-loaded ammunition:

- Cases checked for correct length
- Necks sized, chamfered and trued
- Flash holes checked for proper alignment
- Powder charges are meticulously weighed
- Finished rounds are hand-inspected and hand-polished
- Loaded rounds are hand-packaged in hard plastic boxes with all performance data printed on the label
- Ammunition box labels can be personalized with customer's name or other information at no additional cost

Available only direct from Nosler.
Nosler.com • 800.285.3701

NoslerCustom® Ammunition is currently being offered in numerous calibers, with many more loadings being added all the time. Every one of our loads utilizes premium Nosler Partition®, AccuBond® or Ballistic Tip® bullets. Check our website often to see what new loads we have available. If you don't see your cartridge listed, rest assured that our friends at Federal, Winchester and Weatherby already offer some of the best traditional loadings you can find, using premium Nosler bullets.

NoslerCustom® Cartridge Brass

Build the perfect load. That's long been the motto of handloaders loyal to Nosler brand premium bullets—and it was the sole reason we developed NoslerCustom cartridge brass. Manufactured with the traditional Nosler philosophy of uncompromising attention to detail, NoslerCustom cartridge brass is created to exact dimensional standards and tolerances using quality materials for maximum accuracy/consistency potential and long case life. NoslerCustom brass also undergoes the rigorous quality control that premium Nosler bullets have experienced for almost 60 years. NoslerCustom® brass and premium Nosler bullets are ingredients for the perfect load—the rest is up to you.

Choosing the best cartridge brass for your pet handload is now as simple as selecting the right bullet...

- Fully prepped—ready to reload
- Case mouths are chamfered and deburred.
- NoslerCustom® brass is all hand inspected and weight-sorted.
- Flash holes are deburred and checked for proper alignment.
- Quality made, NoslerCustom® brass is packaged in quantities of 50.

The Limited Edition NoslerCustom® Bolt Action Rifle

Limited to just 500 total units, the NoslerCustom Rifle presents a new opportunity of performance for the shooter whose passion for accuracy is equal to his passion for artistic beauty. Designed to fully utilize the accuracy potential of Nosler's premium hunting bullets, this fine rifle offers a guaranteed accuracy potential of 1/2-inch or better three-shot groups at 100 yards with NoslerCustom hunting loads with Nosler AccuBond® bullets. The owners of these unique, individually serial numbered rifles (from 001 to 500) will automatically have first right of refusal on subsequent rifles of the same serial number.

Individually serial numbered rifle, scope and case

The NoslerCustom Rifle is offered complete with a Leupold Custom Shop™ VX®-III (choice of 2.5-8x36, 3.5-10x40 or 4.5-14x40) riflescope* fitted with a specially designed reticle calibrated to provide 200-500 yard zeroes with 140 grain AccuBond® NoslerCustom Ammunition. The scope, mounted in Leupold QR™ rings, bears the same serial number as the rifle, as does the included Kalispel Aluminum airline-approved travel case.

The NoslerCustom Barreled Action

A double-square bridge, proprietary design, the NoslerCustom action features unique integral scope mount bases that accept Leupold's field-proven QR™ (Quick Release) scope rings.** By integrating a very ergonomic Timney 3-position safety design and Timney adjustable trigger set to a crisp, 3 lb. let-off, the NoslerCustom rifle offers exceptional mechanical precision and modern performance. The action features the unmistakably classic lines offered by a Ted Blackburn-style one-piece bottom metal/trigger guard. To maximize accuracy, the new NoslerCustom action is mated to a hand-lapped, 24" match grade stainless barrel that has been custom chambered for the legendary 280 Ackley Improved cartridge. All metal surfaces on the rifle feature a unique, all-weather ceramic coating that provides a durable, handsome matte finish that is highly resistant to wear and corrosion.

Classic-Styled Fancy Walnut Stock

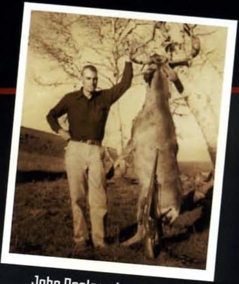
The warmth and beauty of fine walnut, crafted into a classic-styled rifle stock, is the ultimate complement to a custom rifle—especially so when you combine it with the confidence of guaranteed accuracy. NoslerCustom's fancy walnut stock with ebony forearm tip and grip cap are hand-bedded to the barreled action for the ultimate presentation of function and beauty. Yet this work of art is also meant to be hunted with—22 lines-per-inch point-pattern checkering for a sure grip in any weather, a shadow-line cheekpiece designed to provide a perfect 'weld' of your face to the stock, and a Pachmayr® Decelerator recoil pad for optimum shooting comfort.

The NoslerCustom® Accuracy Guarantee

The Limited Edition NoslerCustom rifle is shipped 'hunt-ready' with scope mounted, pre-zeroed to offer the shooter a 'dead-on' hold out to 500 yards. Two 20-round boxes of NoslerCustom ammunition accompany each rifle as does a personal letter of authenticity that guarantees one-half-inch, 3-shot group accuracy—or your money back.

*NoslerCustom® rifles feature optics specifically calibrated by Leupold Custom Shop™.

**The patented Quick Release™ mount system is manufactured under license from Leupold & Stevens, Inc.



John Nosler, circa 1948

Chambered in 270 WSM, 300 WSM or 325 WSM

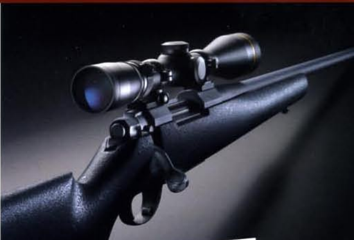
The NoslerCustom® Model 48 Sporter



A tribute to John Nosler and the year he began selling his innovative and legendary Partition bullets—1948—the NoslerCustom Model 48 rifle embodies the performance and quality that John Nosler and his company have lived by for nearly 60 years. Designed and built for the hunter who appreciates a higher level of performance on the bench, yet demands huntability in the field, the Model 48 breaks the myth that states that accurate rifles must be heavy rifles—for it weighs just 5-3/4 pounds and delivers guaranteed sub-MOA groups. For 2007, the NoslerCustom Model 48 will be offered in flat-shooting, high performance 270 Winchester Short Magnum or 300 Winchester Short Magnum and in the 325 Winchester Short Magnum cartridge. The NoslerCustom Model 48 is shipped in a Doskocil Sport rifle case.

Built on the NoslerCustom Action

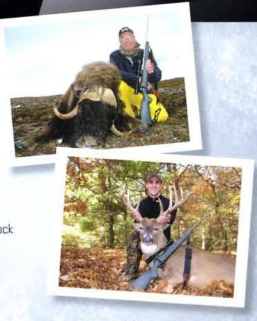
The NoslerCustom Model 48 is built on the same action as our Custom rifles—but in a round-top version that accepts standard scope mounting bases*. Nosler's proprietary push-feed action features a 3-position safety and Timney adjustable trigger set to a crisp, 3 lb. let-off. The Model 48 offers exceptional precision and reliable performance. The action features classic Ted Blackburn-style, one-piece bottom metal and trigger guard. To achieve the highest level of accuracy, the Model 48 action is mated to a hand-lapped, 24" match grade stainless barrel that has been custom chambered for the high performance Winchester Short Magnum cartridges. A true all-weather rifle, the Model 48 integrates the unique MicroSlick™ Coating on interior metal surfaces, including inside the bolt body, on the firing pin, and firing pin spring for maximum corrosion and wear-resistance, even with extensive dry firing.

Extreme-Conditions Stock

Engineered as much for 20-mile days as it is for 300-yard shots, the NoslerCustom ultra-lightweight stock is built to handle the extremes, yet still deliver a firm platform for the barreled action. This classic-styled rifle stock is built entirely of Kevlar composites for ruggedness and maximum weight savings. The stock's durable, deep onyx gray finish complements the handsome, sniper-gray CERAKOTE™** coating on the barrel and action. Stock includes recoil pad and QD sling swivels and bases.

The NoslerCustom® Accuracy Guarantee

Each Model 48 rifle has been accuracy-tested with NoslerCustom ammunition and is guaranteed to deliver three-quarters-of-an-inch, 3-shot group accuracy—or your money back.



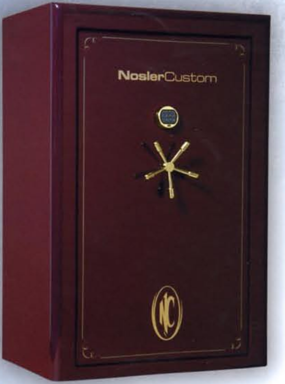
Bob and John Nosler field test the Model 48

---

*Accepts standard Rem. M700 mount bases.

** CERAKOTE is a trademark of NIC Industries, Inc.

Essential Security. The NoslerCustom® Gunsafe



The NoslerCustom Gunsafe is available in a choice of Black or Burgundy high-gloss finishes.

Individually serial numbered to match your NoslerCustom rifle, this safe will keep your investment secure in classic style.

The NoslerCustom Gunsafe offers premium security, impressive fire protection and total peace of mind for the owner—it is also a handsome addition to a trophy room, den, or office. Designed and constructed to the highest industry standards, this safe features the Type 1 High Security electronic lock. It's the most secure system currently available for home security safes.

With rounded exterior corners for additional strength and rigidity, the unibody NoslerCustom Gunsafe features an impressive 12-step paint process for a long-lasting, mirror-like finish. The deluxe interior is trimmed in oak and can be configured to meet different storage needs.
