# Bite size "BIG BITE"

Don't be fooled by their size. The Kahr pistols boast the best size to caliber ratio in the business.

## Unique Design

Six U.S. Patents cover Kahr's unique locking, firing, and extraction systems. The incomparable cocking cam trigger system employs a cam to both unlock the passive safety and complete cocking and releasing of the firing pin. The system provides a "safe cam action" and unbelievably smooth double action only trigger stroke, fast to fire in critical defensive situations.

These innovations, found only in the Kahr pistol, give the Kahr shooter an advantage in self defense, home protection and duty or off duty use.

## Extensive Testing

Quality is never compromised in the making of the Kahr.

The development of the Kahr handgun involved numerous testing sessions during which 10,000 rounds of ammunition were fired through a single Kahr pistol. Each Kahr model has been extensively tested to assure the reliability, function, accuracy and safety of each component and of the final product.

As a result, Kahr has produced the most reliable compact firearm in the world today. We, at Kahr, have total confidence in the durability and long-term reliability of our Kahr pistols.

## The Final Product -

### Big Gun Performance in a Small Gun Package

The Kahr design is original, creating the smallest package possible in two serious defensive calibers - 9mm and the .40S&W.

The union of advanced design, quality materials and proper construction makes Kahr the smallest, thinnest, most reliable full power compact pistol.

**Reliability.** Unless the gun is 100% reliable, all else is meaningless. Kahr pistols have proven their reliability in testing by Federal, State and local agencies.

**Size.** Ergonomically, the Kahr compact pistol excels. The gun is easy to shoot well, and comfortable to carry for extended periods due to its thin profile.

**Power.** Despite their diminutive size, Kahr pistols deliver full size ballistic performance.

So, when it comes to protecting your life, choose **KAHR.**

"The Kahr is hugely and deservedly popular. The P9 will expand the envelope of that popularity considerably, now that it has brought the light weight factor to the table along with the many other desirable Kahr qualities. I will not be at all surprised to see the polymer-framed P9 vault to the forefront as the most popular handgun in the entire Kahr design series."

- Massad Ayoob, Gun World, January 2001

"Thus, in my estimation, the crown jewel of SHOT Show 2002 is the latest Kahr Arms handgun, the new, larger "Target Model." It has a unique story, really: a handgun manufacturer starts business making a micro-miniature semi-automatic pistol, and then expands their product line to include a larger model. Ordinarily, concealed carry handguns are essentially duty handguns shortened at the muzzle and grips. The innovators at Kahr Arms have reversed that process, winning a clientele that will now clamor for this nearly full-sized 9mm Kahr!"

- Gila Hayes, Women & Guns, May-June 2002

**"In my opinion, this is the answer to a lot of peoples' requests. The PM9 is simple to operate and has adequate power. Most of all it is small enough to easily conceal and light enough to habitually be carried. There is nothing quite like the Kahr PM9, a pistol that I believe is the best pocket auto ever."**

- Wiley Clapp, Combat Handguns, September 2002

KAHR ONLINE WEBSITE SHOP

# KAHRSHOP.COM

Kahrshop.com is an online shop of parts, accessories and apparel for Kahr owners.

The Kahrshop is available online 24 hours, 7 days a week!  
The site uses VeriSign with SSL (Secure Sockets Layer) technology to protect your personal information.

Kahrshop for dealers at trade discount is also available. Kahr pistols can also now be ordered online for dealers!!
