Sporting clays, skeet, trap, competitive or recreational. Bird, small and large game hunting. If any or all of the above is your passion, we have a shotgun for you.

2003 was a spectacular year for B. C. Outdoors. Our VERONA shotgun line, DOCTER OPTICS, Red Dot sights, scopes and binoculars, plus our OPTIMA line of competitive shotgun cartridges have gained wide acceptance. To those of you who comprise our ever increasing customer base, we thank you. To those of you who are first-timers, enjoy our new catalog and please feel free to call or e-mail us with questions you have about any of our products.

The newest member of our product line is this new classic Italian side-by-side shotgun built exclusively for Verona by Bernardelli.

See the entire line of Verona shotguns and Docter Optics on our Shooting Safety Express at shooting events and dealer shows throughout the country.

SIDE BY SIDE

SS772-28 Side by Side

Welcome the new Verona SS662 and SS772 side by side shotguns. These beauties were created, designed and manufactured exclusively for Verona by Bernardelli in the classical Italian tradition.

Each model is available in 20 & 28 gauge and features a Purdy Triple lock system. The hand engraving is in a classic motif and the stock and forend is hand-cut checkered in select oil finished English walnut.

LX980

TOP COMPETITION

Those who know and love great guns will experience a thrill at the look and feel of the LX980 Top Competition shotgun. The Verona LX980 is not only beautiful to look at, it embodies the balance, pointability, strength and refinement of fit and finish that competitors find so desirable in a European trapgun.

LX980GCT-12 Top Competition Trap

Removable competition trigger assembly, allowing easy adjustment.

Deluxe leather case to protect your investment.

COMPETITION SPORTING

VERONA
SHOTGUNS

LX702GCT-20/28 Competition Combo

LX702GCT-20 Competition Sporting

LX702GCS-20 Competition Skeet/Sporting

LX702GCT-20: This 20 gauge Skeet/Sporting model, for competitors who prefer the lighter recoil of the smaller gauge, joined its 12 gauge older brother in the Verona line last year. It features a 30-inch barrel, the beautiful color case-hardened receiver with gold inlaid game bird that is typical of all of our 702 models, competition stock, and the skeletonized top lever.

LX702GCT-20/28: Imagine being able to change the gauge of your sporting/skeet gun in seconds! You can with this superb Verona combination shotgun. It comes with two barrel sets, one in 20 gauge, and the other in 28 gauge. Both sets have full 30-inch length barrels. The color case-hardened receiver is highlighted by a gold inlaid pheasant in flight. The Turkish walnut buttstock and beavertail forend feature a hand-rubbed oil finish, and the top lever features the skeletonized style.

ITEM NO.	MODEL	GA.	CHAMBER	BARREL	WT.	CHOKE

ADDITIONAL SPECIFICATIONS:

Hand-rubbed, oil finished Turkish walnut stock dimensionally designed for the competitive shooter, including wider beavertail forend, palm swell on pistol grip, slightly wider comb; hand-cut checkering; color case-hardened receiver and side plates, engraved on three sides with gold-inlaid bird hunting scenes; 20mm black rubber recoil pad; 11mm ventilated rib with white front bead; barrel selector integral with non-automatic safety switch; ventilated rib between barrels for reduced weight and increased cooling

One of our most versatile Skeet/Sporting sub-gauge combinations is the beautiful Verona LX692 Gold Competition superposed shotgun line. The three-barrel-set "Trio" is ideal for shooters who would enjoy shooting all three of the popular smaller gauges – but would rather not buy three shotguns to do so!

All of these handsomely engraved sub-gauge combo guns feature a high comb sporting and skeet stock, and extended forcing cones. The Trio comes in a deluxe case that will accommodate the action, buttstock, forend, three barrel sets and small accessories.

LX692GCSK-20/28 Two superposed barrel sets, one each in 20 gauge and 28 gauge. 30-inch barrels.

LX692GCSK-28/410 Two superposed barrel sets, one each in 28 gauge and 410 bore. 30-inch barrels.

LX692GC-Trio Three superposed barrel sets, one each in 20 gauge, 28 gauge and 410 bore. 30-inch barrels.

If you're a competitive trap or skeet shooter, you've come to the right place! The selection of superb Verona competition shotguns leaves nothing to be desired.

LX680GTSB-12 Competition Trap - Single Barrel

LX680TC-12 Trap Combo (O/U & Single Barrel)

LX680GTSB-12: For shooters who appreciate the balanced weight and quick handling of a single barrel, this is the perfect solution. It has the look and feel of an O/U, but the advantages of a single. Features include a bead blasted, matte finished barrel to reduce glare, plus porting, extended forcing cones and comb adjustments built into our top-of-the-line competition shotguns.

LX680TC-12: If you want to be able to switch from O/U to single barrel, and still enjoy the same feel and familiarity of one shotgun, this is the perfect combination. This excellent Verona combo shotgun allows you to switch barrels - from single to double or vice versa - in a matter of seconds! The 30" O/U set and the 32" or 34" single set feature ported trap barrels, and all of the desirable features and stock adjustments of our Gold Competition models.

SX801 SPORTING

Sporting Clays enthusiasts owe it to themselves to check out these four new autoloading beauties. Made for us especially by Bernardelli, one of the oldest and most well-known Italian gunmaking firms, they are perfectly set up to help you break clays like never before.

Although these excellent shotguns are affordable and within the reach of the average shooter, they are loaded with features that elevate them steps above the average semi-auto. You'll be proud to show off the oil-finished, Montecarlo-style, Turkish walnut stock to your shooting partners at the range. The Gold level models are fitted with an adjustable comb.

SX801GL-12	SX801 Trap/Sporting	12	2 3/4"	30" ported	6 3/4 lbs (approx.)	4 Trulock External M-IM-C-IC

ADDITIONAL SPECIFICATIONS:

All models include a ported barrel with extended forcing cone, raised 9mm wide ventilated competition rib, and HIVIZ front sight for greatly improved visibility. The Standard and Gold models are available in a choice of 28" or 30" barrel length. The black anodized, aluminum receiver provides superior strength and light weight, and is highlighted by a gold plated, competition trigger.

SX801 shotguns are gas operated, and we've taken great pains to assure that the system operates flawlessly with all 2 3/4" shells. Included with each shotgun are four extended Trulock screw-in chokes in Modified, Improved Modified, Cylinder and Improved Cylinder constrictions.

LX1001-308/20

LX1001-308/20 Express Hunting Combo

For more than a century, dependable, quality crafted double barreled rifles have been the choice of hunters and guides. With the fastest follow up shot available to protect the client or yourself from the dangerous game of the world, the double has been there. What was once only available to the wealthy is now available to sportsmen of any means. The Verona LX1001 Express Combo makes that dream a reality.

With the combination of the 20 gauge barrels the hunting field becomes paradise. Big game, small game and upland birds become available for the taking - all at the change of one barrel set to another.

Superbly crafted by Italian gunsmiths, the two wide, through locking underlugs, and the strong Bavarian style cheek piece and Turkish walnut stock make for great strength, balance and quick handling, at just over six pounds.

ADDITIONAL SPECIFICATIONS:

The 28-inch vent rib, 20 ga barrel set with screw chokes and front bead is the compliment to the 22-inch rifled barrel set, available in .223, .243, .270, .308 and 30-06/20 ga combinations.

Incorporating a V rear express sight and a blade front, the Express has auto ejectors and a sling swivel located on the lower barrel while the safety/barrel selector for the mechanical trigger is located on the tang. The hand-cut checkering, rubbed oil-finished stock and forends and screw chokes are secured in a leather-canvas hard case with latches and combination lock.

LX702G

HUNTING

VERONA
SHOTGUNS

LX702G-12 Hunting

Beautifully figured and finished Turkish walnut in the stock and forend of the LX702 are typical of this versatile shotgun, which will serve its proud owner equally well in the field or on the sporting clays course - and as a gun cabinet showpiece. The hand-rubbed, oil finish of the walnut is complemented by a color case-hardened receiver and side plates, engraved on three sides with gold-inlaid bird hunting scenes. The superb quality, fit and finish reflect the special care and attention given this elegant shotgun by dedicated Verona craftsmen.

LX702G-20 Hunting

ITEM NO.	MODEL	GA.	CHAMBER	BARREL	WT.	CHOKE
LX702G-12	LX702 Gold Hunting	12	3"	28"	7 lbs. (approx.)	5 Interchokes F-M-IM-C-IC
LX702G-20	LX702 Gold Hunting	20	3"	28"	6 lbs. (approx.)	5 Interchokes F-M-IM-C-IC

ADDITIONAL SPECIFICATIONS:

Gold-plated, single selective trigger for fast follow-up shots; automatic ejector; coil spring-operated firing pins; color case-hardened receiver and side plates, engraved on three sides with gold-inlaid bird hunting scenes; hand-rubbed, oil finished Turkish walnut with schnabel forend; hand-cut checkering; 20mm black rubber recoil pad. Rib: Ventilated, 7mm width on 12 gauge, 6mm on 20 gauge. Barrel selector is integral with non-automatic safety switch. Solid rib between the barrels prevents snagging by underbrush in the field.

LX692G

HUNTING

LX692G-28/410: The advantage and utility of having a second barrel set available at a moment's notice, in combination with beautiful, gold-inlaid engraving and hand-rubbed Turkish walnut, has proven to be extremely popular with shotgunners. This is a shotgun that you can be equally proud of in the field or in the gun cabinet. For those who appreciate the smaller gauges this gun features two barrel sets, one in 28 gauge with 2¾-inch chambers, and one in 410 bore, with 3-inch chambers.

LX692G-28/410 Hunting

ADDITIONAL SPECIFICATIONS:

Gold-plated, single selective trigger; automatic ejector; coil spring-operated firing pins; steel receiver with sideplates, engraved with gold-inlaid bird hunting scenes; oil finished walnut stock with schnabel forend; hand-cut checkering; 20mm black rubber recoil pad. Rib: 7mm width on 12 gauge, 6mm on 20 gauge. Barrel selector is integral with non-automatic safety switch. Solid rib between the barrels prevents snagging by underbrush in the field.

LX692G-20/28 Hunting

LX692GCSK-12 Hunting

ITEM NO.	MODEL	GA.	CHAMBER	BARREL	WT.	CHOKE
LX692G-12	LX692 Hunting	12	3"	28"	7 lbs (approx.)	5 Interchokes F-M-IM-C-IC

Bright, shiny stocks and metal finishes on guns are attractive on the range, but they can be a definite liability when you're trying to outwit a deer, sharp-eyed turkey or a flock of hunter-experienced geese. That's why we've elected to offer our workhorse, go-anywhere, do-anything, SX405 semi-auto shotguns with permanent camouflage so you won't need to worry about it.

Four models of the SX405 are offered with appropriate camouflage designs for specific hunting purposes, and there's a new combination set (not camouflaged) that offers you the opportunity to switch from smoothbore to fully rifled slug barrel, depending on hunting purpose.

Built-in sight mounts on slug gun and combo

SX405SH-12 Hunting

SX405Slug-12 HW Hunting

SX405SW-12 Hunting

SX405-12 Camo For wetland or woodland hunters, this hard-working, hard-shooting auto loader comes with Real Tree® wetland (SX405W-12 Camo) or hardwood (SX405H-12 Camo) patterns, 28-inch ventilated rib barrel, and 3-inch chamber. This shotgun is also available in either wetland or hardwood camo with 26-inch barrel.

SX405T-12 Camo This is an ideal choice for turkey hunters, with Real Tree® hardwood pattern camo, 24-inch ventilated rib barrel with Tru-Glo front sight, rear sight, and 3-inch chamber.

SX405Slug-12 Camo Made especially for deer hunting, this autoloader features an accurate, 22-inch, fully rifled barrel that will put your slugs right on the money. It comes with a Tru-Glo fluorescent front sight and adjustable rear sight, and Real Tree® hardwood pattern camo.

SX405-12 Combo This versatile shotgun comes with interchangeable barrels. You can hunt deer with its fully rifled, 22-inch slug barrel, and switch to the 26-inch smoothbore barrel for upland bird hunting – and the switch can be accomplished in seconds. No need for two shotguns!

Verona SX405 autoloading shotguns feature sturdy, light-weight, aircraft-grade aluminum receivers and a hard-chromed bolt assembly that won't rust or corrode, no matter what the hunting conditions. The gas-operated system will accommodate either 2¾" standard or 3" magnum loads without adjustment or modification. The auxiliary magazine catch allows round selection without having to load and unload the magazine tube.

SEMI-AUTOMATIC HUNTING

For the avid hunter who expects his gun to shrug off all types of outdoor conditions, yet do it at an easily affordable price, this is exactly what he is looking for. Strength, practicality and economy are the hallmarks of these fine semi-automatic shotguns. Verona semi-automatic shotguns are derived from the famous Italian gas-operated shotguns.

SX405-12 Semi-Automatic Hunting

SX405S-12 Semi-Automatic Hunting

ADDITIONAL SPECIFICATIONS:

Verona high quality autoloading shotguns feature sturdy, light-weight, aircraft-grade aluminum receivers and a hard-chromed bolt assembly that won't rust or corrode. Barrels are blued and made to handle steel shot. The gas-operated system will accommodate both 2 3/4" standard or 3-inch magnum loads. Models are available with either weather-repelling, black composite butt-stock & forend, or Turkish walnut with high gloss finish. These guns feature a magazine cut-off system that allows safe loading or unloading of the chamber without unloading the shells in the magazine. All models feature screw-in chokes. Four chokes and choke wrench are supplied. Magazine capacity is 5 plus 1 (2 3/4" shells), with the supplied plug not installed. For ease of carrying, sling swivels are installed on the butt-stock and magazine cap.

Chokes

Verona Interchokes offer an efficient, easy-to-use system that allows you to perfectly match the choke of your shotgun to expected shooting conditions, or to quickly change the choke when you need to adapt the gun to different conditions on the range or in the field. Verona chokes come in a full range of constrictions, from Extra Full to Cylinder. The degree of constriction is indicated on each choke by a notching system, which allows easy choke selection even in minimal light conditions. A choke wrench is supplied with every Verona shotgun. Replacement or additional chokes are available for purchase.

Briley Spectrum Chokes are furnished with Verona LX980 and LX680 Competition Series shotguns. They are also available for the complete Verona O/U line in 12, 20 and 28 gauges.

Trulock Precision Extended Chokes are furnished with the Verona SX801 series semi-automatic shotguns. They are also available for the Verona SX401 and SX405 Series.

OPTIMA

Our all-new line of range shotshells designed specifically for competitive shooters

B.C. Outdoors is proud to announce the introduction of an extensive line of superior shotshells geared to the rigorous demands of the competitive shooter. These reasonably priced shells, which will be available only at shooting ranges, are designed to assist the serious competitor in achieving the best scores he is capable of producing.

BCO engineers have extensive experience in the world of Sporting Clays, Trap and Skeet shooting, and for more than 20 years have followed and technically assisted shooters and national teams on five continents. The expertise developed during these years has been put to use in the development of our Optima line.

When we set out to design Optima shotshells, our guiding principle was to produce the best range of ammunition for competitors and you will find no compromise in the design or the components of this premium line of shells.

European Single-Base Powders These excellent powders were developed exclusively for shotshell use, and burn exceptionally cleanly, keeping your shotgun functioning smoothly over an extended shooting session. The purity of these powders also allows for lower pressures at higher velocities, so that felt recoil is reduced without compromising performance.

Italian Wads Designed exclusively for PMC Optima shells, these excellent wads from the Baschieri & Pellagri and Gualandi firms feature optimal gas seals for more constant velocities, which results in greater consistency of performance and accuracy because of reduced standard deviation. The prefabricated shotcup completely encloses the shot as it travels through the barrel, then opens and falls away, leaving the shot string to travel to the target unimpeded. This protects the shot from becoming flattened and misshapen by contacting the sides of the barrel. Built-in shock absorbers in the wads also protect the shot column from the shock of ignition, and help lessen felt recoil.

Other High Performance Components European primers (209 size) and strong, reloadable plastic hulls, combined with lead shot that has been selected for roundness for optimal patterning are used in Optima shells. In addition, the antimony content in the shot used in our high performance competition loads is an amazing 5%, contributing to their target-smashing power.

Introducing the NEW PMC OPTIMA Paper Shotshell! Designed to meet the demands of the discerning sporting shooter, PMC Optima's new Paper Competition shotshells marry the latest and greatest competitive components with the look and feel of a well crafted ballistic shell. Optima Paper delivers both high levels of performance and comfort to the competitive shooter.

Ask for PMC Optima Shotshells at your favorite shooting range!

OPTIMA

Target & Competition Loads

Optima Target - 12 Ga. For general purpose target shooting, including Trap and Sporting Clays, Optima Target 12 gauge shells are available in 7½, 8, 8½ and 9 shot sizes. They are loaded with one ounce of 3% antimony shot, and carry a three Dram Equivalent propellant (SBT 6-type powder) charge, producing a muzzle velocity of 1250 ft/sec to reach out and smash those far away targets. The wad type is B&P h.27, and the plastic hull is closed with a six point star.

Optima Competition - 12 Ga. We designed this shell specifically for competition. Its high quality components are geared for complete reliability and top performance. It delivers slightly less muzzle velocity (and recoil) than the Target shell at 1230 ft/sec, but still provides outstanding power for the longer shots. It is available in 7½, 8, 8½ and 9 shot sizes, and features a three Dram Equivalent charge of extra clean-burning powder, one ounce of 3% antimony shot, a B&P h.27 wad, 209 primer and six point star closure.

Optima Competition Lite - 12 Ga. For competition shooters who prefer a lighter recoiling shell. Easier on the shoulder during extended shooting sessions, this excellent shell has all of the outstanding features and components of the Competition shell described above, but with a reduced powder charge. Its 2¾ Dram Equivalent load produces a muzzle velocity of 1185 ft/sec.

Optima Trap/Sporting - 12 Ga. For Trap and Sporting Clays shooters. This hard-hitting shell delivers a full 1½ ounce load of extra-hard, 3% antimony shot, enclosed in a special B&P h.21 wad. It is pushed to 1230 ft/sec by a three Dram Equivalent charge of special propellant (SBT 5-type powder) to help you reduce those clays to a puff of dust. It is available in all four shot sizes and incorporates all of the other desirable features and components of the Optima shells described above.

Optima Trap/Sporting Lite - 12 Ga. This is the same Trap/Sporting shell as above, but with a slightly reduced, 2¾ Dram Equivalent powder charge to make it easier on your shoulder, and a modified wad (B&P h.24) especially designed to provide top performance with this powder and shot charge.

OPTIMA

High Performance Competition Loads

Optima Super-Fast International - 12 Ga. High velocity characterizes this Optima International Trap and Skeet shotshell, thanks to its Max load of type SBT 6 propellant, coupled with 7/8 ounce of extra-hard, 5% antimony shot. A muzzle velocity of 1345 ft/sec delivers target-smashing power even at the longer ranges. Its special B&P h.27 wad provides excellent protection for the shot, further assuring tight patterns. Like all other Optima shells, it features a strong, straight-wall hull with a 6 point star closure. Available in 7½, 8, 8½ and 9 shot sizes.

Optima Super-Fast - 12 Ga. Even faster, and with a heavier shot load than the International, this versatile Trap-Skeet-Sporting shell provides the power and accuracy for all types of competitive target shooting. It incorporates a Max charge of type SBT 5 propellant pushing one ounce of 5% antimony shot, enclosed in a B&P h.24 wad, to 1355 ft/sec. Available in all four standard Optima shot sizes.

Optima Super-Fast Sporting - 12 Ga. This is the perfect choice for Sporting Clays. With 1½ ounces of extra-hard, 5% antimony shot in front of a Max charge of type SBT 1 propellant, you have all the power and velocity (1340 ft/sec) you need to reach those long-range shots. The specially selected B&P h.21 wad pampers the shot, assuring that it stays round and flies true. Available in all four standard Optima shot sizes.

Optima Pigeon - 12 Ga. Designed for Pigeon-Fitasc competition shooters, this special shell features the heaviest shot load of all Optima Target shotshells at a full 1¼ ounces of 4% antimony shot. The 3½ Dram Equivalent charge of type SBT 2 propellant delivers a muzzle velocity of 1300 ft/sec. Slightly larger shot sizes at 7, 7½, 8 and 8½.

Optima Felt Wad - 12 Ga. For shooters who prefer a somewhat wider pattern, this Sporting-Spreader shell features a high quality Diana felt wad that gets the job done right. Selected especially for this shell, the 3 Dram Equivalent charge of type SBT 3 propellant provides a muzzle velocity of 1240 ft/sec for the 1½ ounce load of 3% antimony shot. Available in three shot sizes - 7½, 8 and 9. Strong, reloadable plastic hull with 6 point star closure.

OPTIMA Target & Competition Loads – Sub-Gauge

Optima Trap & Skeet - 20 Ga. This all-purpose Sporting Clays, Trap and Skeet shell features the heaviest shot load we offer in Optima 20 gauge Target. Its 2½ Dr. Equiv. charge of type SBT 1 clean burning propellant pushes one ounce of 3% antimony shot out of the muzzle at 1220 ft/sec, delivering target-dusting power clear to the back fence. The specially designed B&P h.19 plastic wad assures that the shot stays on target. Reloadable six point star closure. Available in 7½, 8 and 9 shot sizes.

Optima Trap & Skeet Lite - 20 Ga. Also designed for all-purpose target and competition shooting, this shell offers greater velocity and a slightly smaller shot load than the shell described above. Its 2½ Dr. Equiv. charge of type SBT 5 propellant delivers 1250 ft/sec at the muzzle. Its ¾ ounce load of 3% antimony shot is enclosed in a B&P h.22 wad. Available in four shot sizes: 7½, 8, 8½ and 9.

Optima Skeet - 28 Ga. This is the ultimate 28 gauge shell for Skeet/Sporting shooters. With a Max charge of type SBT 2 propellant and a ¾ ounce load of hardened, 3% antimony shot leaving the muzzle at 1225 ft/sec, there is no better choice for competition Skeet or Sporting Clays shooters who love this little, pleasant-handling sub-gauge. The shot is fully protected by an E.G. h.28 plastic wad to keep the pattern tight, and the hull is closed with a six point star. Your choice of 7½, 8, 8½ or 9 shot sizes.

Optima Skeet - 410 bore This hard-shooting 410 bore shell gets its 1225 ft/sec velocity from a Max charge of special type SBT 2P propellant. Loaded with a ½ ounce of hardened, 3% antimony shot and manufactured with specially designed Optima components like the E.G. h.27 wad, you won't find a harder hitting, better performing, 410 bore shotshell. Star crimp closure. Available in 7½, 8½ and 9 shot sizes.

OPTIMA Paper Competition Shotshells

New Optima Paper Shotshells- 12 Ga. State-of-the-art shock absorbing, prefractured plastic wad filled with 5% antimony lead shot (1 or 1½ oz.) on top of 3 dram equiv. of ultra progressive single base Italian powder all in a traditional 12 gauge paper hull. Optima Paper shotshells fly through the targets at 1220 fps and are available in a regular 1½ oz. load (OPCH) and in a lighter 1 oz. load (OPC) in 7½, 8, 8½ and 9 shot sizes.

DOCTERsight™

RED DOT SIGHT

First introduced in 1999, the rugged, compact DOCTERsight was the greatest advancement in red dot sights ever conceived. Now, thanks to continuing research and development by DOCTER technicians, the new, even better, Sight II Plus model is here.

Sight II Plus improvements include:

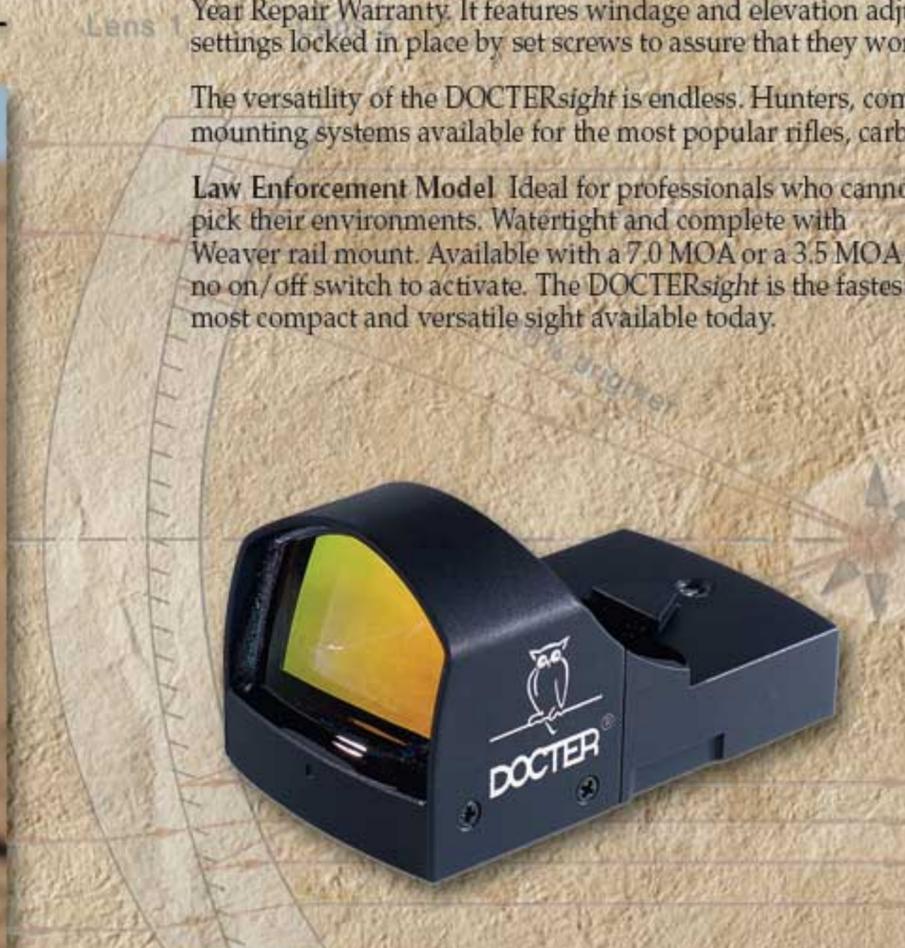

- Cleaner, more precise red dot, generated by an improved LED (Light Emitting Diode) that is 10% brighter than before.
- Thinner, anti-reflection lens coating for a brighter, clearer sight picture.

The DOCTERsight provides the best, materials with state-of-the-art technology. The lightweight compact size makes it the most versatile red dot available. Built strong enough to withstand the rigorous use of professional shooters and sportsmen alike. Aircraft grade hard-anodized aluminum, brass and stainless steel ensure your DOCTERsight will be there when you need it.

The DOCTERsight utilizes two highly polished, optical quality, hardened glass lenses (not plastic) sandwiched together and solidly set in the frame of the sight. The specially formulated multi-coating is applied between the lenses, protecting the coating from scratches and abrasions. The unit is water resistant and carries a Limited Two Year Repair Warranty. It features windage and elevation adjustments similar to those on a scope sight, with settings locked in place by set screws to assure that they won't shoot loose.

The versatility of the DOCTERsight is endless. Hunters, competitors and professionals have over twenty mounting systems available for the most popular rifles, carbines, shotguns and sidearms on the market today.

Law Enforcement Model Ideal for professionals who cannot pick their environments. Watertight and complete with Weaver rail mount. Available with a 7.0 MOA or a 3.5 MOA, no on/off switch to activate. The DOCTERsight is the fastest, most compact and versatile sight available today.

DOCTERsight™ Specifications

Overall Dimensions: 1.8" L by 1.0" W by 0.9" H. Weight: 1.06 oz.. Operating and Storage Temperatures: Fully functional in a temperature range from -15°F to +160°F. Can be stored in temperatures ranging from -40°F to +160°F.

DOCTERsight™ Warranty Information

The strong, all metal construction of the DOCTERsight, combined with hardened glass lenses, means long, trouble-free service for its owner. The DOCTERsight is covered by a Limited Two Year Warranty.

DOCTER Rifle Scopes

Famous for their unsurpassed quality, DOCTER scopes embody the ultimate in clarity and superb German construction. Our lenses have a well-deserved reputation for being among the best in the world, providing great brilliance and razor-sharp definition from edge-to-edge of the entire viewing field. DOCTER scope owners can hunt with confidence, knowing their optics are built to withstand all hunting conditions, from frigid high altitudes to unexpected lowland rainstorms.

New Illuminated Reticle Scopes If you've ever lost the reticle or dot of your scope in a dark mass of hair because of bad light conditions during the first or last few minutes of legal hunting, you know how frustrating that can be. If you shoot, you risk missing, or even worse, wounding and losing a fine animal – maybe the best you've seen. If you don't shoot, and if you're a conscientious hunter you won't, the trophy is lost for sure.

The lost reticle problem is solved with the new DOCTER Illuminated Reticle rifle scopes. Now you have a choice of two versatile variable scopes: A 2.5 to 10 x 48mm with illuminated dot reticle, or a 3 to 12 x 56mm with illuminated duplex reticle. During adequate light, you can switch off the illumination to save battery power, or switch it on when you want to eliminate any guesswork about where your shot will hit.

New Reticle Illuminator Don't want to buy a new scope? You can still solve the lost reticle problem by installing the new DOCTER Point™ reticle illuminator on your existing scope – whether it's a DOCTER scope or another brand. This excellent new product is easy to install on the objective bell of your scope, and provides an illuminated 2.5 MOA red dot that shows you where the dot or juncture of your crosshairs is located. Small and unobtrusive, it can be installed in minutes, and operates on an easy-to-replace, standard lithium battery. A quality instrument, the waterproof DOCTER Point is constructed of high tensile aluminum alloys and stainless steel.

DOCTER

HUNTING BINOCULARS

If serious glassing is an integral part of your hunting, you know how important it is to include the best binoculars you can afford. Cheap binoculars can result in eyestrain, their fuzzy picture makes it hard to see well, and they can fog up and ruin your day altogether when the weather turns sour.

The new DOCTER Sports Optics hunting binoculars are among the best you can buy, and they're available at a price that beats the other top European binoculars. Choose from two models to suit your particular needs: An 8 x 42mm with broader field of view, or the more powerful 10 x 42mm.

Both offer the great resolution, brilliance and edge-to-edge clarity that DOCTER is known for throughout the world.

Typical of roof prism binoculars, they are compact, lighter and easier to carry than the Porro prism type. But with typical German thoroughness, they are built tough to give many years of service. A rubber armor coating helps them shrug off the bumps that occur during hard use. A central focus wheel makes focusing on your subject quick and easy once you have adjusted the diopter setting on the right eyepiece to your particular vision requirements. Multi-coated lenses allow exceptional light transmission, and the reversal system with phase-correction layer and silver reflex coating guarantee bright, clear images. Precision alignment of the optical barrels helps eliminate eyestrain from hours of glassing.

DOCTER HUNTING BINOCULARS

There's a precision DOCTER binocular for every use, all built to give you a lifetime of trouble-free service, plus unsurpassed clarity and brilliance. Choose from the robust Extreme Duty binocular that is especially built for use in adverse conditions, the outstanding Nobilem binocular that is perfect for wide angle viewing on land or sea, handy Compact binoculars that are lightweight and perfect for hunting, or the large Aspectum binocular with magnification from 20X to 50X. There's even a high quality Monocular that will slip into your shirt pocket. All built with world renowned German excellence, and available at a surprisingly affordable price.
