with Black Spiderweb

33 - Mossy Oak® NEW Breakup®

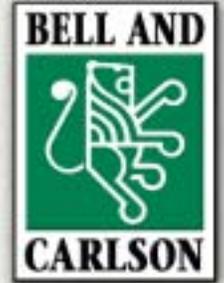

21 - Snow NaturalGear™

34 - Realtree HD
Hardwoods Green

Superior Design

Because Bell and Carlson stocks have been designed and tested by hunters, every shooter can benefit from the innovative features built into every stock. All Bell and Carlson stocks are designed to reduce recoil and withstand temperature extremes, moisture and hard use. The stock pitch design increases contact with the shoulder for better recoil distribution, while the increased angle of comb allows the cheek to fall away from the stock. Both of these design features reduce felt recoil, which reduces flinch and increases accuracy. Bell and Carlson stocks also have an increased pistol grip or wrist arch which gives the hand a more natural and comfortable position on the rifle stock.

Accuracy, Strength, Feel

The *solid throughout* Bell and Carlson composite stock withstands more abuse than a wood or hollow plastic stock and is unaffected by atmospheric conditions. *With a Bell and Carlson stock, the gun stays on target!* Besides being impervious to weather, having the benefits of strength, and the reduction of felt recoil, Bell and Carlson stocks are built to look and feel like a wood stock with which all shooters are familiar.

Fit and Finish

Prior to finishing, an action is mounted to all Bell and Carlson stocks to ensure a proper fit. Any stock that does not precisely fit the barreled action is rejected.

Easy Installation

All Bell and Carlson stocks, unless indicated otherwise, are drop-in stocks designed to permit the customer to simply bolt the barreled action into the stock. Bell and Carlson stocks are fit for current model factory standard barrel contours. It may be necessary to remove minimal amounts of material from the magazine well and/or barrel channel.

Ordering Bell and Carlson Stocks and Accessories

Bell and Carlson encourages the use of its Dealer/Distributor network. However, should you be unable to find the Bell and Carlson products you are looking, please contact one of our Customer Representatives at 620-225-6688.

BELL AND CARLSON COMPOSITE GUN STOCKS

DESIGNED BY HUNTERS, BUILT BY CRAFTSMEN

Choose from seventeen outstanding finish options available on Bell and Carlson centerfire rifle and shotgun stocks!

TEXTURED FINISH OPTIONS

The paint that is used for the five Bell and Carlson textured finishes is the toughest, most durable stock coating available in the market today. The practical, but very attractive textured finish provides a positive, firm grip in less than ideal weather conditions.

When ordering, the 2 digit finish number (ie: 02) becomes the last two digits of the item number (ie: 5131-02).

CAMOUFLAGED FINISH OPTIONS

Bell and Carlson is the only stock manufacturer to utilize a more durable, licensed hydrofilm process. This process also creates more defined camouflage patterns with better color intensity and sharpness. Dedicated and experienced hunters who pride themselves in their ability to get close to their game can choose from Bell and Carlson's twelve popular and effective camouflage patterns.

When ordering, the 2 digit finish number (ie: 02) becomes the last two digits of the item number (ie: 5131-02).

SUMMIT TECHNOLOGIES™ MEDALIST STOCKS

COMPOSITE STOCKS WITH AN INTEGRAL ALUMINUM BEDDING SYSTEM

The **Medalist** line of stocks combines the stability and durability of Bell and Carlson's proprietary composite stock with an integral aluminum bedding system.

23 - Gray with Black Spiderweb

The integral bedding system is computer designed and CNC machined out of aircraft grade 6061-T6 aluminum, and eliminates the need for conventional bedding, assures perfect fit and alignment of the barreled action and stiffens the forend. Medalist stocks are available in all seventeen finish options.

Other Medalist features include:

- 13 1/2" length of pull standard, custom length of pull available for an additional charge
- Hunting and sporting styles weight approximately 2.0 lbs, tactical models approximately 2.5 lbs
- Choice of seventeen different finishes
- Hunting and sporting styles come with a Pachmayr Decelerator recoil pad
- Tactical styles come with a premium Bell and Carlson recoil pad
- Uncle Mikes sling swivel studs installed

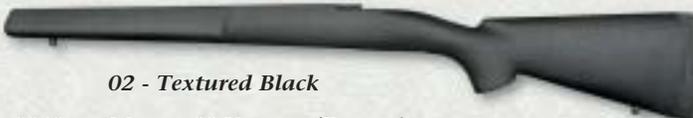

SUMMIT TECHNOLOGIES™ MEDALIST STOCKS

BELL AND CARLSON SPECIAL PURPOSE STOCKS

STABLE, STRONG AND DURABLE – FOR EVERY APPLICATION

We've designed our full line of

Special Purpose Gunstocks

to help you maximize the effectiveness of many modern shooting applications. All Special Purpose Gunstocks are built with stable, strong and durable solid structural urethane with aramid, graphite and fiberglass. Unless stated otherwise, all of our Special Purpose Gunstocks come equipped with a premium recoil pad and Uncle Mike swivel studs and are available in all seventeen finish options.

STANDARD VARMINT STYLE

Features a precision machined aluminum insert bedding block for total metal to metal fit, virtually eliminating additional bedding and assuring a perfect fit that will never change. It is also available without the aluminum insert bedding block.

BELL AND CARLSON RUGER 10/22® STOCKS

MAXIMIZE ACCURACY WITH A BELL AND CARLSON COMPOSITE STOCK

Maximizing the accuracy and appearance of a **Ruger 10/22** starts with a Bell and Carlson stock featuring solid structural urethane with aramid, graphite and fiberglass construction. With your choice of six different stock styles and seventeen finish options, Bell and Carlson is clearly the only choice for accuracy.

Heritage Sporter Style Stock

With cheekpiece. The Heritage Sporter Style features distinctive styling with the accuracy and durability common to all the Bell and Carlson stocks. Heavy barrel contours.
P032-__ Heritage Sporter with Cheekpiece, Heavy Barrel

02 - Textured Black

Anschutz Target Style Stock

Sportsman Team Challenge Heavy Barrel - Although this style Anschutz can be used for any purpose, it has been specifically designed for use in the Team Challenge competition. Scope use only.

AO32-__ Anschutz Sportsman Style Target, Heavy Barrel

Premier Thumbhole Style Stock

The Premier combines beauty with functionality for more comfort and accuracy, featuring a Monte Carlo cheekpiece and thumbhole with palm swell for better grip and reduced recoil. In Standard and Heavy barrel contours.

T032-__ Premier Thumbhole, Heavy Barrel

Classic Style Stock

Featuring the classic design without cheekpiece, this stock works for both right hand and left hand shooters. As with all models, this stock is a true drop-in and installs in minutes. In Standard and Heavy barrel contours.

4032-__ Classic, Heavy Barrel

Anschutz Thumbhole Style Stock

This stock combines the great features of the Anschutz style and the feel and control of a thumbhole. The palm-swell grip fits the hand like a glove!

AT32-__ Anschutz Thumbhole, Heavy Barrel

Odyssey Target Style Stock

Features such as an adjustable comb with an aluminum forearm rail for attachments, downward front to rear tapered forearm for minute elevation adjustments and vented forearm make this the only choice of performance minded shooters. Available with 2 or 3 way adjustable butt assemblies.

2033-__ Odyssey, 2-way Butt Assembly

The DuraMaxx™ Stock

Bell and Carlson is pleased to introduce the new DuraMaxx™ Heavy Barrel Stock to fit Savage long and short action varmint and tactical rifles.

The DuraMaxx™ is a "drop-in" stock that's more affordable than our top of the line fiberglass/aramid/carbon fiber stock but still provides the strength, beauty and functionality that all of our products are known for.

The DuraMaxx™ stock was specially designed for the hunter/shooter to be versatile enough to be used for off-hand, bipod or benchrest use. This "drop-in" stock comes complete with **aluminum pillar bedding** and a **Pachmayr Decelerator pad**.

The stock is designed for a "free-floating" barrel, has no checkering and is available in all the finishes we offer, including our popular Spiderweb and camouflage patterns.

DURAMAXX™ STOCKS FOR SAVAGE VARMINT & TACTICAL RIFLES

7112-___ Savage, Long Action, Blind Magazine
 Fits all long action "three digit models" (such as Model 110, 111, etc.) with standard contour barrel and top loading internal magazine. Fits Accu-Trigger.

7110-___ Savage, Short Action, Blind Magazine
 Fits all short action "two digit models" (such as Model 10, 10GY, 11F, 11FC, etc.) with standard contour barrel and top loading internal magazine. Fits Accu-Trigger.

Bell and Carlson EZ-Roost Target System

"The Ultimate Target System"

Made in the U.S.A., designed for entertainment and to generate interest in target and recreational shooting. Let's face it, it's just not that much fun shooting at paper targets. It's also a real problem figuring out what to attach them to and how to hang them.

The low cost, easy setup and unlimited versatility of the EZ-Roost is why it is considered the "Ultimate Target System". Plus, it's really fun to shoot at a target that actually breaks! It's much more fun than just punching holes in paper.

The EZ-Roost is designed primarily to be used for small and large rifles and pistols at 5 to 500 yards, but it is also a great target for BB/pellet guns and archery. Setting up is as easy as inserting the metal post into the ground, sliding the target holder onto the post and positioning a standard 4 1/2" clay target in the holder.

The EZ-Roost comes complete with four target holders and four mounting posts and is packaged in a clamshell for easy display. The holders are designed to be used with the metal posts included, but they will also fit on a common 3/8" steel post, such as electric fence posts, dowels, etc.

EZ-Roost Target System
