Winchester Short Magnum

The trend in rifle design over the past few years has been towards lighter weight guns. With the introduction of WSM calibres, developed in close collaboration with Browning, proposes a new concept that combines compact, lightweight guns with a calibre providing the exceptional level of ballistic performance that until now has been reserved to the most powerful magnum calibres.

These WSM calibres will allow you to use ammunition offering even better performance than a conventional or standard magnum calibre, in terms of velocity, energy and trajectory.

The Safety Charter

Whatever the country they are supplied to, Browning guns come equipped with the "Gun Lock" and the "Trigger Lock".

Browning encourages and supports responsible gun owners, and offers other products in addition to guns, that are specifically geared towards safety, in particular specially designed gun safes.

Browning guns are subject to the strictest standards of production and testing in the business (drop tests, etc.) The BACO standards constitute a very severe test.

The Ethical Charter

The guns produced and marketed by Browning meet the ethical requirements of all of the different shooting disciplines.

Browning hunting guns also comply with the art and the ethics of hunting, as well as with the laws of each country.

Guns of an aggressive or paramilitary nature are not allowed.

All Browning products are manufactured in countries where human rights are guaranteed and which never use child labour.

The Young Persons' Charter

Browning actively supports young shooters through its programme of sponsoring official "Browning" teams.

Browning also carries out sponsorship operations on behalf of national shooting federations.

The Craftsman's Charter

Hand made, using techniques that retain all the best aspects of the traditional methods, each gun produced by the "Custom Shop" at Herstal is unique.

The close ties that exist between Browning and the School of gunsmithing of Liege guarantee that these age-old skills will continue to be passed down for the benefit of future generations.

Browning recommends the use of ammunition by Browning and Winchester

Dura-Touch Label

Browning introduces Dura-Touch, a unique wood treatment, specially designed to improve the grip and the handling of your gun. Dura-Touch is also an exclusive finish that will perfectly protect the wooden parts of your gun against bad weather, as well as providing an exceptionally smooth and pleasing feel. This treatment will be offered on various guns in our range to allow you to derive even greater pleasure from using your Browning gun.

The Consumers' Charter

The Browning name is synonymous of quality. All our firearms carry a 3 year warranty. The action frames of all Browning over-and-under shot-guns are guaranteed for 10 years.

Brownings' world-wide distribution network ensures that its customers receive a reliable, high quality of service, and guarantees that only original manufacturers' spare parts are used.

Opaline Label

We provide a 100% guarantee on the 10 following qualitative criteria :

1. Using European walnut at least 150 years old.
2. With a hand-produced oil-rubbed finish.
3. With hand-cut checkering .
4. Wooden parts fitted by highly qualified craftsmen.
5. Action frames fitted using the lampblacking technique.
6. Pitch and twist of all stocks checked with millimeter precision.
7. Electronic measurement of ballistic performance and calculation of centre of gravity of the shot pattern.
8. Diameter and length of the firing pin checked with micron accuracy.
9. Trigger pull measured twice (once after mounting trigger assembly and again after the shooting test) to the nearest gram.
10. Supplied in a special carry case.

Environmental Charter

The environment is a constant concern for Browning.

This is demonstrated, for example, in Brownings' decision to restrict the use of toxic products in its production processes. All the cutting oil from our numerically controlled machines is filtered and reused within a closed circuit.

Brownings' back-bored barrels with interchangeable Invector Plus chokes allow the use of cartridges loaded with non-toxic shot, thus reducing lead pollution, in particular in wetland areas.

Browning cartridges are fitted with wads made of a special, photodegradable plastic material. Under the action of UV rays, this wad decomposes in a matter of months rather than the decades taken by traditional wads.

Finally, with the aim of reducing visual pollution, Browning recommends that you pick up your empty cartridge cases, a simple gesture but an important one for the future of our sport.

Back-Bored • Invector

Guns equipped with back-bored barrels with Invector+ chokes will give a reduction in recoil, an improved shot pattern and an increased penetration velocity.

BAR Semi-automatic rifles

BAR Grade D

This is the luxury version of the BAR MK1, assembled in the Custom Shop. It is available in all the usual

calibres in "Battue" or "Affût" versions.

BMM African Repeating rifles

BMM African

Based on the Mauser system and developed in conjunction with Ernest Dumoulin the great bolt-action specialist, this rifle has been oversized to adapt it to the African calibres : the diameter of the 3 lug rotary bolt has been increased to 19 mm. The reinforced breech box has been countersunk and prepared for scope mounting. The integral mag-

azine can hold 4 cartridges and is equipped with a hinged floor plate with a transverse cut-off, exclusive to Browning. The Browning Mauser Magnum is notably manufactured in .416 Rigby, .500 Jeffrey and .505 Gibbs calibres.

BMS Repeating rifles

BMS

This prestigious gun uses original FN components with a forged steel breech box and its long extractor bolt. The BMS exists in the most common calibres such as .270W, 30.06Sprg, .308, 7 mm RM, 300WM, .338WM and .375HH.

Express CCS 25 .375 HH

This gun has been developed to meet the demands of the H&H .375 calibre cartridge that is very widely used for big game hunting and African safaris. Solid action frame with a reinforced lock, thickened 60 cm long barrels, pistol grip stock with an anti-recoil pad for increased comfort. This gun can be equipped

with claw scope mounts upon request.

CCS 25 B2E

CCS 375 African

CCS 25 D5G

Express CCS 25 "Custom" with side-plate engraving

Fitted with side plates, this rifle exists in a "Custom" version having 65 cm barrels with a battue-type rib and a folding "ear shaped" leaf rear sight. It has a 3 piece fore-end and a pistol grip stock with teardrops and with a hidden butt plate, in walnut specially selected for the direction of its grain. The

CCS 25 exists in numerous calibres, such as .270W, .30-06, .30R Blaser, 7X65R, 8X57JRS, 9.2X62 and 9.3X74R. It is also available in a box-lock version with a wide selection of engravings.

Express Herstal Cal. 8 x 57 JRS or 9,3 x 74R

This version offers the quality of the CCS 25 adapted for large game. It includes a battue-type rib incorporating the fixing locations for the base of a universal pivot scope

mount (allowing a scope to be mounted in a matter of minutes and at lesser cost), a pistol grip stock with an insert type anti-recoil pad and a tulip fore-end made from beautiful French walnut with an oil-rubbed finish.

Medallion engraving featuring boar and deer, grey-tempered action frame. Only exists in calibres 8X57JRS and 9.3X74R.

B525 Classic
OVER-AND-UNDER SHOTGUNS

The 5th generation of Browning over-and-under shotguns

THE PINNACLE OF ACHIEVEMENT IN OVER AND UNDER SHOTGUN DESIGN

In 2003, Browning launched a hunting version of the B525 Classic, the 5th generation of the original over-and-under shotguns designed by John Moses Browning.

This model retains all the characteristics that have made Browning over-and-under shotguns the most appreciated guns in the market.

Its handling, its balance and its reliability testify to the care taken by Browning in the making of its guns. The B525 Classic combines the very best of the traditional gun maker's craft with the most advanced production techniques.

For the B525 Classic, Browning has

That Something that makes the difference

gone even further, to ensure that each hunter experiences greater satisfaction when using its guns. A great deal of work has gone into the firing mechanism, to improve its accuracy while at the same time retaining all the unique safety features associated with Browning guns. Particular attention has been paid to the finish of the wooden elements and the checkering has been redesigned for improved handling. The barrels have been revised to enable all "invector" models to fire steel shot cartridges, as guaranteed by means of a test certified by the Liege Test Bench (BEL) label. Finally, the design of the action frame incorporates a small shell on the top, giving it a particular elegance and a unique identity within the Browning range.

1• Large sized bolt

The bolt is large and made of one piece.

It is adjusted to suit the action frame that receives it to guarantee play-free action.

The bolt is adjusted to bear at precisely where it should: on the bottom face of the groove of the barrel locking lug.

The bolt lever is adjusted in such a way that the shooter can tell from its angle to the line of sight that the bolt is bearing correctly and is not fully closed.

4• Highly durable hinge pin

The hinge pin is made of one piece and has a large surface area which ensures that the sliding and rotation forces induced during opening and closing are evenly distributed, thus ensuring maximum resistance to wear.

2• Positive, powerful ejection

Cartridges are ejected by means of a hammer-operated mechanism, the only system which guarantees positive, powerful and regular ejection. Only spent cartridges are ejected, thanks to an ingenious system of rods operated by the hammers as they drop.

3• Chrome-plated barrels

Barrels are chrome-plated internally : for hunting under the worst conditions...

5• Forged steel action frame

The action frame is machined from a block of forged steel. It is able to resist pressures several times greater than those actually used in the Belgium Proof House at Liege.

6• Single selective trigger

The single selective trigger allows you to select the upper or lower barrel for the first cartridge

7• Firing system

The new, more direct firing system gives you a more precise, safer and more consistent shot.

8• Wood and checkering

A choice of woods and new, higher quality finishes. Ideally situated checkered areas ensure accurate and comfortable handling.

9• Shells

The top of the action frame incorporates a shell that gives this model a certain elegance and makes it special.

Black, 100% recyclable polypropylene carry case marked with the Browning logo in gold colour.

B525 Classic 12M

OVER-AND-UNDER SHOTGUNS

The 5th generation of Browning over-and-under shotguns

B525 Classic Cal 12 Magnum

The multi-purpose gun par excellence as it incorporates a 3" barrel that can fire both 70 mm (2 3/4") and 76 mm (3") cartridges, while at the same time being low in weight for the comfort of the shooter.

Only B525s equipped with an invector choke are tested for steel shot.

B525 Classic Cal 12 Magnum Elite Gr 3

Sobriety and elegance characterise the B525 in its Elite (Gr3) version : its engraving, the meticulously selected walnut and oil-rubbed finish make this an ideal compromise between traditional looks and personality. It has a 3" Magnum barrel, just like the Classic model.

B525 Classic Cal 20M

This model represents the traditional compromise between efficiency and weight. A steel 20 gauge action frame and barrels chambered for 3" Magnum allow

optimum efficiency while keeping the weight deliberately low, which is a considerable advantage during a long day's hunting.

B525 Classic Cal 20M Elite Gr 3

Particular attention has been paid to the choice of wood, the finish of the action frame and the type of engraving (incorporating new

game scenes), all of which give this model a refined elegance while retaining the advantages of the basic model.

 **B525 Classic Cal 20M English grip**

Continuing the features of the Classic, this B525 distinguishes itself thanks to its English grip which gives it immaculate contours.

B525 Classic Light 12

OVER-AND-UNDER SHOTGUNS

The 5th generation of Browning over-and-under shotguns

B525 Classic Light Cal 12

The gun of the 3rd millennium for the demanding hunter.

All of the developments introduced with each new generation of Browning light models are incorporated in the B525 Light which constitutes the ultimate synthesis of efficiency, weight and good looks. An action frame made

of a lightweight "Aircraft" grade alloy reinforced with high strength steel inserts, a suitably profiled barrel and a suitable choice of wood and form result in a lightweight gun with perfect handling and balance, as well as an unequalled elegance, further enhanced by game scene engravings.

B425 Light 20M

This gun represents a perfect combination of lightness, looks and strength. Its action frame is made of 7075 alloy with a stainless steel toner insert. Its new, narrower,

tulip fore-end and semi pistol grip stock make this a particularly ergonomic gun.

B425 Light Elite 28

Sober and elegant : a new, original engraving, meticulously selected walnut with an oil-rubbed finish make this an ideal compromise

between traditional looks and personality. This gun will provide maximum pleasure by allowing you to attempt a novel experience: sporting clays with a 28 !

B425 Light Elite 410

Let yourself be seduced by the surprising efficiency of the famous B425 shotgun in its .410 gauge version. This gun combines high performance with a brand new stock

and a new fore-end, which give it very a fluid line and great finesse. This shotgun also has a new, profiled rib.

B425 Specials

OVER-AND-UNDER SHOTGUNS

B425 Privilege Hunting Cal 20M

A "fine" firearm in the true sense of the word, the Privilege is one of the key products of Browning's know-how. The walnut used is a 4 star quality wood that is then oil

rub finished by hand. The side-plate engraving combines deep engraving, decorative motifs and game scenes. This gun comes in an Opaline case.

Opaline case
Developed exclusively for our OPA-LINE label, this superb case with its laminated structure and highly resistant polymer-coated fabric finish is fitted with two combina-

3 precious advantages

Browning reveals the professionals' secret: back-bored barrels. First used in 1992, back-boring is a technical breakthrough that has allowed our shooters to win numerous medals. Better impact and higher velocities for improved shooting accuracy. A "back-bored" barrel is one whose internal diameter (the bore diameter) has been increased beyond traditional specifications.

• Increased penetration velocity
Back-boring ensures that there is less friction between the shot and the wall of the barrel. Instead of having to overcome friction, more of the energy generated by the gunpowder gases serves to propel the cartridge, thus increasing the velocity of the load. The shot retains its ballistic quality. The force of contraction or the pressure exerted by the barrel wall on the load is reduced, thus reducing the number of deformed pellets fired.

Without

• Improved shot pattern

The ballistic characteristics are improved and you achieve exceptionally uniform shots with many more effective pellets hitting the target.

• Reduced recoil

A reduction in recoil means improved shooting comfort. In a back-bored barrel, the load passes more easily reducing the amount of recoil felt by the shooter, thus improving his shooting comfort.

With

• Quick load switching

Magazine cut-off for quick load switching. When engaged, this device is able to block the cartridges in the magazine so as to only load the cartridge located in the chamber.

That Something that makes the difference

Very safe to use

It also has the advantage of enabling you to keep the breech of your fusion open with cartridges in the magazine by engaging the cut-off and ejecting the cartridge contained in the chamber. To quickly reload, release the cut-off and the breech will move forward to feed a new cartridge in the chamber.

1• Perfectly ergonomic

Stock: the more marked cheek piece and asymmetric pistol grip guarantee a gun of unmatched ergonomic quality.

2• Safe

Easy-to-reach transverse safety lever, reversible to suit left-handed shooters

3• Easy to maintain

A Trigger assembly removed simply by popping out two pins from the receiver for quick and easy cleaning of the mechanism.

4• Flowing lines

The narrower fore-end with a particularly well designed shape and magazine plug make this a flowing and extremely elegant gun.

5• Optimum aim

New sighting rib and optical fibre fore sight for an unequalled quality of shot. Set of 6 interchangeable optical fibre foresights provided.

EXCLUSIVE

The "Speed-loading" system allows you to load more quickly. With the breech in the rear-most position, simply slide a shell into the magazine and it is automatically sent to the chamber, ready to fire.

Fully adjustable stock
Quick and easy to adjust to your measurements thanks to the 6 inserts provided.

Other accessories provided:

1. Stock care oil
2. Trigger guard lock for increased safety
3. 50 mm barrel extension

Works perfectly with 24 to 57 g. cartridges.

An extra flat carry case allows you to easily carry all the accessories you need with you, and thus perfectly adapt the gun to all hunting conditions.

Fusion

SEMI-AUTOMATIC SHOTGUNS

Fusion Ultimate Cal 12 M

A superb deluxe version of the Fusion. Anthracite grey receiver, finely engraved and edged with 24

carat gold edging and a very attractive oil-rubbed walnut stock and fore-end.

Browning: the inventor of the semi-automatic shotgun

Fusion Ultimate Cal 20 Magnum

The Fusion 20 gauge also exists in a deluxe version, with a superb anthracite grey receiver edged in fine gold and a new engraving. The

oil-rubbed walnut stock and fore end contribute to the superior quality of this gun.

Fusion Cal 20 M

The Fusion range includes the Fusion 20M. In addition to the qualities of the 12 gauge, the Fusion 20M also provides lightness and ease of handling. The narrower receiver has been scaled to suit the gauge. The quality of the shot pattern is ensured by the 62 mm

long Invector Plus chokes. The 3" chambering of this gun allows it to fire all 20 bore cartridges, regardless of length or load.

Fusion Cal 12 M - Fusion Grade 3 Cal 12 M (p34)

The more marked cheek piece, the more pronounced pistol grip, the longer, narrower fore-end all make for exceptional handling. Its new shape and new sighting rib give it ideal balance. All the receivers are countersunk for mounting a scope. The very high quality European walnut has an oil-rubbed finish.

Accurately shoots all cartridges from 24 to 57g thanks to a regulating valve incorporated within the gas operated mechanism. Its new back bored barrel allows it to shoot all cartridges available on the market without exception, even steel shot cartridges. This 12M gauge shotgun weighs only 2.9 kg.

The new Grade 3 Fusion uses specially selected Turkish walnut with an oil finish, featuring superb chequering.

Browning has reinvented the Express Rifle

40

New battue strip which facilitates sight assembly.

CCS 525

Browning has been the leading producer of express under and over rifles for decades. With the introduction of the CCS 525 in the 525 range, Browning wanted to provide the demanding hunter with a gun that is attractive, while

at the same time guaranteeing flawless operation and unequalled accuracy, and that can be easily adjusted to accept the different types of cartridge available on the market.

New animal engraving - Alloy action frame with steel insert, a balance and robustness gauge

Browning has reinvented the Express Rifle

The barrels, the essential part of this gun, are both traditional and original. A spacer on the upper barrel ensures the accuracy of the vertical convergence of the barrels, while lateral convergence is ensured by the design of the barrel itself, which incorporates a unique "Cradle" strip. Once the ammunition has been chosen, a spacer ring is recommended and inserted securely under the foresight on the upper barrel, guaranteeing unequalled accuracy. (*). The weight and balance are perfect for current hunting conditions. The action frame has been strengthened by means of high strength stainless steel inserts. Very special attention has been

paid to every detail of this gun: a "hog's back" stock with a Bavarian cheek piece, an accentuated tulip-shaped forearm for greater elegance, a fluorescent optical fibre foresight and a traditional battue rib allowing a scope to be mounted by a gunsmith in minimum time. The animal engravings with which it is decorated make this a very special and unique rifle.

(*). It is essential that this operation is carried out by your gunsmith.

56 cm barrels equipped with an exclusive convergence system : Easy, reliable adjustment of your weapon's accuracy depending on the ammunition or the sight used.

In 1966, Browning launched the BAR (Browning Automatic Rifle) that was to quickly become THE market reference. In spite of severe but often ineffective, competitive, competition, the BAR became the leading

semi-automatic rifle in Europe.

In 2002, in close collaboration with Winchester, Browning developed the WSM (Winchester Short Magnum) calibres, combining the power and

the accuracy of classic "magnum" calibres with a smaller cartridge.

In 2003, Browning is launching the *ShortTrac*, the first semi-automatic rifle on the market to be developed specially for WSM calibres. The smaller dimensions of the WSM car-

tridges have made it possible to create a lightweight, compact gun that guarantees "Magnum" performance.

The *ShortTrac* incorporates all the experience of the BAR gained by our Research and Development departments

over a period of almost 40 years for your maximum satisfaction.

Bar Light Battue Luxe

This model has been produced to answer the demands of those who no longer wish to have to choose between functionality and looks. With its nickel-plated old silver receiver and its animal motif engravings embellished with fine

24 carat gold subjects, its wood made of oil-rubbed European walnut, the Bar Light Deluxe is truly an object of great beauty. It comes in an Opaline carry case that will certainly not disgrace it.

Bar Light

SEMI-AUTOMATIC RIFLES

48

Bar Light Battue Prima

The finish of the receiver, including a very beautiful engraving, the materials and the techniques used, the colour of the surface treatment, all contribute to make this gun a very successful combination of class and discretion. But the design also expresses itself in the technical performance : the hog's back stock with a very fine Bavarian cheek piece will work wonders when shooting through open sights and even more so when using a scope.

Bar Acier

SEMI-AUTOMATIC RIFLES

The best known semi-automatic rifle in the world

Bar Acier Battue

With its more compact barrel, its battue type rib and its fluorescent fore sight, this gun is exceptionally

effective and easy to handle in battue or stalking situations.

BAR BOSS "Affut" system

The addition of the Boss system produces two particularly interesting effects : reduced recoil (in the region of 30 to 50 %) and improved accuracy.

The performance of the BAR is thus improved when using a scope or firing long range shots.

BAR Acier Affût

This version is fitted with a vertically and horizontally adjustable rear sight The fine metal foresight ensures a perfect accuracy of aim.

Improved accuracy

The BOSS™ system allows the rifle to be quickly adjusted to the desired load. Each barrel equipped with the BOSS™ is marked with 10 incremental markings, and a table of average settings is supplied for each calibre.

Reduced recoil

The BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e. in the "peak" or the "valley" of the vibration wave when the muzzle is virtually motionless.

Dualis

REPEATING RIFLES

Underneath the fore-end is the key to the unique reliability, accuracy and good looks of the Dualis. No part is in contact with the barrel which is thus

Absolute speed

Particularly ergonomic release lever. Simply press to unload instantly

52

free floating. Its 2 dimensional movement is perfectly ergonomic.

New drop-down magazine. It's asymmetric design allows extremely quick and accurate pointing

Adjustable "Battue" type rib. Its truncated rib affords you a better view of the target. A fine white stripe perfectly guides your eye to the target.

Fibre optic front sight : New, increased brightness for more accurate and faster battue shooting.

DUALIS Battue

A perfect alternative to the semi-automatic
Totally different from normal pump-action rifles, the Dualis reloads in record time. The fore-end moves along 2 axis: you draw it towards you, and it moves backwards and downwards, forming a circular motion and nestling comfortably under the magazine.

No visible cams, a silent action and a superb, highly fluid line. This gun is extremely effective with its floating cold-hammered (FN Herstal made) barrel, its drop-down magazine and its modern optical fibre foresight.

Walnut "hog's back" stock. The Bavarian cheek piece adds to its already good looks.

Receiver drilled and tapped for scope mounting

Drop-down magazine for speed and ease of loading.

New cocking handle

54

The only bolt action rifle in the world to have its

Acera Elite

Deluxe version of the Acera with superb oil rubbed walnut and rosewood on the ends of the pistol grip and the forestock. The obturation plate is finely corked. Comes in an Opaline carry case. (Scope not supplied)

Acera Stutzen

Brand new Stutzen long forestock version with perfectly floating 51 cm barrel. With its superb lines, its lightness and ease of handling, you will be able to shoot shot after shot with exemplary accuracy. FN-Herstal cold hammered barrel. Comes in a black ABS carry case.

Acera

With the Acera, reloading simply involves a straight-pull action: a straight back-and-forth movement along the line of the gun is all that is required. But its other major advantage is that the bolt is completely enclosed in the receiver. There is therefore no risk of receiv-

ing the bolt in the eye: the hunter is thus able to keep the target in his sights while reloading. Available in calibre 270 win, 7X64, 7RM, 30.06 and 300 WM. Comes in a black ABS carry case.

Adjustable "Battue" type rib, truncated to afford you a better view. A fine white stripe perfectly guides your eye to the target.

breech block completely enclosed within the receiver

The seven lug rotating bolt engages directly into the barrel extension, making it particularly strong and reliable.

Fibre optic front sight : unequalled brightness, the quality of your shot depends on it.

Acera Affût

Designed more for walk-up or still hunting, this new version has a 58 cm barrel with the appropriate sights. Easy scope mounting thanks to the steel inserts on the breech box. Comes in a black ABS carry case.

Optasight	57
Optapoint	58
Optalens scopes	59
Optalens Initial scopes	60

Browning, the world's leading gun producer wanted to pass on the benefit of its experience of hunting and target shooting by developing the "Optalens" scope range. This range has been designed, down to its minutest details, to meet your highest standards. All Optalens scopes are guaranteed 30 years*.

* Except Optapoint and Optasight.

Optasight

Quick, accurate, perfect

Optasight

The Optasight is one of the very latest generation of sights based on the principle of a projected reticule. This revolutionary sight does not have its equal on the market: it incorporates a sensor that measures the ambient light level and adjusts the brightness of the reticule accordingly. The constant need to manually adjust the

brightness when passing from bright sunshine to shade is now a thing of the past. The Optasight provides a choice between four reticules, simply by operating a selector knob. It is equipped with a large window (22 x 28 mm), providing the perfect compromise between a wide field of vision, lightness and compactness. (Powered by a CR 2032 lithium battery) – Guaranteed 3 years.

Model	Optasight
Size (mm)	Long : 80 - l. : 36 - H. : 55
Weight (g)	112
Window	22 x 28
Magnification	1
Reticule	
Autonomy (H)	60-80

1• Multi-coat Anti-reflection and anti-scratch treatment.

2• Location of CR2032 battery

3• Vertical and sideways reticule adjustment

4• Quick, easy assembly.

5• Self regulating brightness sensor

6• Reticule brightness adjustment thumbwheels (choice of 7)

7• Reticule selector (choice of 4)

8• After adjustment on the target, firmly tighten this screw to avoid any ill-timed shifting of the reticule.

Scopes

Optalens Optapoint

This illuminated dot scope provides 1x magnification, which is ideal for quick firing. The brightness can be adjusted and the definition of the dot is always perfect (no edge iridescence). The 33 mm diameter tube gives a vast field of vision. This model comes with an adjustable polarising filter, a lithium/manganese battery and a mount that is compati-

Optapoint

The symbol of speed

ble with 16.5 mm wide rails. The Optapoint is guaranteed for 1 year.

Red Point

Optalens Model 1-4 x 24

Battue hunting requires the use of a scope having very specific optical qualities. The 1-4 x 24 scope (total length 263 mm), with its qualities of lightness and maneuverability, is the perfect answer. It combines a wide field of vision with a reticule No. 4 for rapid firing. The care taken in its manufacture and the multi-coat treatment of the lens ensures

Optalens 1-4 x 24

Ideal qualities for battue hunting

perfect brightness in even the most unfavourable conditions. Its one-piece alloy body also makes it particularly robust.

reticule 4

Optalens Model 1-4 x 26 MRE

For firing quickly on the hop from a path, in scrub land or in foggy conditions, an illuminated reticule is just the solution for a battue hunter.

Optalens 1-4 x 26 MRE

Perfect definition under all circumstances

The 1-4 x 26 scope offers a choice of 6 easily selectable reticules, simply by operating the selector. The adjustable brightness guarantees perfect definition under all circumstances. Particularly light, compact and

genuinely strong, this scope is the ideal companion for all your hunting trips.

reticules

Optalens 1,5-6 x 42 IS

For use in any weather, under all circumstances

Optalens Model 1,5-6 x 42 IS

The disconnectable illuminated reticule of the 1,5-6 x 42 IS is ideal for sighting the target when shooting in poor light (twilight) or where the shot requires to be fired extremely quickly. The red dot at the center of the very fine reticule No. 4, with its well defined edge, is combined with a brightness adjustment system to avoid excessive pupil dilation.

Model	Optapoint	1-4 x 24	1-4 x 26 MRE	1,5-6 x 42 IS
Magnification	1	1-4	1-4	1,5-6
Tube (mm)	33	30	30	30

Field of vision (in m at 100m)	-	28,5-8	25,4-8	21,1-5,2
Length	119	253	250	294

Each Optalens scope comes with protective lens caps

Each Optalens scope comes in a recyclable cardboard box.

reticule 4IS

Optalens 3-12 x 56

One of the best Stalking scopes

Optalens Model 3-12 x 56

Designed for still hunting, from a stand, the 3-12 x 56 scope provides maximum visual comfort. The very high quality multi-coat lens treatment makes this one of the very best scopes in the world where colour transmission and restitution of form are concerned. With twilight factors from 12.9 to 25.9, your scope remains perfectly useable, even under conditions of very poor or

low light. The reticle No. 14 (with an additional dot beneath the intersection) is ideal. The scope is assembled with meticulous care in a clean room and is filled with nitrogen to avoid all risk of fogging or sensitivity to variations in temperature.

reticule 14

Optalens 1,5-6 x 42

The universal

Optalens Model 1,5-6 x 42

A virtually universal scope, the 1.5-6 x 42 combines a short length (only 298 mm), a large magnification range (1.5 to 6 times) and a reticule 4. It thus consti-

tutes a high performance, extremely versatile scope. Like all Optalens scopes, its inside is filled with nitrogen to prevent fogging due to changing temperatures.

reticule 4

Optalens 3-9 x 40

For hunting in the mountains

Optalens Model 3-9 x 40

The combination of a large magnification range (from 3 to 9 times) and a lens diameter of 40 mm make this an ideal scope for use in the mountains, and more generally in all cases where the key advantage is a compro-

compensates for the trajectory of the projectile. The very high quality multi-coat treatment and the aperture diameter (which goes up to 13.3 mm) make this a very effective scope for selective shooting. It also ensures perfect colour rendition.

reticule 14

mise between weight and magnification. The reticule No. 14 is really perfect for long range shots. The little dot situated beneath the intersection of the cross hairs allows the point of impact to be determined, and thus

Optalens 3-12 x 56 IS

A must in poor light conditions

Optalens Model 3-12 x 56 IS

Perfectly adapted to still hunting, this illuminated reticule version of the 3-12 x 56 is at its best at twilight or in very bad light. The very fine red dot, with its very well defined edge, ensures unequalled efficiency. Its meticulous construction, its one-piece alloy housing (of total length not exceeding 377 mm) and

silent fine adjustment screws make this an extremely strong scope that is guaranteed for 30 years, like the whole of the OPTALENS range.

reticule 30/30

Each scope comes with a set of removable folding lens caps

 **GTS Cal 12M Grade 1**

This is the ideal model for both sporting clays and hunting. Its back-bored barrel, its 10 mm rib and its ability to shoot any type of cartridge (including steel shot) make it an incredibly efficient gun, without loss of comfort, for hunting waterfowl and migrating birds.

It has removable butt swivel rings, its stock is made from very attractive selected European walnut with an oil-rubbed finish.

 **GTS Cal 12M Elite**

With its superb engraving, this version of the GTS gains in distinction and elegance. The engraving is based on the distinctive GTS design (of a duck gradually being transformed by "morphing" into a clay), further enhanced with 24 carat gold and additional decora-

tive engraving, and superb oil-rubbed European walnut.

Ultra XS • XSH • XTR MIDAS

Removable Midas chokes, easily identified by means of the colour codes applied by anodizing. Removal and installation without need of a wrench. Unequalled ballistic performance.

1•Large sized bolt

Very large flat bolt. It bears on the under locking lug of the barrels with a bearing surface of 36 mm². Able to withstand forces several times those of the Liege test bench. Unequalled durability.

2•Positive, powerful ejection

Positive and powerful ejection ensured by a hammer mechanism. This mechanism provides unequalled durability compared to spring-operated ejectors which weaken over time.

3•Back-Bored barrel

Back bored barrel (exclusive Browning patented design). Gives all demanding shooters:

- reduced recoil;
- increased shot velocity;
- improved shot pattern;
- increased penetration.

(see page 34)

4•European walnut

Superb European walnut with an oil-rubbed finish.

5•Highly durable hinge pin

One-piece hinge bolt. Forces are distributed over a bearing surface 3 times greater than that of guns with trunnions.

Maximum resistance to wear.

6•Sport engraving

Very attractive sport theme engraving on grey action frame. Very striking gold edging.

7•Single selective trigger

Single adjustable selective trigger. Supplied with 3 different triggers. Quick and accurate, as its position can be adjusted to suit the size of your hand.

8•Perfectly ergonomic

Asymmetric grip for perfect handling.

*That
Something
that makes
the difference*

Discover: the new revolutionary adjustable stock of the Ultra X.

New adjustable cheek piece

Undo the single adjustable screw through the butt plate, move the cheek piece to the desired position and retighten the screw. You are now ready to fire.

Strong and elegant, this aluminum carry case is ideal for transporting your gun in all situations, even by plane. Its four latches ensure faultless reliability.

Ultra XT • XTR • XSH

OVER-AND-UNDER SHOTGUNS

Ultra XT

The Ultra XT (T for Trap) version is a gun of undoubtable efficiency. The adjustment range of its cheek piece allows it to be adapted to all angles of clay. The semi-beavertail

fore-end, the symmetrical grip and its extraordinary balance give it impeccable handling. Comes in an aluminum carry case.

Ultra XTR

This model is provided with a rubber cheek piece that is non-slip silky smooth to the touch. This gun allows millimeter accuracy of aim

with a level of comfort never before achieved. It is intended above all for very intensive use. Comes in an aluminum carry case.

Concentrated technology ...

Ultra XTR Midas Cal 12

This well known Trap model is now also available with keyless removable Midas chokes, giving it greater versatility for the different trap

disciplines (Olympic trap, Universal trap, double trap, etc.) and unequalled ballistic efficiency.

LONG CHOKE

 **Ultra XS Sporter Ported**

With its ported barrels, this gun is the very best there is in terms of efficiency, technology and comfort. By significantly reducing recoil and muzzle flip during

shooting, the gun allows a second shot to be fired more quickly and more accurately. Comes in an aluminum carry case.

MIDAS
LONG CHOKE

 **Ultra XS Sporter cal 20**

Equipped with Invector Plus chokes, a 10 mm sighting rib and a magnificent oil-rubbed wood finish, the Ultra XS 20 is the ideal gun for sports shooters.

INVECTOR+
LONG CHOKE

Ultra

OVER-AND-UNDER SHOTGUNS

Ultra Sporting/Sporter

In its Sporting (fixed chokes) or Sporter (with Invector Plus chokes) versions, this gun is intended for sporting clay or Compact Sporting. The Sporter comes with 4 Invector Plus chokes. The fore-end is tulip shaped. (Also available, in left-handed version)

INVECTOR+

Ultra Trap

This model aims above all to provide efficiency. Its finely polished 76 or 81 cm long barrels (30" or 32"), its streamlined, floating rib provide a particularly pleasing and

accurate sighting line. The trigger can be adjusted to 3 positions. (Also available, in left-handed version)

new

new

new

Following the introduction of the hunting B525 in 2003, the range is naturally being developed this year in the Sports shooting field. In fact, it is a complete range of B525 Sport which see the light of day with numerous versions which reveal major innovations:

- Another change, the trigger weights which have been re-worked to become both lighter and more accurate.
- The B525 Sport line is resolutely innovative with a specific re-filing of the action frame and the barrel wings. All the models are also fitted with lateral ventilated ribs which improve the weapon's handling in particular.

the new barrels are now chambered in 3" which allow steel shot to be fired, for the models fitted with adjustable, "Invector" type chokes. These same "Invector" are also new, as they are going to be made of "stainless steel" from now on, which makes them light and sturdy to improve patterns.

The woods benefit from an all new oil finish which is far brighter.

(*) Average values

This is without doubt one of our very favourite Browning products. With its exceptional, highly accurate and reliable design, this gun provides a vast range of possibilities of use.

Buck Mark Classic Target Rifle

This is the latest addition to the Buck Mark Rifle range. It has been designed to give the shooter the maximum possible accuracy through the use of a heavy large diameter Match type barrel. The laminated wooden stock and forearm give it a special and highly distinctive look.

Semi-auto .22

This much copied, never equalled rifle has been continually produced since 1924 and has something for everyone:

- operation in "blow-back" mode (unlocked breech operated by gas)
- automatic ejection, cocking and loading
- loading through the stock (the magazine tube is pulled to the rear and the cartridges are dropped one at a time into an opening in the stock)
- bottom ejection
- barrel take-down with wear adjustment

Pro 9

HAND GUNS

Pro 9

The Pro 9 handgun is the result of lengthy research aimed at developing a gun that precisely meets the needs of the market. This classic double action handgun (double action for first shot, single action for the others), which was jointly developed by FN Herstal and Browning, is not only a highly reliable gun but also a unique solution in terms of ergonomics, safety and modularity.

new

The firing mechanism is housed in an easily replaceable "firing box", for ease of servicing, both for yourself and your gunsmith. A medium-sized handgun, the handle can be adapted to suit the hand of each user

Safety has not been ignored. The Pro 9 handgun is equipped with the most modern systems:

- Firing pin safety to avoid the gun accidentally firing without first pulling the trigger.
 - A safety lever to make the gun safe and to deactivate the hammer with or without a cartridge in the chamber.
- Finally, it is fitted with a rail which is able to receive an extensive range of accessories, such as flash lights, laser designators, etc.

The expertise of FN Herstal and Browning in handgun design and the care taken in developing the Pro 9 have already made it a "Standard" of reliability, like its predecessor the celebrated HP. This gun incorporates highly sophisticated technological solutions:

The steel slide sits on a steel mechanical cradle, which is itself housed in a receiver made of synthetic material, thus combining strength, weight and balance.

GP • BDA

HAND GUNS

GP Vigilante adjustable

The latest standard version of the HP handgun incorporating new low profile sights.

GP Practical adjustable

The GP Practical has been developed to meet the stringent demands of "Practical Shooting". It includes numerous improvements, such as :

- Adjustable, low profile sights
- Particularly crisp trigger pull
- Ultra precise handling through the use of Pachmayr chequered rubber grips
- Hammer redesigned to avoid getting caught when drawing
- Increased weight and improved stability
- Ambidextrous (left/right) with retained magazine safety
- Larger magazine entry in the frame
- Ejectable magazine equipped with Pachmayr rubber buffer
- Particularly corrosion resistant finishes

GP MK III S

The GP MK III S combines all the qualities of the original HP with an ambidextrous safety and a weight (910 g) that makes it a safer and more accurate gun to handle. It is also fitted with Pachmayr grips for improved handling. A handsome gun with its blued and chrome finishes.

GP Silver Chrome

The GP also exists in a Silver Chrome version, equipped with an adjustable backsight that can be adjusted for both windage and elevation and a sport foresight with a rounded base. It is also fitted with Pachmayr grips to provide improved handling. A handsome gun with its blued and chrome finishes.

Browning BDA

The new BDA is an extremely reliable gun which is very robust and provides maximum safety. It incorporates the results of decades of experience gained with the famous HP pistol and includes numerous innovations, both in terms of the materials used and the design of certain parts.

The BDA offers the following features :

- Greater strength of parts
- Lower weight and increased compactness
- Improved extraction, ejection and feeding
- Automatic firing pin safety
- Fixed sights
- Reversible magazine stop
- New magazine
- Better grip.

Buck Mark

.22 HAND GUNS

Buck Mark Standard Nickel

Black rubber and bronzed steel combine to make this a particularly tough-looking pistol. The nickel plating on the slide and barrel provide increased protection. The grips provide sure handling. An extremely reliable and accurate pistol.

Buck Mark Standard

A cut above the rest, this is Browning's version of a basic pistol. It can easily compete with the best .22 calibre target shooting guns. Hundreds of HMSA winners are there to prove it. Its features include a thumb-operated magazine release, a 10-shot magazine, a bull barrel and "Pro-Target" sight.

Buck Mark Target 5.5 blued finish

Identical to the Buck Mark Target 5.5 Gold, but with the original Target blued finish.

Buck Mark Bullseye

According to the old adage, it's the shooter that counts, not the gun. But the shooter also knows that he wouldn't have been able to win without his gun. It is for this reason that many sports shooters have chosen the Browning Buck Mark Bullseye. Its accuracy and reliability make it the perfect choice for Compton shooting. It is very well balanced, and is available with a rosewood or a rubber grip.

Accurate, durable locking

of our break-open barrels thanks to a ball type design. Perfectly airtight. (Vectis 026, Vectis 032)

Adjustable vernier rearsite

Allowing adjustment of windage and elevation: Brownings' hall-mark attention to detail

Double interleaved spring compression system.

This unique design consists in having not one, but two springs in compression. With a coil pitch two times greater than that of the standard springs used by our competitors, our two springs are subject to less stress, slackening by less than 25%. They thus provide durable power that does not tail off with use.

Double-action lever

Vectis 220 : (50% spring compression forward, 50% back), that greatly simplifies cocking and requires less effort. 14 click non-return system.

Roma towel

100 % Cotton / Logo
dimensions : 30 x 50 cm

392251 - Black

Profile Electronic Ear Protection

- The electronic model features a low frequency "lift", which enables the shooter to hear more bass detail whilst at the same time the treble response is gently rolled off, eliminating distracting and unwanted high-pitch sounds
- When shooting, sound below the 75 dB safe level is heard normally
- As the gun is fired, this threshold is exceeded and the sound output is cut to zero but quickly returns back to normal.

With charger 220-230 V:

12648 - Black

Profile Passive Ear Protection

The passive Pro-tection offers many of the same design characteristics

- Noise attenuation is approximately 24 dB
- They may be comfortably worn with glasses, are lightweight and feature padded seals and a cushioned head-band

12644 - Black

Toe Rest

- You can use this accessory to let the barrels of your gun lie on the top of your shoes.
- Real leather 100%

Browning Special Care Products

Our gas-free pump-action system and the adherence of our low volatility oils, make the LEGIA SPRAY 25% more efficient than traditional gun oils.

- LEGIA SPRAY Standard (Red): cleaning oil for barrels and receivers: excellent for maintenance and protection.
- LEGIA SPRAY Stockcare (Green): the ideal product for protecting and maintaining precious woods. Nourishes and increases the impermeability of all "oil rubbed" finishes.
- LEGIA SPRAY Longlife (Grey): Low volatility oil. The oil film remains on the gun longer, making it the ideal product for use in extreme conditions (salty, damp, etc.)

Weapon-cleaning mat

The safe way to protect both firearms and furniture. The soft, felt-like fabric won't damage firearms and has a water-proof Zorb Tech™ backing. Zorb Tech stops spills from spreading and inhibits

the soak through of cleaners. The mat is also washable, dryable and highly stain resistant.

40,64 x 137,16 cm

12420 - Black

new

Barrel-cleaning kit

The Browning Barrel Weasel™ is a simple tool that thoroughly and effectively cleans your rifles and shotguns in about ten seconds. Bronze bristles, embedded in the nylon cord, loosen deposits while the cord itself wipes away deposits in a way cleaning patches can't equal. Constructed from durable nylon cord, the Barrel Weasel is washable and reusable for many years.

new

Dry wash

No water or towel necessary. Carry in the field for quick clean-up after dressing game or prior to the dinner bell. Quickly cleans. Simply apply soap and rub hands together. Goes on wet, dries within seconds. Dry wash™ flakes off along with dirt blood, etc. Remove almost anything from hands including oil, fuel, blood and fish odours. Anti bacterial and environmentally friendly.

Canvas case

- Canvas exterior accentuated by rich leather corners, thick leather handle and leather Browning logo.
- Fits barrel lengths from 66 cm - 81 cm
- Two brass combination lock keep your gun secure.
- Short nap wool interior

142510 - Olive

Travelling case

When travelling, a gun case must be able to stand up to large variations in temperature and humidity. That is why our Travel Vaults provide a perfect seal, so much so that a purge valve is provided to allow you to equalise internal pressure before opening.

whilst stocks last

1. A special inset O-ring completely seals out water, humidity, dirt and sand to totally protect your guns and equipment.

2. Because Travel Vaults seal 100% airtight when closed, it is necessary to have a purge valve in order to equalize internal pressure after you change altitude. Lesser cases don't need a purge valve because they don't seal 100% tight.

3. Travel Vaults seal so tightly they'll float, even when fully loaded with gear. This makes them ideal for transporting gear when rafting, canoeing, etc. Small models are great for keeping personal valuables safe and dry.

Water Hole™ Hydration Packs

- Days spent afield are often some of the longest and hardest days you'll experience, requiring plenty of water and gear to get through. Water Hole™ Day Packs address the needs of the hunter head-on. Made from durable saddle cloth, these low profile packs are designed to slip quickly and quietly through brush. Water Hole™ Days packs feature an integrated hydration reservoir which holds 64 ounces (2L) of water, enough to keep you hydrated and moving all day long. The flexible reservoir is made from a durable, three ply laminate that is able to withstand the effects of boiling, freezing and microwaving and does not impart a plastic taste to water. It is also removable for easy filling and cleaning. The unique Bite Me™ valve will not leak and allows convenient drinking quickly, quietly and hands-free. Fully adjustable, padded shoulder straps and waist belt keep the pack secure while external compression straps keep gear in place. A mesh back panel aids in moisture transfer to help keep you cool. Water Hole™ Hydration Bladder included, and also sold separately

Water Hole™ 1000

12910

Water Hole™ 2000

12911

Water Hole™ Fanny Pack

- Unique single shoulder strap for better support, stability and comfort • Shooting arm stray free • Hydration system with one litre bladder is specially designed for this pack • Bladder is extremely quiet • Quiet, waterproof saddle cloth in Mossy Oak® Break-up™ • Easy access to pockets for shells, calls and accessories when sitting in a tree stand or against a tree • Foam rollaway seat attaches to bottom of pack

Legia Phoenix

Legia Phoenix game cartridges

Browning is proud to present its Phoenix range of high quality hunting cartridges. Retaining the essential features that were so appreciated in the old Legia range, this new cartridge will give entire satisfaction for hunting all types of game. The Phoenix range of cartridges are available in the following weights: 34g, 36g Ni, 42g Ni and 53g Ni. All of the cartridges are provided with a 20mm nickel-plated head to avoid any risk of corrosion and thus ensure that your cartridges remain in perfect working order even after several seasons at the bottom of your cartridge bag. Because we are concerned for the environment, all of the cartridges in the Phoenix range are provided with a photodegradable wad which decomposes much faster than traditional Polyethylene ones.

Legia Phoenix Super 36g Ni

The ideal cartridge for "difficult" birds such as pigeon, duck and high flying pheasant, as well as for hare. Its 36g nickel-plated shot load ensures an exceptional shot pattern and high penetration.

Legia Phoenix Classic 34g

This 12/70mm cartridge loaded with 34 g of hardened lead offers an excellent compromise for hunting all types of game throughout the hunting season. Available in shot sizes 4-5-6-7-8

Legia Phoenix Semi-magnum 42g Ni

This 12/70 mm cartridge is capable of firing a 42g load of nickel-plated shot. It will satisfy the needs of all wild waterfowl hunters who shoot duck from a longer range. Only to be used in shotguns that have been double tested to 1300 bars.

Legia Phoenix Magnum 53g Ni

12/76 mm Magnum cartridge for firing from long-range or for hunting migratory birds such as duck and geese. Only to be used in Magnum shotguns.

Legia Phoenix Classic	12/70	20 Ni	34 g	photodegradable wad	4-5-6-7-8	10
