## Muzzleloaders: New Sidekick™

**Two slick Sidekick™ muzzleloaders are available:** the blued model features a case-hardened frame, a 24" or 26" (Magnum) barrel with deep-cut rifling for pinpoint accuracy, and a walnut-finished hardwood pistol-grip stock.

The stainless model features a matte nickel finish receiver, stainless steel 24" or 26" (Magnum) barrel with deep-cut rifling for pinpoint accuracy, and high-density, black matte polymer pistol grip stock.

The Sidekick™ design is based on a reconfigured version of the familiar H&R single-barrel break-open action. The new muzzleloader uses standard #209 shotshell primers held in place by a patented primer carrier. This rifle is extra easy to clean and corrosion-resistant. Both models feature adjustable fiber-optic open sights, a unique telescoping brass ramrod, swivel studs and a ventilated recoil pad, and are drilled and tapped for a scope base.

Drop at Heel	2 ⅛"	2 ⅛"
Weight	6 ½ lbs.	6 ½ lbs.

Unique telescoping brass ramrod (Both Models).

Both models come with a breech plug wrench and five primer carriers.

The primer is held in place by a special, patented, reusable primer carrier, which also serves as a visual indicator that the rifle is primed (Both Models).

# Huntsman<sup>®</sup> Muzzleloaders\*

**If there's anything better** than hunting season, it's a longer hunting season. And when you hunt with a muzzleloader, that's exactly what you get. Better still, when you hunt with New England Firearms' Huntsman<sup>®</sup>, you get the best of both the primitive and modern hunting experiences.

The proven NEF break-open action protects the primer from the weather and from loss. Our Transfer Bar System prevents accidental discharge. The Huntsman<sup>®</sup> uses standard 209 shotshell primers for sure, strong ignition every time. We've even improved what many consider the least enjoyable

feature of blackpowder hunting...the clean-up. The Huntsman's stainless-steel breech plug can be removed quickly with a special wrench (provided), so you can easily swab out the barrel from the breech end, or disassemble the barrel entirely for cleaning.

The standard Huntsman<sup>®</sup> features a blue-black metal finish with color case-hardened frame, and is equipped with a 24" barrel with deep-cut rifling for superb accuracy. Its walnut-finished hardwood stock is equipped with a ventilated recoil pad and swivel studs.

The Stainless Huntsman<sup>®</sup> is a .50 caliber muzzleloader featuring a stainless steel 24" barrel, matte nickel-finished receiver and high-density, black matte polymer pistol grip stock. Both models come with adjustable fiber-optic open sights, a breech plug wrench, patented primer carriers for fast repriming, and a unique telescoping brass ramrod.

The Huntsman<sup>®</sup> from New England Firearms offers you the power, accuracy and reliability you need for a successful hunt; and the pride that comes from making that one shot count. And it's all at a truly affordable, old-time price.

Stainless Huntsman<sup>®</sup> Muzzleloader

Huntsman<sup>®</sup> Muzzleloader

The primer is held in place by a special, patented, reusable primer carrier, which also serves as a visual indicator that the rifle is primed (Both Models).

Unique telescoping brass ramrod (Both Models).

\* Since Huntsman<sup>®</sup> muzzleloaders can be fitted with modern rifle and shotgun barrels, they are classified by the BATF as "firearms", and are subject to federal firearms regulations.

# Huntsman® Combos

**New England Firearms** has the versatile and economical solution to your all-season hunting needs. This trio of combo guns give you a choice of muzzleloading, centerfire rifle, shotgun or slug gun performance. All feature our rugged and field-proven single shot action, with lightning-fast side-lever opening. Our Transfer Bar System provides an enhanced measure of safety against accidental discharge, and each combo

gun includes its own special locking device for safe transport or storage. Why strain your budget on two guns, when one frame with a pair of barrels will serve you well?

## New Pardner® Pump

**For more than a century**, pump shotguns have proven their worth and gained the affection of the American sportsman. And the new NEF Pardner® Pump offers the best value you'll ever find in a 12-gauge pump shotgun.

We challenge you to compare the Pardner® Pump, feature for feature, with any of its higher-priced competitors. The Pardner® Pump has a steel receiver, double action bars, cross-bolt safety, easy take-down, 28" barrel with 3" chamber and ventilated rib, screw-in Modified Choke tube (Additional choke tubes – Winchester/Browning/Mossberg-type – can be purchased from a gun shop.), 5-shot tubular magazine with 2-shot plug furnished, an American walnut stock with ventilated recoil pad and a classic grooved fore-end.

The Pardner® Pump is backed by the same H&R 1871® one-year warranty protection as all our H&R and NEF branded firearms.

NEW Pardner® Pump

Simple, easy take-down.

- Classic Grooved Fore-end

Positive cross-bolt safety and convenient action release lever.

Screw-in choke tube and ventilated rib.

American walnut stock and ventilated recoil pad.

# Shotguns: Pardner®

## Pardner®

The NEF Pardner® carries on an honored tradition in American shotguns. For generations, just about every farmhouse in America kept a shotgun handy behind the kitchen door. It was strong medicine for pests and predators, protection when needed, and a useful tool for harvesting Nature's bounty when the larder ran low. Usually, that shotgun was a single shot break-open, and for very good reason. Such guns were rugged, reliable and inexpensive. And the single shot action encouraged careful shooting and ammo conservation.

We are proud of our history of making single shot shotguns that earn their keep without breaking the bank. We offer the Pardner® shotguns in 12, 16, 20 and 28 gauges, and .410 bore, and a variety of chokes, with color case-hardened finished receivers with walnut-finished hardwood stocks.

Our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up tight as a bank vault door. Our Transfer Bar System prevents accidental discharge, and each gun comes complete with its own special locking device for added safety in storage or in transport.

# Shotguns: Pardner® Turkey

**One shot. One turkey.** Any experienced hunter will tell you that the successful culmination of any turkey hunt depends on one — just one — well-placed shot.

We have many years of experience in making guns for those hunters who can make that one shot count. Our 10-gauge Turkey Gun is one good example. Its 24" barrel has a 3½" chamber, plus a screw-in extended extra-full choke tube to keep a super-tight pattern on your point of aim. The barrel is drilled and tapped for mounting a scope. The matte black or Mossy Oak® "Break-Up™" camo-finished hardwood stock incorporates a counterweight system to soften recoil.

New England Firearms offers you a wide range of turkey guns from which to choose. In addition to our 10-gauge models, we offer 12-gauge models

in Mossy Oak® "Break-Up™" camo or black, with fixed full choke or screw-in turkey choke, and a 20-gauge 22" youth model with Mossy Oak® "Break-Up™" camo-finished wood.

Our field-proven single shot action opens smoothly when you press the lever. Our Transfer Bar System prevents accidental discharge. And each gun comes complete with a special locking device for secure storage.

What you take into the woods can have a big impact on what you take out of the woods. For the ultimate satisfaction that comes from one-shot expertise, see your New England Firearms dealer and select that special gun that suits you and your budget best.

# Shotguns, Rifles: Tracker II, Survivor®

## Tracker II

In some areas, deer hunting is a “shotguns-only” proposition. Years ago, that might have been a handicap. Today, thanks to new projectile technology and a new breed of slug guns, the shotgun hunter can have a far-reaching advantage.

Our tack-driving single shot slug guns can cost less than an accessory slug barrel for your repeater. The Tracker II Slug Gun is available in both 12 and 20 gauge, with a 24" fully-rifled barrel designed for long-range accuracy with sabot-style slugs. The Tracker II features a walnut-finished hardwood stock, adjustable rifle-type sights, a recoil pad and sling swivel studs.

On all New England Firearms slug guns, our rugged, time-tested single shot action opens smoothly when you press the lever, and locks up tight as a bank vault door. Our Transfer Bar System prevents accidental discharge, and each gun comes complete with its own special locking device for added safety in storage or in transport.

Affordable New England Firearms slug guns offer you the power, accuracy and reliability you need for a successful hunt...and the pride that comes from making that one shot count.

Tracker II Slug Gun  
12 Gauge or 20 Gauge

Survivor®  
.410/45 Colt

Survivor®  
223 Rem. or 308 Win.  
Bull Barrel

.410/45 Colt model has a fully rifled barrel and screw-in choke for shotshell use.

308 Win. and 223 Rem. bull barrels are equipped with Weaver-type scope mount, and hammer extension.

Hidden compartment in high-density polymer stock holds survival necessities.

## Survivor®

Ready for service when the going gets rough, the NEF Survivor series provides the go-anywhere, do-everything versatility and rugged dependability you want. Take your pick of shotgun, rifle/shotgun combination, or heavy barrel rifle configurations to meet any challenge. A special stock compartment stores survival items. NEF Survivor models in the unique .410/45 Colt are available in either a blue finish or a high-durability electroless nickel finish for harsh environments. The heavy bull-barrel versions in 223 Rem. and 308 Win. are offered in low-profile matte blue. Our Transfer Bar System provides an added measure of safety. Standard shotguns incorporate a Modified Choke, while the .410/45 Colt model has a fully rifled barrel and screw-in choke for shotshell use.

## Specifications: All models are single shot, break-open action with side lever release, automatic ejection and transfer bar system.

## Rifles: Handi-Rifle™

**If meat on the table** were the sole object of the hunt, then a trip to the supermarket would suffice. We all know that there's much more involved. At its best, the hunt has always been the acid test of the hunter's skills. And the truly skilled hunter is the one who can confidently achieve his or her goal with one well-placed shot.

For generations, the single shot rifle has been the choice of the accomplished and self-assured hunter. And for years, New England Firearms has honored that choice. Our centerfire rifles are designed and built to make that one shot count. For the varmint or big game hunter, we offer many very attractive options. New England Firearms Handi-Rifles™ are available in a wide range of rifle calibers ranging from 22 Hornet to 45/70 Government, and in 44 Magnum. We're also offering the hot new 204 Ruger chambering.

# Rifles: Synthetic/Stainless/ Superlight Handi-Rifle™

## Synthetic Handi-Rifle™

For those who hunt regardless of the weather, today's cutting-edge high-density polymer stocks are a necessity. Synthetic stocks and fore-ends make these NEF Handi-Rifles™ the toughest, most weather-resistant ones ever built. Like all NEF rifles and shotguns, these high-durability, synthetic stock versions incorporate our Transfer Bar System. For added versatility, these models can be factory-fitted with your choice of accessory rifle and shotgun barrels. For information on accessory barrels, call our Service Department at (978) 630-8220.

## Stainless Handi-Rifles™

Spend more time outdoors! Five synthetic Handi-Rifles™ are available for worry-free all-weather hunting. All models feature matte-finish stainless steel 22" barrels, with scope mount rail and hammer extension. Receivers are matte nickel finished, and stocks and forends are black matte high-density polymer.

## Superlight Handi-Rifle™

When the going gets tough and the best game is deep into the forest or high on the mountain, every extra ounce you carry feels like a pound. That's the time when the Superlight Handi-Rifle is worth its weight (or lack of it) in gold. These super utility rifles weigh only 5½ pounds – even less in their Youth model configurations. Stocks and fore-ends are made of high-density black polymer, and are fitted with recoil pads and swivel studs. Fully adjustable rifle sights outfit the Youth model, which is also drilled and tapped for a scope base. The 223 Rem. and 243 Win. include a Monte Carlo style stock and factory mounted scope base, plus an offset hammer extension to ease cocking when a scope is mounted.

# Rifles: Sportster™/Versa Pack™

## Sportster™

Of all the calibers for which rifles are chambered, the 22 rimfire is America's favorite. Whether you're ventilating paper targets, popping tin cans, or hunting squirrels for a traditional Brunswick stew, the "double deuce" is the caliber of choice. Accurate and economical, it's been America's "fun caliber" since the 1880s.

We pride ourselves in making 22s that can provide generations of shooting enjoyment. Our Sportster™ rimfire rifle, in both 22 Long Rifle and 22 Win. Mag., features a precision-crowned 20" barrel, factory-mounted scope base and offset hammer extension. This single shot break-open rifle is finished in low-profile matte blue and features a weather-proof black matte high-density polymer Monte Carlo stock and fore-end with swivel studs. Our Youth version is available in both rimfire calibers. The Sportster™ includes a scope base as standard equipment, and we include an offset hammer extension for easy cocking when a scope is installed.

## Sportster™ 17 HMR

Here's strong medicine for varmints! The NEF Sportster™ 17 HMR is chambered for the hottest rimfire cartridge on earth. Hornady's 17 Magnum Rimfire is the same length as a 22 Win. Mag cartridge, but generates an amazing 2,500 fps muzzle velocity, at least 25% faster than the 22 Mag. It fires a high-performance 17-grain V-MAX boat-tail jacketed

bullet. The Sportster™ 17 HMR features our field-proven break-open, side-lever single shot action and a heavy 22" varmint barrel, complete with scope mount. The stock and fore-end are high density black polymer, with recoil pad and sling swivel studs.

## 22/410 Versa-Pack™

This is the handiest little field gun ever. It's a super, youth-size 22 rimfire rifle for plinking, informal target practice and pest control. The 20" barrel comes with adjustable rifle sights and is chambered for 22 Short, Long and Long Rifle. Swap barrels and, in an instant, it's a light and fast-handling .410 shotgun, a natural for small game. The 22/410 Versa-Pack™ is based on our field-proven single shot action with Transfer Bar System. Best of all, you get all this performance and versatility in one compact package, at a cost far less than two separate guns.

## Specifications: All models are single shot, break-open action with side lever release, automatic ejection and transfer bar system.

# New Sportster SL Self-loading 22 Rifle

An exciting new self-loading 22 with loads of features and a very economical price. Its side-ejecting receiver has a manual bolt hold-open and is grooved for a scope base. The 19-inch barrel is equipped with an adjustable open rear and ramp front sight. Its solid-locking clip magazine holds 10 Long Rifle cartridges.

And the Sportster SL's Monte Carlo stock is walnut-finished hardwood, with a hard rubber butt plate.

NEW Sportster SL

The Sportster SL's manual bolt hold-open allows the shooter to see into the action and to carry the rifle in the safe open position.

## Specifications:

# Shotguns: Topper®

## Topper® Deluxe

The Topper Deluxe is available in 12 gauge with a 3 1/2" chamber and a screw-in choke that can handle both lead and steel shot. Like the Topper, the Topper Deluxe features the trademark black and nickel finish, with black-finished hardwood stocks and fore-ends. It includes a ventilated recoil pad for greater shooting comfort.

## Topper®

At Harrington & Richardson, the Topper name has been associated with a long-lived line of rugged, reliable and affordable single shot shotguns, well-known to generations of shooters. We make it in 12, 16, 20 and 28 gauge, and .410 bore with a variety of chokes. It features automatic shell ejection for fast reloading, a brass bead front sight for fast target acquisition, a rugged nickel-plated frame, and a black-finished hardwood stock and fore-end.

## Topper® Junior

The Topper Junior is an ideal firearm for training the next generation of America's hunters. Its 22" barrel is scaled ideally for smaller-framed shooters, and it incorporates a recoil pad to make a youngster's first shooting experiences more comfortable and rewarding.

## Topper® Junior Classic

For that very special birthday or event, the Topper Junior Classic is a gift that any youngster will always remember. Like the Topper Junior, the Topper Junior Classic has a 22" barrel and is proportioned properly for a youthful shooter. This special model, however, features a blued frame, and a cut-checkered American black walnut stock and fore-end.

### For farmers, hunters

and folks who live off the beaten path, the single shot, break-open shotgun is basic equipment.

This versatile and inexpensive gun protects the henhouse, keeps meat on the table and provides that much-needed measure of security. For the young'uns, it is a good introduction to responsible firearms ownership... and the single shot action encourages careful shooting and ammo conservation.

### NEW Topper® Deluxe Classic

An upgraded version of the Topper is now available in 12 gauge with a ventilated rib and choke tube system (modified tube provided). The Topper Deluxe Classic features a 28" barrel with a bead front sight, and a nickel-plated receiver. The stock is genuine American Walnut with a ventilated recoil pad. The most handsome Topper ever!

## Shotguns: Ultra Slug Hunter/ Tamer®

### Ultra Slug Hunter

Thanks to new projectile technology and a new breed of slug guns, today's shotgun hunter can reach way out with impressive accuracy and striking power.

At Harrington & Richardson, we offer a range of tack-driving single shot slug guns that can cost less than an accessory slug barrel for your repeater. At the top of the list is our heavy 24" barrel, fully-rifled H&R Ultra Slug Hunter, in 12- or 20-gauge. We've shot extremely tight groups at 100 yards, using sabot slugs. The Ultra Slug Hunter comes complete with a Monte Carlo stock, recoil pad, factory-installed scope base, sling swivels and a nylon sling. A walnut-finished American hardwood stock is standard, and the Deluxe model comes with a checkered laminate stock and fore-end. A Youth Model is available with a rifled 20-gauge 22" barrel.

On all Harrington & Richardson slug guns, our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up tight as a bank vault door. Our Transfer Bar System prevents accidental discharge, and each gun comes complete with its own special locking device for added safety in storage or in transport.

### Tamer®

For those intrepid spirits who venture into uncharted regions and unpredictable climates, our weather-defying Tamer is a welcome companion. Here is a versatile, easy-to-handle shotgun with a high-density polymer stock and fore-end and matte-finish nickel receiver and barrel that can shrug off the worst that Mother Nature can hand out. The unique thumbhole/pistol grip assures you of a firm hold. The specially designed stock also enables you to store four rounds of .410 ammo. The Tamer includes all the H&R high performance features, including automatic shell ejection, our Transfer Bar System to prevent accidental firing, and a unique locking system for safe storage.

# Rifles: Ultra Varmint/ Hunter

**For the dedicated hunter,** the memories and pride of accomplishment are what endure. At its best, the hunt has always been the acid test of the hunter's skills. And the truly skilled hunter is the one who can confidently achieve his or her goal with one well-placed shot.

For generations, the single shot rifle has been the choice of the accomplished and self-assured hunter, the true heir to a noble tradition. And Harrington & Richardson has honored that choice. Our centerfire Ultra rifles are designed and built to make that one vital shot count. Our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up tight as a bank vault door. Our Transfer Bar System prevents accidental discharge, and for added safety in storage or in transport, each one of our guns comes complete with its own special locking device.

For the one-shot hunter, we offer a wide range of choices. H&R Ultra rifles are available in 223 Rem., 243 Win., 25-06 Rem., 308 Win., 30/06 Sprg. and 270 Win.; and in a heavy-barreled varmint configuration in 22 WMR, 223 Rem. and 243 Win.

# Rifles: Buffalo Classic and Target Models

**Tradition, history and American craftsmanship** combine to create today's Harrington and Richardson rifles, continuing a legacy that began in 1871. The Harrington and Richardson 45/70 Government Buffalo Classic® and the 38-55 Win. Target Model are true American classics to their very core. Modeled after the Frank Wesson tip-up rifles that were first made in Worcester, Massachusetts in the 1850s, these modern classics fill the need of the long-range Cowboy Action Shooter as well as those who simply enjoy shooting these great old cartridges.

Both the Buffalo Classic and the Target Model reflect true 19th century styling, including antique color case hardening on the frame and a crescent butt plate, plus cut checkering on their American black walnut stocks and fore-ends.

The Harrington & Richardson Buffalo Classic in 45/70 Government has carved out a highly competitive position in today's fast-growing sport of Cowboy Action Shooting. It features a mid-weight 32" barrel to extract all the velocity possible out of the venerable 45/70 cartridge. The 32" barrel length also provides the necessary sighting radius for long-range matches. It's equipped with a Williams receiver sight, and a Lyman target front sight with eight aperture inserts.

The Harrington & Richardson Target Model in 38-55 Win. follows a tradition of fine target offerings. The 38-55 cartridge traces its roots to the early 1880s, when it was developed for target shooting by the Ballard Rifle Company. The Target Model employs a 28" heavy target barrel and original style rifling for consistent accuracy. It has a Williams receiver sight, and a Lyman target front sight with eight aperture inserts.

# H&R® and NEF Sporting Firearms

## The Other Branch of the Marlin Family

In November of 2000, The Marlin Firearms Co. purchased the assets of H&R 1871, Inc.

Founded in 1871 (one year after Marlin), the original company started in a plant in Worcester, Massachusetts.

The company subsequently moved to Gardner, Massachusetts, and today employs over 200 people. Marketing

its products under the brand names of Harrington & Richardson® and New England Firearms®, H&R 1871® is the largest manufacturer of single shot shotguns and rifles in the world.

**Marlin®**  
America's Favorite Riflemaker

## NEF/H&R Barrel Accessory Program

New England Firearms® and Harrington & Richardson® offer a barrel accessory program that allows the purchase of additional barrels that may be added to firearms of our manufacture since 1987. Rifle frames may be fitted with additional rifle, shotgun, and muzzleloader barrels; and shotgun frames may be fitted with additional shotgun and muzzleloader barrels (only). All barrels must be factory fitted in Gardner. To learn more about this program, please visit our website at [www.hr1871.com](http://www.hr1871.com), or write to: H&R 1871, LLC, ATTN: Barrel Accessory Offer, 60 Industrial Rowe, Gardner, MA, 01440.

## Support Your Sport

**Hunting & Shooting Sports  
Heritage Fund.**

## NEF Dog Training/Starter Revolvers

Available in both 22 and 32 caliber blank, these American-made revolvers are rugged and reliable. Metal finish is matte blue, and a bright orange cap on the barrel is a reminder that the revolver is not a firearm. The grips are walnut-finished hardwood, and a blue lanyard ring is included for security.

The Bureau of Alcohol, Tobacco and Firearms has designated these revolvers "non-firearms," so they are not subject to any Federal firearms restrictions.

Both double-action revolvers feature our Transfer Bar System, virtually eliminating the possibility of an unintentional discharge.

## Specifications: NEF Dog Training/Starter Revolvers

Model	B22-002 and B32-002
Caliber	22 Cal. Blank, or 32 Cal. Blank
Capacity	22 Cal. - 9/32 Cal. - 5
Mechanism	Double action, heat-treated steel frame, ordnance-grade steel cylinder, hammer, and fire control mechanism
Grips	Walnut-finished American hardwood
Weight	24 oz.

## Congressional Sportsmen's Foundation

The Congressional Sportsmen's Foundation serves as American sportsmen's link to Congress, in order to ensure that current and future generations will have the right and opportunity to hunt, fish, and trap.

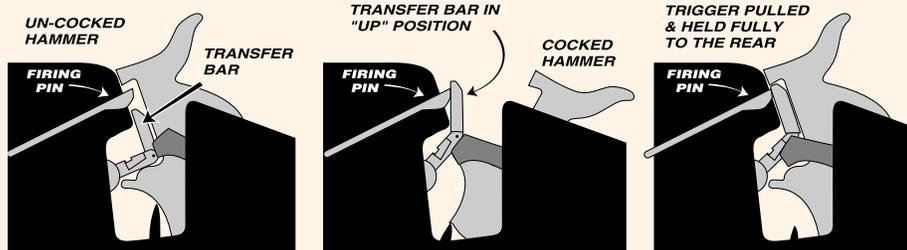

Governed by a Board of Directors comprised of industry and conservation leaders, the Congressional Sportsmen's Foundation educates Members of Congress, staff, and federal officials to better understand and represent their hunting, angling, and trapping constituents.

In this way, the CSF promotes legislation and policies favorable to conservation and responsible management of our nation's fish and wildlife resources.

To learn more about CSF activities and how to become a member, write: The Congressional Sportsmen's Foundation, 110 North Carolina Avenue, SE, Washington, DC 20003, Phone: (202) 543-6850, Fax: (202) 543-6853 or online: [www.sportsmenslink.org](http://www.sportsmenslink.org).

## Transfer Bar System

All NEF and H&R single shot firearms incorporate a special safety feature – a transfer bar system that prevents the gun from being fired unless the hammer is fully cocked and the trigger pulled and held completely to the rear.

With the Transfer Bar System, the hammer never strikes the firing pin directly. Instead, cocking the hammer raises the transfer bar, which is held in the "up" position only if the trigger is pulled and held fully to the rear. Only then can the energy of the hammer be transferred to the firing pin.

The transfer bar system prevents the type of accidental firing that might result from a blow to the hammer or from a dropped hammer during the cocking process.

We are committed to safety as well as to quality. The shooting sports have an enviable safety record among all leisure activities, and we applaud your efforts to maintain and improve that record. We urge all shooters to follow standard firearm safety practices and to participate in safety training.
