Wgt w/o mag:	19.75	14.8	25% Lighter

Preferred Choice of Undercover Armed Professionals

Don't be fooled by their size. The Kahr pistols boast the best size to caliber ratio in the business.

Unique Design

Six U.S. Patents cover Kahr's unique locking, firing, and extraction systems. The incomparable cocking cam trigger system employs a cam to both unlock the passive safety and complete cocking and releasing of the firing pin. The system provides a "safe cam action" and unbelievably smooth double action only trigger stroke, fast to fire in critical defensive situations.

Bite size
"BIG BITE"

These innovations, found only in the Kahr pistol, give the Kahr shooter an advantage in self defense, home protection and duty or off duty use.

Extensive Testing

Quality is never compromised in the making of the Kahr. The development of the Kahr handgun involved numerous testing sessions during which 10,000 rounds of ammunition were fired through a single Kahr pistol. Each Kahr model has been extensively tested to assure the reliability, function, accuracy and safety of each component and of the final product.

As a result, Kahr has produced the most reliable compact firearm in the world today. We, at Kahr, have total confidence in the durability and long-term reliability of our Kahr pistols.

The Final Product -

Big Gun Performance in a Small Gun Package

The Kahr design is original, creating the smallest package possible in three serious defensive calibers - 9mm, .40S&W and the new .45ACP.

The union of advanced design, quality materials and proper construction makes Kahr the smallest, thinnest, most reliable full power compact pistol.

Reliability. Unless the gun is 100% reliable, all else is meaningless. Kahr pistols have proven their reliability in testing by Federal, State and local agencies.

Size. Ergonomically, the Kahr compact pistol excels. The gun is easy to shoot well, and comfortable to carry for extended periods due to its thin profile.

Power. Despite their diminutive size, Kahr pistols deliver full size ballistic performance.

So, when it comes to protecting your life, choose **KAHR**.

While still thin and compact, the weight of the Kahr K series stainless steel pistols gives the shooter the feel of wielding a "real man's" gun. The weight adds to the shooting comfort as the gun's inertia absorbs the recoil. Kahr's diminutive size and ultra smooth double action trigger make it the ideal pistol for carry and shooting enjoyment.

Why did NYCPD choose the Kahr K9 as one of only 3 semi-autos approved for back up and off duty carry? The experts know. There is nothing quite like a Kahr.

The Kahr P45 has the combination of features which make it the best Concealed Carry 45 caliber pistol in the market. It has the ideal combination of stopping power and shooting comfort, and is smaller, slimmer and lighter than competitive brands. Its smooth double action trigger reduces flinch, improving shot placement, and is safer.

"The MK40 from Kahr is a breakthrough achievement because here for the first time is a true pocket pistol by almost any size definition you care to use, and it is also that most exclusive of defensive pistols - a true big bore."

- Frank W. James, HANDGUNS

Kahr's Premium Stainless Models - The Elite 2003

"In my opinion, this is the answer to a lot of peoples' requests. The PM9 is simple to operate and has adequate power. Most of all it is small enough to easily conceal and light enough to habitually be carried. There is nothing quite like the Kahr PM9, a pistol that I believe is the best pocket auto ever."

- Wiley Clapp, Combat Handguns
