

Olympic Arms Lifetime Warranty

Our goal at Olympic Arms is to lead the industry in customer service and satisfaction. For this reason, we are proud to offer the most comprehensive factory warranty of its kind. We will warranty all parts and products manufactured by Olympic Arms against any and all manufacturer's defects in materials and workmanship, which affect the satisfactory operation of the item being warranted. This warranty is non-transferable.

Beyond warranty, we guarantee complete customer satisfaction. If you are not completely satisfied with the purchase of any Olympic Arms product for any reason, simply return it to us within sixty (60) days for a replacement, credit, or refund of the original purchase price (to be decided by Olympic Arms). If you purchased your product directly from Olympic Arms, simply return the product with a copy of the original invoice to qualify. If your purchase was made through one of the thousands of Olympic Arms retailers / dealers, then they (the retailer / dealer) have the option to return the product to Olympic Arms for a replacement, credit, or refund as well. Olympic Arms does not dictate the in-store policies of all our retailers / dealers. Check with your retailer / dealer for their policy before purchasing.

The liability of Olympic Arms is limited to repair or replacement of only those parts determined by our expert staff to be defective on the part of the factory. The decision to repair or replace a warranted product will be made by Olympic Arms as necessary to provide the customer with a properly operating finished product. Olympic Arms assumes no liability for accidental or consequential damages. The following items are specifically *excluded* from coverage under this warranty:

- Normal wear of the protective finishes and of all metal or plastic parts.
- Damage or malfunction resulting from accident, negligence, misuse, or unauthorized repair or alteration.
- Damage or malfunction resulting from barrel obstructions.
- Damage or malfunction resulting from use of other than factory SAAMI specification brass cased new production ammunition.
- Damage resulting from the use of *ANY* imported, hand loaded, reloaded, or factory re-manufactured ammunition.
- Any finished products that are *NOT* assembled at the factory, or are assembled using imported or used parts. This includes completed rifle kits, pistol kits, upper receivers, lower receivers, barrel units / assemblies, etc.
- Any damage to Olympic Arms parts or components during assembly by an individual, organization, company, or entity other than Olympic Arms.

Open Letter From Olympic Arms:

In 1776 when this nation began its quest for freedom, the most important person in the village was not the mayor, or civic leaders. It was not the dry goods vendor or even the Parson. It was the blacksmith. And why? Because the blacksmith, with his ability to manufacture firearms, as well as fix and repair existing weapons, had the unique ability to allow a man to not only put food on the table, but also to defend himself, his family and his home from any aggressor be they four-legged beasts seeking to steal your livestock, or two-legged beasts seeking to steal your freedom and independence.

Olympic Arms functions in many ways the just as the blacksmith did over 200 years ago. It was the blacksmith, through first hand experience and dealing with actual customers who used his product, that was able to meet their every need through alternative design and product innovation. That's what we do best. Alternative design and product innovation have always been our specialties.

Being a true manufacturer, just in the same way as the blacksmith was 200 years ago, we can provide a product that is innovative, of high quality, and on the cutting edge of design and technology to meet our customers needs and desires. We have been doing this for almost 30 years now, and we continue to do it today.

This past year has been an exciting one. We continue to grow and expand. We have added 3 more new state-of-the-art CNC machine stations in 2003, and our growth just seems to keep going. Our product research and development department is headed by Corporate Vice President Brian Schuetz who also happens

to be my son. He is assisted by 20 year employee and Master Gunsmith Steve Houseman, and they have been kept busy to say the least. The short list of new products developed in 2003 included two more world firsts!

The first AR15 based rifles chambered in the new Winchester Super Short Magnum® cartridges are now shipping. The worlds first 30 Carbine Caliber AR15 is now out (which by the way was developed for a requirement of the Israeli Defense Forces). We continue to lead the industry in product upgrades and technology with things like Maxhard and Blak-Tac.

Rest was something that the local blacksmith didn't get much of. Always on demand when his help was needed, we have done the same for our military, our Special Forces Groups, as well as our nations civilians for 29 years and counting. As long as there's work to do, we won't rest either.

Robert C. Schuetz
President/CEO Olympic Arms, Inc.

Ordering Instructions

We take pride in our customer service team, which consists of the most courteous and knowledgeable staff in the industry. Our office and retail storefront are open Monday through Friday, from 7:00 a.m. until 4:30 p.m. Pacific Standard Time.

Phone (800) 228 - 3471 • Fax (360) 491 - 3447
www.olyarms.com For 24/7 Ordering

How To Order

A retail customer is any individual who is not an Federal Firearms Licensed (FFL) Dealer. All retail customer orders are accepted by telephone, mail, fax, or e-mail. Customers can also order certain items from our online store, please visit our website for more details. Orders must include: full name with shipping address (PO Box address are *NOT* accepted), day time and business phone and fax numbers if available, a method of payment arrangements, and a complete description of the products ordered to include item and/or stock numbers. Dealer orders will *NOT* be accepted under the name of anyone other than those people who are named on the FFL or those not designated by the Licensee. No exceptions to these policies will be made.

Shipping And Handling Fees

All shipping and handling fees are billed on a flat rate scale based on the total dollar amount of each invoice. Each separate box required for shipping, will be shipped via a separate shipping invoice. Shipping and handling charges are taxable to Washington State residents. The scale for determining shipping and handling charges are as follows:

\$0.01 - \$99.99	\$7.95
\$100.00 - \$499.99	\$14.95
\$500.00 - 999.99	\$20.00
\$1000.00 & Up	\$27.00
COD	\$6.25 Extra per invoice.

Methods Of Payment

We will accept COD, credit card, or pre-paid orders. All COD orders will be shipped on a certified-funds-only basis. To receive a 'COD Check OK' status, a bank reference must first be filed with the Olympic Arms accounting department. At the time of a bank reference filing all 'COD Check OK' account will be approved for future shipments pending approval by our accounting department.

The following major credit cards are accepted: American Express, Discover Card, Master Card, and VISA. Credit card accounts are not charged until the order is shipped. Pre-paid orders are accepted, however, orders paid by personal check or company check may be held until the funds clear the bank. This process could delay your order as much as ten to fourteen (10-14) days. All orders from within the state of Washington will be charged a seven-point-eight percent (7.8%) sales tax. Sales taxes for Washington state orders are waived if a Washington State Department of Revenue resale certifi-

cate is on file with our accounting department. The Olympic Arms accounting department does *NOT* offer 'open' accounts of any type.

Returns

All returns must be sent to:

Olympic Arms, Inc.
Att: Returns & Repairs
624 Old Pacific Hwy SE
Olympia, WA 98513

Please be sure that you include a personal and company name, a return address (again PO Boxes are not acceptable), a daytime phone number, a copy of the original invoice, as well as a letter detailing the reason for the return. All of these items must be included with a return to ensure prompt processing of an returned item.

No CLASS III returns or repairs can be accepted without prior notification and proper ATF transfer. All CLASS III items sent to Olympic Arms without advance notification and the proper ATF forms will be IMMEDIATELY returned to the sender.

Warranty Repair

All returns for warranty repair must be shipped to the address specified in the 'Returns' section. Determination as to whether the problem with the returned product is covered under warranty will be made after it is inspected by the expert technical staff of Olympic Arms.

Restocking Fee

All refused or returned shipments without prior authorization are subject to payment of all shipping charges incurred by Olympic Arms, as well as a fifteen percent (15%) restocking fee. Please be sure to call to determine if a RETURN AUTHORIZATION NUMBER is required before you return any product to us. Olympic Arms is bound by all federal laws applicable to the products we manufacture and sell, including the legal transfer of such weapons. Please contact our customer service staff during business hours for confirmation of procedures.

K4B

K4B Specifications:

- 7075 T6 Aluminum Forged Receiver Made By Olympic Arms
- Black Matte Anodized Receivers, Parkerized Steel Parts
- Gas Operated Semi-Automatic Action
- 5.56 NATO Caliber
- A2 Adjustable Rear Sight
- Elevation Adjustable Front Post Sight
- 20" Match Grade Button Rifled Barrel In 4140 Chromemoly Steel
- Long Life Non-Chromed Bore
- 1x9" Twist Rate
- Threaded Muzzle w/ Flash Suppressor
- Length: 39.5" Weight: 8.6 lbs.

K4B:
\$803⁰⁰
 MSRP

The K4B is the industry standard with a 4140 Chromemoly steel match-grade button rifled barrel. With an A2 upper receiver, A2 handguards, and an A2 stock, this is as close to the M16A2 in a civilian variation as you can find.

K4B-A3

The same great rifle as the K4B, but add a picatinny flat top upper receiver and a detachable carry handle standard. Get fundamental versatility for your K4B when you use the picatinny mounting system.

K4B-A3:
\$899⁰⁰
 MSRP

K4B-UR

The complete K4B upper receiver makes a great upgrade. Comes assembled with an A2 upper receiver, 20" match grade button rifled barrel in 4140 chromemoly steel, A2 handguards, A2 sights, threaded muzzle, flash suppressor, and bayonet lug.

K4B-UR:
\$449⁰⁰
 MSRP

Please see the Standardized Rifle Options page for a listing of some of the options you can add to this rifle.

Detachable carry handle shown included.

Plinker Plus 20

Plinker Plus 20 Specifications:

- All Features Of Plinker Plus, Longer Barrel
- 20" Match Grade Button Rifled Barrel In 4140 Chromemoly Steel
- Length: 39.5" Weight: 8.4 lbs.

The big twin to the Plinker Plus, this rifle is a throw-back with an A1 rear sight system. This modernized A1 rifle comes with an A2 lower receiver and all of the A2 features, except for the sights. The upper receiver is forged and the forward assist and brass deflector are built right in. Standard with a 20" heavy barrel, this rifle is ready for action. At a competitive price for the budget shooter, this is the least expensive 20" barrel AR on the market, but don't forget the Olympic Arms lifetime warranty.

PLINKER PLUS 20:

 MSRP

K7-A3:
\$985⁰⁰
 MSRP

When the eliminator style AR was introduced years back, the idea was to produce a 16" barrel with the sight radius of a 20" barrel with the benefits of both in a compact form. The first eliminator barrels made had very poor manufacturers were simply cutting gas ports. On these early barrels the proximity of the gas port to the muzzle created very poor reliability because the gas pressure required to be generated. At Olympic Arms we took the idea version.

applications because down the barrels without relocating the gas port to the muzzle created very poor operate an AR's systems was not being and made our own properly designed

At Olympic Arms rather than cutting down a 20" barrel, we created a new 16" barrel and contoured the 16" gas system same location it would have been on a 20" barrel. Looking at our design, we have a gas block separate from the front sight base. The front sight base is not part of the gas system, but still holds the handguards and the front sight assembly. This successful Olympic standard among industry leaders

to accept a standard front sight base in the Arms design has brought the Eliminator to a high in quality, reliable tactical AR systems.

The K7 Eliminator is available in the A3 style which adds a flat top upper receiver and detachable carry handle. Also, available is the K7 upper receiver as a fully assembled, headspaced, and test fired unit by itself.

- Add 24" Barrel In 4140 Chromemoly Steel
- WSSM .223, .243, or .25 Calibers

Take the K8 rifle and chamber it for the new Winchester® Super Short Magnum cartridges and you've got a K8-MAG. This rifle is a flat top target grade rifle available in the .223, .243, and .25 WSSM chambering. The K8-MAG launches a 55 grain .223 bullet at 3,950 FPS, and a 55 grain .243 bullet at 4,000 FPS. Hardly the standard AR rifle, the K8-MAG is outfitted with proprietary high pressure bolts, barrel extensions, bolt carriers, and modified upper receivers. While not standard, the upper receiver will still fit and function on any standard .223/5.56 caliber lower receiver without modification to the lower receiver. Long time Olympic Arms customers spend hundreds less for the K8-MAG compared to other .308 rifles. Or you can convert your .223 caliber AR into a *MAGNUM* by ordering just the upper receiver assembly.

Quickly building it's own reputation, the K16 is one of the best selling AR style rifles in the industry. This amazing little carbine comes with a free floated 16" button rifled barrel. See the Testimonial page for the two 10 shot 1/2" groups from our K16.

Both rifles are available as upper receiver units as well. Upper receiver units are completely assembled, headspaced, and test fired. K30-UR comes with magazine and mag catch insert.

K30 Carbine

K30 Specifications:

- Most Features Of K16 Carbine, Add:
- A2 Upper Receiver
- Collapsible Stock
- Threaded Muzzle, Flash Suppressor
- .30 M1 Carbine Caliber
- 1x12" Twist Rate
- Length: 39.5" Weight: 7.15 lbs.

 MSRP

K30-UR:
\$654⁰⁰
 MSRP

One of the latest caliber conversion units from Olympic Arms, the K30 Carbine uses standard unmodified 30 carbine magazines. If you order just the upper receiver to convert your AR you won't need to make any modifications to your lower except for the installation of our easy-to-install magazine catch. Complete rifles come with the magazine catch already installed. Some areas limit the use of .223 caliber ammunition for hunting, but our K30 system might allow you to legally take your AR with you for hunting.

Pistol Caliber Carbines

K9, K10, K40, K45

 - Includes 10 round converted Uzi magazine.
- Extra Magazines** \$65⁰⁰
- Same as included magazines per caliber listed above.

These handy pistol caliber carbines are Olympic Arms originals and are some of the best AR style pistol caliber carbines on the market. Designed with a straight blow-back system and our patented conical shaped bolt and chambering built into an unbelievably reliable rifle. Ammunition feeding and hollow point bullets are not a problem for this rifle. Our design has the mag well block adapter attached to the magazine body, so there is no need for mag well inserts. Everything adds to a positive and reliable rifle.

All pistol caliber carbine rifles are available as upper conversion units. Each upper conversion unit includes a completely assembled, headspaced, and test fired upper receiver and the proper magazine. Also available are picatinny flat top upper receivers for each version.

Glock® Lower Pistol Caliber Rifles

 MSRP

Introducing Olympic Arms pistol caliber rifles available with Glock® style lower receivers. The lowers accept full size or larger Glock® magazines, including the high-capacity 30 round mags. Configure your upper receiver with two caliber options and two barrel types. The receivers are made by Olympic Arms in the Glock® style.

Using a straight blow-back system, the bolt will lock back after the last round is fired. With our patented conical shaped bolt and chambering this rifle stands to be unbelievably reliable. Choose a caliber option of either 9mm or 40 S&W. Then choose the barrel type of either 11.5" with a permanently attached 5.5" flash suppressor or a straight 16" barrel. The lower receiver utilizes a standard magazine release button to release the Glock® magazine. *Please specify caliber and barrel version when ordering.*

Glock is a registered trademark of Glock, Inc.

Standard Rifle Options Listing

At Olympic Arms we offer more options and variations than any other AR style rifle manufacturer. To simplify ordering and pricing we offer the following consolidated list of available options. Please note that not all options listed will be available for each standard rifle offered. Also, this list does not contain every option available. For example a MIL4 style barrel cannot be fluted, nor are accessories for the FIRSH handguard listed. Shown on this page are the most popular options ordered and their prices in an easy to read form.

To ensure order accuracy and availability please call our Customer Service Team.

OA-98 AR Style Pistol

OA-98:
\$1,020⁰⁰
 MSRP

OA-98 Specifications:

- 7075 T6 Aluminum Forged Receivers Made By Olympic Arms
- Black Matte Anodized Receivers, Parkerized Steel Parts
- Gas Operated Semi-Automatic Action
- 5.56 NATO Caliber
- Picatinny Style Flat Top Upper Receiver
- 6.5" Barrel In 416 Stainless Steel
- Long Life Non-Chromed Bore
- 1x7" Twist Rate
- Crowned Muzzle
- Length: 14" **Weight: 49 ounces**

Member of the family of OA-93 pistol systems is the OA-98. Built to conform to the 10-Year-Weapons-Ban, this AR style pistol still has looks and fire-packed into a featherweight OA-98 pistol is shipped in a lon assault case. The case has

power system. Every black ballistic nyspace in external pouches for two 30 round magazines and secures with a heavy duty zipper. The 10-Year-Weapons-Ban may be gone, but the OA-98 is here to stay.

The OA-98 operates off of the OA-93 integrated recoil system and allows the elimination of the buttstock. Looking at the OA-98 you can see that we've taken weight off the pistol wherever it's not needed. A custom mesh handguard, a milled magazine well, and a machined handgrip, all to reduce the weight of this pistol system. The upper receiver is topped with an integrated charging handle and picatinny mounts for custom accessories. The photos also show a magazine stub partially inserted to help you visualize how this pistol's magazine well looks when loaded.

The OA-98 pistol and black nylon case are not shown to scale. The OA-98 pistol is not available as an upper conversion unit.

OA-93

OA-93 Specifications:

- 7075 T6 Aluminum Forged Receivers Made By Olympic Arms
- Black Matte Anodized Receivers, Parkerized Steel Parts
- Gas Operated Semi-Automatic Action
- 5.56 NATO Caliber
- Picatinny Flat Top Upper Receiver
- 6.5" Barrel In 416 Stainless Steel
- Long Life Non-Chromed Bore
- 1x7" Twist Rate
- Aluminum Free Floating Handguard
- Threaded Muzzle w/ Flash Suppressor
- No Buttstock!
- Length: 26.5" Weight: 5.8 lbs.

This is the foundation of the OA-93 family of weapons from Olympic Arms. The OA-93 AR style pistol is manufactured in such a way that no buttstock assembly is needed. This pistol is not a re-style, it was engineered to be the most effective, reliable AR style handgun available. Utilizing basic ideas from the AR style rifles, the lower receiver is of a familiar style. With the picatinny flat top upper receiver, the OA-93 is ready for your choice of CQB optics. The OA-93 is also available as an upper conversion unit to add to your existing AR style variant.

OA-93 Carbine

OA-93 Carbine Specifications:

- 7075 T6 Aluminum Forged Receivers Made By Olympic Arms
- Black Matte Anodized Receivers, Parkerized Steel Parts
- Gas Operated Semi-Automatic Action
- 5.56 NATO Caliber
- Picatinny Flat Top Upper Receiver
- 16" Barrel In 416 Stainless Steel
- Long Life Plus Non-Chromed Bore
- 1x9" Twist Rate
- Aluminum Free Floating Handguard
- Threaded Muzzle w/ Flash Suppressor
- Aluminum Side-folding Stock
- Length: 36.5" Weight: 7.6 lbs.

* Length is with stock not folded.

An AR style carbine rifle with a side-folding stock attached to a standard mil-spec, unmodified, AR style lower receiver. This rifle excels in overall versatility as well as parts interchangeability. Utilizing the OA-93 pistol system eliminates the need for a recoil buffer. The upper receiver has the charging handle integrated and is topped with a picatinny mounting system. The OA-93 carbine is also available as an upper receiver conversion system which you can add to your own AR style variant.

OA-93-CAR-KIT:

\$779⁰⁰
MSRP

OA-93 Carbine Conversion Kit

A complete conversion kit to add to your lower receiver. This kit features a 16" barrel with a threaded muzzle and flash suppressor. Also included is a side folding stock because the OA-93 operations system doesn't use a recoil buffer. The handguard is a tubular aluminum free floating handguard with a knurled sure grip in the center.

OA-93-CAR-UR:

\$659⁰⁰
MSRP

Optional OA sight system is shown in the photo, but is not standard.

OA-93PT Conversion Kit

A complete conversion kit to add to your lower receiver. The OA-93 Packable-Tactical conversion kit comes with a complete upper receiver, vertical pistol grip, detachable stock assembly, and detachable stock. The upper receiver features the OA-93 operations system requiring no recoil buffer. Also featured are a FIRSH handguard and a picatinny flat top. *This conversion kit is classified as a 10-Year-Weapons-Ban format system which has no threaded muzzle, no flash suppressor, and no bayonet lug. The OA-93PT-CK is ideal for New York and New Jersey residents as well as California law enforcement.*

OA-93PT-CK:

\$899⁰⁰
MSRP

Upper Receiver Units

Olympic Arms upper receiver units are available as complete kits or as stripped units. A complete upper receiver kit comes completely assembled with bolt carrier assembly and charging handle, is headspaced, and factory test fired. A stripped upper receiver unit does not include the bolt carrier assembly nor the charging handle, and is therefore not headspaced or test fired. When ordering stripped upper units it is understood that the purchaser assumes all responsibility with regards to proper headspace and function. Both versions of upper units, complete or stripped, come with the standard 60-day satisfaction guarantee and a lifetime warranty. *Whether or not it is shown in the photos, post sights have bayonet lugs. The 'S' designation signifies the receiver is stripped, and the 'C' designation signifies the receiver is complete. For example 'K1SA' is the stripped K1 Assembly.*

EACH

22+17 Solution Rifle Conversion Kit

At Olympic Arms we keep a watch on what our customers need. Over time we have seen the need for live fire training but at a lower cost. In response we now have a conversion system that allows the shooter to use .22 LR or .17 MK2 caliber ammunition in an AR style rifle.

Our kit is base around the upper receiver and will function with any standard mil-spec AR style lower receiver. The barrel is bored out to accept calibrated sleeves and a pistol caliber bolt carrier assembly. With our system you use a magazine insert in a standard mag to feed the ammunition to the receiver.

Other manufacturers offer a bolt assembly which will fire these types of pistol caliber ammo, but the compromise is in loss of accuracy. With the Olympic Arms 22+17 solution you maintain accuracy and the feel of real ammunition in an AR style rifle.

This solution was designed to allow the use of either ammo from the same upper receiver and lower receiver.

The 22+17 solution is available as a complete rifle, as an upper receiver system, or as individual parts. Switch between both the 22 LR and the 17 MK2 calibers simply by swapping out the sleeve in the receiver. AR shooters do not need to own two or three complete rifles to be able to use different calibers. If you already own an AR style rifle you have the option of our upper receiver solution with either or both pistol calibers to use with your current lower.

The sleeves can only be used with our 22+17 barrel and the bolt carrier assembly we provide, otherwise we cannot guarantee safety, reliability, or accuracy. Complete rifles and upper receivers include a magazine with a magazine insert.

22SR	Complete Rifle With 22LR Sleeve.....	\$756 ⁰⁰
17SR	Complete Rifle With 17MK2 Sleeve	\$756 ⁰⁰

22S	Sleeve 22LR As Separate Component.....	\$107 ⁰⁰
17S	Sleeve 17MK2 As Separate Component.....	\$107 ⁰⁰
MI	Magazine Insert: Will Be Available At Later Date	

Call our Customer Service Team for details on the 22+17 Rifle Solution.

Targets shot with .22 LR ammunition by Steve Houseman at the Olympic Arms underground shooting range. Three targets of five shots each grouped under .780 from 100 yards.

Barrel Kits

A complete barrel kit is exactly what a tired out AR needs. Also great for reconfiguring. All parts are for a complete re-barrel are included. These kits do not include receivers, but are available in a variety of lengths, contours and configurations. Products shown below are button rifled barrels only.

All barrel kits available with threaded muzzles, flash suppressors, and bayonet lugs; whether or not shown photographically. Unless otherwise specified, barrels will come threaded with an A1 "Birdcage" flash suppressor.

See the options page for items such as barrel fluting, FIRSH handguards, and picatinny gas blocks.

Standard Barrel Assembly Specifications:

- Barrel w/ 1x9" Twist Rate
- Complete Front Sight
- Barrel Nut
- Gas Tube Assembly
- Plastic Handguards w/ Delta Ring

Standard barrel kits come with bayonet lugs, threaded muzzles, and flash suppressors. They are also available in the 10-Year-Weapons-Ban format which has the bayonet lug removed and the muzzle crowned.

About Barrel Fluting

Fluted AR barrels are available in both the button rifled and broach cut (Stainless Ultramatch) styles.

All barrels are fluted with six grooves 1/4” wide each. This end-mill cut method increases surface area by 105% which increases cooling during periods of rapid fire. The fluting process not only reduces barrel weight by 12 to 14 ounces, it also increases rigidity by 20 to 25 percent.

⁽¹⁾ Does not apply to MIL4 or Eliminator barrels because they are stainless steel only. ⁽²⁾ Alternate twists are available for the 5.56 NATO chambering only and are only available in 1x7, 1x12, and 1x14 as subject to availability. ⁽³⁾ Any barrel ordered with custom shop options (Fluting, Custom Length, Contour, Thread) is subject to the Custom Shop Fee plus option fees. ⁽⁴⁾ Alternate calibers are not available in all configurations and are subject to availability. ⁽⁵⁾ The 5.56 NATO chambering is the default caliber for barrels.

AR Style Ultramatch Barrels

The Olympic Arms series of Ultramatch and Stainless Ultramatch (SUM) barrels are new production AR style barrels made from 416 Stainless Steel bar stock and broach cut to the GI specified National Match four lands and four grooves bore. Each barrel blank is double heat stress relieved and then air-gauged for consistency. Customers continue to let us know that our SUM barrels are the best AR barrels they have used. *Unless otherwise specified, all SUM barrels are delivered with a 1x10" twist rate and a black oxide coating.*

As standard, all non-bull barrels are shipped with bayonet lugs and threaded muzzles ready for a flash suppressor. However, all barrels are available in the **10-Year-Weapons-Ban format** which has the muzzle crowned and bayonet lug removed.

Standard Barrels:

Code	Description	Cost
SUM16	16" Ultramatch Barrel.....	\$229 ⁰⁰
SUM20	20" Ultramatch Barrel.....	\$239 ⁰⁰
SUM24	24" Ultramatch Barrel.....	\$272 ⁰⁰
SUM26	26" Ultramatch Barrel.....	\$308 ⁰⁰

Barrel Options:

Code	Description	Cost
AWB	Assault Weapons Ban Format.....	No Charge
1X8	Substitute 1x8" Twist Rate.....	No Charge
—	Custom Shop Fee ¹	\$60 ⁰⁰
F	Fluted Barrel.....	\$90 ⁰⁰

Read a testimonial to the Ultramatch barrels from one of our 10+ years Olympic Arms distributors, located on the Testimonial Page in the back of the catalog.

(*) Any barrel ordered with custom shop options (Fluting, Custom Length, Contour, Thread) is subject to the Custom Shop Fee plus option fees.

Picatinny Rail Gas Blocks

A great addition to both standard and bull barrels, these gas blocks are machined from solid aluminum extrusion. Cut with standard picatinny rails, they will accept all picatinny standard hardware including detachable A-Frame style front sight bases and globe sights. *Please specify the diameter when ordering; (.728") Standard or (.928") Bull diameters.*

F11 Detachable A2 Carry Handle. Includes rear sight assembly.

\$95⁰⁰

BJS National Match Interchangeable Aperture Sights.

\$59⁹⁵

T13 Scope Mount Base. This is a *see through* mount for A2 uppers. Inexpensive and functional, easy to install.

\$11⁰⁰

Detachable Sight Systems Olympic Arms quality detachable sights. Manual flip-up operations and made from billet aluminum and steel. All manufactured in the USA.

2ST Two Stage Trigger. A fine two stage trigger machined from carbon steel. For use in any mil-spec lower receiver.

SEPARATE - \$119⁰⁰

RIFLE UPGRADE - \$107⁰⁰

MASS **\$223⁰⁰** Detachable set, front and rear.

MARS **\$166⁰⁰**

Detachable multiple aperture rear sight.

T23 Charging Handle. Machined from 7075 T6 aluminum forging to military specifications. Assembled with latch and roll pin.

\$24⁰⁰

DFS **\$65⁰⁰**

Detachable front sight.

T23TL Charging Handle Tactical Latch. Made from aluminum, makes finding the charging handle quick and easy.

\$21⁹⁵

T22 Ejection Cover Assembly. Includes new cover, spring, hinge pin, hinge pin clip.

\$11⁰⁰

AR Parts

T24A Blak-Tac Bolt Carrier Assembly. Includes forward assist bolt carrier, gas key with two hex-head screws, cam pin, firing pin, retaining pin, a complete bolt. Comes assembled. Requires headspacing.

\$118⁰⁰

Flash Suppressors For standard thread muzzles. Will fit all standard threaded Olympic Arms barrels.

F2A Birdcage. Choose A1 or A2.

\$5⁹⁵

F2B Vortex. One of the best, and is supplied to the

\$53⁰⁰ military.

F2C Phantom.

Just as effective as the vortex, but stronger and no open-ended prongs.

\$39⁰⁰

F2MB Olympic Arms own 10-Year-Weapons-Ban muzzle brake. Made specifically for PCR rifles and attaches using four set screws.

\$30⁰⁰

T27 Lower Receiver Parts Set. Includes all the parts necessary to complete a stripped lower receiver. Does not include a buttstock. Available with pistol grip.

WITH GRIP - \$62⁰⁰

WITHOUT GRIP - \$56⁰⁰

T21 Round Forward Assist Assembly. Complete with springs and pins.

\$16⁰⁰

T26 Complete Bolt. Chrome bolt not available as a separate component. Manufactured to mil-spec.

\$52⁰⁰

Pistol Grip Assembly Includes a new pistol grip, set screw, and a washer. Choose from the three styles listed. See the Ergo® brand accessories page for more pistol grips.

F3A **\$10⁰⁰** A2 style stowaway grip assembly.

F3B **\$8⁰⁰** A2 style non-stowaway grip assembly.

F3E **\$25⁰⁰** Ergo® brand ergonomic pistol grip.

H8 Front Conversion Pin. This is the conversion pin needed when using GI spec upper receivers with Colt® manufactured lower receivers.

\$7⁰⁰

H15 Anti-Walk Pins. Often used on full automatic rifles, but also great for older or worn out lower receivers. These headed pins are captured with a C-clip on one end. When installed they prevent the walk-out of both the hammer and trigger pins.

\$7⁰⁰

H11 AR Field Kit. This package includes a hammer and spring, firing pin and retaining pin, extractor and spring, disconnecter and spring, buffer detent and spring, two gas tube roll pins, a set of three gas rings.

\$38⁰⁰

This handy kit will fit inside stowaway pistol grips.

AR Parts

M4S MIL4 Style Handguards. Made from a polymer with single black heat shield liners. A popular upgrade for any carbine to give it that current military MIL4 look.

\$22⁰⁰

Harris Bi-Pods *Official bi-pod of Olympic Arms.*

Harris Bi-Pods mount to our match handguard through a standard bi-pod stud, standard plastic handguards and a Harris universal bi-pod adapter, or the Olympic Arms FIRSH handguard system with an Olympic Arms BPM. It also provides a built in bench rest for superior handling and accuracy in almost any situation. Legs are spring loaded to swing up and out of the way and are adjustable for height and angle. The S-Series Harris Bi-Pod articulates and swivels at the mounting base allowing for leveling of your rifle on an uneven surface.

HBP-1 Bi-Pod - **66⁰⁰**

HBP-S S-Series Bi-Pod - **91⁰⁰**

GF-C	1001-5000 Pieces ..	\$0 ⁹⁹ per piece

GF10 Green Follower Retail 10 Pack. Ten green followers vacuum packed in lots of ten.

\$13⁵⁰

AR Parts ESpring® Technology

New spring technology has been used at Olympic Arms for several years now. This new ESpring® technology combines the latest in engineering expertise and metallurgy. New metal alloys are available which allow results not even imaginable a decade ago. These new ESpring items may be more expensive than you may be accustomed to, but guarantee they will get the job done and not wear out like standard springs.

AR11B ERing Gas Ring. Another ESpring® technology. This one-piece gas ring is made from a proprietary material that will withstand the most torturous conditions. The ERing's single piece construction prevents gas ring alignment (which leads to gas leakage). This ring will make any AR15/M16 more reliable.

\$7²⁰

AR42C Universal Compression Washer. This compression washer replaces the need for the expensive and sometimes hard to use peel washers for installing flash suppressors or muzzle brakes which require indexing. Use this compression washer with any flash suppressor or muzzle brake. Simply thread the unit on, align as needed, and you're done. *Reusable multiple times even after being torqued on!*

\$3⁰⁰ - EACH

\$32⁰⁰ - DOZEN Pcs.

HTU High Tech Upgrade Kit. This bag of small parts will make a significant improvement to any AR's reliability through ESpring® technology. Kit includes one universal compression washer, two ESpring's, two ERings, and five EXrings.

\$30⁰⁰

EXRING EXring Polymer Extractor Assist. A vast improvement over similar products, the EXring is 'x' shaped in the cross-section. This design gives added strength to the extractor as is needed in many AR style rifles. If your AR is having extraction problems, try out the EXring, it may be the solution.

Shown here is the EXring installed over an extractor spring.

\$1⁵⁰ - EACH

\$24⁰⁰ - 25 Pcs.

ESEJ Made from ESpring® proprietary metal alloy material, this ejector spring is absolutely the best available. Tested by the military under severe and stressed situations. Even after 9,000 rounds of sustained full automatic fire this ejector spring didn't fail.

\$5⁰⁰ - EACH

\$54⁰⁰ - DOZEN Pcs.

.22 Conversion Kit For .223 Caliber Rifles

RFA .22 Rimfire Adapter. Though not as accurate as our 22+17 Solution system this conversion kit quickly lets you change your rifle's caliber from .223 to a .22. The bolt carrier assembly installs quickly into your rifle and works with all standard mil-spec AR parts. The ammunition is fed from a standard magazine through a magazine adapter. The magazine adapter inserts into a standard magazine and can hold ten rounds.

Extra magazine inserts may be available, please call our Customer Service Team for details.

PLEASE CALL FOR PRICES AND AVAILABILITY

Aluminum Free Floating Handguards

Match style in a tubular design removes pressure on the barrel. The handguard threads onto an included barrel nut for simple installation. All lengths are made from aluminum extrusion and are knurled in the center for a sure grip.

Aluminum Free Floating Handguard shown installed on an Olympic Arms ML-2 Multimatch rifle with a flat top upper receiver, bull barrel, and a picatinny gas block.

Each aluminum free floating handguard includes a new barrel nut for installation.

Code	Description	Cost
F7A	Fits 20" Barrels And H-Bar Rifles.....	\$52 ⁰⁰
F8A	Fits 16" Barrels And Carbines.....	\$42 ⁰⁰
F23A	Fits Pistol ARs and SBRs	\$36 ⁰⁰

F23A Super short length handguard. Design to fit 6.5" barrels and still knurled in the center. Same handguard is fitted on the Olympic Arms OA-93 AR pistol.

F8A A carbine length handguard, but still free floating over the barrel.

F7A Standard match length for target rifles. Best fits 20" barrels.

FIRSH Handguard Accessories

SR1 Scope Rings. Some of the best and most versatile scope mounts on the market. They mount to any picatinny standard system, including our flat top uppers and the FIRSH handguard. Made from billet aluminum with quick lock screws and 1" inserts.

\$47⁹⁵

SR2 Scope Rings. A new offering from Olympic Arms. These sleek mounts are very similar to the SR1 mounts but trimmed down and lightweight.

\$21⁵⁵

F11 Detachable Carry Handle. Match grade rear sight, can be used on any picatinny standard upper receiver or rail. It is often mounted directly to the FIRSH and used as a scout type of sight.

\$95⁰⁰

BPM Bi-Pod Mount. Machined from solid aluminum extrusion. Attaches to picatinny rails using two set screws and can be used as either a bi-pod mount or as a side sling mount.

\$22⁰⁰

BPM-S Side Sling Adapter. Machined from solid aluminum extrusion, and suitable for use in mounting side sling adapters.

\$20⁰⁰

VPG Vertical Pistol Grip. Machined from billet aluminum and secures with a serrated lock nut. Mounts to all picatinny standard rails, but designed for best use with the FIRSH system. This tactical grip is ergonomically contoured and ribbed for a positive feel. Also available with a foam covered grip for a comfortable and positive hold.

\$41⁵⁰

VPG-F Foam Hold VPG - \$47⁰⁰

FIRSH Handguards

Free Floating Integral Rail System Handguard

FIRSH Specifications:

- Aluminum Extrusion
- Single Piece Tubular Design
- Picatinny Standard Rails
- Four Rails On All Four Sides

Starting with an aluminum extrusion, the FIRSH handguards derive a portion of their name from the fact that the rails are *integral* to

the handguard tube itself. The rails are not attached to the tube, they are a physical part of the tube from the start which adds overall strength to the rail. No longer is interference from bolts or screws an issue. The FIRSH attaches using a threaded barrel nut and can be positively locked in any rotated position desired.

Code	Description	Cost
F23R	Fits AR Pistols and SBR's.....	\$78 ⁰⁰
F8R	16" Barrels and Standard Carbines	\$99 ⁰⁰
F85R	Mid-length Barreled Carbines	\$124 ⁰⁰
F7R	20" Barrels and H-Bar Rifles	\$129 ⁰⁰
F8LCR	Fully Covers 16" Barrels.....	\$155 ⁰⁰

FIRSH Gen-II

F8R-GII This FIRSH system was designed for rifles which have flash suppressors permanently attached to the barrel. This is a four piece system which installs directly over the delta ring assembly.

Each FIRSH free floating handguard includes a new barrel nut for installation.

The FIRSH handguard installs easily with a barrel wrench and a few other standard tools.

Ergo® Brand Accessories

F10 Tactical Pistol Grip Assembly. Features a solid plastic core coated with a soft stippled rubber surface. The adjustable palm shelf is standard and comes complete with hex head pistol grip screw.

\$53⁰⁰

F3E AR Pistol Grip. Ergonomically designed to improve hold and comfort for the shooter. Available for the left hand, right hand, and ambidextrous rifle owners. Also available in a rubber coated sure grip. *Please specify left, right, or ambi when ordering*

\$25⁰⁰

F3ESG Sure Grip - **\$30⁰⁰**

AC5 The “Gapper” Rubber Trigger Guard Plunger. An inventive product that fills the annoying space between the back of the trigger guard and the front of your pistol grip. Installs easily and reduces contact with the lower receiver.

\$3⁹⁵ EACH

ACRKS Accessory Rail Kit. Attaches to standard military style handguards. This kit will give your standard handguards a picatinny rail for mounting all sorts of accessories, including our FIRSH accessories. The rails can be cut down to the length you need.

\$13⁰⁰

AC2 Rail Panel Covers. This covers are pliable, yet rugged and fit any standard picatinny rail system. The panels are made from vulcanized rubber and work especially well on the FIRSH handguard system from Olympic Arms. Multiple colors available include: black, olive drab (OD) green, and new coyote brown. The rail panels come in three different sizes and two different styles. The sizes are: single panel, double panel, and triple panel as shown below. The two different styles are solid and vented as shown below. *Please specify color when ordering. Save more, buy a dozen.*

AC2 panels shown on a FIRSH handguard with a vertical pistol grip.

AC2L vented panels shown on a FIRSH handguard with a vertical pistol grip.

Code	Description	Cost
AC2	Single Panel Solid	\$3 ⁰⁰
AC2D	Single Panel Solid Dozen Pieces.....	\$32 ⁰⁰
AC2-2P	Double Panel Solid.....	\$6 ⁰⁰

Pneumatic Recoil Buffer

AC4 Pneumatic Adjustable Recoil Buffer. *Tried, tested, and proven!* Born out of military test, this recoil buffer completely eliminates the need for the standard recoil spring and buffer found in all AR15/M16 style rifles. The AC4 is adjustable so that one model can now be utilized on .223, 5.56 NATO, pistol caliber, and a number of alternative rifle cartridges.

This air-charged buffer has been tested from -60°F to +140°F and worked without problems.

Because it is air charged, there are no messy leaks that are commonly found in similar hydraulic products which have historically proven to fail. More than improving feeding, extracting, and ejecting, this pneumatic buffer has been shown to reduce the cyclic rate of a military M4 carbine from approximately 620rpm down to 460rpm.

The AC4 pneumatic recoil buffer is also great for CMP and hi-power rifles as it reduces recoil and muzzle climb giving increased reliability during matches. With the adjustability for suiting your individual needs via the hex head screw on the face of the buffer. Installation is simple: remove your current GI or other antiquated buffer system and insert the AC4 in it's place. No tools needed for installation!

**AC4: PLEASE CALL
MSRP**

Because of impending production improvements the new lower price for 2005 was not available at the time this version of the catalog was made. Please call our Customer Service Team for details.

Tri-Pod Grip

TPG Tri-Pod Grip. One the most versatile and exciting new accessories released by Olympic Arms. This handy and effective item has two main uses. With the legs extended out it becomes a tri-pod for anything from rifles to cameras. Retract the legs into the shaft and the TPG becomes a grip for whatever it is attached to.

Features include three retractable legs, steel ball joint for strength, all aluminum body, fully adjustable for pan, tilt, and swivel with one lock, adjustable tension with one lock, knurled collar for positive locking, comfortable foam rubber grip, standard 1/4-20 threads, and a picatinny mount on request at no additional cost.

The legs are held inside the grip by a small magnet. To extend the legs, point the TPG with the legs facing down and snap the grip down. The magnet will release and the legs will extend. To retract the legs, simply push them up into the grip until the magnet grabs a hold.

When ordering specify the short or long model and your choice of the BPM Bi-pod Mount, or the SSM Side Sling Mount. *If no mount is specified, no mount will be shipped, and no discount will be given.*

Prop Guns & Pro Training Aids

Prop Guns In today's firearms market there is a large trend toward training and security. There is also a growing need in Hollywood for movie prop guns. Olympic Arms has been supplying true firing weapons, blank firing weapons, and movie prop guns for many years now. Some of our rifles and pistols have been in big-screen movies such as *Clear and Present Danger*, *Eraser*, *Batman Returns*, *Bad Boys*, *The Professional*, *The Rock*, and more. The studios that rent and purchase our firearms routinely comment on the unique quality, ruggedness, and believability of our movie prop guns. Even the largest Hollywood prop rental house, Independent Studio Services, prefers Olympic Arms prop guns over other manufacturers. Rifle accessory manufacturers such as *Blackhawk Industries*, *Quake Industries*, *Falcon Industries*, and *Laser Devices* use our prop guns in their own catalogs to showcase the fantastic accessories they make.

These three rifles are example of prop guns recent sent to Blackhawk Industries.

All prop guns are **non-firing** museum quality replicas. They are non-guns and do not require an FFL for purchase or transfer. Because of large demand for standard prop-guns most are not listed in our catalog. Also, because the guns are non-firing, they can be built with almost any imaginable option and configuration. Please call our Customer Service Team for details.

Code	Description	Cost
CAR15-PROP	Standard Carbine.....	\$474 ⁰⁰
M16A2-PROP	Standard M16A2 Replica...	\$510 ⁰⁰
M16M4-A3-PROP	M16 M4 Flat Top	\$714 ⁰⁰

Call our Customer Service Team for a quote based on your specific needs. We can add almost any option to a prop gun!

AR-CUT AR Training Aid. Nothing is more effective in training than a full cut-away view of a functioning firearm training aid. Fully visible fire control components and bolt/chamber area make this an excellent training tool for any agency or department. *Cut-away, fully functional, requires an FFL.*

AR-CUT:
\$1,320⁰⁰
MSRP

T3-CUT Fire Control Training Aid. The T3-Cut is a training aid cut-away non-gun lower receiver forging. It is milled to accept the fire control components for training with regards to the hammer, disconnecter, trigger, engagement, and for fitting custom trigger components. *No FFL required.*

The mag well is solid, and the takedown pin holes have not been drilled. The rear are for a receiver tube is solid.

T3-CUT:
\$107⁰⁰
MSRP

1911-CUT As detailed, functional, and beautiful as the AR-Cut, this training aid is the absolute best way to teach the 1911 handgun. Great for teaching beginners and pros alike. *Fully functional. This is a Series 70 1911 pistol.*

1911-CUT:
\$1,194⁰⁰
MSRP

Owner's Manuals For AR15® M16® Style Rifles

MAN-1 The Olympic Arms official AR/PCR owner's manual. This is the same manual that ships with each and every rifle that Olympic Arms manufactures.

\$4⁰⁰

MAN-2 The Olympic Arms official owners's manual for pistol caliber upper receiver conversions. This is a brief manual which covers the basics for operating, maintaining, and cleaning Olympic Arms pistol caliber units.

\$3⁰⁰

MAN-3 This manual contains all the original OA-93 information, including exploded parts views with parts numbers, descriptions. This is the same manual that ships with OA-93 upper receivers and OA-98 pistols.

\$5⁰⁰

H7 Marine Corp Manual. A reprint copy of the United States Marine Corp Technical manual. Covers everything from complete disassembly and reassembly to torque specifications and beyond. We recommend that all serious AR owners have this manual.

\$9⁰⁰

TM-220 A combo Army and Air Force manual. This handbook as with all military manuals is very detailed. Covers only the M16A2 standard issue rifle.

\$12⁰⁰

TM-225 A composite of the Army TM 9-1005-319-23&P and the Air Force TO 11 W3-5-5-42 books. This is a comprehensive manual for both the M16A2 and the M16A4 Carbine rifles.

\$15⁰⁰

Airsoft CAR-97M4

Used by gamers, and purchased by collectors for years. Airsoft products have made their own place in the firearms industry and sales of Airsoft products tripled since 2000. A partnering between Team SD and Olympic Arms brought about an Airsoft version of our K3B-MIL4. It looks and functions like many other Airsoft products and check out our standard features:

- All metal construction. No plastic substitutions.
- Two piece gear box construction.
- Removable gear box, just like a real AR style bolt carrier assembly.
- Select fire with full automatic electronic firing.
- 5-Position collapsible stock.
- Picatinny flat top with detachable carry handle.
- Licensed Olympic Arms logo.
- High capacity 400+ round magazines.

Battery packs and charging systems sold separately. No FFL required. Must be at least 18 years of age to purchase.

Code	Description	Cost

Cleaning & Lubricating Products

Firepower FP-10 *We just cannot say enough good things about this product.* It has a military stock number (NSN 6850-01-408-4531) and performed better than all other issued lubricants in recent conflicts in the middle east. FP-10 meets all EPA standards which some well known similar products do not. This lubricant is also used by Picatinny Arsenal, is a two time winner of the Gold Medal Best Value Award by the Defense Supply Centers, and has been in the USPFO system since 1998. FP-10 is so highly thought of by many firearms industry members that it is even recommended and sold by Cleanbore.

"...we have arrived at the conclusion that FP-10 is a substantially better product than it's many rivals. FP-10 has performed flawlessly for us..." Cleanbore Ltd.

Ask for a free sample of FP-10 when you place your next order with Olympic Arms. We are so confident you'll like it, we'll give it to you absolutely FREE!

Schuetzen Pistol Works

In 1987 Olympic Arms incorporated Safari Arms and began production of 1911 handguns in the form of the now famous Matchmaster and Enforcer pistols. With technological and quality advancements along the way since then the current models bear only a cosmetic resemblance to the original handguns produced prior to those now built in our Olympia, Washington pistol shop.

In 1993 the name Schuetzen Pistol Works was created to differentiate between standard production 1911 handguns and the custom order 1911 handguns we offer. In 2004 the decision was made to stop using the Safari Arms name and to move to the more familiar Olympic Arms trademark.

Built with pride, experience, and quality, no matter the name. Whether you want a production 1911 pistol, or a custom made for you 1911 handgun the pistol you receive will have been overseen by two of the most experienced and skilled pistolsmiths in the country.

In addition to standard Olympic Arms production pistols, the Street Deuce and Journeyman are premium grade pistols from the SPW shop. They are top-notch, high-end pistols just as good and in most aspects better than any other 1911 pistol at any price. *Have your pistol made for you, call our Customer Service Team for details or ask to speak directly with Richard in the pistol shop.*

Our Customer Service Team is often asked if we provide an *accuracy guarantee* with our pistols. The answer is usually no, because we do better. Not only do all 1911 pistols come with a limited lifetime warranty, but you'll also get the sixty day 100% satisfaction guarantee. If within sixty days of receiving your pistol you are not 100% satisfied with it, you can have your dealer return the handgun to Olympic Arms for a full refund.

Our commitment is simple and we are confident that we built the best 1911 45 caliber handguns with which we back with the best warranty in the industry. *Call our Customer Service Team for product and warranty details.*

Whitney Wolverine

Here it is again. At Olympic Arms we've been touting the return of the Whitney Wolverine pistol for years, and here it is to begin shipping in late 2004. Not flood, fire, nor earthquake could keep this pistol from seeing the light of manufacturing day. The original Whitney Wolverine pistols first went into production in 1956. They were a huge hit with consumers. The radical 'space age' design was ergonomic on the hand, and pointed quite well for most shooters. With new technology in cast aluminum available after WWII, the Wolverine was a very lightweight and strong handgun. It's shape alone attracted many consumers.

Unfortunately, the Whitney Wolverine pistol quickly went out of production because of distribution problems. To make problems worse a rival pistol was introduced shortly afterwards that sold for just a few dollars less than the Wolverine (remember 1956 dollars not 2004 dollars). Now, fall 2004, and with years of development backing it, the Whitney is being readied for release. The new Whitney pistol will be manufactured with a high-strength polymer frame. It is extremely lightweight and very durable as well as molded in a stylish black color. The .22 caliber LR (Long Rifle) ammo will be delivered through an all metal magazine body that houses 10 rounds. Current production magazines will be 100% interchangeable with earlier production pistols.

Easy disassembly of the barrel unit allows for the use of interchangeable barrels and allows the change to be done without tools in only seconds. Optional barrels for swapping, such as longer or ported barrels will be made available at a later date. This once highly sought after pistol has not lost its desirability amongst some old time shooters. Now it will attract an entire new generation of gun enthusiasts to its following. Once called, "The most reliable, best shooting, best pointing little .22 pistol ever handled" by the late Rex Applegate, the Whitney Wolverine makes a great plinker, farm hand, or home defense pistol.

Parts for both previous production Whitney Wolverine's and current pistols made by Olympic Arms are available. *Please call our Customer Service Team for details.*

Shipped with an Owner's Manual and a custom molded dark royal blue case. The case is a limited edition which is branded with a Whitney Wolverine logo.

Whitney Wolverine Specifications:

- Hardened Lightweight Polymer Frame
- Dovetail Rear Sight
- 6" Sight Radius
- Uses .22 Caliber Long Rifle Ammunition
- Capacity: 10 Rounds
- Length: 9" Height: 5.5"
- Empty Weight: 19.2 oz.

WHITNEY WOLVERINE:

\$279⁵⁰
EACH

Matchmaster 5"

Matchmaster 5" Specifications:

- 5" Barrel
- 6.75" Sight Radius
- Capacity: 7 + 1
- Length: 8.75" Height: 5.5"
- Empty Weight: 40 oz.

MATCHMASTER 5":

\$714⁰⁰ MSRP

The Matchmaster handguns feature hand-matched frames and slides, hand-fitted and headspaced barrels, fitted barrel bushings, complete ramp and throat jobs, lowered and widened ejection ports, hand-stone matched hammers and sears, aluminum long-shoe over-travel adjusted triggers, 5-6 lb. trigger pulls, shaped and tensioned extractors, Wolff 18.5 lb. recoil springs, extended safeties and slide stops, wide beavertail grip safeties, fully adjustable rear sights, full length recoil spring guides, hooked trigger guards and finger-groove front strap frames, and smooth laser etched walnut grips.

Matchmaster series are test fired with ball, LSWC, and JHP. Choose from stainless, black parkerized carbon, or deuce finish configurations. Also available in a two-tone version known as the "Deuce".

Matchmaster 6"

Matchmaster 6" Specifications:

- 6" Barrel
- 7.75" Sight Radius
- Capacity: 7 + 1
- Length: 9.75" Height: 5.5"
- Empty Weight: 44 oz.

MATCHMASTER 6":

\$774⁰⁰ MSRP

This Matchmaster has the same features as the 5" Matchmaster, less the full length recoil spring guide. Other options available are a standard GI frame, and in the two-tone version known as the "Big Deuce".

The Enforcer

ENFORCER:
\$750⁰⁰ MSRP

Enforcer Specifications:

- 4" Bull Barrel
- 5.75" Sight Radius
- Capacity: 6 + 1
- Length: 7.75" Height: 5"
- Empty Weight: 36 oz.

This is the Schuetzen Pistol Works compact model. The Enforcer has all of the standard features of the Matchmaster, but adds a bushingless bull barrel and a computer-designed recoil system. The heart of this pistol is its advanced triplex counterwound self contained spring recoil system. This is a durable, reliable, quick cycling, compact, yet serious gun. Carry the power of 45 caliber ammunition with you.

The Cohort

COHORT:
\$779⁰⁰ MSRP

Cohort Specifications:

- 4" Bull Barrel
- 5.75" Sight Radius
- Capacity: 7 + 1
- Length: 7.75" Height: 5.5"
- Empty Weight: 38 oz.

The Cohort combines the short Enforcer top end and recoil system with a full-sized Matchmaster frame. Standard with a rounded trigger guard. This pistol is sure to fit any quality holster for mid-length pistols. Includes the same standard features of the Matchmaster series. Features like hand-matched frames and slides, hand-fitted and headspaced barrels, lowered and widened ejection ports, shaped and tensioned extractors, fully adjustable rear sights, and smooth laser etched walnut grips.

The Westerner

Classic appearance, cowboy style, and modern technology make the Westerner 1911 pistol. The slide and frame are colored to a stunning finish using a method called color case hardening.

Though color case hardening does more than add a colored finish to the pistol. The process is a heat treatment that strengthens the steel and adds a protective casing finish.

Not just beautiful, these handguns are extremely reliable, and will almost never wear. Each pistol is hand fitted, color case hardened, and then re-assembled by hand fitting again. The entire production process leads to surprising capabilities of accuracy. *The Westerner Series are uncompromising works of art.*

Get the looks you deserve the next time you take this pistol to a show, or show it off at the shooting ally. Though some of the Olympic Arms and Schuetzen Pistol Works customers keep their Westerner series pistol for display, we recommend that you enjoy as a pistol.

WESTERNER:
\$834⁰⁰ MSRP

Westerner Specifications:

- 5" Bull Barrel
- 7" Sight Radius
- Capacity: 7 + 1
- Length: 8.75" Height: 5.25"
- Empty Weight: 35 oz.

Building from the great success of the Westerner pistol introduced in 2003, Olympic Arms has decided to expand it's line of true color case hardened 1911 offerings by adding two new models. The truly awe inspiring colors of the color case harden process are lost in this black and white print. Color case harden is an old-fashioned method with side effects of vibrant blues, violets, crimsons, and patinas.

Trail Boss Westerner

TRAIL BOSS:
\$959⁰⁰ MSRP

Trail Boss Specifications:

- 6" Bull Barrel
- 8" Sight Radius
- Capacity: 7 + 1
- Length: 9.75" Height: 5.25"
- Empty Weight: 38 oz.

The Trail Boss sports a six inch slide and barrel unit. With the beauty of the color case hardening and add on the extra length of the slide assembly, this pistol will take your breath away. Standard with laser engraved grips.

Constable Westerner

CONSTABLE:
\$935⁰⁰ MSRP

Constable Specifications:

- 4.25" Bull Barrel
- 6.25" Sight Radius
- Capacity: 7 + 1
- Empty Weight: 33 oz.

The Cohort is a compact version of the Trail Boss. It sports a 4.25 inch slide and barrel assembly. This handy handgun is practicable for plinking or home defense. Standard with laser engraved grips.

Street Deuce

Street Deuce Specifications:

- 5.2" Bull Barrel
- 7" Sight Radius
- Capacity: 7 + 1
- Length: 8.75" Height: 5.5"
- Empty Weight: 38 oz.

STREET DEUCE:
\$1,299⁰⁰ MSRP

Fantastic for daily street use or as a service carry. Standard features include a stainless steel frame, carbon steel Maxhard slide, lowered and widened ejection port, hand shaped and tensioned extractor, polished ramp and throat, stainless steel national match bushingless bull barrel, SPW Hi-Ride beavertail with Positive Disengagement Ridge, beveled magazine well, hand matched sear and commander hammer, custom trigger adjusted for over-travel, raised front strap, extended thumb safety, double diamond checkered Rosewood grips.

Journeyman

Journeyman Specifications:

- 4" Bull Barrel
- 6" Sight Radius
- Capacity: 7 + 1
- Length: 7.75" Height: 5.5"
- Empty Weight: 35 oz.

The Street Deuce and the Journeyman are both custom made pistols from the Schuetzen Pistol Works custom shop. Each part is hand selected and fitted by expert pistolsmiths.

JOURNEYMAN:
\$1,299⁰⁰ MSRP

The Journeyman is a compact form of the Street Deuce and has all of the same features, but adds our Triplex Counter Wound recoil spring. Optional at no additional cost is a flat or arched mainspring housing, LPA adjustable rear sight, or Heinie Slant Pro fixed rear sight.

Schuetzen Pistol Works Custom Pistols

Blak-Tac Matchmaster

Blak-Tac Specifications:

- 5" Barrel
- 6.75" Sight Radius
- Capacity: 7 + 1
- Length: 8.75" Height: 5.5"
- Empty Weight: 40 oz.

BLAK-TAC:
\$834⁰⁰ MSRP

- *No Slide Wear!*
- *No Frame Wear!*
- *No Fear Of Galling!*
- *Unmatched Corrosion Resistance!*
- *Self Lubricating Action!*
- *Tough-as-nails Attractive Matte Black Finish!*

The Olympic Arms Blak-Tac process has been used as a standard on all of the bolt carriers produced by Olympic Arms for a few years now. The Blak-Tac Matchmaster was introduced in 2003, but was upgraded in 2004 for appearance and configuration in order to fit the Tactical implications of its name.

The frames and slides of each Blak-Tac Matchmaster are hand-fitted and the pistols are fully assembled, then and only then do we proceed with the Blak-Tac processing. Why? Because once we have treated the frames and slides to the Blak-Tac process, they become so hard, that fitting is no longer an option!

The Blak-Tac Matchmaster is an awesome piece of mechanical functional reliability with unmatched longevity, mixed with a beautiful appearance. Designed around the standard Matchmaster by Olympic Arms, this pistol begins with all the same features such as a 416 true National Match barrel made here by Olympic Arms. It is also standard with items such as a widened and lowered ejection port, complete ramp and throat job, tuned and tensioned extractors, 18.5 lb Wolff brand recoil spring, full length recoil spring guide and more. But it is then outfitted with the Blak-Tac standard package which includes:

- *Blak-Tac treated frame and slide*
- *Round trigger guard with finger groove front strap*
- *High-ride Olympic Arms beavertail with PDR*
- *Low Profile combat style sights*
- *Front and rear slide serrations*
- *Your choice of arched or straight main spring housings.*
- *Custom engraved slide emblazoned Blak-Tac*
- *Adjustable automatch trigger*

This is a great deal of 1911 for the money. With features that would cost you literally hundreds of dollars more elsewhere, plus the Blak-Tac treated frame and slide only available from Olympic Arms! All with the standard Olympic Arms Lifetime Warranty.

Schuetzen Pistol Works Specialty Shop List

Placement and cost of Schuetzen Pistol Works custom orders are not guaranteed. Not all of the options listed are available on all 1911 pistols. Please contact our Customer Service Team and ask about the *1911 Specialty Shop* for details and quotes for scheduling and cost of the custom work you may have in mind.

 Matt Satin Stainless
 Flat Black Parkerized (Carbon Steel)
 Blak-Tac Armour

Evaluate 1911 Pistol; Detail, strip, inspection of all parts. Includes rockwell hardness testing of key items.

Trigger Work (\$50/hr., Plus Parts)

Due to the variety of lockwork types and the disparate quality of parts in some current 1911 Pistols, all trigger work is billed on a pistol-to-pistol basis. Some 1911 trigger jobs require only skill and time, others require replacement of all of the component parts and the fitting of new ones.

Custom Schuetzen Pistol Works 1911 6" With Color Case Hardened Slide.

Ultramag Barreled Actions And Custom Rifles

BBK-01. The BBK Ultramag action is the starting point for some of the world's finest quality safari grade rifles made today. Large enough to chamber up to the .505 Gibbs cartridges and strong enough for more. Our actions have been used to take down dangerous game all over the world. Constructed from high quality 4140 Chromemoly Steel casting and standard with a three position Winchester® style safety, positive claw extractors, and a controlled round feed bolt system. All making this one of the most reliable and safest actions every made. Available as actions only in the white or as assembled barreled actions in various calibers. Please call our Customer Service Team for details.

Ultramag Features:

- Three Position Winchester® Style Safety
- Fully Adjustable Timney Trigger
- Mauser Claw Extractor
- C Internal Ring
- Controlled Round Feeding
- Uncut Double Square Bridge
- Bolt Face Cut To .532"
- Receiver From 4140 Chromemoly Steel
- Barrel Thread Of 1.10" x 12 TPI
- Magazine Capacity Of Six Rounds .375 H&H
- Magazine Length Of 3.85"

Select calibers are available with broach-cut National Match barrels in the barreled action format.

Testimonials To Olympic Arms

These targets were shot by an Olympic Arms customer at 100 yards using Black Hills 55 grain V-Max factory blue box ammunition. With the exception of one flyer, the Olympic Arms K16 rifle made these two 10 shot 1/2" groups. Olympic Arms owners all over the world have come to expect 1/2" group accuracy, most of the time right out of the box.

"My first 'black rifle' was a PCR4 with a 20" stainless ultramatch barrel. I don't consider myself to be a great shot, but this gun makes me look good!"
- K.C.

"After several months of field and laboratory testing in cooperation with both US forces domestic and overseas, and testing with local troops in the harsh, hot, dusty, desert conditions in Kuwait, Iraq, and the United Arab Emirates we have arrived at the conclusion that FP-10 has performed flawlessly for us, and at every stage of the thorough evaluation process FP-10's performance was impressive. In the desert, the 'boundary film' technology allowed weapons to be fired 'dry' preventing sand and dust adherence, whilst still providing a 'boundary film' perservative coating to inhibit corrosion."

- Brian Goldie, Chief Executive Officer, Cleenbore Ltd., October 25, 2003

"I just received my FIRSH and installed it last night....the mounting system is incredible.... barrel torque and final spin-on plus the two set screws went so cleanly!!! Thank you for this excellent product."

- T.W.

"I ordered a T-2 upper receiver last week to update an older A-1 receiver CAR-15 kit I had purchased from PAC West Arms over 10 years ago. The kit was all PAC West except your barrel. Your barrel had always been accurate for a 10 1/2 inch CAR barrel set up but it had a sight problem. The rifle sights had to be adjusted all the way to the right in order for it to be on target. I put a scope on this less than mil-spec A-1 upper receiver and shot it that way for over 10 years. Now, after installing your upper receiver this weekend and firing it, I was amazed how accurate it is now! I only had to adjust the sights one click to the right and it is was dead on target! My brass used to come out pretty chewed up and now that problem is gone as well! Another item I noticed was the upper to lower receiver fit is much tighter now. This allowed me to remove the plastic spacer I had to use to take the slop out! There was a small mix up on my order but your folks fixed that with one phone call. My rifle is like new now and I only wished I had updated it sooner! When you say mil-spec tolerances you mean mil-spec tolerances! I am a very satisfied customer, keep up the good work!"

- K. J. P., SMSgt USAF (retired)

"I recently purchased your 'Ultramatch' AR-15 with the 20" barrel. The guy selling me the rifle said they got 1/4" groups out of them. I was pretty skeptical, as getting quarters out of a bolt gun is tough enough. However, he was right! The first night I got a .260 with 40-grain Ballistic tips. Knowing it would probably shoot better with the heavier bullets, I tried some 55-grain Ballistic tips and shot the best group of my life, a .074". I was witnessed by Kevin Huxoll, a correctional officer at the Washington State Penitentiary. Thanks for a great gun!"

- C. R.
