

BIANCHI

2007
THE WORLD'S FINEST HOLSTERS, DUTY GEAR & ACCESSORIES

For almost fifty years the Bianchi name has been synonymous with the utmost quality in holsters, belt and accessories — whether for duty, concealment, sporting, or military applications. It is important to us that when you purchase a Bianchi product it will look, wear and function beyond your expectations.

Today, as part of the Armor Holdings Products Group, we have even more opportunity to bring you the products and service you expect from Bianchi. With our partnership we are working to leverage the resources and manufacturing capabilities that this relationship has to offer. For you that means cutting edge technology, greater availability and an even better product selection.

After all, Bianchi customers expect and deserve the best and we intend to support that expectation.

Auto Retention *There is never a good time to lose your weapon.*

There is no good time to lose your weapon! The traditional thumb break holster has been around for a long time and for good reason...it's simple, reliable and it works. But it's not perfect. One of the hurdles with a thumb break is that you have to snap the thumb break before it can do its job.

Bianchi recognized the need for improved retention while retaining a natural and fluid draw. The result is Bianchi's Auto Retention™ concept. Many innovations have been introduced over the years, but not until Bianchi introduced the concept of Auto Retention, was there a holster designed that immediately secured the weapon upon holstering and before manually securing any external devices present.

Auto Retention provides immediate and positive mechanical retention when the weapon is properly holstered. Bianchi's ThumbLok™ and FingerLok™ devices provide secure weapon retention by automatically locking the trigger guard of the pistol during reholstering of the weapon. This is accomplished through a patented locking lever that is strong, simple and reliable. The spring loaded cam lever remains engaged until deactivated through the natural positioning of the thumb or finger during the draw. The result is a smooth and efficient draw stroke that does not require any unnatural movements.

Auto Retention is offered in both duty and off duty holsters that feature either the FingerLok or ThumbLok internal retention devices. Also, the Auto Retention concept is available on both open top holsters and those with thumb break straps.

ThumbLok™ Device
The thumb, as the name implies, deactivates the Bianchi ThumbLok on the way to a firing grip position. This cam device is easy to use and offers an instinctive straight up draw. The hidden release lever is unobtrusively located between the holster and jacket slot belt loop. Holsters with this device feature our exclusive Auto Retention feature; ideal for duty use.

PATENTED

The ThumbLok™ device provides Auto Retention™ when the weapon is holstered and is released by grasping the device with the thumb when drawing.

7935
PAGE 7

FingerLok™ Device
The FingerLok is our latest device to employ the Auto Retention feature. The release lever is positioned behind the trigger guard enabling the user to sweep it with the middle finger as a natural part of the draw. Many officers like this concept because it allows them to use the same muscle memory when drawing from either a Bianchi duty or concealment holster.

PATENT PENDING

The FingerLok™ device provides Auto Retention™ when the weapon is holstered, and is released by sweeping the device with the middle finger when drawing.

The Bianchi Difference

Design, function, security, comfort. Here at Bianchi we take these words to heart in developing new products. Our research and development team is continually looking for new materials and new ways to offer you the best product money can buy.

Bianchi has introduced a lot of "firsts" over the years – our Model 5BHL, the first thumb break holster, our Model 27K, the first duty retention holster, AccuMold®, the first molded nylon holster - just to name a few. Yet innovative breakthroughs like this are what drives us, and what keeps you relying on the Bianchi difference when you choose your equipment.

You'll find the following Bianchi features throughout our line of duty law enforcement products.

ErgoTek™ Duty Belts It's all in the pillows...

Bianchi's ErgoTek™ Duty Belts redistribute the weight of the duty gear, away from the edges of the belt and over its wide closed-cell foam cushioned surface. For even more stability and added holster support, a high density internal polymer stiffener runs the full length and width of belt. You'll notice immediately that the ErgoTek belt is both light in weight and far more comfortable than a traditional duty belt. Plus, ErgoTek is offered in a wide variety of finishes and styles and are lined with hook to work in conjunction with the Bianchi 7205 Liner Belt.

ErgoTek™ Cushioned Belt Loop

The ErgoTek system is truly a breakthrough in comfort technology. We started with our ErgoTek cushioned belt for effective load distribution. It was only natural to extend this technology into our injection molded duty belt loop, by adding a high-density, closed-cell foam cushion, where the holster rides on the hip. Wearing your equipment day in, day out doesn't have to be uncomfortable.

Low Ride Belt Loop

Our patented ErgoTek jacket-slot belt loop with a 1.5" (38mm) drop from a standard ride is designed for female officers and others that require a low-ride holster. The offset provides just the right carry position for comfortable wear throughout an entire shift. Offered as an option on all Auto Retention duty holsters and duty light holsters.

Dual Belt Loop Technology

Bianchi now offers its most popular duty accessories with a uniquely designed belt loop that allows for snug carry on either a 2" (50mm) duty belt or 2.25" (58mm) duty belt. This feature is available on both our top end AccuMold & AccuMold Elite accessory lines, and on our new PatrolTek™ accessory line.

For 2.25" (58mm) belts slide the belt between the web tab and the pouch.

For 2" (50mm) belts slide the belt between the web tab and the belt loop.

Materials

AccuMold® technology

A state of the art molded nylon holster constructed and molded from Bianchi's trilaminar material comprising a ballistic weave outer material, a firm, high density closed-cell foam center, and our smooth Coptex™ lining. All AccuMold gear is designed to precisely fit the gear it was designed to carry.

AccuMold® Elite™

We've taken our patented AccuMold technology and dressed it up. The AccuMold Elite line offers the same construction of AccuMold, but with a Duraskin™ outer material that looks amazingly like leather. You can't tell the difference until you pick it up and see that it's almost half the weight of leather!

Leather

Many people still love traditional leather gear. It wears beautifully and nothing quite feels the same. Bianchi leather is U.S. full grain cowhide – the best available. We choose different weights based on the product requirements, handcrafting and molding it to perfection the old fashioned way, by not cutting corners.

PatrolTek™

PatrolTek duty belts and accessories are made using our molded trilaminar technology but at a price to meet the demands of ever tightening budgets. Now you don't have to give up function and wear to get duty gear at a great price.

Duty Gear

7140

7140 & 7940 DutyLok™

The DutyLok is the next generation, multi-retention duty holster with our exclusive Auto Retention™ concept. It provides an easy to use, smooth, single plane drawing platform, and offers excellent retention capabilities. Bianchi's KnuckleBreak™ provides quick access to your weapon and thumb snap is released with a straight downward stroke of the thumb while the middle finger indexes on the FingerLok™ release lever. The draw stroke is an efficient upward movement. ErgoTek belt loop; fits belts up to 2.25" (58mm).

7940

7135 & 7935 SpeedBreak™

If you are looking for a multi-retention holster that's easy to use, you will definitely like the SpeedBreak. The draw is accomplished with a straight downward stroke of the thumb releasing the KnuckleBreak™ on its way to the hidden ThumbLok™ release lever. The enlarged contoured KnuckleBreak™ actually facilitates a one-step, rapid acquisition of the release lever. Upon depressing the lever, the draw is straight up and out. No tricky twists or turns required. Combine that with Auto Retention™ and you'll soon see why it's so easy and comfortable to use. Features ErgoTek™ belt loop.

7135

7935

KnuckleBreak™

Our contoured KnuckleBreak provides a large target area for the thumb break, which can be a real advantage when having to draw under pressure. Its unique design also aids in a more rapid draw. A straight downward, one-step motion of the thumb on its way to a firing grip position releases the break. For those with shorter thumbs, bending the thumb creates an even larger profile for a more positive break.

Low Ride Belt Loop

Low Ride Belt Loop provides a 1.5" (38mm) drop from standard ride.

7130

7930

7920

7130 & 7930 SL3.2.1™

The SL3.2.1 combines traditional thumb break retention with the ThumbLok™ device and features an instinctive straight up draw stroke. No twisting or rocking required. The thumb easily follows the transition from the thumb break to the ThumbLok retention lever. Upon firmly holstering the weapon, the hidden ThumbLok cam automatically engages the trigger guard, locking the weapon in place, activating Bianchi's Auto Retention™ feature. Includes our ErgoTek™ belt loop.

7120 & 7920 Defender®

An excellent duty holster that incorporates a traditional thumb break with our Pinch® Retention Device (PRD™). The PRD is a polymer clamp, riveted and sewn into the welt of the holster. It provides additional retention at the front of the trigger guard, yet releases cleanly when the weapon is drawn in an upward motion. Jacket slot belt loop fits up to 2.25" (58mm) duty belts.

Low Ride Belt Loop

Low Ride Belt Loop provides a 1.5" (38mm) drop from standard ride.

Pinch® Retention Device – PRD™

Our exclusive PRD is formed of a high strength polymer. When the weapon is firmly seated in the holster the PRD grips the trigger guard holding the weapon in place until you're ready to draw.

7125 Enforcer® SLR™

The Enforcer features our SlideLok™ Retention (SLR™) mechanism that provides a positive lock in the snap of the thumb break. This offers enhanced weapon security and is ideal for activities such as court details, prisoner transport duties, and in jail environments. Further, the internal Pinch® Retention Device enhances security by providing additional tension on the trigger guard. Bianchi Sight Channel™ and jacket slot belt loop.

FINISH BALLISTIC WEAVE
CARRY HIGH RIDE; STRONGSIDE

Pinch® Retention Device – PRD™

Our exclusive PRD is formed of a high strength polymer, which is riveted, then sewn into the holster's welt. When the weapon is firmly seated in the holster the PRD grips the trigger guard holding the weapon in place until you're ready to draw.

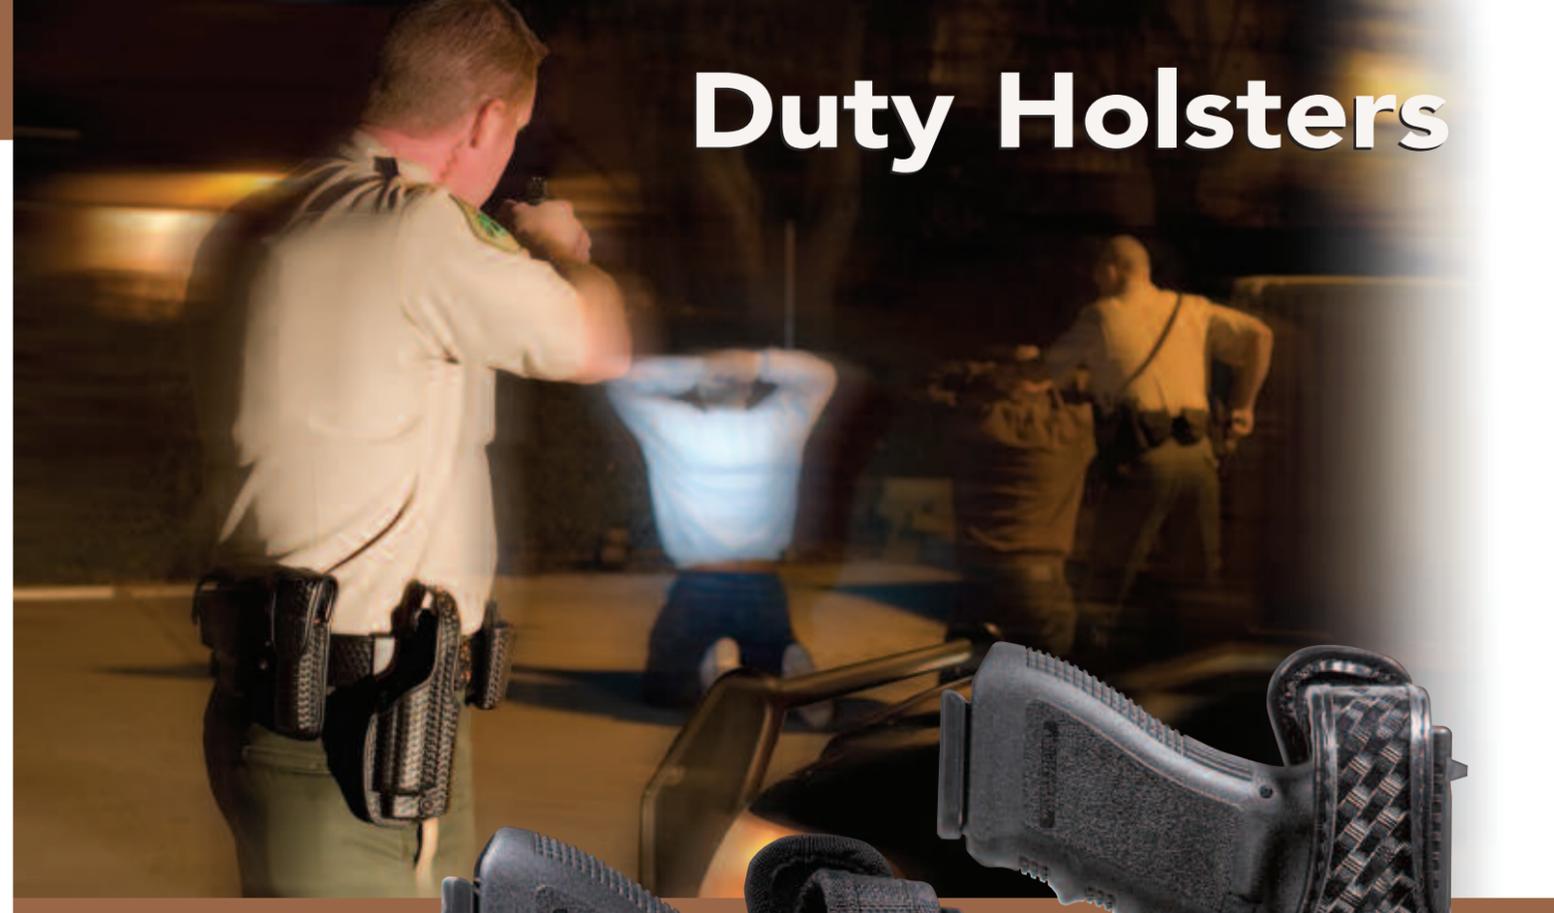

PATENTED

Slide•Lok™ Retention

Constructed of high-strength polymers, the Slide•Lok is virtually unaffected by adverse weather conditions. Push forward to disengage, backward to engage retention mechanism. Provides visual and tactile feedback on position and movement of the mechanism. Extended flange and internal componentry combine to help prevent unintentional disengagement of the thumb snap.

PATENTED

7145 & 7945 Luminator™

The Luminator offers AccuMold® technology for a custom molded holster designed specifically to address the growing demand for holsters that carry a light mounted on the weapon at all times. This design is ruggedly durable, yet light in weight and compact. No bulky design here.

The Luminator features our ErgoTek™ Belt Loop for added comfort and convenience for all day wear. The bottom of the Luminator is closed under the light to protect the bezel and open at the muzzle to allow debris to fall through. The draw stroke is an uncomplicated up and out movement.

PATENTED

Low Ride Belt Loop

Low Ride Belt Loop provides a 1.5" (38mm) drop from standard ride.

390 Interceptor®

The Interceptor is a leather version of our popular SpeedBreak™ Duty Holster. When the pistol is placed in the holster, the ThumbLok™ retention device automatically engages the trigger guard securing the weapon and activating Bianchi's Auto Retention™ feature. The secondary thumb break can then be snapped. It also features the KnuckleBreak™, an enlarged, contoured thumb break that allows the shooter to break the snap with a straight downward motion of the thumb on the way to the thumb lever. The thumb naturally indexes on the ThumbLok lever, releasing the pistol. Includes Bianchi's ErgoTek™ jacket slot belt loop and a steel reinforced Sight Channel™.

AccuMold®

AccuMold® Elite™

Leather

PatrolTek™

There's leather and then there's Bianchi leather.

Tanned and cured to our specifications we use premium grade, full grain vegetable-tanned cowhide – the highest quality available. Then, we check every hide to make sure that only the best leather finds its way into our holsters. Another thing you'll notice is our outstanding finish. Our black leather is vat dyed and the excess is buffed off. Then we apply a top coat to prevent any possibility of color bleed. Our edges are burnished and dressed with a special protective compound or wax burnished by hand.

7200 Duty Belt 2.25" (58mm)

5-part laminate featuring a polymer stiffener inside belt for firmness and holster support. Ballistic weave fabric; loop lining. Tri-Release™ buckle. Sizes: xs, s, m, l, xl, xxl, to fit 24" - 58" (61cm-147cm) waists. Also available in O.D.

B8GC Garrison Belt 1.75" (45mm)

Trouser belt for wear under equipment belt. Full grain cowhide, plain or basket finish, black. Nickel or brass finish hardware. Even sizes 26" - 46" (66cm-117cm).

The PatrolTek™ brand of duty accessories - a line of products for the professional that provide significant cost savings over premium brands, and offers a considerable improvement over similarly priced products on the market.

With the current budget trends, law enforcement agencies often must make price an important part of their purchasing decisions. At Bianchi we have spent forty-eight years making top quality products and we don't believe that making compromises in quality vs. price is something agencies should have to do. It's got to be good if it's got our name on it. With PatrolTek you'll be hard pressed to find a better value anywhere!

- Pleated pouch lids offer a smooth closure and great fit
- Reinforced snap closures
- Dual belt loop design lets same pouch be used for 2" (50mm) & 2.25" (58mm) belts
- Lightweight and weatherproof
- Easily cleaned with soap and water
- Stays flexible in cold weather

Reinforced snaps and pleated lids for good looks and durability.

Quality Features

PatrolTek products are made to our rigid quality specifications using our patented foam-molded technology so you can do your job without having to worry about the performance of your gear. Pouches are durable and formed to fit your gear. We've borrowed some key functional elements from our premium line as well as added a new dual belt loop for greater versatility.

PATENT PENDING

Dual Belt Loop

PatrolTek accessories features our Dual Belt Loop; Fits snugly on both 2" (50mm) and 2.25" (58mm) duty belts.

The Bianchi Difference

What holster is best for me?

Only you can decide, but we can help. No one holster is perfect for everyone. That's why Bianchi provides you with a wide variety of holster models to fit your lifestyle.

What should I consider?

- Comfort
- Concealability
- Convenience
- Compatibility

Each one of these factors must be balanced with the others. A deep concealment holster may not be as comfortable as a belt holster. In addition, your style of clothing, climate, and the particular handgun must be considered. Depending upon your needs, you may want to consider a shoulder holster, fanny pack, or an ankle holster. Each offers specific advantages that are detailed in our catalog.

Comfort

The traditional belt holster provides the greatest comfort for most users. While it works well with all sizes of handguns, it allows larger framed handguns to be carried comfortably by evenly distributing the weight along the belt and belt loops. Some designs are full size holsters that cover the complete slide or barrel. Others are an abbreviated style often described as belt slides. The open bottom allows the slide or barrel to extend past the bottom of the holster. They allow several length pistols of the same design to be carried in one holster. To maximize comfort and security, the holster should be worn with a sturdy belt.

Concealability

This is a relative term and most often is associated with the length of the barrel. In reality, the butt or handle of the gun presents the greatest challenge. Inside the waist band holsters (IWB) and shoulder holsters provide the greatest concealment for most types of handguns, yet the trade-off is often comfort. They work well under jackets or even lightweight shirts. Belt slides, when worn above and behind the hip under a jacket, can also offer a high degree of concealability.

Convenience

For those who wear a firearm for short periods of time or tend to put it on or take it off frequently, the paddle holster is ideal. Originally designed for plainclothes investigators, paddle holsters have become popular with a wide variety of customers. The paddle slips inside the waist band of the user's pants and anchors the holster to the body. When properly designed, the paddle is easy to put on but relatively difficult to remove. This translates into a secure holster that will not come off the pants during a draw.

The snap-on style holster provides the convenience of a paddle holster with the stability and comfort of a belt holster. Instead of belt slots, leather loops wrap around the belt and are secured by snaps. The wide base of the snap loops works to distribute the weight of the pistol and prevents the holster from shifting on the belt.

Muscle Memory & Compatibility

Many of our customers are uniformed law enforcement officers who use a duty holster on a daily basis. Under stress, it has been proven that individuals will revert to the movements to which they are most accustomed. Thus, we have been asked for a concealment holster that is compatible with a duty holster, one that allows the same basic draw stroke to be used in both environments. Our DutyLok™ holster and concealment holsters with Auto Retention™ meet this requirement. Both use the same FingerLok™ retention mechanism and middle finger release lever. This translates to both confidence and security on the part of the user.

Concealment

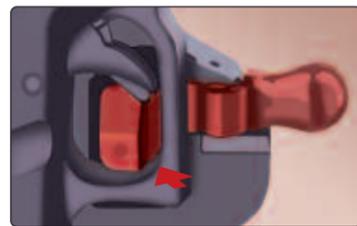

82 CarryLok™

The CarryLok offers the speed of an open top concealment holster with the security of Bianchi's Auto Retention™ concept. The FingerLok™ internal retention mechanism secures the pistol by the trigger guard as it is inserted into the holster. To draw, the middle finger sweeps the release lever allowing the pistol to be drawn in an upward movement.

PATENT PENDING

FITS MOST POPULAR AUTOS
FINISH TAN OR BLACK; UNLINED
CARRY STRONGSIDE

The FingerLok™ device provides Auto Retention™ when the weapon is holstered, and is released by sweeping the device with the middle finger when drawing.

84 SnapLok™

A new twist on the traditional belt slide holster that combines our Auto Retention™ concept with internal retention and easy on/off belt loops. The FingerLok™ internal locking mechanism automatically blocks the trigger guard when the weapon is firmly seated in the holster. As the pistol is drawn, simply depress the release tab with the middle finger to release the mechanism. It's simple and swift. Belt loops feature snaps that may be positioned with the tabs in the upward or downward position. The reinforced top stays open for easy one-handed holstering. 1.5" (38mm) belt loops.

PATENT PENDING

CARRY STRONGSIDE

5 Black Widow™

A compact belt slide with the security of a thumb break. The open muzzle design provides for pistols of the same model with different barrel lengths to be carried. Widely spaced belt slots allow the pistol to ride close to the body for both comfort and concealability.

FITS MOST POPULAR AUTOS & REVOLVERS
FINISH TAN OR BLACK; UNLINED
CARRY STRONGSIDE

4597 Ranger™ Shadow®

Combines the features of a high ride concealment holster with the durability and affordability of our Ranger trilaminate construction. Tunnel belt loops aid in the low profile of this design while the polymer reinforced thumb break protects the user from sharp edges.

FITS MOST POPULAR MEDIUM & LARGE FRAME AUTOS
FINISH BLACK; BALLISTIC NYLON
CARRY STRONGSIDE

FBI Cant

You will notice that our most concealable holsters position the gun with the firearm butt forward and muzzle back. This position is known as the FBI cant. This is done to pull the grip of the weapon in toward the body, preventing it from imprinting on your clothing providing excellent concealment. This angle, or cant, also helps to facilitate the draw from a sitting position.

83 PaddleLok™

The PaddleLok offers comfort and convenience - plain and simple. Our paddle design is contoured to the body and features unique molded-in elastomer ridges for maximum grip on your trousers and belt. The paddle is adjustable for cant and height providing a custom fit so the user can adjust it to fit his or her body shape, placing the gun at the preferred angle and position. This feature even allows the same holster to be used for cross draw or strongside carry. The PaddleLok combines the durability, beauty and feel of Bianchi's fine leather with the function of today's polymer technology.

PATENTED AND PATENTS PENDING

FITS MOST POPULAR AUTOS
FINISH TAN OR BLACK; UNLINED
CARRY STRONGSIDE; CROSS DRAW

7500 AccuMold® Paddle

Offering a wide range of adjustability for cant and draw height, this design allows you to position the holster where it's most comfortable and accessible. This keeps the holster and firearm close to the body. The unique paddle features molded in elastomer ridges for maximum grip on your trousers and belt. Adjustable for cant and height provides exceptional stability without sacrificing comfort.

PATENTED

59 Special Agent®

Combines the proven design of our thumb break belt holster with the convenience of a paddle holster. The Special Agent paddle can be rotated for a variety of carry options to meet the user's individual needs. The unique paddle features molded-in elastomer ridges for maximum grip on your trousers and belt. Adjustable for cant and height provides exceptional stability without sacrificing comfort.

PATENTED

FITS MOST POPULAR AUTOS
FINISH TAN OR BLACK; UNLINED
CARRY WAISTBAND; STRONGSIDE OR CROSS DRAW

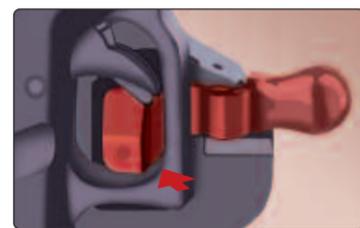

990 Wide Offset Paddle

The #990 is a modified paddle that provides additional clearance between the pistol's butt and the user's body for greater comfort. Ideal for female users, it prevents a lady's hips from forcing the butt of the pistol into their side.

PATENTED

FITS MODELS 59 & 7500

The FingerLok™ device provides Auto Retention™ when the weapon is holstered, and is released by sweeping the device with the middle finger when drawing.

Adjustable Cant Adjust the cant virtually 180° for your preferred carry in either strongside or cross draw options.

Adjustable Height By adjusting the two Allen screws the holster can be positioned at your desired ride height. Standard ride, high ride, or anything in between.

Secure Paddle Grip Our two-tone paddle comprises a soft rubber elastomer that is molded onto a hard polymer contoured panel. This offers a positive grip (like that of today's toothbrush handles) and provides the structure needed for stability. You'll be amazed at how comfortable yet secure this holster is.

100 Professional™

An inside the waistband holster that meets the requirements for deep concealment. This design features a high back that provides a shield between the body and the sharp edges of the pistol. The belt clip provides easy on/off convenience, yet securely anchors the holster to the belt.

FITS MOST POPULAR AUTOS & SMALL REVOLVERS
FINISH TAN; LEATHER LINED
CARRY INSIDE WAISTBAND; STRONGSIDE

6 Waistband Holster

Our ultra lightweight suede design lets you tuck a gun inside your waistband without having to worry about it falling down your pant leg. The heavy duty spring-steel clip holds the holster firmly to your belt or waistband for a secure draw.

FITS MOST POPULAR AUTOS & REVOLVERS
FINISH TAN SUEDE; UNLINED
CARRY INSIDE WAISTBAND; STRONGSIDE

6D ATB™ Waistband Holster

An ultra-thin, lightweight, inside the waistband holster that is ideal for casual carry. The soft suede construction makes this an extremely comfortable holster. Offered in multiple sizes with an adjustable thumb break that can be custom fitted to a variety of similar pistols.

FITS MOST POPULAR AUTOS & REVOLVERS

Bianchi Belt Loop Holsters

90 Vision™

Designed specifically for those who carry a rail mounted light mounted on their handgun. This traditional thumb break holster features Bianchi's unique belt loop design, allowing the pistol to be carried either strongside or cross draw high and close to the body for optimum concealment. A semi-closed design allows coverage of the light's bezel to protect the lens, yet open at the muzzle end to allow debris to fall through. Fits up to 1.75" (45mm) belt widths.

4620 & 4625 Ranger™ Tuxedo®

The Bianchi Tuxedo horizontal shoulder holster system is lightweight and comfortable enough to wear all day. Its sleek appearance offers lightning-fast access; it's ambidextrous and swiftly adjustable to fit most torsos. The holster is lined with a soft suede-like material for protection of the firearm. Our single side version, the Model 4625, is a lightweight option and comes with holster, harness and single tie-down. The 4620 rig comes complete with holster, X-harness, two tie-down straps and a double mag pouch or speedloader panel. Bianchi's trilaminate construction provides padded protection of the firearm.

4750 Ranger™ Triad™ Ankle Holster

Our Triad ankle holster, as its name implies, features three unique features that help overcome some of the challenges of ankle carry. First, the back of the holster has an Achilles arch that helps keep the holster in position on the ankle. Next, the detachable ankle pad can be positioned for maximum comfort no matter what size ankle you have. And lastly, yet perhaps most importantly, is the compression strap designed to pull the butt of the gun in tight against the calf for a low profile and to keep the weapon securely against the leg during vigorous activity.

FITS SMALL FRAME REVOLVERS UP TO 2.5" & AUTOS UP TO 4"
FINISH BLACK; BALLISTIC NYLON
CARRY ANKLE

Ankle Pad

Our ankle pad is adjustable for customized positioning, and is breathable and washable.

Compression strap

The Triad's unique compression design allows you to pull the gun butt tight into the calf for unobtrusive carry.

4755 Baton Ankle Holster

This unique design provides a comfortable and concealable wear option for expandable batons. Two compression straps pull the holster tight against the calf for a low profile to keep the baton secure against the leg. The detachable ankle cushion fits snugly against the ankle bone and can be adjusted for maximum comfort. An easy pull tab allows quick, easy access to the baton.

CARRY ANKLE

NEW

4751 Triad™ Leg Extender

This nylon strap system adds inches to the Triad so that it can be worn over boots or by individuals with larger calves. The straps conveniently attaches via hook and loop to existing Triad straps for a secure fit.

FITS 4750 TRIAD
FINISH BLACK NYLON

Why the Ankle?

The size of the calf in relation to the ankle provides a perfect location to conceal a firearm and holster. It allows for greater flexibility in clothing styles as it is not dependent on a belt or waistband for support. Further, ankles rarely receive the scrutiny of the casual observer.

4451 Deluxe Pistol Case

Slim portfolio design, these cases feature web carry handles, outside pockets and open flat to use as a shooting pad at the range. Two sizes available to fit most popular handguns. Case lengths:

- MEDIUM - 10"
- LARGE - 12"

4452 Range Portfolio™

All the bells and whistles in a compact range case. Comfortably carries one or two firearms in its dual, cushioned sleeves. Roomy interior pockets for accessories, and elastic web loops for secure carry of additional magazines or other essentials. Web carry handles and exterior accessory strap holds hearing protection or extra targets. One size fits firearms up to 6" barrel length.

4450 Pistol Case

Three sizes fit most popular revolvers and pistols. Compact design with zippered side pocket for small accessories. Case lengths:

- SMALL - 8"
- MEDIUM - 10"
- LARGE - 12"

Ranger™ Sporting Cases

Our trilaminate construction features a tough ballistic weave exterior and high-density foam padded core to cushion and protect the firearm. Plus, we've added our exclusive Air-Flo™ inner lining for breathability and added protection of the firearm's finish. We use only YKK® self-healing zippers that are long lasting and durable. You simply will not find a better quality case for the price.

4414 Executive Toolbag™

The ultimate in organization and good looks, this briefcase features a roomy interior, two exterior sleeve pockets and an efficient organizer panel. Heavily padded, non-slip shoulder strap. Constructed of 420 denier nylon pack cloth for durability and offered in two sizes:

- SMALL - 11" X 4.5" X 14"
- MEDIUM - 12" X 4.5" X 17"

4410 Top Secret™ II Fanny Pack

The Top Secret allows easy access to pack contents without exposing your firearm. That's because it's hidden behind the main compartment in a concealed pocket. The ambidextrous design gives you instant access to your firearm by pulling open the right or left side hook and loop concealment flaps. Front and side are lined with dense foam for a clean look. The concealed buckle helps prevent the pack from being snatched. Web loops conveniently hold clip-on items.

29 Triple Threat™ Magazine Pouch

- Horizontal or vertical carry
- 2 tension screws permit various drawing options
- Accepts belts from 1.5" (38mm) to 2.25" (58mm) wide
- Plain finish, tan or black, brass hardware
- 3 sizes

20A Magazine Pouch

- Spring-steel clip
- Plain finish, tan
- 3 sizes

16RS Slim Speedloader Pouch

- Holds one medium frame speedloader
- Snaps around up to 1.75" (45mm) belt
- Plain finish, tan

24 CarryCuff™ Handcuff Case

- Pull through style for linked and hinged cuffs
- Belt loop snaps on/off for user convenience
- Fits up to 1.75" (45mm) belt loops

45 Mag/Cuff Paddle

- Paddle adjustable for carry height and angle
- Easy one-handed draw for handcuffs
- Accommodates standard, large and hinged handcuffs
- Plain finish, tan or black; 4 sizes

PATENTED

34 Open Cuff Case

- Holds handcuffs chain down with friction fit
- Slides onto belts from 1.5" (38mm) to 2.25" (58mm) wide
- Plain finish, tan or black

B4 Ranger Belt 1.75"

Features the popular Western billet design. Plain or basket finish; tan, unlined. 1" buckle. 32" - 46" (81cm-117cm).

B8 Heavy Duty Belt 1.75"

Full grain heavy cowhide. Plain or basket finish; tan, unlined. 32" - 46" (81cm-117cm).

B5 Dress Belt 1.5"

Perfect for dress or casual. Plain or basket finish, tan or black, unlined. 32" - 46" (81cm-117cm).

B9 Reversible Fancy Stitched Belt 1.75"

Smooth, full grain leather on one side, suede on the other. Plain finish, tan with fancy stitching. 32" - 46" (81cm-117cm).

Bianchi Leather

We use only select full grain, U.S. tanned cowhides - the best available. Our tan belts and accessories reflect the natural blemishes or scars from the animal itself, giving each its own distinctive look. Our craftsmen then hand rub a natural oil deep into the hide for a rich looking, long lasting finish.

B12 Reversible Sport Stitched Belt 1.5" (38mm)

A narrower version of the original fancy stitched belt. Natural oil finish on one side, suede on the other. Plain finish, tan with fancy stitching. 32" - 46" (81cm-117cm).

B27 Professional Belt 1.25" (38mm)

This premium leather belt features a deep oil tan finish and border stitching. Plain finish, tan or black. 24" - 44" (61cm-112cm).

B21 Contour Belt 1.75" (45mm)

Contoured at a natural angle to wrap around the body. Foam padded and fancy stitched with two thicknesses of heavy cowhide. Plain finish, tan. 26" - 42" (66cm-107cm).

7201 Nylon Gun Belt 1.75" (45mm)

Features our exclusive four part construction for durability. Comprising a ballistic weave fabric exterior, a high-density, closed-cell foam center, a polyethylene center stay and smooth nylon lining. Hook and loop closure. Sizes s, m, l, xl to fit 28" - 52" (71cm-132cm) waists. Black.

B26 Professional™ Belt 1.5" (38mm)

Unlined, yet stitched for an elegant appearance, making it ideal for dress occasions. Plain finish, tan or black. 24" - 48" (61cm-122cm).

7202 Gun Belt 1.75" (45mm)

Features four part construction, comprised of a ballistic weave fabric exterior, a high-density, closed-cell foam center, a polyethylene center stay and smooth nylon lining. Sturdy, quick-release polymer buckle. Sizes s, m, l, xl to fit 28" - 52" (71cm-132cm) waists. Black or Advantage Timber®.

UM84 Universal Military Holster

The UM84 series represents the commercial offering of the M12 holster. Fits both revolvers and most semiauto pistols. Its unique, ambidextrous design, when worn with other Bianchi accessories, provides several different carry modes.

U.S. AND FOREIGN PATENTS

- Removable flap for conversion to thumb break
- Easily converts to shoulder or chest carry
- Equipped with Quick-Lock™ belt fastener
- Equipped with mil-spec cleaning rod

UM92 Universal Military Holster

The UM92 incorporates the time proven design features and versatility of the M12/UM84 with the addition of a polymer trigger guard insert. This shield stabilizes the pistol by providing a solid anchor for the trigger guard to interface with. The UM92 is offered in two sizes (UM92I, UM92II) and is ideal for Glock and Sig Sauer weapons.

U.S. AND FOREIGN PATENTS

M12 Universal Military Holster

Designed by Bianchi in the 1980's the M12 is the standard issue holster for the U.S. Armed Forces and has been battle proven from Bosnia to Panama and Iraq. Its unique ambidextrous design, when combined with our modular accessories, allows the M12 to be worn in 14 different positions. The M12 is specifically designed to fit the Beretta 92 semiauto pistol and was awarded 5 separate patents for its utilitarian design.

U.S. AND FOREIGN PATENTS

T6500 Tac Holster LT

The T6500 meets the needs of the tactical operators who utilize a light mounted to their weapon. The holster is adjustable to fit most pistol mounted tactical lights. It mounts to our Modular Accessory Panel becoming an integral part of our Cobra® Tactical System. The thumb break has a secondary security strap for additional retention during high stress activities.

PATENTED

T6505 Tac Holster

Based on our best-selling M12 hip holster, the standard issue for our U.S. Armed Forces. Constructed of our durable trilaminate, this design features a polymer trigger guard shield that protects and stabilizes the trigger guard for improved firearm retention of newer semiauto models. Ambidextrous.

PATENTED

7200/7120 AccuMold® O.D. Duty Belt Rig

A select group of our best-selling AccuMold items available in O.D., featuring our 7120 Defender® Duty Holster for the Beretta 92 & Glock 17/22. Models offered are those shown. Special order item. See your dealer for availability. (See full product information on pages 9, 14, 18-19.)

M1020 Web Pistol Belt

- Tough 2.25" (58mm) wide mil-spec nylon
- Official military plastic buckle
- One size fits 30" to 48" (76cm-122cm)

T6510 Modular Accessory Panel

The heart of the Cobra® system, our Modular Accessory Panel offers security and adjustability. Pouches and holsters mount on the multiple web attachment points and the non-slip backing means the panel stays put during extreme use. The thigh strap is also vertically adjustable and features a Fastex buckle and high-strength elastic insert for flexibility and comfort. All pouches attach to the panel via our Quick-Lock™ belt clip.

PATENTED

Easy Attachment & Removal

Standard on our UM military holsters, our exclusive Quick-Lock™ belt clip has performed flawlessly for U.S. Armed Forces for almost two decades. Bianchi's Cobra® gear features this attachment system, so changing your equipment mix can be done in seconds, to quickly adapt to the needs of any given situation. No tools required.

M1425 Tactical Hip Extender

Created for demanding requirements of U.S. Special Warfare groups, this extender offers a rigid platform and incorporates an upper attachment point for accessories such as the M1025 magazine pouch (shown) or a large combat or survival knife.

UM84H Underarm Shoulder Harness

This optional harness allows all UM holsters to be worn under the arm in a vertical carry position. Harness attaches quickly to the holster in place of its flap. Specify semiauto or revolver. Fits up to 48" chest.

M1415 Thumb Snap System

Extends the mission capabilities of the UM92/UM84/M12 hip holster. With the holster flap removed, it offers more compactness and faster performance for tactical situations.

M13 Chest Harness

This versatile, front carry harness carries the holster four ways on the chest: vertical or angled, right or left hand. It's a completely self-contained system that replaces the flap on all UM holsters (except UM84R) and converts it to a shoulder holster. Top closure opens silently; hook and loop holds it open and out of the way. For use with or without a separate pistol belt.

M1025/M1030 Military Magazine Pouch

- Trim and compact
- Quick-Lock™ belt fastener fits up to 2.5" belt
- Holds two (M1025) or four (M1030) magazines or other accessories like first-aid kit or compass

PATENTED

At Bianchi, our goal is to provide you with the finest quality holster products. Fitted and used properly, a holster facilitates firearm safety. All firearms, however, are potentially dangerous, and if misused, may cause great harm, injury or death. You are responsible for becoming thoroughly familiar with the safe and proper use of your firearm under all conditions. You are also responsible for making sure your firearm is in proper, safe operating condition. Please read these very important safety warnings prior to use of any Bianchi holster.

Consumer Safety Warnings

FIREARMS SAFETY

Bianchi continually strives to provide the finest quality holster products with an emphasis on safety, function, comfort and convenience. Fit and used properly, a holster is a valuable aid in carrying a firearm. Because holsters are used to carry firearms, however, any person purchasing or using a Bianchi holster should read and understand the following warnings and instructions, as well as being thoroughly familiar with the proper and safe use of his or her firearm in the circumstances in which he or she is using it.

All firearms are potentially dangerous. Their use may cause great harm, personal injury or death. For your own safety and the safety of others, it is your responsibility to carry and handle a firearm safely. Proper training is available through accredited firearms safety programs conducted through police departments, the military, state-run hunter safety programs, and other agencies such as the National Rifle Association. Do not carry or use a firearm without a thorough knowledge of its characteristics and safe use in the circumstances in which you intend to use it. It is also your responsibility to be certain that your firearm is in proper, safe operating condition.

Pin to rest on empty chamber

Be sure firearm is not cocked when placing in holster

CARRYING

Loaded Firearms

Carrying a firearm with a live cartridge in the chamber could result in an accidental discharge. Certain single-action revolvers and semiautomatic pistols should only be carried with the hammer or firing pin resting on an empty chamber. It is your responsibility to exercise extreme caution when handling or carrying any handgun, and to assume at all times that the gun is loaded.

Cocked Hammers

Be sure your firearm is uncocked before placing it in the holster. Carrying a cocked firearm in the holster or attempting to cock or uncock a firearm when it is in the holster can result in an accidental discharge.

Take-Away

Carrying a firearm is a serious responsibility and must be given constant attention and awareness at all times. It is not possible for any holster to be manufactured which is completely "take-away proof". It is your responsibility to exercise extreme caution at all times during any situation where another individual may attempt to take away your handgun and to strictly adhere to any procedure in which you have been trained.

Retention

Do not rely on your holster's retention capabilities to justify activity which may dislodge your firearm. Your firearm should be held in place by hand during vigorous physical activity to avoid the gun falling from the holster. Always make sure the firearm is firmly seated in its proper position in its holster.

HOLSTERING

Always point your handgun in a safe direction and use extreme caution when holstering or unholstering your handgun to avoid an accidental discharge. Never place your finger inside the trigger guard while holstering or removing your gun from the holster. Keep your thumb on the back of the hammer or the slide when inserting your gun into the holster to help prevent movement during insertion. Be certain that your handgun is securely seated in the holster and that any integral strap is properly engaged.

FIT

Your Bianchi holster should only be used with the specific gun model for which it was designed. After being certain your firearm is unloaded, you should test your holster for proper fit. Never place a loaded firearm in a holster without first testing it unloaded for proper fit. Use only the handgun for which your holster was designed. If there is any doubt, cease use immediately.

It is important for your own safety and protection that you physically check the compatibility of the handgun with the holster. Although Bianchi attempts to fit the most current model handguns, manufacturers of handguns constantly update their product specifications, often several times per year. Even the slightest changes can have important safety consequences with regard to the way in which a gun fits a particular holster. Bianchi will not be responsible for such changes or for typographical or other human errors which can and do occur despite diligent efforts.

It is also your responsibility to regularly check your holster, including any retaining strap, snap and spring or other retaining device, for precise fit and performance. Should your holster become ill-fitting, worn, loose, or defective at any time, cease use immediately.

Do not use trigger shoes

ALTERATION

Neither your gun nor your Bianchi holster should be modified in any way because alteration may increase the chance for accidental discharge. All Bianchi holsters are designed to function safely and efficiently with modern, high quality factory equipped handguns. Use of trigger shoes, target triggers or grip adapters may prevent the handgun from correctly fitting the holster. Trigger shoes, for example, are outmoded, removable devices that provide a trigger surface which is usually wider than the handgun's protective trigger guard. Trigger shoe equipped handguns should never be used with any holster, because an accidental discharge may occur which could cause great harm, personal injury, or death.

To Insure Your Satisfaction

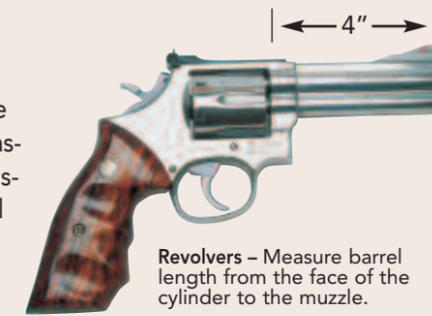

Your Bianchi product is carefully crafted from the finest materials. For product longevity and your own safety, here are some common sense guidelines:

INSPECTING YOUR PRODUCT

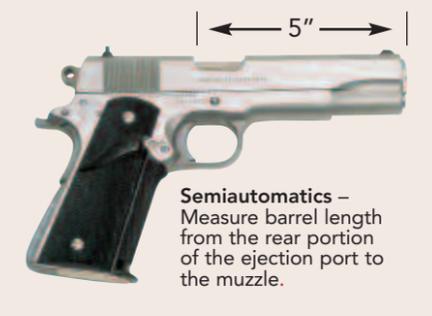

1. Thoroughly read the safety information in this catalog and other information included with your purchase.
2. Make sure your handgun fits properly, safely and to your satisfaction.
3. Visually inspect for any defects in material or workmanship.
4. Check the retainer strap, spring or other retaining device and be certain that your handgun is properly and safely secured for your application.
5. Visually inspect all stitchings, snaps, springs, clips and rivets for looseness, breakage or other damage.
6. Pay special attention to points of strain and critical points such as belt loops, welts, retainer straps, springs or other retaining devices.
7. Look for any sign that leather or other materials have become dry or brittle.
8. Should your holster or other product become worn, loose, defective or ill-fitting, cease use immediately.

How to Measure Barrel Length

Before you order a holster, please be sure you have the correct barrel measurement for your handgun. This measurement is very easy to do and it will insure that you get the holster that's exactly right for your gun.

Revolvers – Measure barrel length from the face of the cylinder to the muzzle.

Semiautomatics – Measure barrel length from the rear portion of the ejection port to the muzzle.

Care and Storage

Storage

Store your leather in a cool, dry place. High humidity can cause mildew, while dry heat and direct sunlight can cause drying and cracking. If you leave your handgun in the holster or other product, check it daily for moisture, condensation or corrosion. Changing atmospheric conditions, heavy perspiration and other factors could create such conditions.

Care

Treat the interior of your holster with spray silicone to help protect against excess moisture. It also speeds the draw by reducing friction. If your product becomes water-soaked, reshape it as best you can and allow it to air-dry at room temperature. Do not use a hot oven - it will shrink, harden and crack the leather.

Because Bianchi leather is hand finished with our special leather dressing, should your leather product become dry or scratched, you can treat the exterior with a commercial leather dressing that does not contain lacquer. (Be careful when using Neat's foot oil; large amounts will soften the leather.)

Brass cartridges or other brass hardware when stored with leather will acquire a greenish residue called "verdigris". It is a natural product of a chemical reaction between brass and vegetable tanned leather, and it wipes off. (Using nickel-plated cartridges in belt loops will avoid this condition.)

Storage

AccuMold and AccuMold Elite products have been field-proven to withstand a wide variety of environmental conditions. AccuMold and AccuMold Elite products should be stored in a cool dry environment when not in use. We do not recommend storing these products in a vehicle trunk or other areas where extreme heat can exceed the outside environment.

Cleaning

AccuMold and AccuMold Elite products are best cleaned with a solution of warm soapy water and a soft brush. A toothbrush and dish soap work well. If decontamination is required, an antibacterial soap or 10% solution of household chlorine bleach may be used. After cleaning simply rinse off with fresh water and let air-dry. Be sure the product is completely dry inside and out prior to use.

When AccuMold and AccuMold Elite products are exposed to salt spray or immersed in salt water it is important to thoroughly rinse in warm water as soon as possible. Never use solvents such as acetone to clean AccuMold products, as this could result in damage to the product.

No Modifications or Customizing

It is not possible to alter or modify Bianchi products in any way. Please do not ask for custom modifications, as we can make sure of your satisfaction only by providing you with time-tested, proven designs. Bianchi reserves the right to improve its product designs and update specifications without notice.

Your Satisfaction is Important

Bianchi products are crafted with the utmost care by our expert artisans. If you have any questions about the use or function of your holster, please contact us so that we can make an evaluation of the product to ensure your satisfaction.

Conditions of Sale

In accordance with the provisions of the California Song-Beverly Consumer Warranty Act, the product is sold "as-is" and "with all faults." The entire risk as to the quality and performance of the product is with the buyer. Should the product prove defective following its purchase, the buyer and not the manufacturer, distributor, or retailer, assumes the entire cost and responsibility of all necessary servicing or repair. The implied warranties of merchantability and fitness for a particular purpose and all other warranties, express or implied, are excluded from the transaction and shall not apply to the product sold. The determination of the fitness or the suitability of any product for a specific use is the responsibility of the buyer. Some products which are manufactured by outside vendors for Bianchi carry their own manufacturer's warranty statements. All Bianchi prices, product designs, and availability are subject to change.

Customer Service

Bianchi products can be purchased through our worldwide network of authorized dealers and distributors. For information on a dealer nearest you, or to answer other questions you may have, please check out our web site or call our friendly, knowledgeable customer service staff between the hours of 7:30 AM and 4:30 PM Pacific Standard Time.
