Shotguns: Pardner® Pump

The NEF Pardner® Pump has already made a name for itself as the best value you'll ever find in a 12 gauge pump shotgun, and now, we are aiming to bring you the best in value for 20 gauge pump actions with components scaled down to the proper proportions.

With steel receiver, double action bars, cross-bolt safety, screw-in modified choke, that is steel shot compatible and easy take down, we challenge you to compare the Pardner Pump feature-for-feature with any of its higher-priced competitors. All Pardner Pumps are drilled and tapped for a scope base.

Pardner® Pump Walnut. Our standard model that started it all. American walnut stock, ventilated recoil pad, chrome-plated bolt and classic grooved fore-end. Available in 12 and 20 gauge.

Pardner® Pump Synthetic. A rugged synthetic stock makes this model ideal for tough hunting conditions. It has molded-in checkering and a ventilated recoil pad, and the quality features of the standard walnut Pardner Pump. Available in 12 and 20 gauge.

Pardner® Pump Youth. Available with either a rugged black synthetic stock, or classic American walnut, these 20 gauge pumps have 21" barrels, reduced length of pull, and weigh slightly less than their adult counterparts.

The Pardner® Pump is backed by the same H&R 1871® one-year warranty protection as all our H&R and NEF branded firearms.

Screw-in choke tube and ventilated rib.

Positive cross-bolt safety and convenient action release lever.

Shotguns: Pardner® Pump

Pardner® Pump Slug Gun. Due to popular demand, a Pardner Pump Slug Gun, in both 12 and 20 gauge, is included in the pump line. Featuring 22" and 21" fully rifled barrels respectively, these guns feature a ramp front sight and a fully adjustable rear sight and swivel studs. Like all Pardner Pumps, they are drilled and tapped for a scope base.

Pardner® Pump Turkey. The synthetic stock of this model is finished in a popular camo pattern, making it ideal for turkey hunting. It has a 22" barrel with vent rib, Tru-Glo front and rear sights, and a screw-in, extra-full turkey choke that is steel shot compatible. It also has molded-in checkering, a ventilated recoil pad, swivel studs, and it's drilled and tapped for a scope base.

Pardner® Pump Combo. Now you can have the versatility of both a 28" smoothbore hunting barrel and a 22" rifled slug barrel with sights at a very reasonable price. The smoothbore barrel has a ventilated rib, steel shot compatible modified screw-in choke tube, and a bead front sight. The receiver is drilled and tapped for a scope base and the bolt is chrome-plated.

Pardner® Pump Protector. A home defense model, the Protector features a black synthetic stock with an 18½" barrel, swivel studs, grooved fore-end and ventilated recoil pad. The receiver is drilled and tapped for a scope base.

Shotguns: Excell Auto™

This line of autoloading 12-gauge shotguns represents the super-value of an imported shotgun built to the specifications and quality standards of H&R 1871. And they have the full backing of an H&R warranty.

All models feature up to 3" Magnum capability and 5-shot magazines. They also feature ventilated recoil pads and vent rib barrels (except the slug barrel).

Excell Auto™ Synthetic. Features a black synthetic pistol grip stock with molded-in checkering and a ventilated recoil pad. Its 28" vent rib barrel has 4 screw-in steel shot compatible choke tubes (IC, M, IM, F).

Excell Auto™ Walnut. This model features a checkered walnut stock with fluted comb and ventilated recoil pad. The 28" vent rib barrel has four screw-in steel shot compatible choke tubes (IC, M, IM, F). Walnut model comes with stock adjustment shim kit. When fitted between the buttstock and the receiver, shims adjust the cast-on or cast-off and raise or lower the drop at comb and heel.

Excell Auto™ Waterfowl. A complete camo dip finish makes this model an ideal duck and goose gun. It features a 28" vent rib barrel with four steel shot compatible screw-in choke tubes (IC, M, IM, F).

Excell Auto™ Turkey. This turkey specialist features a complete camo-finish. It has a 22" vent rib barrel and four steel shot compatible choke tubes (IC, M, F, and Extra Full Turkey), and fiber optic front and rear sights.

Excell Auto™ Combo. A super value in a shotgun/slug gun combo package. It features a black synthetic stock with molded-in checkering and a ventilated recoil pad. The 28" smoothbore barrel has a vent rib and four steel shot compatible choke tubes (IC, M, IM, F). The 24" slug barrel is fully rifled and has front and rear fiber-optic sights.

Shotguns: Topper®

For farmers, hunters and folks who live off the beaten path, the single shot, break-open shotgun is basic equipment. This versatile and inexpensive gun protects the henhouse, keeps meat on the table and provides that much-needed measure of security. For the young'uns, it is a good introduction to responsible firearms ownership... and the single shot action encourages careful shooting and ammo conservation.

Topper®. At Harrington & Richardson, the Topper name has been associated with a long-lived line of rugged, reliable and affordable single shot shotguns, well-known to generations of shooters. We make it in 12, 16, and 20 gauge, and .410 bore with a variety of chokes. It features automatic shell ejection for fast reloading, a brass bead front sight for fast target acquisition, a rugged nickel-plated frame, and a distinctive black-finished hardwood stock and fore-end.

Topper® Deluxe. The Topper Deluxe is available in 12 gauge with a 3 ½" chamber and a screw-in choke that can handle both

lead and steel shot. Like the Topper, the Topper Deluxe features the trademark black and nickel finish, with black-finished hardwood stocks and fore-ends. It includes a ventilated recoil pad for greater shooting comfort.

Topper® Deluxe Classic in 12 and 20 gauge. An upgraded version of the Topper is available in 20 gauge, as well as 12 gauge with a ventilated rib and choke tube system (modified tube provided). The Topper Deluxe Classic features a 28" vent rib barrel with a bead front sight, and a nickel-plated receiver. The stock is genuine American walnut with checkering and a ventilated recoil pad. The most handsome Topper ever!

Topper® Junior. The Topper Junior is an ideal firearm for training the next generation of America's hunters. Its 22" barrel is scaled ideally for smaller-framed shooters, and it incorporates a recoil pad to make a beginner's first shooting experiences more comfortable and rewarding.

Topper® Junior Classic. For that very special birthday or event, the Topper Junior Classic is a gift that any youngster will always remember. Like the Topper Junior, the Topper Junior Classic has a 22" barrel and is proportioned properly for a youthful shooter. This special model, however, features a blued frame, and a checkered American black walnut stock and fore-end.

On every H&R shotgun, our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up tight as a bank vault door. Our Transfer Bar System prevents accidental discharge, and each gun comes complete with its own special locking device for added safety in storage or in transport.

The Harrington & Richardson family of shotguns offers you all the performance and reliability you need at a very reasonable price...and the well-earned pride that comes from one-shot success.

Shotguns: Pardner® & Tracker II

Pardner®

We are proud of our history of making single shot shotguns that earn their keep without breaking the bank. We offer the Pardner® shotguns in 12, 16, 20 and 28 gauges, and .410 bore, and with a variety of chokes and stocks.

Our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up solidly when closed. Our Transfer Bar System prevents accidental discharge, and each gun comes complete with its own special locking device for added safety in storage or in transport. We also offer three Pardner models with synthetic stocks and steel shot compatible screw-in modified choke tubes.

What you take into the woods can have a big impact on what you take out of the woods. For the ultimate satisfaction that comes from one-shot expertise, see your Harrington & Richardson dealer and select that special gun that suits you and your budget best.

Pardner® Turkey

Our Pardner line offers you a wide range of turkey guns from which to choose. In addition to our 10-gauge models, we offer 12-gauge models in camo or black, with fixed full choke or screw-in turkey choke, and a 20-gauge, 22" barreled youth model with camo-finished hardwood.

Tracker II Slug Gun

In some areas, deer hunting is a "shotgun-only" proposition. Years ago, that might have been a handicap. Today, a new breed of slug guns, the shotgun hunter can have a far-reaching advantage.

Our tack-driving single shot slug guns can cost less than an accessory slug barrel for your repeater. The Tracker II Slug Gun is available in both 12 and 20 gauge, with a 24" fully-rifled barrel designed for long-range accuracy with sabot-style slugs. The Tracker II features a walnut-finished hardwood stock, adjustable rifle-type sights, a recoil pad and sling swivel studs.

Rifles: Handi-Rifle™

If meat on the table were the sole object of the hunt, then a trip to the supermarket would suffice. We all know that there's much more involved. At its best, the hunt has always been the acid test of the hunter's skills. And the truly skilled hunter is the one who can confidently achieve his or her goal with one well-placed shot.

For generations, the single shot rifle has been the choice of the accomplished and self-assured hunter. And for years, we have

honored that choice. Our centerfire rifles are designed and built to make that one shot count. For the varmint or big game hunter, we offer many very attractive options.

Handi-Rifles are available in a wide range of rifle calibers ranging from 22 Hornet to the 500 S&W. New for 2007 are three new models that come with factory-mounted and bore-sighted 3-9x32 scopes.

Transfer Bar System

All H&R single shot firearms incorporate a special safety feature – a transfer bar system that prevents the gun from being fired unless the hammer is fully cocked and the trigger pulled and held completely to the rear.

With the Transfer Bar System, the hammer never strikes the firing pin directly. Instead, cocking the hammer raises the transfer bar, which is held in the “up” position only if the trigger is pulled and held fully to the rear. Only then can the energy of the hammer be transferred to the firing pin.

The transfer bar system prevents the type of accidental firing that might result from a

blow to the hammer or from a dropped hammer during the cocking process.

We are committed to safety as well as to quality. The shooting sports have an enviable safety record among all leisure activities, and we applaud your efforts to

maintain and improve that record. We urge all shooters to follow standard firearm safety practices and to participate in safety training.

Rifles: Synthetic/Stainless/Superlight Handi-Rife™

Synthetic Handi-Rifle™

For those who hunt regardless of the weather, today's cutting-edge high-density polymer stocks are a necessity. Synthetic stocks and fore-ends make these Handi-Rifles™ the toughest, most weather-resistant ones ever built. Like all our rifles and shotguns, these high-durability, synthetic stock versions incorporate our Transfer Bar System. For added versatility, all rifles can be factory-fitted with your choice of accessory rifle and shotgun barrels. For information on accessory barrels, call our Service Department at (978) 630-8220.

Stainless Handi-Rifles™

Spend more time outdoors! Five synthetic Handi-Rifles™ are available for worry-free all-weather hunting. All models feature matte-finish stainless steel 22" barrels, with scope mount rail and hammer extension. Receivers are matte nickel finished, and stocks and foreends are black matte high-density polymer.

Superlight Handi-Rifle™

When the going gets tough and the game is deep in the forest or high on the mountain, every extra ounce you carry feels like a pound. That's the time when the Superlight Handi-Rifle is worth its weight (or lack of it)

in gold. These super utility rifles weigh only 5½ pounds – even less in their Youth model configurations. Stocks and fore-ends are made of high-density black polymer, and are fitted with recoil pads and swivel studs. Fully adjustable rifle sights outfit the Youth model, which is also drilled and tapped for a scope base. The 223 Rem. and 243 Win. include a Monte Carlo style stock and factory mounted scope base, plus an offset hammer extension to ease cocking when a scope is mounted.

Rifles: Sportster™ /Versa Pack™

Sportster™ 17 M2

Sportster™ 17 M2
Sportster™ 17 HMR
(Scope not included)

The 17 rimfire sizzler is making a name for itself, and so is the Sportster M2. The 17 Mach 2 cartridge is a shorter version of the super-accurate 17 HMR. It features a high-performance 17-grain V-Max bullet that exits the muzzle at 2,100 feet-per-second, and is superbly accurate.

The Sportster M2 is built on our proven break-open, side-lever single shot action, and has a heavy 22" barrel, complete with scope mount.

The stock and fore-end are molded in high-density black polymer, with recoil pad and swivel studs.

Sportster™ 17 HMR

Here's strong medicine for varmints! The Sportster™ 17 HMR is chambered for the hottest rimfire cartridge on earth. Hornady's 17 Magnum Rimfire is the same length as a 22 Win. Mag cartridge, but generates an amazing 2,500 fps muzzle velocity, at least 25% faster than the 22 Mag. It fires a high-performance 17-grain V-MAX boat-tail jacketed bullet. The Sportster™ 17 HMR features our field-proven break-open, side-lever single shot action and a heavy 22" varmint barrel, complete with scope mount. The stock and fore-end are high density black polymer, with recoil pad and sling swivel studs.

Sportster™/Sportster™ Youth

Of all the calibers for which rifles are chambered, the 22 rimfire is America's favorite. Whether you're ventilating paper targets, popping tin cans, or hunting squirrels for a traditional Brunswick stew, the "double deuce" is the caliber of choice. Accurate and economical, it's been America's "fun caliber" since the 1880s.

We pride ourselves in making 22s that can provide generations of shooting enjoyment. Our Sportster™ rimfire rifle, in both 22 Long Rifle and 22 Win. Mag., features a precision-crowned 20" barrel. This single shot break-open rifle is finished in low-profile matte blue and features a weather-proof black matte high-density polymer stock and fore-end with swivel studs. It also features an adjustable open rear, and ramp front sight.

22/410 Versa-Pack™

The handiest little field gun ever is fitted with a light weight black polymer stock. It's a super, youth-size 22 rimfire rifle for plinking, informal target practice and pest control. The 20" barrel comes with adjustable rifle sights and is chambered for 22 Short, Long and Long Rifle. Swap barrels and, in an instant, it's a light and fast-handling .410 shotgun, a natural for small game. The 22/410 Versa-Pack™ is based on our field-proven single shot action with Transfer Bar System. Best of all, you get all this performance and versatility in one compact package, at a cost far less than two separate guns.

Shotguns/Rifles: Survivor®

Ready for service when the going gets rough, the Survivor series provides the go-anywhere, do-everything versatility and rugged dependability you want. Take your pick of shotgun, heavy barrel rifle or .410/45 Colt configurations to meet any challenge. A special stock compartment stores survival items. Survivor models in the unique .410/45 Colt are available in either a blue finish or a

high-durability electroless nickel finish for harsh environments. The heavy bull-barrel versions in 223 Rem. and 308 Win. are offered in low-profile matte blue. Our Transfer Bar System provides an added measure of safety. Standard shotguns incorporate a Modified Choke, while the .410/45 Colt model has a fully rifled barrel and screw-in choke for shotshell use.

Muzzleloaders: Sidekick™

Two slick Sidekick™ muzzleloaders are available: the blued model features a 26" (Magnum) barrel with deep-cut rifling for pinpoint accuracy, and a walnut-finished hardwood pistol-grip stock with ventilated recoil pad.

The stainless model features a matte nickel finish receiver, stainless steel 26" (Magnum) barrel with deep-cut rifling for pinpoint accuracy, and high-density, black matte polymer pistol grip stock with ventilated recoil pad.

The Sidekick™ design is based on a reconfigured version of the familiar H&R single-barrel break-open action. It uses standard #209 shotshell primers held in place by a patented primer carrier. This rifle is extra easy to clean and corrosion-resistant. Both models feature adjustable fiber-optic open sights, a unique telescoping ramrod, swivel studs and a ventilated recoil pad, and are drilled and tapped for a scope base.

Unique telescoping ramrod.

The primer is held in place by a special, patented, reusable primer carrier, which also serves as a visual indicator that the rifle is primed.

Whether you choose the blued finish or the stainless steel, both include our Transfer Bar System. This feature provides an enhanced measure of safety against accidental discharge. Each gun also includes its own special locking device for safe transport or storage.

Shotguns: Ultra Slug Hunter/Tamer®

Ultra Slug Hunter

Thanks to new projectile technology and a new breed of slug guns, today's shotgun hunter can reach way out with impressive accuracy and striking power.

At Harrington & Richardson, we offer a range of tack-driving single shot slug guns that can cost less than an accessory slug barrel for your repeater. At the top of the list is our heavy 24" barrel, fully-rifled H&R Ultra Slug Hunter, in 12 or 20 gauge. We've shot extremely tight groups at 100 yards, using sabot slugs. The Ultra Slug Hunter comes complete with a Monte Carlo stock, recoil pad, factory-installed scope base, sling swivels and a nylon sling. A walnut-finished American hardwood stock is standard, and the Deluxe model comes with a checkered laminated stock and fore-end. A Youth Model is available with a rifled 20-gauge 22" barrel.

On all Harrington & Richardson slug guns, our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up solidly

when closed. Our Transfer Bar System aids in preventing accidental discharge, and each gun comes complete with its own special locking device for added safety in storage or in transport.

Tamer/NEW Tamer 20

For those intrepid spirits who venture into uncharted regions and unpredictable climates, our weather-defying Tamers are welcome companions. Here is a versatile, easy-to-handle shotgun with a high-density polymer stock and fore-end and matte-finish nickel receiver and barrel that can shrug off the worst that Mother Nature can hand out. The unique thumbhole/pistol grip assures you of a firm hold. The specially designed stock also enables you to store four rounds of .410 ammo (Tamer) and 3 rounds of 20 gauge ammo (Tamer 20).

The Tamers include all the H&R high performance features, including automatic shell ejection, our Transfer Bar System to prevent accidental firing, and a unique locking system for safe storage.

Rifles: Ultra Varmint/Ultra Hunter

For the dedicated hunter, the memories and pride of accomplishment are what endure. At its best, the hunt has always been the acid test of the hunter's skills. And the truly skilled hunter is the one who can confidently achieve his or her goal with one well-placed shot.

For generations, the single shot rifle has been the choice of the accomplished and self-assured hunter, the true heir to a noble tradition. And Harrington & Richardson has

honored that choice. Our centerfire Ultra rifles are designed and built to make that one vital shot count. Our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up solidly when closed. Our Transfer Bar System aids in preventing accidental discharge, and for added safety in storage or in transport, each one of our guns comes complete with its own special locking device.

Ultra Varmint Fluted

This exciting model combines a high-tech synthetic stock with a fluted bull-barrel to create the ultimate varmint rifle. It features a skeletonized butt stock with a vertical adjustment knob for shooting from the bench and a ventilated recoil pad. The grooved forearm has an adjustable insert for mounting a bipod. And this tack driver is chambered for the hottest varmint cartridges: 204 Ruger, 22-250 Rem., 223 Rem., and 243 Win.

Rifles: Buffalo Classic®, Target & Carbine Models

Tradition, history and American craftsmanship combine to create today's Harrington and Richardson rifles, continuing a legacy that began in 1871. The Harrington and Richardson 45/70 Government Buffalo Classic, the 38-55 Win. Target Model and the new 45 Colt Carbine are true American classics to their very core. Modeled after the Frank Wesson tip-up rifles that were first made in Worcester, Massachusetts in the 1850s, these modern classics fill the need of those who simply enjoy shooting these great old cartridges.

They reflect true 19th century styling, including antique color case hardening on the frame and a crescent butt plate, plus cut checkering on their American black walnut stocks and fore-ends.

The Harrington & Richardson Buffalo Classic in 45/70 Government features a mid-weight 32" barrel to extract all the velocity possible out of the venerable 45/70 cartridge. The 32" barrel also provides the necessary sighting radius for long-range matches. It's equipped with a Williams receiver sight, and a Lyman target front sight with eight aperture inserts.

The Target Model in 38-55 Win. follows a tradition of fine target offerings. The 38-55 cartridge traces its roots to the early 1880s, when it was developed for target shooting by the Ballard Rifle Company. The Target Model employs a 28" heavy target barrel and original style rifling for consistent accuracy. It has a Williams receiver sight, and a Lyman target front sight with eight aperture inserts.

The New Harrington & Richardson CR Carbine in 45 Long Colt caliber appeals to nostalgia and cowboy fans. This fast-handling, 20-inch barrel carbine features a case-colored receiver, checkered walnut stock, and a case-colored crescent steel buttplate. It's equipped with carbine-style open sights.

Harrington & Richardson® Sporting Firearms

2007

The Other Branch of the Marlin Family

In November of 2000, The Marlin Firearms Co. purchased the assets of H&R 1871, Inc.

Founded in 1871 (one year after Marlin), the original company started in a plant in Worcester, Massachusetts.

The company subsequently moved to Gardner, Massachusetts, and today employs over 200 people. Marketing its products under the brand names of Harrington & Richardson® and New England Firearms®, H&R 1871® is the largest manufacturer of single shot shotguns and rifles in the world.

Support Your Sport

If we are going to preserve cherished hunting and shooting traditions, we must all get involved in spreading the truth, as well as contributing time and money to worthwhile conservation organizations.

Join a sportsmen's club. Buy Duck Stamps. Write letters to editors. And join the NRA. Learn the advantages of National Rifle Association membership. Write: National Rifle Association, 11250 Waples Mill Road, Fairfax, VA 22030.

Barrel Accessory Program

Harrington & Richardson® offers a barrel accessory program that allows the purchase of additional barrels that may be added to H&R & NEF firearms of our manufacture since 1987. Rifle frames may be fitted with additional rifle, shotgun, and muzzleloader barrels; and shotgun frames may be fitted with additional shotgun and muzzleloader barrels (only). All barrels must be factory fitted in Gardner. To learn more about this program, please visit our website at www.hr1871.com, or write to: H&R 1871, LLC, ATTN: Barrel Accessory Offer, 60 Industrial Rowe, Gardner, MA, 01440.

H&R 1871® proudly supports the Hunting & Shooting Sports Heritage Fund.

Congressional Sportsmen's Foundation

The Congressional Sportsmen's Foundation serves as American sportsmen's link to Congress, in order to ensure that current and future generations will have the right and opportunity to hunt, fish, and trap.

Governed by a Board of Directors comprised of industry and conservation leaders, the Congressional Sportsmen's Foundation educates Members of Congress, staff, and federal officials to better understand and represent their hunting, angling, and trapping constituents. In this way, the CSF promotes legislation and policies favorable to conservation and responsible management of our nation's fish and wildlife resources.

To learn more about CSF activities and how to become a member, write: The Congressional Sportsmen's Foundation, 110 North Carolina Avenue, SE, Washington, DC 20003, Phone: (202) 543-6850, Fax: (202) 543-6853 or online: www.sportsmenslink.org.

NEF Dog Training/ Starter Revolvers

Available in both 22 and 32 caliber blank, these American-made revolvers are rugged and reliable. Metal finish is matte blue, and a bright orange cap on the barrel is a reminder that the revolver is not a firearm. The grips are walnut-finished hardwood, and a blued lanyard ring is included for security.

The Bureau of Alcohol, Tobacco and Firearms has designated these revolvers "non-firearms," so they are not subject to any Federal firearms restrictions.

Both double-action revolvers feature our Transfer Bar System, virtually eliminating the possibility of an unintentional discharge.
