★★★ RUST PREVENTION MADE SIMPLE ★★★

When moisture on a firearm is combined with salt and other components, it's inevitable that rust isn't too far behind. If rust appears and is left unattended, corrosion or pitting will form, in return ruining the look of the firearm and potentially halting its functions.

Outers Gun Oil Rust Preventative is the perfect solution for preventing such corrosion. It coats evenly and will not stick or gum up like other oils. It is polarized to bond naturally with metal, forming a lasting barrier to corrosion and the special additives increase lubricity and rust prevention.

★★★ QUICK AND EASY PROTECTION ★★★

After putting several rounds through your gun, build up from lead, copper and other material begins to form. This build-up can lead to accuracy and function problems down the road. Nitro Solvent, a long time

member of the Outers family, is popular for its ability to loosen lead, copper and powder/fouling. Its non-acid formula also leaves behind a light layer of oil for corrosion protection.
