For All Your Scopes

Our Patented **Scopecoat[™]** protective covers are constructed of the highest quality neoprene (2, 3, 5 and 6mm thick) laminated with nylon. It's simple design safeguards your scope from dings and scratches, dust, dirt and moisture. The shock and moisture absorbing Neoprene helps draw moisture and condensation (sweating) away from your scope and helps protect it from the elements.

Our standard **Scopecoat[™]** is available in Black, Natural Gear[™] Camo, Coyote Brown and Dark Earth unless otherwise noted. XP-6 Flak Jacket **Scopecoat[™]** is available in Black only.
