The firearms industry is one of tradition. Noble tradition.

It's why we proudly declare “Since 1794.” In all honesty, truly innovative moves in firearms design since the death of John M. Browning can probably be counted on one hand.

And that's okay. Unlike some of our colleagues in the industry, you won't see Springfield Armory putting a new finish or different colored grip on a 96-year-old design and calling it NEW. We save our proclamations of innovation for things that are truly innovative. Like John Garand's M1 design or the new EMP™ (see pages 22-23). Some people aspire to own the latest. Others aspire to own the best.

Either way, in 2007, Springfield has you covered.
GI SERIES
Forged frame, slide and barrel, low-profile military sights, standard magazine well and spur hammer, standard ejection port, arched mainspring housing with lanyard loop, vertical slide serrations, hardwood U.S. grips, and titanium firing pin.

MIL-SPEC™
Forged frame, slide and barrel, 3-dot combat sights, high-hand™ grip, beveled magazine well, polished feed ramp & throated barrel, arched mainspring housing, stainless steel barrel, lowered and flared ejection port, angled slide serrations, loaded chamber indicator and titanium firing pin.

LOADED
Precision-fit forged frame, slide and barrel, flat serrated mainspring housing, lowered and flared ejection port, Delta™ lightweight hammer, loaded chamber indicator, titanium firing pin, carry bevel treatment, ambidextrous thumb safety, high-hand beavertail grip safety, dovetail front sight, premium fixed or adjustable rear sights (many with tritium inserts), Torx head grip screws and lightweight, adjustable speed trigger.

TRP™ & TROPHY MATCH
Forged frame, slide and barrel, fully checkered front strap and mainspring housing (20 lpi), match barrel and bushing, wide-mouth magazine well, tuned trigger and your choice of stainless steel or durable Armory Kote™ Teflon.

SPRINGFIELD ARMORY® NEW 1911 PACKAGES
All Springfield Armory 1911 pistols now include a deluxe carrying case, an injection-molded belt-slide holster, double magazine pouch, cable lock and bore brush, all for the same price as the gun alone.

SIZE COMPARISON

In a world where "one size fits all" is increasingly sold as a benefit, Springfield Armory recognizes that one platform isn’t sufficient for all operations. And whether your operation is a felony vehicle stop, an undercover drug bust, breaching an entry to a hostage standoff, winning the world championships in your tactical or target shooting discipline or just punching holes in aluminum cans to pass the time at deer camp, Springfield Armory offers the features you need in the frame size best suited to your end use.

Springfield Armory designers have gone well beyond the standard full-size, mid-size and compact configurations to include long-range tack drivers and the new Enhanced Micro Pistol (See Pages 22-23)— the new standard in concealable 1911-style pistols.
The TRP® series of Tactical Response Pistols delivers many of the features that parallel our FBI contract custom pistol — along with the resulting performance — but at a fraction of the cost. Fully checkered front strap and mainspring housing (20 lpi), match barrel and bushing, wide-mouth magazine well, tuned trigger and your choice of stainless steel or durable Armory Kote™ Teflon. Choose from three TRP models.

The Springfield Armory Trophy Match takes many of the tactical features developed for the TRP family of pistols, wide-mouth magazine well, highly tuned trigger, match barrel and bushing and checkered front strap and mainspring housing.

These features guarantee functionality while its contrasting stainless steel finish is easy on the eyes. Fully adjustable target sights enable you to take advantage of all of this gun’s accuracy.

**THE TRP PRODUCTION CYCLE**

Springfield Armory Tactical Response Pistols begin as high-end production guns. However, before leaving the factory, each TRP undergoes a series of operations that only a trained master pistolsmith can execute. The result is the perfect hybrid of a top-end production gun and a custom rig.

</table>
Springfield Armory Operator® model pistols were the first pistols offered by a major 1911 manufacturer having a light mounting rail forged directly into the pistol frame. While others have followed our lead, we still offer the most comprehensive line of 1911 light rail guns available, which now includes the first aluminum-framed 1911s with integral light rails.

The standardized Picatinny mounting platform readily receives the most popular white-light, infrared and laser illuminating devices used by US military Spec-Ops and law enforcement SWAT teams. These fully capable, extreme duty firearms are truly the best of the best.
These Loaded models include premium adjustable rear sights (select models with tritium inserts), precision-fit forged frames, slides and barrels, front & rear cocking serrations on full-size guns, flat serrated mainspring housing, lowered and flared ejection port, Delta™ lightweight hammer, loaded chamber indicator, titanium firing pin, carry bevel™ treatment, ambidextrous thumb safety, high-hand™ beavertail grip safety, dovetail front sight, Torx head grip screws and lightweight, adjustable speed trigger.

ADJUSTABLE SIGHTS
Springfield’s premium adjustable rear sights help you take advantage of all the accuracy advantages built into the Loaded family of pistols.
Loaded models with fixed combat sights offer either traditional 3-dot or tritium inserts. All the other Loaded options are here including precision-fit forged frames, slides and barrels, front & rear cocking serrations on full-size guns, flat serrated mainspring housing, lowered and flared ejection port, Delta™ lightweight hammer, titanium firing pin, carry bevel treatment, ambidextrous thumb safety, high-hand™ beavertail grip safety, dovetail front sight, Torx head grip screws and lightweight, adjustable speed trigger.

**FIXED SIGHTS**

Our fixed sights are designed with a special low profile to increase the speed of your draw and minimize snagging. Some models feature traditional 3-dot, while others have tritium inserts for low light situations.

All Springfield Armory Mil-Spec™ 1911 models include: forged frame, slide and barrel, 3-dot combat sights, high-hand grip, beveled magazine well, polished feed ramp & threaded barrel, arched mainspring housing, stainless steel barrel, lowered and flared ejection port, angled slide serrations, black and cocobolo hardwood grips, loaded chamber indicator and titanium firing pin.
Our tribute to the 1911 that started it all, the Springfield Armory G.I. 1911 single-stack models are built with a forged frame, slide and barrel. Single stack and high capacity models feature low-profile military sights, a standard magazine well and spur hammer.

Standard ejection port, arched mainspring housing with lanyard loop, vertical slide serrations, hardwood U.S. grips, and titanium firing pin.

In other words, you won’t see these guns on blue velvet in glass cases. They’re either in the holster or in your hand doing their job.

I.L.S. ™ INTEGRAL LOCKING SYSTEM
Springfield’s patented Integral Locking System (I.L.S.) is available on all Springfield Armory 1911 pistols. With the turn of a key, the pistol is locked and the hammer cannot be cocked. The I.L.S. also is available in a retrofit kit that is compatible with all 1911 pistols utilizing a standard mainspring housing, regardless of manufacturer.
Champion is Springfield Armory’s designator for mid-size 1911s. Champions are built on a full-size frame with a shortened four-inch barrel and slide and are the perfect blend of handling and concealability.

Loaded Champions and the Champion Operator are built on rugged forged frames with precision-fit slides and barrels, flat serrated mainspring housing, lowered and flared ejection port, Delta lightweight hammer, loaded chamber indicator, titanium firing pin, carry bevel treatment, ambidextrous thumb safety, high-hand beavertail grip safety, dovetail front sight, Torx head grip screws and lightweight, adjustable speed trigger.

ADJUSTABLE SPEED TRIGGER
Springfield’s Custom Loaded 1911s have trigger overtravel adjustability, a feature most shooters would expect from special custom models or as a pricey add-on.

Mid-size Champion models are also available in our GI configuration that includes a forged frame, slide and barrel and include low-profile military sights, a standard magazine well and spur hammer, standard ejection port, arched mainspring housing with lanyard loop, vertical slide serrations, hardwood U.S. grips, and a titanium firing pin.
Springfield Armory has created the smallest, most concealable 1911 available: The Enhanced Micro Pistol — EMP™. Importantly, you can’t reduce the outer dimensions of a pistol without going after the inner workings, too. All together we had to re-engineer 15 different parts. What we got in the end was not just a new gun, but a new class of gun — the short-action 1911. Now that the hard part is out of the way, other gunmakers will surely copy it. But when you see their copies that look almost like a Springfield EMP, you’ll say to yourself, “Hey, that looks almost like a Springfield EMP.” … It’s great to be first.

What did it take to create the smallest, most concealable 1911 you can buy? … Quite a bit. The new Enhanced Micro Pistol (EMP) design enhances the legendary 1911’s performance with shorter cartridges like 9mm and 40 S&W. This allowed us to shorten the frame by 1/8 inch. This seemingly small change in the front-to-back dimension creates a remarkable reduction in grip circumference.

Model | Caliber | Barrel | Sights | Trigger Pull | Magazines | Grips | Weight
---|---|---|---|---|---|---|---
PI9209LP | 9mm | 3” Fully Supported Ramped Bull | Fixed Combat Tritium | 5-6 lbs | 2 | Cocobolo | 26 oz
PI9210LP | 9mm | 3” Fully Supported Ramped Bull | Fixed Combat Tritium | 5-6 lbs | 2 | Composite | 26 oz
PI9240LP | 40 S&W | 3” Fully Supported Ramped Bull | Fixed Combat Tritium | 5-6 lbs | 2 | Cocobolo | 30 oz
PI9241LP | 40 S&W | 3” Fully Supported Ramped Bull | Fixed Combat Tritium | 5-6 lbs | 2 | Composite | 30 oz

Enhanced Micro Pistol (PI9201LP)
Springfield’s line of compact pistols all come equipped with ramped, fully supported barrels. Not all manufacturers of compact 1911s offer this important feature. Ramped, fully supported barrels are needed to provide total reliability in shorter slide length pistols.

Loaded Ultra-Compact and Micro Compact® pistols include all the Loaded features including precision-fit forged frames, slides and barrels, that serrated mainspring housing, lowered and flared ejection port, Delta lightweight hammer, loaded chamber indicator, titanium firing pin, carry bevel™ treatment, ambidextrous thumb safety, high-hand™ beavertail grip safety, dovetail front sight, Torx head grip screws and lightweight, adjustable speed trigger.

**DELTA LIGHTWEIGHT HAMMER**

An ergonomic, rounded design assists rapid operation while skeletonized construction reduces mass and, therefore, lock time — the duration between the trigger sear’s disengagement and the firing pin striking the primer. Allowing for better performance.

Compact 1911 models are also available in our GI configuration that includes a forged frame, slide and barrel, low-profile military sights, a standard magazine well and spur hammer, standard ejection port, arched mainspring housing with lanyard loop, vertical slide serrations, hardwood U.S. grips, and a titanium firing pin.
When master pistolsmiths begin with a foundation as solid as a Springfield Armory 1911, apply a combination of ultra-modern manufacturing technologies and old-school hand fitting and attention to detail, the result earns a Springfield Custom™ stamp on the slide. With input from legends like 16-time USPSA National Champion Rob Leatham and Custom Shop Director and American Pistolsmiths’ Guild Pistolsmith of the Year David Williams, we’ve developed a few proven “recipes” for great custom guns. However, you can work personally with our Custom Shop Coordinator to spec out every single part and feature to your exacting demands.

PC9111
The FBI’s regional SWAT and Hostage Rescue Teams have chosen this Springfield Custom Shop 1911 as their primary sidearm for good reason.

• Custom-fit slide and frame
• Custom-fit Novak match barrel
• Polished feed ramp and threaded barrel
• Tool steel match hammer and sear
• Lightweight speed trigger (6 lb)
• Tuned for total reliability
• Lowend and flared ejection port
• Tuned and polished extractor
• Std. 1911-A1 recoil spring guide
• Custom-fit beavertail grip safety
• Custom-fit ambidextrous thumb safety
• Low-mount fixed combat tritium rear sight
• Downward front sight
• Custom-fit magazine well
• 20 lb hand-checkered frontstrap
• Checkered cocobolo hardwood grip
• Carry Bevel on complete pistol
• Black T™ finish
• Available with optional light rail

TGO1: LEATHAM LEGEND™ SERIES
The world’s greatest shooters demand the world’s greatest firearms. TGO series 1911s are built to the exacting specifications of 4-time World Champion and 16-time National Champion, Rob Leatham. For a detailed description of each part and specification, visit springfieldarmory.com.

XD CUSTOM
Springfield Armory is the only manufacturer offering in-house custom services for modern polymer pistols. And what better starting point for a custom polymer pistol is there than a Springfield Armory XD? Whether you choose one of our complete packages or have one customized to your specifications, now there is a way to make the best striker-fired polymer pistol even better: The XD at right features:

• Extended magazine release
• Tuned 3.5 lb trigger
• Trigger system with reduced overtravel and reset
• Hi-hand relief modification to frame with extended beavertail and texture treatment
• Bo-Mar adjustable rear sight
• XD match barrel (fitted)
• Custom-fit slide and frame
• Custom-fit Novak match barrel
• Polished feed ramp and threaded barrel
• Tool steel match hammer and sear
• Lightweight speed trigger (6 lb)
• Tuned for total reliability
• Lowend and flared ejection port
• Tuned and polished extractor
• Std. 1911-A1 recoil spring guide
• Custom-fit beavertail grip safety
• Custom-fit ambidextrous thumb safety
• Low-mount fixed combat tritium rear sight
• Downward front sight
• Custom-fit magazine well
• 20 lb hand-checkered frontstrap
• Checkered cocobolo hardwood grip
• Carry Bevel on complete pistol
• Black T™ finish
• Available with optional light rail

These are just a few examples of the Springfield Custom Shop’s capabilities. If you can dream it we can build it. After all we are one of the last true custom shops. 1-800-617-6751
SOCOM rifles are compact, powerful, close-quarter battle rifles, but they still pack plenty of punch to reach out and make that crucial shot at a distance. They feature 16-inch barrels made possible by a re-tuned gas system. A proprietary, high-efficiency muzzle brake virtually eliminates muzzle rise, enabling you to stay on target for faster, more accurate follow-up shots.

EXTENDED TOP RAIL
The extended top rail system of the SOCOM II further enhances its versatility by the ability to choose fixed optical sights with shorter eye-relief.
The Scout Squad™ provides similar compact dimensions to the SOCOM family of close-quarter battle rifles, but utilizes a slightly longer barrel that enhances the ability to reach out for that difficult long-range shot.

MUZZEL BRAKE
The muzzle brake feature on our close-quarter battle rifles is something that has to be experienced to be believed.
The M25 White Feather is a tribute to the late Marine Gunnery Sgt. Carlos N. Hathcock. Hathcock is widely known as the most effective sniper during the Vietnam conflict. The M25 Has all the same features as our Super Match M1A, plus: a pillar-bedded rear-lugged receiver, low-profile custom muzzle brake/stabilizer, adjustable McMillan stock, proprietary match trigger group and scope mount.

M25 WHITE FEATHER
In a special arrangement with the Hathcock family, each M25 White Feather bears the likeness of Hathcock’s signature and the White Feather logo. White Feather is a nickname bestowed upon Hathcock by enemy Viet Cong in reference to the white feather he often wore in his bush hat.

M25 White Feather Tactical Rifle w/ Bi-pod (SA9502) Shown with optional scope, bipod and 20-round magazine
Loaded M1A w/ Extended Cluster Rail (MA9827) Shown with optional scope, bipod, light and 20-round magazine

**MOSSY OAK BREAK-UP®**

Many M1A models are available in a rugged film-transfer Mossy Oak® Break-Up® camouflage pattern. This industry standard was set by hunters who recognized the superiority of its computer-enhanced realistic elements that create a sense of depth and texture that is yet to be matched by any other pattern.
Springfield M1A Target rifles take all the dependability of the M1A design and add accuracy enhancements like glass bedding, an improved gas cylinder and National Match recoil spring guide, rear-lugged receiver, flash suppressors and sights. With the 100th annual National Rifle Championships occurring at Camp Perry this year, 2007 is a perfect year to get your M1A Target rifle from Springfield Armory.

NATIONAL MATCH SIGHTS
Our National Match sights have a smaller rear aperture for more precise target acquisition. Elevation adjustment is done in ultra-precise half-minute-of-angle increments as compared to full minute-of-angle adjustments on standard sights. The aperture itself is hooded to reduce glare.

### Specifications

#### M1A National Match w/ Walnut Stock (NA9102)
- **Model**: M1A National Match
- **Stock**: Walnut
- **Caliber**: .308 Win.
- **Barrel**: 22"; twist 1 in 10"; RH; 6-Groove; Douglas Premium Air-Gauged Custom Heavy Match

- **Aperture**: Front: National Match Front Blade; Rear: Match-Grade Hooded Aperture with One-Half Minute adj. for both Windage and Elevation
- **Trigger**: 6.5 lbs; Crisp
- **Pull**: 2-Stage Military
- **Capacity**: 10-Round Box Magazine
- **Length**: 44.33"
- **Weight**: 11.2 lbs (Walnut) 11.8 lbs (Fiberglass)
General George Patton declared the M1 Garand the greatest battle implement ever devised. In the hands of Allied soldiers fighting on two fronts, the Garand liberated Europe and pushed back the spread of Japanese imperialism. No collection of historical military firearms is complete without an M1 Garand.

AUTHENTIC SPRINGFIELD
When the U.S. Army adopted the M1 Garand design in 1936, the greatest production effort in the history of Springfield Armory began. During the entire production history of the M1 rifle, Springfield Armory produced over 4.5 million of them. Today you can get one, brand new, with all the authentic details of the original.
1911 MAGAZINES:
- .45 6-round compact magazine:
  - Blued (PI4723)
  - Stainless (PI4726)
- .45 7-round 5” service magazine:
  - Blued (PI4523)
  - Stainless (PI4520)
