

WALTHER®

For over a century, CARL WALTHER has set new standards in the design and manufacture of law enforcement firearms. Working closely with German police firearms experts, the company's products have been produced to the most stringent standards. Safety and quality are the true tests of a police firearm. CARL WALTHER uses the experience we have gained in the law enforcement market to develop products for the police and competition markets. WALTHER sporting weapons have been the competitor's choice in international competition ever since they first appeared in the Olympic Games.

In 1993, a new chapter in the rich WALTHER history was written as WALTHER merged with the UMAREX Corporate Group. This merger was the cornerstone for the worldwide success of the WALTHER brand, and the continued growth of the WALTHER name.

WALTHER has forged strategic alliances with several strong partners in an effort to achieve greater success in the international law enforcement market. WALTHER police pistols must meet the highest standards of quality with unsurpassed fit, finish, reliability and durability. Law enforcement professionals have provided assistance in developing our product specifications in order to meet the needs of today's police officer.

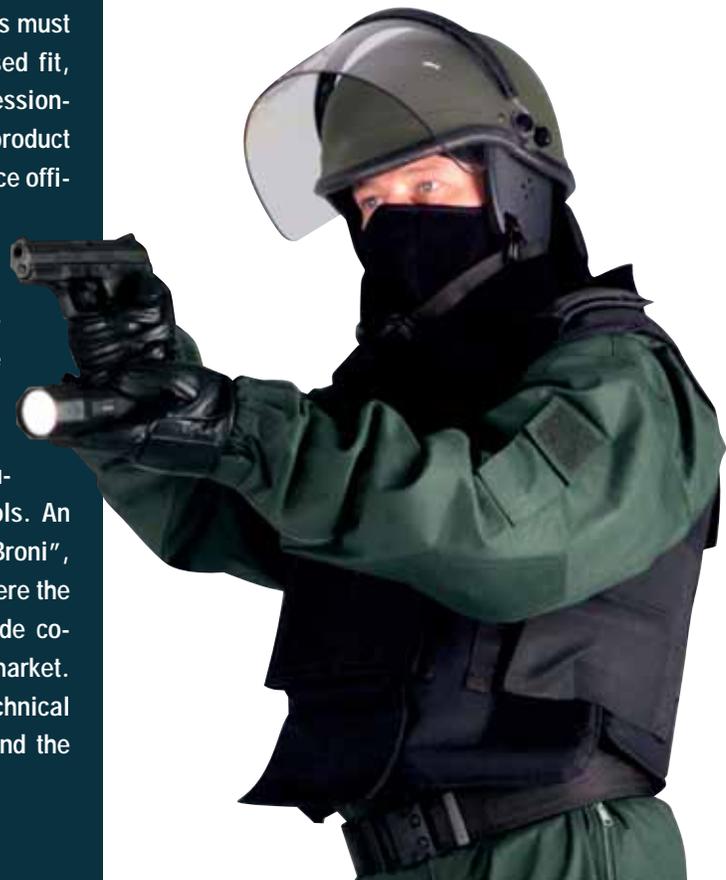

WALTHER has partnered with another recognizable firearm brand, Smith & Wesson to manufacture the Smith & Wesson SW99 line of pistols. Based on the proven WALTHER P99 platform, WALTHER and Smith & Wesson have been co-producing the SW99 for six years. Smith & Wesson is also under license to manufacture the legendary WALTHER PPK and PPK/S pistols. An alliance has also been formed with the "Fabryka Broni", another partner with a long manufacturing tradition. There the WALTHER P99 is also manufactured as a custom-made co-produced pistol to serve the Polish law enforcement market. CARL WALTHER continues its long tradition of technical expertise in the design and production of firearms, and the worldwide recognition of the WALTHER brand name.

## TECHNOLOGY AND EQUIPMENT

### 01 Loaded chamber indicator

Unloaded: The extractor is flush with the slide (can be seen and felt).

Loaded: The red marker is visible; the extractor is recessed in the slide (can be seen and felt).

### 02 Cocking indicator

Decocked: The firing pin is recessed into the slide end cap (can be seen and felt).

Cocked: The firing pin projects from the slide end cap (can be felt) and shows a red mark (visible).

### 03 Interchangeable backstrap

Manufactured from a recoil-damping compound and available in three sizes for a customized fit and feel.

### 04 Ambidextrous magazine release

Integrated into the side of the trigger guard for a unique look.

### 05 Improved slide serrations

For a positive grip on the slide and improved slide racking.

### 06 Weaver equipment rail

A new feature for the quick attachment of lights and lasers.

P99QA

#### **DISASSEMBLY**

The P99 QA is a hammerless pistol with a partially pre-cocked striker capable of being disassembled without the need to pull the trigger. Simply remove the magazine, clear the chamber, press the takedown button, pull down the takedown catch and remove the slide.

## QUICK ACTION

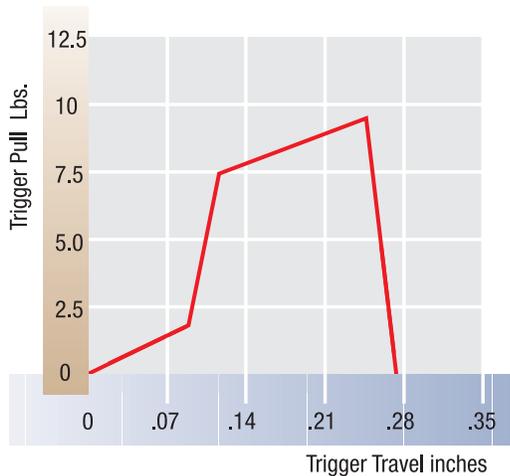

### TRIGGER MECHANISM: PRE-COCKED STRIKER SYSTEM

The P99 Quick Action, with its uniform short trigger pull is the pistol of choice for both-law enforcement tactical teams and competitive shooters. The P99 QA is easy to use with its repetitive trigger pull and with its four independent safeties; the P99 QA is one of the safest pistols available today.

## LIGHTNING-FAST FIRING

The Quick Action trigger system: The striker is partially pre-cocked and when the trigger is pulled, the striker is fully cocked and released, firing the pistol. The trigger travel is approximately .31 inches with a trigger force of approximately 8 lbs. This short pull with its quick reset provides quick shot delivery especially in competitive situations.

Trigger	TDA	TDA
Trigger Weight	11 lbs./5 lbs	11 lbs./5 lbs

### DECOCKING LEVER

This feature allows for safe decocking of the striker.

## ANTI STRESS

### TRIGGER MECHANISM: TRADITIONAL DOUBLE ACTION WITH AN ANTI-STRESS MODE

As the first pistol equipped with a firing pin lock, the P99 AS combines the advantages of the traditional Double Action System with Single Action Anti Stress trigger. The P99 provides the shooter with a user-friendliness previously found only in hammer fired pistols.

## TRADITIONAL DOUBLE ACTION

The anti stress trigger makes the P99 one of the world's safest firearms by preventing unintentional "reflex" firing in stressful situations. The decisive innovation: When the slide is racked completely to the rear upon loading, the trigger remains in the forward position for the first shot; not only in the double action trigger mode, but also in the single action mode. The trigger travel is .551" long in the anti stress mode (at 4.4 lbs. trigger force), preventing inadvertent firing. On all subsequent shots, the trigger travel is reduced to .314" (at the same trigger force) and this permits firing in rapid sequence, due to the quick reset of the P99 trigger.

## ENHANCED SAFETY

The P99 AS is equipped with a decocking button to safely decock the striker. It acts as an automatic safety and cannot snag on clothing even if the gun is drawn quickly, because it is integrated directly into the slide.

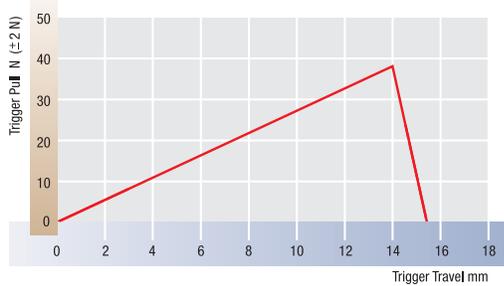

### P99 AS

Trigger Weight	9 lbs.	9 lbs.

### ELONGATED AMBIDEXTROUS SLIDE STOP

This feature is standard on the P99 DAO.

www.waltheramerica.com • 1-800-372-6454

## DOUBLE ACTION ONLY

### TRIGGER MECHANISM: DOUBLE ACTION ONLY

The Double Action Only trigger mechanism in the P99 guarantees a consistent trigger force of approximately 3,800 g with a trigger travel of 14mm, from the first shot to the last. The striker of the P99 DAO is always in the at rest position with no pre-load.

## SAFE HANDLING

Three built-in safety systems ensure that a shot can be fired only if the trigger is intentionally pulled completely to the rear.

The weapon can be safely holstered after the shot. No additional steps are required; and no additional safeties need to be engaged.

This safe and simple design concept reduces training time and effort and has convinced an ever-increasing number of users that the P99 DAO is an ideal trigger system.

All P99 DAO pistols come standard with both - an ambidextrous slide stop, and steel rear sights.

### P99 DAO

German Police NRW.*

# P99 Compact

## SIZE COMPARISON -

Notice the size comparison between the full size and the compact version.

## COMPACT PISTOLS FOR CONCEALED CARRY

Today's trend is toward pistols that are compact in design and light in weight, yet have all of the features that the law enforcement professional is seeking.

### SYSTEM IDENTICAL WITH THE FULL SIZE MODELS

The P99 compact has the same highly advanced design features of the full size P99, but in a size that is designed for concealed carry. Just like the full size version, the compact P99 is available with same trigger variations including the QA, AS and DAO. The frame backstraps are interchangeable so that the pistol will fit a wide variety of hand sizes. The pistol will not snag in clothing when it is drawn, thanks to rounded edges. The hammer-less striker system and safety devices integral to the P99 are also available in the P99 compact.

All the compact versions are delivered, as standard equipment, with a flat-bottom magazine butt plate and a finger rest magazine butt plate. The frame is molded with a Weaver-style rail to accept lights and lasers.

The new P99 compact is the ideal compliment to the P99 full size line of pistols. Perfect for concealed carry or as a backup weapon for law enforcement.

# GSP

- Innovative absorbers improve recoil compensation.
- Proven trigger design.
- Two interchangeable calibers.

## GSP CARBINE CONVERSION KIT

An 18.3" fluted, stainless steel barrel with MagnaPorting allows for match-grade quality precision groups at 55 yards. A laminated thumb hole woodstock, a diopter rear sight and all necessary accessories are supplied in a hard plastic case.

**GSP EXPERT**  
WAT22001 - .22 LR

**GSP EXPERT SPORT PISTOLS**  
Our Bestseller.

The world's most popular target pistol received significantly improved features. Improved barrel geometry and a vibration absorbing plastic sleeve provide reliable shooting precision. Sighting errors are reduced due to the low sight plane. The grip is ergonomically adapted to the shooting hand. A nitro-carbonized breech reduces cycling friction even throughout rapid fire series. Newly developed recoil absorbers allow for the perfect tuning between the shooter, weapon and ammunition. The grips are available for right and left-handed use. Three different grip sizes (left available in M only) allow for the perfect fit.

**Two Interchangeable Calibers**

# P22

**Loaded Chamber Indicator**  
The notch on the top of the barrel shows whether a cartridge is in the chamber.

**Magazine Release**  
Molded to the same contour as the trigger guard, prevents the magazine from being unintentionally released from the weapon. The ambidextrous magazine release can be operated equally well by either right or left-handed shooters.

**Back strap and Magazine Butt Plates**  
Two interchangeable grip back straps, and two different magazine butt plates, allow for customizing based on the shooter's hand size.

**Integrated Lock with Key**  
A specially designed key locks the trigger in the P22 and thus prevents use by unauthorized persons.

## ACTION & FUN

Whether you are looking for a pistol for affordable training or simply the excitement of shooting, the P22 is the pistol for you. The Walther P22 is fascinating in its compact size, while still maintaining all of the features of a full-size pistol. Constructed using a modular manufacturing concept, the P22 offers several different equipment configurations. The barrel can be changed out or a red dot sight can be mounted – almost instantly.

## FEATURES OF THE P22

- Interchangeable frame back straps create an ideal fit to the shooter's hand.
- Compact design and light-weight are achieved by a modern polymer frame (just 480 g, including the magazine).
- Traditional double-action operation.
- Ambidextrous controls for both left and right hand shooters.
- Integrated trigger lock, loaded chamber indicator.
- Magazine disconnect, hammer safety and firing pin safety for safe and reliable operation.
- Modern, eye catching high tech design.
- A fixed barrel for incredible accuracy.
- Windage adjustable rear sight and elevation adjustment with interchangeable front sights for variations in shooter operation.
- Interchangeable barrel (sold separately) can convert the P22 from the standard configuration to the target version in minutes.

# G22

**Slide safety**  
The ambidextrous safety is in a convenient location for use and easy accessibility. Two tabs are clearly visible, even when the weapon is raised, indicating whether the safety is engaged.

**Integrated, internal lock**  
The internal lock is located next to the slide safety and can be used to lock the rifle. The key is identical to the key for the P22 pistol.

**SEMI AUTO RIFLE**

WALTHER continues its long-standing tradition of manufacturing small-bore rifles that have won numerous gold medals in the Olympic games and at World Championship matches with the introduction of the new WALTHER G22.

The WALTHER G22 employs an innovative "Bullpup" design for the first time on any WALTHER rifle. The G22 with its full line of accessories is a utilitarian rifle for hunting, competitive shooting, or just plinking.

**G22 DETAILS**

- Fire control and magazine integrated into the rear of the stock.
- This gives an extremely short overall length of 28 inches in spite of the optimal 20" barrel length.
- The first small-bore rifle in this class available in a genuine left-hand version.
- Variable-length stock for a custom fit to the shooter. A .75" extension is included.
- Adjustable sliding sights.
- Weaver-style rail at the sight mount to accept optics.
- Weaver-style rail at the front sight mount to accept the WALTHER laser.
- Weaver-style rail at the forearm for a bipod or other accessories.
- WALTHER Safety Package provides a maximum degree of safety during use and when in storage. It consists of a slide safety, cocking indicator, magazine safety and integral lock to protect against unauthorized use.

**Cocking indicator**  
The red indicator in the fire control housing indicates whether the rifle is cocked.  
**Magazine disconnect (not illustrated)**  
Prevents firing with the magazine removed.

**Magazine release**  
Integrated into the stock; permits rapid magazine exchanges.  
An additional magazine is located in the stock.

**Multi-functional**  
Weaver-style rails, mounted on the forearm and front sight mount in the standard configuration permit the attachment of lights, lasers, a bipod or other accessories. The non-slip, soft touch pads aid in properly positioning the rifle.

**Sliding rear sight**  
Located in the carrying grip for protection, the sliding rear sight is activated only as required.  
**Weaver-style rail**  
For mounting of various aiming devices.
