BENELLI 2008

BENELLI®

Innovative state-of-the-art precision firearms

By the mid-1960s gas-operated semi-automatic shotguns were considered to be state-of-the-art firearms, and appeared to be the way of the future.

At the same time, attempts were being made to develop a non-gas-operated system, but the best of those attempts resulted in little improvement, nor advantage over gas.

In 1967, Benelli introduced the Model 121 semi-automatic shotgun featuring a revolutionary cleaner, faster system based

For 40 years Benelli has

embraced the latest

performance of this innovative operating system was mechanically reliable in technology, which

and safe. Benelli's Inertia Driven® system was considered a milestone in the continues today and will

evolution of semi-automatic firearms in its reliability, simplicity, strength and do so in the future.

resistance to residue build-up. But what really caught the imagination of the shooting world was not just the system's speed of operation, but the total reliability that guarantees every shot will fire.

Benelli
simply perfect

From those who founded the company right up to present day employees, Benelli continues to make revolutionary contributions to the firearms world, and the results of that work speaks for itself.

INERTIA DRIVEN

INERTIA DRIVEN® SYSTEM

Best Operating System ever devised

Reliable — The Inertia Driven® system never needs adjusting and will cycle anything from light field loads to 3½" magnums with consistent reliability, year, after year, after year. In fact, there are Inertia Driven® Benelli shotguns that have fired over 500,000 rounds, still in the field and functioning perfectly.

Benelli's automated manufacturing system produces the Inertia-Driven® bolt system with surgical precision.

Simple — Inertia Driven® is simple with only three primary parts: the bolt body, the inertia spring and the rotating bolt head. Simple is better.

Faster — With a greatly reduced mass of parts, Inertia Driven® is faster.

Cleaner — Gas, smoke and burnt powder stay in the barrel where they belong, rather than being channeled into the gun's mechanism, as they are in gas systems.

Strong — The strong steel locking lugs on the Inertia Driven® system's rotating bolt head not only lock steel-to-steel into the gun's barrel; the lugs lock-in even tighter during firing.

Low Maintenance — The Inertia Driven® system is much cleaner so gun cleaning takes a fraction of the time that it takes to clean a gas-system gun.

Light Weight — The Inertia Driven® system is not only incredibly simple, it is also lightweight, allowing Benelli shotguns to be some of the lightest semi-automatic shotguns ever produced.

Perfect Balance — With no springs, action bar linkage or heavy gas cylinder under the fore-end, Benelli's Inertia Driven® shotguns balance like a fine game gun should.

INERTIA DRIVEN® SYSTEM

"THE LAW OF INERTIA"— is Newton's First Law of Physics and is as consistent and unchangeable as The Law of Gravity. Benelli has harnessed this basic law of physics in the Inertia Driven® system to operate the world's fastest, simplest and most reliable semi-automatic shotguns. It's not boasting, it's the law — The Law of Inertia.

CHAMBERING

STEP 1: As the bolt assembly moves into battery, the locking head pin moves along a curved track in the bolt body to rotate the steel bolt head into engagement with the steel barrel extension. The cartridge drop lever is down, the red dot indicating that the gun is cocked.

FIRING

STEP 2: When the trigger is pulled, every part of the shotgun except the bolt body moves rearward. The curved track in the bolt body, which is moving forward relative to the rest of the gun, presses against the locking head pin, turning the bolt head even tighter into the barrel extension. At the same time, the inertia spring is compressed between bolt head and body. The cartridge drop lever moves up, allowing a shell to move from the magazine to the carrier.

RECOIL

STEP 3: Near the end of the recoil cycle, chamber pressure drops to a safe level and the gun's rearward motion slows. The heavy inertia spring then thrusts the bolt assembly rearward, unlocking the rotating bolt head, extracting the spent shell from the chamber and pulling it against the ejector.

EJECTION

STEP 4: As the empty shell exits the receiver, the energy of the moving bolt assembly re-cocks the hammer and compresses the recoil spring in the buttstock. The recoil spring then thrusts the bolt assembly forward, lifting the on-coming shell into position and chambering a fresh cartridge. The gun is ready to fire again in a fraction of a second!

COMFORTECH™ SYSTEM**Reduces felt recoil by as much as 48% over the competition!**

Benelli's ComforTech™ system revolutionizes firearms technology. For centuries, the laws of physics have defined shooting comfort. If you wanted less recoil, your choices were to make the shot charge lighter

or the gun heavier. Reducing the shot charge compromises on-target performance, and increased gun weight affects the speed and balance of the shotgun.

You can't repeal the laws of physics, but sometimes you can fool Mother Nature.

Benelli reached outside the firearms industry

Benelli's technical department

to materials scientists, computer specialists and design engineers

utilizes Computer Aided Design (CAD)

to take a fresh look at recoil and how to tame it. The result? A new

software programs for cutting-edge

stock system that reduces felt recoil by as much as 48 percent over the

design-and, Computer Aided

competition. It's often said there's nothing new in guns, but the

Engineering-(CAE) for precise

ComforTech™ system is unlike anything ever seen before. Previous

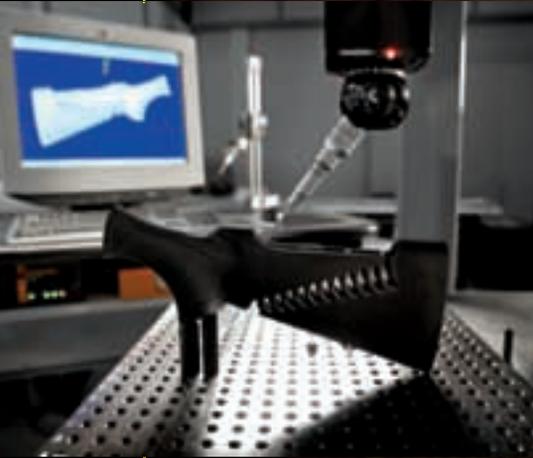

structural calculations of the

generations of firearms designers never had access to the computer

finished elements.

modeling, high-speed photography and state-of-the-art synthetics that

make this revolution in shooting comfort possible.

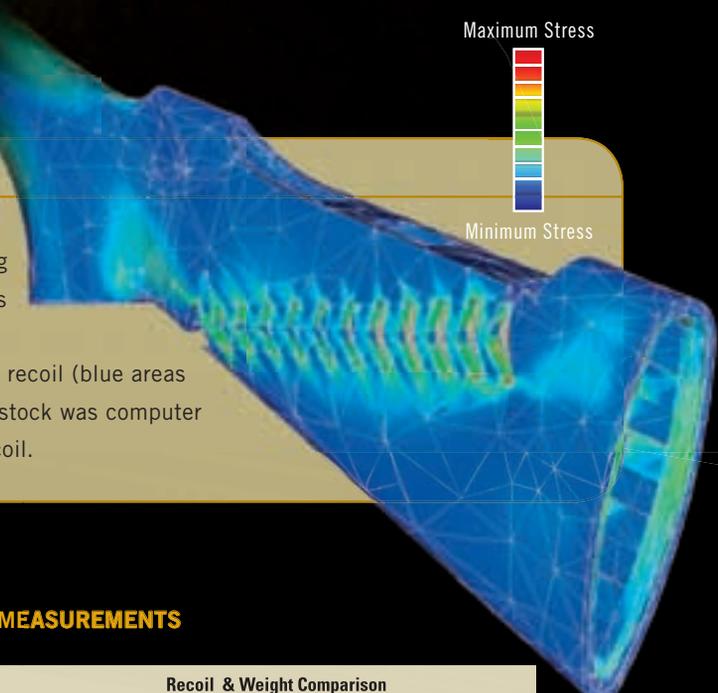

To test durability, the stock was subjected to 100,000 brutal cycles with the recoil pad removed in a fixture exerting loads 20% more force than the most powerful 3½" magnum loads available. Testing was conducted at temperature extremes ranging from 150° F to -75° F. In the end, the ComforTech™ stock looked and performed as well as it did when new!

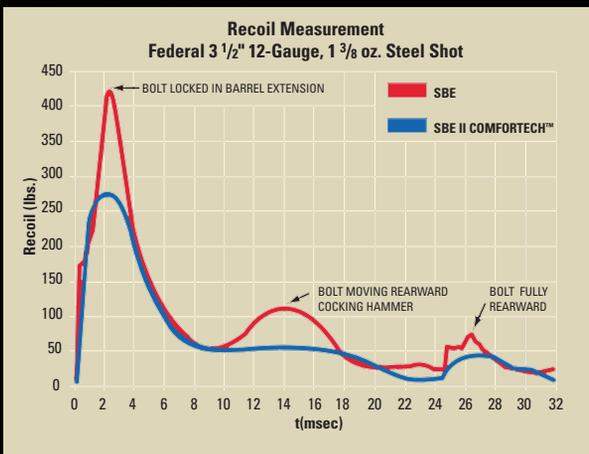

COMFORTECH™ STOCK

The ComforTech™ stock is split diagonally from the heel of the buttstock to a point just behind the pistol grip. Connecting the two pieces are eleven synthetic recoil-absorbing chevrons that form a highly effective recoil barrier.

Computer simulation showed Benelli engineers the path of recoil (blue areas are minimum stress) through a gun stock. The ComforTech™ stock was computer designed so that even the exterior shell flexes to dampen recoil.

COMFORTECH™ RECOIL MEASUREMENTS

Benelli engineers developed specialized machinery to measure and graph recoil. Here a Benelli Super Black Eagle is plotted along with an SBE II with ComforTech™. A dramatic reduction with ComforTech™ can be seen in all three peaks of recoil — firing, bolt cocking the hammer and the end of bolt travel.

The Super Black Eagle II does what many thought was impossible; it is both the lightest gun in its class and the softest-kicking. Imagine how fresh you'll be at the end of a long hunting day with that combination!

COMFORTECH™ SYSTEM

Recovery time is 69% faster than the competition

How the competition stacks up against the ComforTech™ system:

- **WEIGHT COMPARISON** – the competition weighs 13% to 15% more (on average, that is a pound or more!)
- **RECOIL COMPARISON** – the competition kicks up to 48% harder.
- **MUZZLE CLIMB COMPARISON** – the competition recovers as much as 69% slower. To put it simply, Benelli engineers have created the lightest, softest kicking shotgun on earth. It gets back on target faster than any other and don't forget, Benelli is already the fastest cycling auto-loading shotgun in the world!

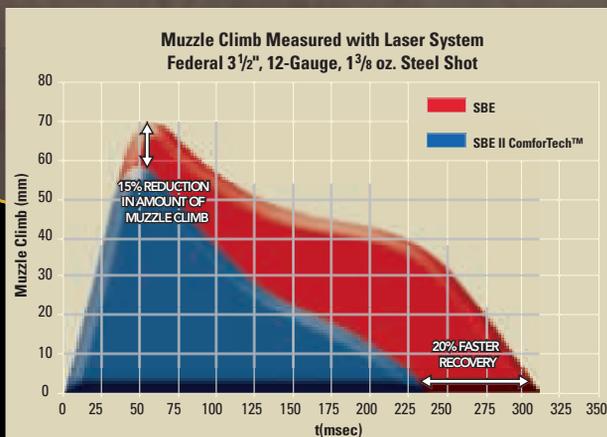

At Benelli, we can't break the laws of physics, but we can bend them just a little.

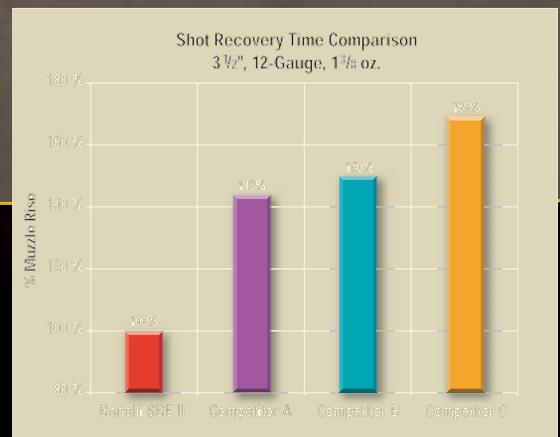

M U Z

COMFORTECH™ SYSTEM REDUCES MUZZLE CLIMB

The Super Black Eagle II with ComforTech™ system reduces muzzle climb by 15% and recovery time is 20% faster, when compared to the original Super Black Eagle.

Forget about losing sight of a fleeing flock. You'll get 15% less muzzle climb and 20% faster recovery with the Super Black Eagle II. Bagging doubles will become the rule, not the exception.

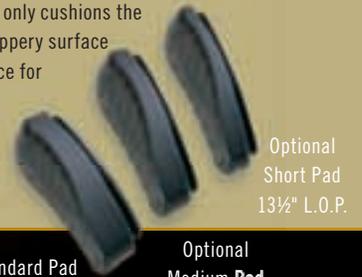

They'll wonder how you do it. You'll know the reason is that your recovery time is as much as 69% faster than competitive shotguns. You'll bag birds while they're still trying to get back on target.

COMFORTECH™ GEL COMB INSERTS & RECOIL PADS

◀ This special synthetic gel comb insert not only cushions the shooter's cheek during recoil, it also has a slippery surface that allows the cheek to slide along the surface for added comfort. Available in 3 sizes, for ComforTech™ stocks only.

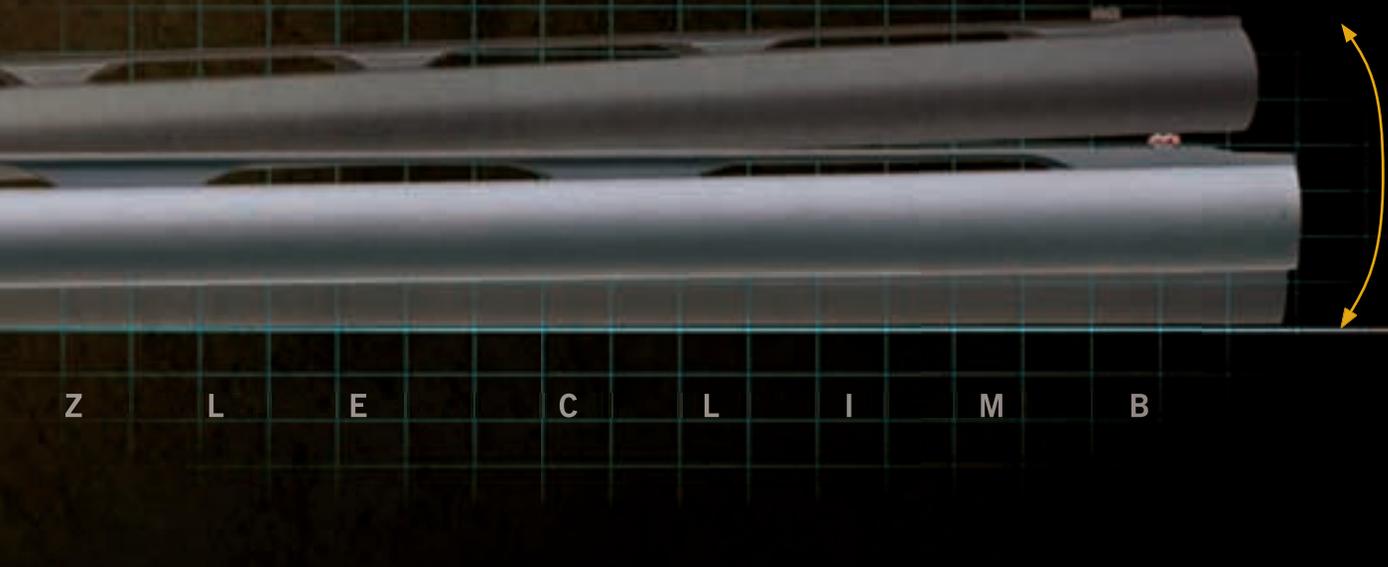

▶ Adjustable length-of-pull with optional ComforTech™ gel recoil pads.

Standard Pad
14 3/8" L.O.P.

Optional
Medium Pad
14" L.O.P.

Optional
Short Pad
13 1/2" L.O.P.

COMFORTECH™ GEL RECOIL PADS

OLD STYLE

GEL RECOIL

LEFT RECOIL PAD

RIGHT RECOIL PAD

COMPARISON CHART

The gel recoil pad puts more shock-absorbing material against your shoulder to spread recoil. There are no hard inner structures that push against you. The soft, comfort-fitting gel recoil pad takes the sting out of magnum loads like no conventional recoil pad can.

COMFORTECH™ GEL RECOIL PADS:

The ergonomics of the gel recoil pad are so carefully engineered that there are separate versions for left- and right-handed shooters. The pad is shaped to conform to the contours of the shoulder for maximum contact.

CRIO® SYSTEM

Denser patterns with 13.2% more pellets on target

Cryogenic physics has revealed that strange things happen when matter is taken to temperatures of -300° F; gases become liquids and solids, ceramics become conductors

of electricity and steel is changed at the molecular level.

When a Benelli barrel is cryogenically treated, all of the stresses caused by hammer forging are relieved and the surface of the bore

The Crio® System combines a barrel frozen to -300° F with a specially designed longer choke tube that is also cryogenically treated.

Benelli Crio® Barrels not only pattern better, they stay cleaner longer.

The result is a denser, more uniform pattern

Crio® Chokes are the second part of the Benelli Crio® System. Extra with up to 13.2% more pellets on target.

long choke tubes, with a more gradual constriction, coupled with the slick surface created by the cryogenic treatment, puts more pellets on target. The Benelli Crio® System improves patterns by as much as 13.2% and yields denser, more uniform shot patterns.

cryogenic

BENELLI'S
C R I O ® S Y S T E M T E C H N O L O G Y

BETTER SHOT PATTERN

With high-speed cameras, Benelli engineers caught shot strings in flight. Crio® Barrels and Chokes threw patterns with substantially denser and more uniform shot patterns.

CRYOGENICALLY TREATED →
Denser and more uniform pattern

UNTREATED →
Irregular and uneven shot pattern

UNTREATED

CRYOGENICALLY TREATED

WHY FREEZE BARRELS?

Hammer-forging induces stresses in the barrel steel caused by an uneven grain structure (left). Freezing the barrel to -300° F changes the steel at the molecular level, leaving a more even grain structure. The result? The barrel flexes more predictably and has a smoother bore surface that resists fouling.

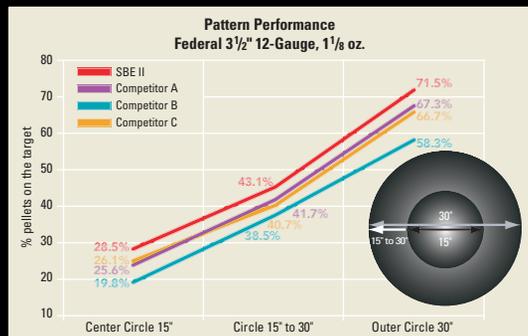

Crio® Choke

Standard Choke

PATTERN PERFORMANCE

When compared to the competition, the new Crio® Barrel puts 13.2% more pellets in a 30" circle. That's bird-busting power you'll see in the field! This sort of pattern performance once required special barrels and aftermarket choke tubes. With the Crio® System, you get it right out of the box!

CRIO® CHOKES

The specially designed longer choke tubes of the Crio® System allows for more gradual constriction of the shot charge, which reduces pellet deformation. Frozen to -300° F, Crio® Chokes have a more evenly grained and slicker surface that provides less resistance to the shot charge as it passes down the bore. When coupled with a Crio® Barrel, the result is as much as 13.2% more pellets on target.

BENELLI 2008

SUPER BLACK EAGLE II

Sets the standards for reliability

Super Black Eagle II — 12-GAUGE

SUPER BLACK EAGLE II, COMFORTECH™
 Realtree® APG HD™ | 12-GA, 3½" | MSRP \$1,690

SUPER BLACK EAGLE II, COMFORTECH™
 Advantage® MAX-4 HD™ | 12-GA, 3½" | MSRP \$1,690

THE SUPER BLACK EAGLE II SETS THE STANDARD for styling, versatility and performance by which all other semi-auto shotguns are judged. That judgment is based on unfailing reliability — the kind of reliability that you can count on, shot, after shot, after shot. As the original 3½" semi-auto shotgun, the Super Black Eagle was on the cutting edge of shotgun development. Utilizing the proven Benelli Inertia Driven® bolt mechanism allows the Super Black Eagle II to shoot 2¾", 3" and even 3½" magnum ammunition without adjustments.

The Super Black Eagle II also incorporates some basic improvements, like the ComforTech™ system, reducing recoil up to 48% without adding any moving parts or weight. Compared to competing brands, the Benelli weighs 13 to 15% less — on average, that's more than a pound less! The ComforTech™ system reduces muzzle climb by 15% for fast follow-up shots, which allows shooters to get back on target up to 69% faster than the competition. The Super Black Eagle II is the quickest shooting and most reliable shotgun ever.

The trigger guard has 30% more room, so even in the coldest waterfowling weather, the heaviest gloved finger will fit easily.

Benelli includes a set of shims to make customizing the gun's drop and cast quick and simple.

F E A T U R E S

STANDARD

- CHOKE TUBES:** C, IC, M, IM, F Crio® choke tubes and wrench.
- FINISHES:** Realtree® APG HD™, Advantage® Max-4 HD™, Black synthetic or Satin walnut.
- GEL PADS:** ComforTech™ gel recoil and comb pads (ComforTech™ models only).
- SHIM KIT:** For adjustment of drop and cast.

OPTIONAL

- CHOKE TUBES:** Extended chokes for pass shooting (M), shooting waterfowl over decoys (IC), and for turkey (XF) (12-gauge only).
- GEL RECOIL PADS:** Three options to customize length-of-pull to 13½", 14" or 14¾".
- RAISED COMB PADS:** Three options to customize sight plane for different shooting scenarios from field to target shooting to scoped hunting.

SUPER BLACK EAGLE II

The original 3½" magnum

BENELLI'S COMFORTECH™ RECOIL SYSTEM

The new ComforTech™ system reduces recoil up to 48% over the competition, without adding any moving parts or weight. This allows shooters to get back on target up to 69% faster than the competition. The buttpad, made of a shock-absorbing gel originally developed for the medical industry, works with the ComforTech™ system to soak up recoil.

SUPER BLACK EAGLE II, COMFORTECH™		
Black synthetic	12-GA, 3½"	MSRP \$1,550

SUPER BLACK EAGLE II		
Satin walnut	12-GA, 3½"	MSRP \$1,485

COMFORTECH™ GEL COMB INSERTS & RECOIL PADS

◀ This special synthetic gel comb insert not only cushions the shooter's cheek during recoil, it also has a slippery surface that allows the cheek to slide along the surface for added comfort. Available in 3 sizes, for ComforTech™ stocks only.

▶ Adjustable length-of-pull with optional ComforTech™ gel recoil pads.

A dimpled grip checking pattern called AirTouch™ gives the shooter a firm grasp on the pistol grip and fore-end, hot or cold, wet or dry.

The SBE II's magazine cap has heavier ribs so that take down is easier, even with gloved hands.

M2 FIELD

The workhorse of the Benelli semi-auto line

THE M2 FIELD IS THE WORKHORSE OF THE BENELLI SEMI-AUTO LINE. Light, nimble, but ruggedly built, the Benelli M2 is built around the ultra-reliable Inertia Driven® bolt mechanism. The Inertia Driven® system allows the M2 to digest nearly any 12-gauge cartridge, from 2¾" target loads to the heaviest 3" magnums.

Benelli engineers have also adapted the ComforTech™ recoil system for the M2. This revolutionary system reduces felt recoil by up to 48% and cuts muzzle climb by 15%. When combined, this puts the shooter back on target up to 69% faster than with any other comparable semi-automatic shotgun. The M2 is not only faster, but with the new ComforTech™ system, it may be the most comfortable shotgun you will ever shoot.

The M2 is a workhorse with the speed of a thoroughbred.

M2 Field — 12-GAUGE

M2 FIELD, COMFORTECH™
 Realtree® APG HD™ | 12-GA, 3" | MSRP \$1,365

M2 FIELD, COMFORTECH™
 Advantage® MAX-4 HD™ | 12-GA, 3" | MSRP \$1,365

M2 FIELD, COMFORTECH™
 Black synthetic | 12-GA, 3" | MSRP \$1,230

M2 FIELD
 Satin walnut | 12-GA, 3" | MSRP \$1,170

Benelli's M2 trigger guard and safety is ergonomically-designed, blending style and function.

The M2's magazine cap is heavily-ribbed making take down easy.

AirTouch™

The AirTouch™ dimple checking pattern on the M2's pistol grip and fore-end gives a secure grip in any kind of weather.

◀ This special synthetic gel comb insert not only cushions the shooter's cheek during recoil, it also has a slippery surface that allows the cheek to slide along the surface for added comfort. Available in 3 comb sizes, ComforTech™ stocks only.

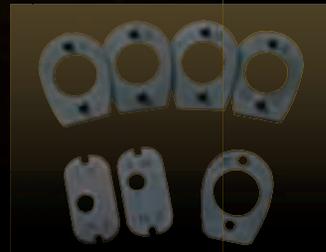

▶ Adjustable length-of-pull with optional ComforTech™ gel recoil pads.

BENELLI'S RECOIL TUBE SYSTEM

The corrosion-resistant recoil tube and stainless steel spring can be accessed easily by removing the quick-detachable recoil pad.

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

CORDOBA**Manages hot-barreled, high-volume shooting with ease**

INSPIRED BY THE HIGH VOLUME DOVE SHOOTING found around Cordoba, Argentina, Benelli engineers designed the Cordoba as a lightning-fast hunting gun with all the advanced features of a serious sporting clays shotgun. Incorporated into the Cordoba is the 10-mm tapered sporting rib favored by competition shooters and porting to keep barrel climb to a minimum. The ComforTech™ stock cushions the blow when ammo isn't measured in boxes, but by cases in an afternoon. The ComforTech™ system also helps reduce barrel climb and puts the shooter back on target 69% faster, so that the Cordoba just may be the fastest field gun ever built. A Crio® barrel and extended Crio® choke tubes put more pellets on target and the whole package is finished in matte black GripTight® coating or Advantage® Max-4 HD™, so a reflected flash won't give you away.

Extended Crio® Chokes reduce pellet deformation and the ported barrel nearly eliminates muzzle climb allowing for fast second target acquisition. A high-visibility red bar sight provides fast sight alignment.

Extended Crio® Choke tubes are standard. 12-gauge in 28" and 30" barrels. 20-gauge in 28" barrels only.

WARNING!

Always physically and visually check the magazine tube and chamber to verify that the firearm is not loaded!

ShellView™ is standard with the 20-gauge Cordoba, allows the shooter to visually check the number of shells in the magazine tube at a glance.

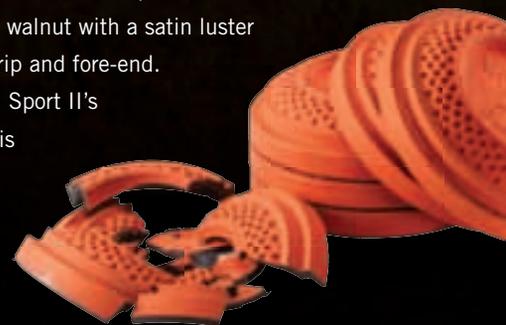

SUPERSPORT & SPORT II

The ultimate “speed guns” for clay games

THE BENELLI SUPERSPORT AND SPORT II ARE THE ULTIMATE “speed guns” for sporting clays. The SuperSport’s ComforTech™ recoil-dampening system allows the shooter to recover for the critical second shot up to 69% faster than with other comparable shotguns — that’s fast! Couple the quick recovery speed with a ported barrel that keeps muzzle climb to a minimum and it’s doubly fast. And the ComforTech™ system’s special gel recoil pad and comb insert reduce felt recoil by up to 48% compared to the competition.

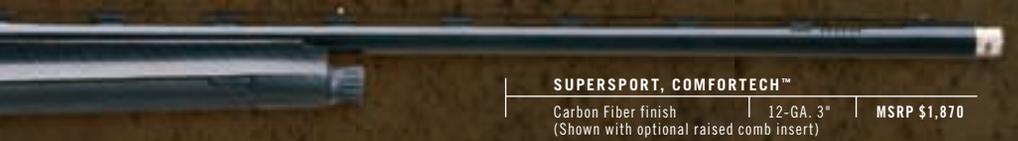

For traditionalists, the Sport II’s stock features beautifully figured A-Grade walnut with a satin luster finish, a right-hand contour gel recoil pad and cut checkering on both pistol grip and fore-end. When one clay often separates the winner from the losers, the SuperSport and Sport II’s superior reliability, faster recovery time, lower recoil and denser shot patterns is almost like having an unfair advantage.

20-GAUGE SPORTING GUNS

Reliability blended with style and performance

LIKE THE BIG-BROTHER 12-GAUGES, Benelli's 20-gauge SuperSport and Sport II were both designed with sporting clays in mind. Traditionalists love the look and feel of the Sport II with a stock cut from beautifully figured A-Grade walnut finished to a satin luster. Cut-checkering graces both the pistol grip and fore-end, and a contoured gel-pad fits the butt stock. The racy-looking SuperSport features a carbon-fiber finished stock, incorporating the ComforTech™ system to accommodate high-volume shooting. Extended Crio® chokes come standard with both the Sport II and SuperSport.

Benelli's original Cordoba came in 12-gauge — a gun developed for high-volume shooting anywhere in the world. But when ammo on an afternoon is measured in cases rather than boxes, dove aficionados choose the Cordoba's 20-gauge version. This handy gun incorporates ShellView™, which allows you to check the shells in your magazine at a glance.

LEGACY

New World reliability wrapped in Old World craftsmanship

BENELLI CREATED THE LEGACY for those who appreciate style and performance. Blending distinctive style and dependable performance, the Legacy is built around the ultra-reliable Inertia Driven® system, with all the refinements and attention to detail that discriminating shooters expect. The sculptured lower receiver, with classic game scene etchings and contrasted by a highly polished blued upper receiver, gives the Legacy eye-catching originality. Complimenting the Legacy's sculptured metalwork is a stock cut from beautifully-figured, hand-selected AA-Grade walnut.

A new member joins Benelli's Legacy line-up with the Legacy Sport — a race gun that clay shooters will instantly recognize as not only a beautiful competition gun, but a serious one. The Legacy Sport is a gun with all the features — gel recoil pad, ported barrel, Crio® chokes and barrel — and the advantages of a semi-auto that also incorporates the slimness and balance of an over & under. The Legacy Sport is an elegant, smooth-swinging gun that combines best quality materials and workmanship with the most modern engineering.

LEGACY TRIGGER ASSEMBLY

The trigger assembly is easily removed as a unit by driving out just one pin.

Beautifully engraved receivers, with deep patina and black titanium insert define old world craftsmanship for the Legacy Sport.

LEGACY HARD CASE

The durable protective carrying case protects your Benelli shotguns with style and safety during trips to the range or field.

ULTRA LIGHT

The lightest 12- and 20-gauge ever built — an uplander's dream

WEIGHING ONLY 6 LBS., the Ultra Light is the lightest 12-gauge semi-automatic shotgun in production, sporting a featherweight alloy receiver, shortened magazine tube and a unique raised target rib made from the same super-light, super-strong carbon fiber employed in Formula 1 race cars.

New this year is the Ultra-Light 20-gauge, which is literally the lightest 20-gauge in the world, weighing in at just 5.2 lbs. The Ultra-Light 20-gauge incorporates all the same features that lightened up it's 12-gauge big brother. The Ultra Light in either 12- or 20-gauge is an uplander's dream.

A light-weight raised target rib is made from the same super-light, super-strong carbon fiber employed in Formula 1 race cars.

If your average hunting day is measured in miles, wouldn't you rather carry an Ultra-Light, the lightest, most reliable shotgun in the world.

Ultra Light — 12- and 20-GAUGE

ULTRA LIGHT

RECOIL PADS:	Gel recoil pad for shock absorption.	
SHIM KIT:	For adjustment of drop and cast.	
HARD CASE:	Custom fitted hard case to protect in transport.	

The carbon fiber rib is complemented by a matching carbon fiber grip cap.

ULTRA LIGHT FORE-END COMPARISON

The Ultra Light's magazine tube and fore-end are considerably shorter than the Montefeltro's. This new design makes the Ultra Light incredibly light on those long hunts.

MONTEFELTRO FORE-END

ULTRA LIGHT FORE-END

MONTEFELTRO SILVER

Distinctive styling in a gun that shoots as good as it looks

To aid take-down, the Montefeltro Silver's mag cap is deep-grooved for a positive grip, even with gloved hands.

The Montefeltro Silver uses Benelli Crio® chokes that sit flush with the muzzle, available in F, IM, M, IC, C.

A nickel-plated alloy receiver, complete with scroll engraving and gold embellishments give the Montefeltro Silver a distinctive and beautiful look.

MONTEFELTRO SILVER RECEIVER DETAILS

The beautifully engraved receivers, with the deep patina, makes the Montefeltro Silver a top choice when looking for that old world craftsmanship quality.

MONTEFLETRO SILVER | L: Pointing Setter

MONTEFLETRO SILVER | R: Pair of quail

DISCERNING SHOOTERS will instantly notice the distinctive features of the Montefeltro Silver edition; the satin-sheen of a stock cut from highly figured select walnut and the single-piece, nickel-plated alloy receiver, complete with scroll engraving and gold embellishments. The Montefeltro Silver comes in either 12- or 20-gauge and is adorned with a pair of gold quail on the right side of the receiver and a pointing setter on the left. Blending style and performance in a way that every sportsman will appreciate, the Silver's light-weight, slim fore-end and low-profile rib makes it a standout in the semi-automatic shotgun world. In the Montefeltro Silver you have a gun with all the desirable features and advantages of a semi-auto where art and function are combined to create a most appealing and reliable shotgun. The Silver utilizes Benelli's fast-firing, ultra-reliable Inertia Driven® system.

Montefeltro Silver — 12- and 20- GAUGE

MONTEFLETRO SILVER		
AA-Grade satin walnut	12-GA, 3"	MSRP \$1,575

MONTEFLETRO SILVER		
AA-Grade satin walnut	20-GA, 3"	MSRP \$1,575

The Montefeltro Silver's trigger guard and safety accommodates shooting with gloves, while a stylish gold-plated trigger compliments the overall distinctive design.

FEATURES

STANDARD

- CHOKE TUBES:** C, IC, M, IM, F and wrench.
- FINISH:** AA-Grade satin walnut.
- SIDE PLATE:** Acid etched, gold-filled game scenes with rich patina.
- SHIM KIT:** For adjustment of drop and cast.

- BARRELS:** Variety of lengths of high-luster blued barrels.

MONTEFELTRO

Light, slender and quick pointing, for the wingshooting purist

LIGHT, SLENDER AND QUICK POINTING never described a semi-auto better than the Benelli Montefeltro. The Inertia Driven® system, requiring no springs or gas-cylinder under the fore-end allows the Montefeltro's fore-end to be slim and graceful while the light-weight, anodized aluminum receiver keeps weight to a minimum. Chambered for 3" magnum loads in both the 12- and 20-ga., the Montefeltro is equally at home in New England woodcock cover as in a Louisiana duck blind. This is one gun that looks as good as it shoots. Stocked with beautifully finished satin walnut, the Montefeltro is the gun the wingshooting purist who wants the added advantage of a semi-auto and the feel of a classic game gun.

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

Montefeltro — 12-GAUGE

MONTEFELTRO		
Satin walnut	12-GA, 3"	MSRP \$1,140

Montefeltro — 20-GAUGE

MONTEFELTRO		
Satin walnut	20-GA, 3"	MSRP \$1,140

MONTEFELTRO YOUTH		
Satin walnut	20-GA, 3"	MSRP \$1,150

Grooving at the top of the receiver extends the sight plane for fast and consistent target acquisition.

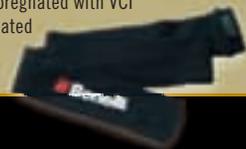

The Benelli Montefeltro's trigger guard provides extra room for the shooter's finger, along with a stylish gold plated trigger.

Benelli Inertia Driven™ system uses a rotary bolt head for secure lockup and lightening-quick functioning. It's the truest example of "less is more" in gun design.

OPTIONAL

CHOKE TUBES: Extended chokes for pass shooting (M), shooting waterfowl over decoys (IC), and for turkey hunting (XF) (12-gauge only).
BARRELS: Variety of lengths and finishes.

Left-Hand Models — 12-GAUGE

**COMFORTECH™
GEL RECOIL PAD**

The Benelli engineers have thought of everything. There's even a Gel recoil pad on the SBE II and M2 specifically designed to fit the left shoulder. The ergonomic shape spreads the impact over a larger area for less felt recoil.

IT SEEMS THAT SOUTHPAWS HAVE

ALWAYS BEEN IGNORED by gun manufacturers. Over the years their choices have been few and, in many cases, limited to cosmetic changes to right-hand guns. Benelli has changed that minority status and produced a selection of semi-autos created especially for the left-handed shooter.

The Benelli flagship semi-auto, the Super Black Eagle II, is made in a left-hand version with a specially designed ComforTech™ stock that features a gel pad contoured to fit the left shoulder pocket. The Benelli workhorse M2 Field also comes with left-handed ComforTech™ stock and, like the SBE II, in two patterns of camo or black synthetic. The classic Montefeltro left-hand comes stocked with satin finished walnut. With three different left-hand models, there's a southpaw gun for every occasion.

COMFORTECH™ GEL COMB INSERTS & LEFT-HAND RECOIL PADS

◀ This special synthetic gel comb insert not only cushions the shooter's cheek during recoil, it also has a slippery surface that allows the cheek to slide along the surface for added comfort. Available in 3 comb sizes, ComforTech™ stocks only.

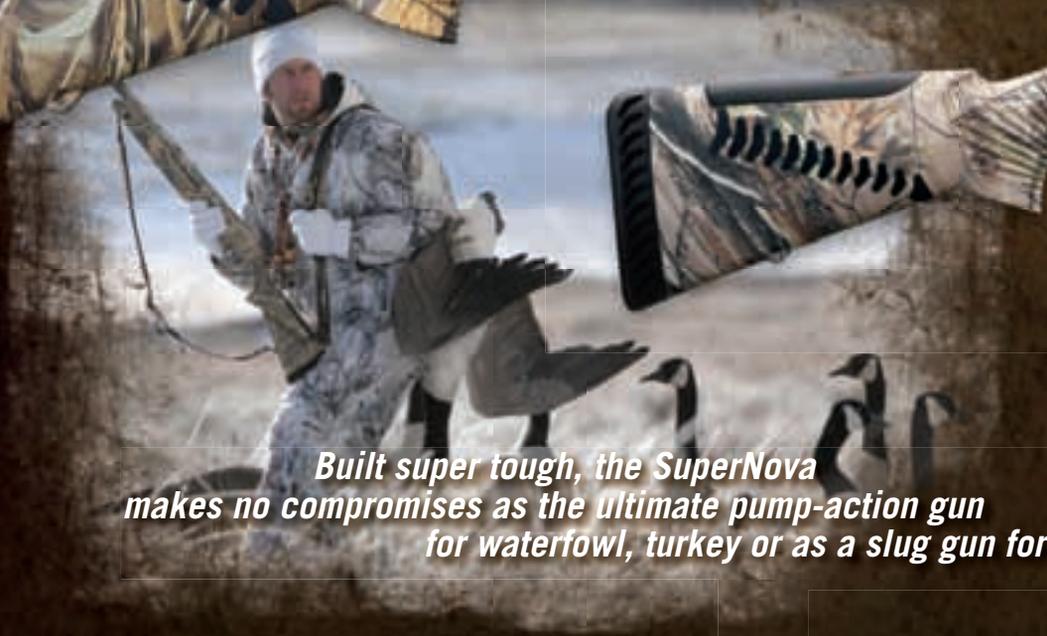

▶ Adjustable length-of-pull with optional left-hand ComforTech™ gel recoil pads.

SUPERNOVA**Pump-action shotguns that are rock-solid to the core**

Built super tough, the SuperNova makes no compromises as the ultimate pump-action gun for waterfowl, turkey or as a slug gun for deer.

THE BENELLI SUPERNOVA EMBODIES A MODULAR DESIGN CONCEPT in a pump-action shotgun. With the optional SteadyGrip™ stock, the SuperNova can be transformed into a high-performance turkey gun or mount a fully-rifled slug barrel for tack-driving accuracy on deer. There's even a barrel with rifle sights for home defense and a SuperNova Tactical fitted with a ghost-ring rear sight and pistol grip.

At the heart of this new pump gun is a lightweight steel skeleton framework over-molded with a high-tech polymer, making the new SuperNova super-light, super-strong and almost completely impervious to any weather condition. But the SuperNova isn't just tough on the outside, with its dual-action bars and two-lug rotary bolt head that locks up steel-to-steel inside the barrel, the SuperNova is rock solid to the core.

The SuperNova's newly styled trigger guard, similar to the Super Black Eagle II, allows for 30% more finger room for a gloved hand. In addition, a new larger safety button provides easy acquisition and quick, positive function.

- RAISED COMB PADS:** Three options to customize sight plane for target shooting.

SUPERNOVA

A shotgun that delivers rifle accuracy

The SuperNova offers the kind of dependability and accuracy that you can rely on when hunting for monster whitetails with a shotgun.

FRONT SIGHT

REAR SIGHT

The Benelli's adjustable rear and fixed blade front sights will get the job done in any weather.

Checkering is for wood stocks, but the SuperNova uses distinctive grooves that give both unmatched gripping surfaces and an unforgettably distinctive look.

The button on the underside of the fore-end activates a shell stop allowing a chambered shell to be removed without releasing rounds from the magazine.

SuperNova Slug Configuration Options — 12-GAUGE

SUPERNOVA RIFLED SLUG, COMFORTECH™

BENELLI'S MODULAR STOCK SYSTEM

STEADYGRIP™

PISTOL GRIP™

STANDARD COMFORTECH™

The SuperNova is available with a choice of three modular buttstocks and can be quickly reconfigured with a simple ratchet wrench. All three stocks are made of tough synthetic and have a textured matte finish to provide years of reliable service.

SUPERNOVA RIFLED SLUG, COMFORTECH™

Realtree® APG HD™ | 12-GA, 3" | **MSRP \$775**

In comparison to its competitors, the SuperNova with ComforTech™ reduces felt recoil by as much as 62%, shot recovery time by as much as 52%, and muzzle climb by as much as 33%. The comparison test used Federal's 3½" 1½ oz. steel load.

NOVA PUMP

Versatile and dependable when every shot counts

BACK WHEN EVERYONE thought that the pump-action shotgun couldn't be improved, Benelli unveiled the Nova Pump. Completely original and innovative, the Nova Pump incorporates a polymer stock and lightweight receiver into a single unit for unsurpassed strength and weather resistance. Italian styling and high-tech ergonomics make the gun not only pleasing to look at, but a delight to hold and handle. Distinctive grooves on the pistol grip and fore-end in place of conventional checkering provides a positive gripping surface and compliments the Nova's innovative engineering.

With dual-action bars and rotary head locking lugs, the Nova will handle anything from target loads to 3½" magnums. Available in Black synthetic, Advantage® Max-4 HD™, and new Realtree® APG HD™ finishes, and as a youth model, the Benelli Nova is the most versatile pump-action shotgun ever made.

NOVA PUMP'S ONE-PIECE SKELETON FRAME

Benelli's Nova is truly a 21st Century pump shotgun. Corrosion proof polymer is over-molded on a skeleton framework to form the one-piece receiver and buttstock, in a revolutionary shotgun manufacturing process. The lightweight polymer stock also provides plenty of room for mounting an optional 14-oz. recoil reducer.

SLUG GUNS

When accuracy means success, you can trust Benelli's slug guns

FRONT SIGHT

REAR SIGHT

The Benelli's adjustable rear and fixed blade front sights will get the job done in any weather.

"SLUG GUN ONLY" deer hunting areas are increasing across the country. Following the trend, Benelli engineers designed slug guns to give the accuracy and performance hunters have come to expect. The heart of the Benelli slug guns is a specially designed, heavy-walled 1:28" twist rifled barrel that gives accuracy undreamed of in conventional smooth-bore slug guns. The Super Black Eagle II, M2 12-gauge, M2 20-gauge, Nova Pump and SuperNova slug guns come standard with barrel mounted, fully adjustable rear sights, fixed blade front sights and specially designed receivers drilled and tapped for optics. The ComforTech™ stock, available for synthetic and Realtree® camo-patterned SBE II, M2 Field and SuperNova slug models, reduces felt recoil by as much as 48%.

OPTICS PACKAGES

TURKEY GUNS

Shotguns specifically designed with big gobblers in mind

NO MATTER WHAT YOUR STYLE

of turkey hunting there's a Benelli shotgun for the job. If you demand the ultimate ballistics

of the 3½" 12-gauge, choose the Super Black Eagle II.

The new ComforTech™ system stock will take the sting out of those 2-ounce loads. The same ComforTech™ recoil-reducing magic can be had in the 3" magnum M2 Field.

The turkey is the only game bird generally hunted from a static sitting position. To get the rifle-like accuracy needed, choose the guns voted "Shotgun of the Year." The M2 Field, Super Black Eagle II or the new SuperNova with the SteadyGrip,™ allows a comfortable, rock-solid grip. A comfortable sitting position makes it easier to wait patiently for that savvy old Tom.

The SuperNova and Nova 12-gauge pump guns shoot 3½" ammunition and are the smoothest pumping slide-actions on the market today. Like the lighter-weight and recoil of a 20-gauge? Choose the M2 Field or Nova Pump.

The extra-full turkey choke is specially designed to throw tight, uniform patterns with today's modern turkey loads (optional).

SteadyGrip™ — 12-GAUGE

SUPERNOVA, STEADYGRIP™

Realtree® APG HD™ | 12-GA, 3½" | MSRP \$595

BENELLI'S MODULAR STOCK SYSTEM

Benelli offers different synthetic stock options for the Super Black Eagle II, M2 Field and SuperNova. In Black synthetic and Realtree® camo-patterned guns that come with the ComforTech™ system can transform into a high-performance turkey gun with the purchase of a SteadyGrip™ stock. Fitting a rifled slug barrel can turn the same gun into the ultimate answer for deer, where hunting is restricted to slug guns.

The Super Black Eagle II, SuperNova and Nova shotguns, chambered for 3 ½ -inch shells, offer maximum 12-gauge power by handling the heaviest of magnum loads.

SUPER BLACK EAGLE II, STEADYGRIP™

Realtree® APG HD™ | 12-GA, 3½" | MSRP \$1,680
(Burris® Speed Dot scope not included not included)

Benelli's SBE II trigger guard and safety are a blend of style and function that comes together on the SBE II SteadyGrip™.

The SteadyGrip™ lets you sit comfortably as the most skittish gobbler winds his way to your call.

AirTouch™

The AirTouch™ dimple checking pattern on the M2's gives a secure grip in any kind of weather.

M4 STANDARD STOCK	Black synthetic
--------------------------	-----------------

Both durable stocks are made of tough synthetic and have a textured matte black finish to provide years of reliable service and withstand the rigors of everyday use.

M4 PISTOL GRIP STOCK	Black synthetic
-----------------------------	-----------------

The M-4 comes standard with a synthetic pistol grip stock that allows total control of the gun from any position. All stocks are made of tough synthetic and have a textured matte black finish to provide years of reliable service.

M4 ARGO SYSTEM

The stainless steel pistons are required to move only $\frac{1}{2}$ " for complete cycling which results in a faster operation with minimum vibration and quick target acquisition.

GHOST-RING SIGHTS

Optional three-dot tritium inserts can be easily installed into this military spec ghost-ring sight. The rear sight is click-adjustable for both windage and elevation. These sights are intended for rough service and feature rugged "wings" to protect the removable ghost-ring and front post.

M4 Ghost-ring Insert
Item (#60795) MSRP \$90

Benelli's versatile, reliable M4 serves our armed forces in some of the world's toughest terrains.

WHEN THE U.S. MARINE CORPS went shopping for a combat shotgun they bought a Benelli. That's because a combat shotgun has to function the first time, every time. The Benelli M4 does it for the U.S. military and now it can be the centerpiece of your own home defense plan.

Benelli engineers developed a unique Auto Regulating Gas Operated (A.R.G.O.) system. Dual stainless steel, self-cleaning pistons located just ahead of the chamber operate directly against the bolt assembly. The M4 Tactical comes standard with a Picatinny rail for optics, a fully adjustable ghost-ring rear sight and fixed-blade front sight and a black synthetic pistol-grip style stock. An optional standard stock is offered.

M2 TACTICAL PISTOL GRIP

Black synthetic

Ghost-ring Sights

12-GA, 3"

MSRP \$1,200

THE BENELLI M2 TACTICAL

M3 Convertible semi-auto/pump are no-nonsense

depend on. Both the M2 Tactical and M3 Convertible are available with matte black synthetic stocks, fully adjustable ghost-ring aperture rear sights and military style fixed-blade front sights. The M2 Tactical is available with a pistol grip, standard or ComforTech™ stock, while the M3 Convertible comes with a standard black synthetic stock.

If your life depends on it, then depend on a Benelli.

INERTIA DRIVEN® SEMI-AUTO and the

shotguns that military and police all over the world

M2 Tactical Configurations — 12-GAUGE — 18.5" Barrels

M2 TACTICAL, COMFORTECH™	Ghost-ring Sights
Black synthetic	12-GA, 3" MSRP \$1,300

Black synthetic	12-GA, 3" MSRP \$1,100

M3 CONVERTIBLE	Ghost-ring Sights
Black synthetic	12-GA, 3" MSRP \$1,380

The M3 Convertible Auto/Pump is a fast cycling auto for conventional loads that can be pumped manually for low energy special purpose loads such as gas, beanbag and rubber bullet loads.

GHOST-RING SIGHTS

The military spec ghost-ring sights utilized by the M2 Tactical and M3 Convertible can accommodate optional three-dot tritium inserts. Windage and elevation is click adjustable on the rear sight. Designed for rough usage, rugged "wings" protect the removable ghost-ring and front post.

M3/M1/M2 Ghost-ring Insert Item (#60794) MSRP \$90

FEATURES

	STANDARD		OPTIONAL
CHOKE TUBES:	Crio® IC, M, F, on M2; fixed C on M3 Convertible.	GEL RECOIL PADS:	Three options to customize length-of-pull to 13½", 14", or 14¾" (M2 Tactical models only).
FINISH:	Black synthetic.	MODULAR STOCKS:	Variety of Black synthetic modular stocks.
SIGHTS:	M2 Tactical in ghost-ring and open rifle; M3 Convertible in ghost-ring only.	TRITIUM INSERTS:	Three dot tritium inserts available for ghost-ring sights.
DRILLED & TAPPED:	M2 drilled & tapped; M3 Convertible not.		

BENELLI'S MODULAR STOCK SYSTEM

The M2 is available with a choice of modular synthetic buttstocks and can be quickly reconfigured with a simple 13mm socket. All stocks are made of tough synthetic and have a textured matte black finish to provide years of reliable service.

DEFENSE

Danger knocks — Answer with absolute confidence

FRONT SIGHT

REAR SIGHT

GHOST-RING SIGHTS

Optional three-dot tritium inserts can be easily installed into this military spec ghost-ring sight. (see page 59).

BENELLI'S SUPERNOVA TACTICAL IS A MODULAR concept pump-action

shotgun that can be quickly reconfigured with different special-purpose stocks to be ready for any home defense or tactical situation. The ComforTech™ stock absorbs nearly 48% of felt recoil to dampen the jolt of heavy buck shot loads. The tactical pistol grip stock turns the SuperNova into a rock solid shooting platform for optical sights and slugs at long yardage.

The Nova Pump Tactical comes with either open rifle sights or click-adjustable military style ghost-ring aperture sights. The Nova H₂O Pump Tactical utilizes a corrosion-resistant chrome and nickel-plated components to ensure function in the harshest conditions.

Shell stop button

BENELLI'S NOVA PUMP H₂O COATING

The barrel, magazine tube, magazine cap, trigger group and all other inner metal parts are nickel-plated on the Nova H₂O to survive the wettest, saltiest environments.

With a chrome-plated rotary bolt head and a matte nickel-finished bolt body, the Nova Pump H₂O is ready to take on the harshest weather and keep on firing.

R1 RIFLE

Benelli's R1 rifle takes the sting out of magnum loads

JUST IMAGINE A .300 WINCHESTER MAGNUM that feels like you're shooting a light .270 and you'll understand what this rifle from Benelli is all about. The R1's ComforTech™ recoil dampening stock, cuts felt recoil. To put it more graphically, other high-powered rifles kick about twice as hard.

Three different thicknesses of quick-change pads for adjusting length-of-pull and three different comb inserts to adjust for drop are available. Also included is a totally unique accessory — a shim kit to make precise stock adjustments for drop and cast providing a truly custom fit.

NEW! APG 2-7X35 VARIABLE SCOPE

Realtree® APG HD™ | 2-7X35
MSRP \$270

The Benelli R1 with ComforTech™ features a high-tech texturing material on both the stock and fore-end called GripTight®. This synthetic over-coating feels almost tacky to the touch, so consequently, gives a sure grip wet or dry, with bare hands or even gloves. GripTight® is totally weather resistant and completely bonded to the surface of the synthetic material of the stock and fore-end.

apg HD

DRILLED & TAPPED:	All R1 receivers are drilled and tapped for scope mounting and come equipped with a Picatinny rail.		

R1 RIFLE**When there's no compromise for accuracy****argo system**

SIMPLICITY, STURDINESS AND INGENUOUS DESIGN are the distinguishing features of the patented Auto Regulating Gas Operated (A.R.G.O.) system—the mechanism that's at the heart of the R1 rifle. The operating system contains a short-stroke piston, which captures pressure to create sufficient force to operate the bolt, and which also helps to absorb some of the recoil. Add to this unique and reliable operating system, the recoil-dampening ability of optional recoil-pads of varying thicknesses for length-of-pull adjustments and much of the sting of recoil removed from the R1.

Another unique feature of the R1 rifle is interchangeable barrels, meaning that one rifle can convert to any caliber currently available from an ever-expanding selection of calibers from Benelli. Also included is a shim kit, providing precise stock adjustments for drop and cast for a truly custom fit.

**OPTIONAL R1 RIFLE STOCK EXTENSIONS**

The R1 is perfect for shooters of all sizes. Optional recoil pads are available for the desired length-of-pull (13 $\frac{3}{8}$ " 14" 14 $\frac{3}{8}$ ").

Quick detachable magazine holds three to four rounds, depending on caliber.

AUTO-REGULATING GAS-OPERATED (A.R.G.O.) SYSTEM

The reliability of the R1's Auto Regulating Gas Operated (A.R.G.O.) system has been proven in the M1014 military shotgun and has been adapted for centerfire rifle cartridges with a three-lugged rotary bolt. The rifle's gas cylinder is positioned just in front of the chamber allowing for short operating rods and reduced recoiling mass.

GAS PORT

The gas port is located just forward of the chamber where the gases are hotter and cleaner resulting in less fouling and more reliable cycling.

SIMPLE DESIGN GAS PISTONS

Two short stroke, self-cleaning gas pistons push directly against the R1's bolt body, eliminating the need for connecting linkage or heavy action bars.

PISTONS

Since the pistons push directly against the bolt, they are required to move only 1/2-inch for complete cycling which results in fast operation with minimum vibration.

TORQUE LOCKING SYSTEM

System ensures repeatable accuracy when changing barrels, because tension remains constant shot after shot.

R1 RIFLE

AA-Grade satin walnut	.300 WIN. MAG	MSRP \$1,290
-----------------------	---------------	--------------

(shown with optional R1 Rifle sight package)

OPTIONAL R1 RIFLE SIGHT PACKAGE

Optional open sights feature a fully adjustable rear blade and front sight with a special red fiber optic insert.

Usually only found on custom-made rifles, the R1's barrel is cryogenically frozen to -300° F which changes the steel at the molecular level. The result, better barrel harmonics providing superior accuracy.

Chamber pressure is contained by the massive three-lug rotary locking head, which locks into the steel barrel extension.

RECOIL REDUCERS

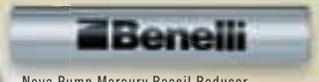

Benelli's Nova is truly a 21st Century pump shotgun. Corrosion proof polymer is over-molded on a skeleton framework to form the one-piece receiver and buttstock, in a revolutionary shotgun manufacturing process. The lightweight polymer stock also provides plenty of room for mounting an optional 14-oz. recoil reducer.

SBE/M1 Mercury Recoil Reducer

MERCURY RECOIL REDUCER

Benelli offers a mercury recoil reducer for the 12-ga. Super Black Eagle and M1 Field models with synthetic stocks. It weighs only 11 ozs. and is easily installed (no bracket is necessary).

Nova Pump Mercury Recoil Reducer

RECOIL REDUCER BRACKET

The Nova Pump's stock has a recess for easy installation of a recoil reducer bracket which houses a 14-oz. mercury recoil reducer. When shooting the mighty 3½" magnums, this innovative system is a welcome addition.

NOVA RECOIL REDUCER PACKAGE

Includes the mercury recoil reducer and bracket for easy installation.

SHIMS KITS

STANDARD SHIM KIT

Stock drop is user adjustable; changing shims provides a customized sighting plane to fit the individual shooter's unique physical build and shooting style (specify model).

COMFORTECH™ SHIM KIT

You can customize the models with the ComforTech™ buttstock to your personal requirements using a shim kit that adjusts both drop and cast also fits newer Montefeltros and Legacys.

NEW!

TOM KNAPP

Benelli "Top Guns" are the greatest

Tom's M1 Super 90—retired after 500,000 rounds fired – still in perfect working condition.

TOM KNAPP, recognized as the greatest exhibition shooter of modern times, appears at more than 140 live shows a year in the United States and Europe, thrilling countless spectators with his seemingly impossible feats with shotguns. Of course the shotguns that Tom shoots are Benellis.

The holder of two World Records for hand-thrown clay targets — 9 clays with a Benelli M1 Super 90 in 1993 and 8 clays with a Benelli Nova Pump in 2000, Tom set out to do it again. On October 20th, 2004, he **did** the unbelievable, shooting 10 clay targets out of the air in 2.2 seconds with a Benelli M2 Field with ComforTech™. Tom says that hard work and commitment are key elements to success, but added, "Without **the right** equipment I could never do it. That's why I shoot Benellis."

WORLD RECORD NO. 1

Tom joined Benelli in 1993 when he set the world record with his Benelli M1 Super 90 by throwing nine standard clay targets and breaking them with individual shots in 2.3 seconds.

WORLD RECORD NO. 2

On July 19, 2000 Tom Knapp, with his Benelli Nova pump in one hand, threw eight clay targets in the air with his other hand and broke everyone of them with individual shots in an amazing 2.1 seconds.

WORLD RECORD NO. 3

In Murfreesboro, Tennessee, on October 20th, 2004 Tom Knapp set out to make history again. With his 12-ga. Benelli M2 fitted with a Comfortech™ stock and extended magazine tube, Tom launched ten clay targets into the air with one hand, shooting all ten with individual shots in an unbelievable 2.2 seconds.

Tom Knapp finally retired his old Benelli M1 Super 90 in 2006 when he donated it to the Buffalo Bill Historic Center in Cody, Wyoming, where it is on permanent display next to the guns of other great exhibition shooters like Herb Parsons and Annie Oakley. Tom's old Benelli wasn't worn out, in fact it had never let Tom down. After Tom had presented his faithful Super 90 to the museum, he sat down to figure out just how many rounds he had fired through that gun. With over 100 live shows per year, the total number of rounds put through the Benelli was over half a million. Well, it's a good thing Tom decided to retire that gun, because at that pace he might have worn it out... in another hundred years or so.

TIM BRADLEY

Team Benelli's newest exhibition shooter

TIM BRADLEY learned to shoot at an early age. Growing up on his family's farm in northeast Arkansas he shot almost everyday, devoting every spare minute to hunting, trapping and shooting—often burning up five or six cases of .22 ammunition each year. During his high school years Bradley became interested in boxing and the martial arts, earning his black belt in karate by the age of 17.

Utilizing the discipline he learned from the martial arts and his ability for mastering extreme challenges, Bradley tackled the unique and difficult requirements

of becoming a world-class exhibition shooter. He honed his gun handling skills through years of practice, and by firing thousands upon thousands of rounds of ammo. Bradley's talents were recognized by none other than Tom Knapp, Team Benelli USA's World Record holding exhibition shooter. Determination and dedication to perfect specific shooting skills finally paid off for Bradley, who was invited to join Team Benelli's busy shooting exhibition schedule, teaming up with Tom Knapp in 2006 to thrill crowds of all ages all across the country.

BENELLI'S TV SHOWS

Featuring exciting hunts on the **VERSUS** channel

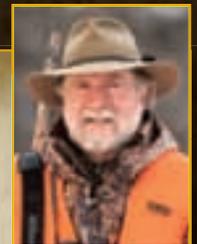

TOP-RATED BENELLI'S AMERICAN SAFARI, Benelli's original TV show, continues its sixth season airing on VERSUS. The show features host, Stephen McKelvain, passionate hunter and expert marksman, who teams up with various guests and celebrities to hunt birds and big game all over the world. A weekly "Shooting Tip" from Benelli Top Gun, Tom Knapp, covers subjects like, proper choke selection, correct leads, field safety issues, hearing protection, proper sight picture, ammo selection and others.

VERSUS

WATCH BENELLI'S TWO TOP RATED TV SHOWS ON VERSUS

BENELLI ON ASSIGNMENT, Benelli's brand new TV show begins its second season airing on VERSUS. Host, Joe Coogan, former African professional hunter and outdoor writer, teams up with editors, writers, and photographers from national magazines, who are "on assignment" to write about their hunting experience using the Benelli family of products on the show.

Host Joe Coogan travels the world to hunt "on assignment" with nationally known outdoor writers and photographers.
