

2008 – 2009  
BERETTA  
ANNUAL

BERETTA

500 YEARS. ONE PASSION.

At the core of Beretta is a passion.  
An understanding of the wild places. The cold fields of autumn.  
The high grass and the low marsh. Rain and sun. Man and dog.

It's an understanding that is pure and real.  
It lives in the deepest reaches of the hunter's heart.  
The innermost corners of the shooter's soul.  
And it is everywhere.  
A field in Tuscany. A lake in Wyoming. The flash of a tail. The thunder of wings.

And then there is the stirring. The relentless search for balance.  
Between what has gone before and what is yet to be.  
Between then and now and tomorrow.

This is the passion that drives Beretta. It's in our genes.  
And so, too, is it in our hearts. It's why we exist.  
And it's why we have endured for nearly 500 years.  
Because of one purpose. One passion.

A FAMILY TRADITION

La Presidenza  
Fabbrica d'Armi Pietro Beretta S.p.A.  
Via Pietro Beretta, 18  
25063 Gardone Val Trompia  
Brescia, Italy

Dear Friends,

Welcome to the 2008 Beretta Annual. It is with great pleasure that I introduce this book and the family of Beretta products that showcase our unwavering commitment to master craftsmanship, absolute reliability, and industry-leading innovation. In a year in which we once again expect to see Beretta firearms accompany the world's best shooters atop the Olympic medal stand, you will see that we have not for a moment rested on our laurels. We continue to be driven to bring you newer and better firearms, and the accessories that accompany them.

You see, we have a passion for everything that we do. You can see it in the details of our products and in our commitment to our customers. It is not enough to make the best firearms; we must also respond to our customers' needs and provide them with everything it takes for them to pursue their passions.

We are more committed than ever to the sporting life. In these pages you will find products that are a true reflection of who we are. We live, love, and believe in what we do. Just like you, the Beretta family's outdoor pursuits are wide ranging: upland, big game, waterfowl, competition shooting, Western and more. Because of this, we are committed to bringing you all-inclusive collections of firearms, apparel, and accessories — designed to complement each other and suit each individual's particular need.

Cav. Ugo Gussalli Beretta  
President, Fabbrica d'Armi Pietro Beretta S.p.A.

INTRODUCING  
UPLAND SPORTSMAN

Whether it's aspens and alders that hide the darting flight of woodcock and grouse — or the open grass plains of pheasant and quail — you are in your element. The crisp fall morning air heightens your senses as the sun warms your face. You once again marvel at the gracefulness of your trusty German Shorthair at rock-solid point. It is a scene you've both played out many times before. Yet it feels as fresh and exhilarating as the first time you swung your shotgun towards the skies. No matter the day's result, this is reward enough.

These moments are what bring you back season after season. A respect for nature, harmony, and heritage are the hallmarks of the Beretta Upland Sportsman. Hallmarks that are reflected in Beretta's superb collection of fine shotguns perfectly suited for their purpose in the field, superior upland apparel designed to meet the challenges of nature, and accessories that perfectly complement your passion and pursuit.

UPLAND SPORTSMAN

## SV10 PERENNIA

DESIGNED TO PERFORM. THE REVOLUTIONARY SV10 PERENNIA.

## SV10 PERENNIA

### SV10 PERENNIA JV13A18

Every once in a generation or so comes along a shotgun that revolutionizes and reshapes the category. Beretta's SV10 Perennia is such a firearm. The third evolution of Beretta's celebrated over-and-unders, its lineage springs from the elegant and high performance SO10.

Like its root word, perennial, it has been meticulously engineered for reliable performance, year after year, round after round. The Perennia's new aesthetics and technical design are unmatched anywhere. A redesigned safety offers a better grip and ergonomics, while a new locking system provides a more constant lock between the stock and receiver. From its deeper, more elegant breech shoulders and wide ellipse for clear, richer engravings to its innovations like the first ever application of Kick-Off technology in a wooden stock, this is a world-class gun that will outperform your expectations.

The receiver, while maintaining the traditional Beretta locking system with trapezoidal shoulders and double longitudinal locking lugs, is characterized by arrowhead-shaped sideplates that stand out from the sides. The locking shoulders of the monobloc and their corresponding seats on the receiver feature new, larger shapes that are not only better integrated into the design of the sideplates, but also improve the efficiency of the lock-up. The styling refinements continue into the shape of the stock inletting, which now moves well forward into the sides of the receiver, consolidating the rigidity of the assembly.

The new profile of the barrels also unifies form and function: The tubes elegantly blend with the receiver and ensure excellent strength and durability.

The top moldings integrate gracefully with the style of the receiver, while guaranteeing an improved field of view when sighting.

Machined from a solid steel alloy billet, hardened and tempered, the Perennia's over-and-under receiver provides a low and elegant profile that allows the redirection of the recoil in-line to the shooter's shoulder. This reduces the felt recoil and eases shouldering.

The high-strength alloy receiver is treated with an exclusive, nickel based, protective finish that increases its durability and resistance to corrosion.

SV10 PERENNIA

**KICK-OFF**

**BERETTA Q-STOCK,  
PATENTED QUICK TAKE-DOWN STOCK**

The new profile Q-Stock features an exclusive attachment system to the receiver, patented by Beretta, which allows its disassembly in just a few

seconds – for replacement, special work or access to the trigger mechanism – without having to remove the recoil pad. This new Q-Stock design no longer requires the traditional internal through-bolt since it attaches directly to the receiver, increasing the solidity of the receiver-stock assembly. The result is a lock-up that is constant over time, also contributing to extending the life of the shotgun. The disassembly operation is executed using the included special key, inserting it through the grip cap which features an elegant and functional hinged coverplate.

**REMOVABLE TRIGGER GROUP**

Once the stock is removed, even the trigger group may be quickly removed in order to have access to all of its components for cleaning or maintenance. The disassembly may be performed with the same tool used to detach the stock.

**TITANIUM TRIGGER**

The Beretta Perennia is formed from solid, lightweight, titanium. This premiere material guarantees the durability and reliability of use. The mirror polish highlights the harmony of its shapes.

**TRIGGER GUARD AND TRIGGER PLATE**

The strong trigger guard, machined from a single piece of steel, elegantly blends into the trigger plate via two rounded reinforcement ridges. Even in this case form and function are wisely intertwined.

**REINFORCED HINGE PINS**

Well proportioned yet characterized by a significant size, the hinge pins, also thanks to a new special internal reinforcement shoulder, offer the maximum resistance to the stress of years of use. Positioned as close as possible to the lower barrel axis, the pins allow the compactness, elegance and strength of the receiver.

**NEWLY DESIGNED SAFETY/SELECTOR LEVER**

New top lever design. The newly designed top lever features a wide surface area to ensure ease and comfort of operation. The design of the safety/selector assembly has been executed with attention to the smallest detail to ensure smooth, precise and secure operation and a constant engagement force. The selector (where present) is integrated into the lever and snaps precisely into one position or the other, avoiding the annoyance of being in a non-firing 'neutral' position and compromising the shot.

## SV10 PERENNIA

### NEW BARREL PROFILE

Manufactured from the highest strength alloys using the exclusive process of cold hammer forging, which guarantees the perfect concentricity of the tubes, the barrels of the new Beretta Perennia are extremely strong yet, at the same time, extremely light. Designed to be able to withstand the rigors of steel shot, they feature a new internal Optima-Bore HP (High Performance) profile with a longer forcing cone which improves patterning and contributes to reduce felt recoil. The bore and chamber are completely chrome-lined to guarantee maximum resistance to corrosion and wear, and to increase the velocity of the shot. The new profile of the barrels joins form and function: The tubes blend harmoniously with the monobloc, mating the streamlined profile of the receiver and, at the same time, ensuring excellent durability and strength. The external surfaces of the barrels are finished in a resistant polished bluing.

### NEW LONG GUIDED EXTRACTORS

The newly designed extractors are precisely guided along the entire length of the barrel monobloc to ensure impeccable extraction or ejection of the shells. The large contact surface area of the extractors on the rim of the shell improves its retention and reliability.

### SPECIAL 'ENVIRONMENTALLY FRIENDLY' EXTRACTION SYSTEM

In the new Perennia over-and-under, Beretta introduces a new patented extraction system that allows the selection between automatic ejection or simple mechanical extraction of the fired shells. The selector is easily accessed by simply removing the fore-end.

### NEW BERETTA OPTIMACHOKE® HP CHOKE TUBES

The new flush Beretta Optimachoke® HP (High Performance) choke tubes feature an internal profile to reduce friction and improving the density and distribution of the pattern. Manufactured from high-strength steel and finished in a nickel-alloy coating, the Beretta Optimachoke® HP chokes guarantee significant corrosion resistance and ability to withstand the rigors of steel shot.

### NEW FORE-END AND FORE-END IRON

The fore-end, streamlined and elegant, features new ergonomic shapes that guarantee its optimal grip. The new fore-end iron boasts a new patented internal mechanism that maintains a constant barrel-receiver-iron fit. This system further contributes to improve the strength of the locking system and the service life of the gun. The new fore-end lever, with its elongated shape, ensures the smooth release of the fore-end from the barrel.

### KICK-OFF® RECOIL REDUCTION MECHANISM

The new patented Kick-Off® mechanism (on select models only) was conceived to significantly reduce the felt recoil to the shooter's shoulder. Thanks to Kick-Off®, the recoil energy is gradually dissipated through two oil hydraulic dampeners integrated into the design, with obvious increased comfort to the shooter. At the same time, the vibrations and the muzzle rise are decreased, and the durability, reliability and handling of the firearm are enhanced.

# 687 EELL DIAMOND PIGEON

### 687 EELL DIAMOND PIGEON J6873A0

In Italian, EL stands for *extra lusso* (extra luxury). The EELL designation takes that quality to an even higher level. This is an over-under with the feel and allure of a classic game gun for the discriminating sportsman who appreciates all the finer points of a well-made shotgun. The patented locking system creates a particularly slim receiver, making it one of the most elegant, finely balanced and responsive shotguns in the world. The extensive hand-chased engraving, combined with the highly figured oil-finished walnut, makes a classic statement of your good taste. The 687 EELL Diamond Pigeon is also available in 20/28 gauge Combo set.

The sideplate design gives the engraver full scope for his craft. When combined with fine walnut, nothing is quite so pleasing.

### 687 EELL DIAMOND PIGEON COMBO

ACTION	LOW PROFILE, IMPROVED BOX LOCK

The rich hand-chased engraving extends to the trigger plate and trigger guard.

## 687 SILVER PIGEON FAMILY

### SILVER PIGEON V J6871R8S

The pinnacle of the Silver Pigeon line, this prestigious over-under is stocked in richly figured, oil-finished walnut and detailed with gold game bird inlays and a Beretta gold medallion underneath. The receiver is treated with Beretta's proprietary process that imparts a classic color-case finish that ensures metallurgical integrity and a distortion-free part. A joy to own and shoot, thanks to Beretta's superior mechanical refinement and innovative technology, the Silver Pigeon V will last for generations.

### SILVER PIGEON IV J6871B8

Beretta shotguns are carried with pride on every continent. The Silver Pigeon IV is expressly styled to satisfy those who desire a classic blued finish. In contrast to most Beretta over-unders, it has a rich, classic black frame, accented by gold inlays that reflect the typical quarry for each gauge. It's a striking gun that stands out — even among other Berettas.

### SILVER PIGEON III J6871J8

There's no need to sacrifice style for function with this attractively priced member of the Silver Pigeon family. The distinctive Silver Pigeon III has all the features of the S and II, but with more extensive engraving, including game scenes, on the frame. Available in a trim and racy 28-gauge made on its own properly scaled frame, this finely crafted shotgun with natural pointability is up to any hunting challenge.

## 687 SILVER PIGEON

### 687 SILVER PIGEON II J687155

Designed to perform, the Silver Pigeon II is also as beautiful to the eye as it is to the touch. The oil-finished stock is select walnut with a traditional Schnabel fore-end; bold game scene engraving separates it from other shotguns. This over-under also enjoys the Beretta's legendary pointability, thanks to the 680 series low-profile receiver. Furthermore, the absolute strength of the unique locking system provides for years of trouble-free use. Also available in 20/28 gauge combo set.

## 686 SILVER PIGEON S

### 686 SILVER PIGEON S J68652

With the same level of mechanical refinement as Beretta's higher end over-unders, this entry-level shotgun offers an economical way to enjoy both the aesthetics and quality of a prestigious Silver Pigeon. The extensive floral and scroll engravings are executed on a satin nickel-alloy finished receiver that is exceptionally resistant to wear and corrosion. And the dual-cone locking mechanism stands up to years of constant shooting.

## 687 ULTRALIGHT FAMILY

### ULTRALIGHT DELUXE J687575

When game trails are long and terrain is rugged, every ounce comes to tell as the hours pass. The Ultralight is a 12 gauge that carries like a small bore. The key to the Ultralight's feathery feel is a light but strong aluminum frame, reinforced at the breech face and shoulders with hard, durable titanium. In this Deluxe version, Beretta has added highly figured oil-finished walnut stock and full floral engraving with gold-filled game birds.

### ULTRALIGHT J687559

Like the Ultralight Deluxe, this sturdy over-under will help you stay afield. The lightweight aluminum and titanium alloys keep weight to the very minimum while preserving the smooth, sure handling you expect from a Beretta. The Ultralight has a semigloss-finished walnut stock with a Schnabel fore-end. Its receiver is distinctively decorated with the very game birds a hunter might pursue with Ultralight in hand.

Why low profile? Beretta's box lock mechanism allows a lower profile receiver. This benefits the shooter's accuracy, providing improved hand-to-eye coordination for instinctive shooting.

	ULTRALIGHT DELUXE	ULTRALIGHT
<b>ACTION</b>	LOW PROFILE, IMPROVED BOX LOCK

# 686 WHITE ONYX

### 686 WHITE ONYX J6862K6

At some point in every sportsman's hunting life—whether as a novice or a seasoned shooter in need of an additional gauge—a no-nonsense, versatile tool is called for. The 686 White Onyx, with its streamlined stock design for fast target acquisition, top mounted bolt-lug design for secure barrel lockup, and easy maintenance, fits the bill. The satin nickel frame is accented with Beretta's Dura-Jewel finish for a classic look.

### 686 WHITE ONYX

\*WEIGHTS ARE APPROXIMATE, DEPENDENT ON WOOD DENSITY AND BARREL LENGTH.

Beretta over-unders are known for their slim, low-profile receivers that let the shotgun rest low in the hands for superb pointability.

## 471 SILVER HAWK FAMILY

### 471 SILVER HAWK J471240

Extensive scroll and leaf engraving and a gold-filled hawk's head on the top lever make the 471 Silver Hawk a prestige item you'll be proud to carry in any company. Just like the 471 EL, this side-by-side's frame is made of a steel alloy rich in nickel, chromium and molybdenum for durability and beauty. Both shotguns feature barrels joined to the monoblock by a laser system that creates the strong, secure Beretta barrel assembly.

### 471 EL SILVER HAWK J470335

Combining half a millennium's worth of design skill and craftsmanship with state-of-the-art technology, the classic side-by-side 471 EL Silver Hawk is a hunting arm that is both beautiful and rugged. Its lines and finishes recall the best of a bygone era. The classic English-style buttstock and splinter fore-end are made of oil-finished select walnut. Case-hardened sideplates with Beretta's unique coloring process are decorated with eye-catching gold-filled game bird scenes.

The 12-gauge Optima-Choke tubes feature longer tapered construction, assuring greater pellet concentration and better distribution of shot.

The sideplates are attached without visible screws, for a classic understated look.

AL391 TEKNYS GOLD

**AL391 TEKNYS GOLD J391T36**

The AL391 Teknys Gold brings unmatched design and prestige to the most discriminating autoloader aficionado. Beretta's ultimate field autoloader, this distinctive sporting arm with superb recoil control performs as well as it looks. Its semiautomatic gas system cycles ammunition ranging from feathery target loads to thumping 12-gauge, 3-inch magnums. Select oil-finished walnut buttstock and fore-end with polished side panels are complemented by deeply engraved hunting scenes.

A green enamel inlay at the wrist gives the Teknys a distinctive look.

The buttstock can be adjusted for drop and cast with a supplied shim spacer kit.

## AL391 URIKA 2 GOLD

12 GA.

20 GA.

### AL391 URIKA 2 GOLD J39TB18

Beretta offers an enhanced version of the award-winning gas-operated semiautomatic that has sold over 1.5 million units worldwide since its introduction. The Urika 2 has several notable features that make it the fastest, easiest, and smoothest handling semiautomatic on the market today. The AL391 Urika 2 Gold features a higher grade of select oil-finished wood stock and fore-end. The upgraded engraving scheme features gold-filled game bird inlays.

## AL391 URIKA 2 CLASSIC

### AL391 URIKA 2 CLASSIC J39TB18

For Upland hunters, the Urika 2 Classic comes in a standard model that features the new X-Tra Grain wood enhancement treatment — and for the first time on the base Urika — tasteful fine-line scroll engraving on either side panels of receiver.

### THE BERETTA GAS SYSTEM IS TWICE AS FAST AS ANY OTHER OPERATING SYSTEM.

The gas system has been improved by the addition of a spinning and self-cleaning action. As gas pressure is fed into the gas cylinder, a series of expandable fingers on the piston move outwardly to clean the gas cylinder as the action cycles. Additionally, the gas piston is imparted with a spinning motion and "scraper teeth" to ensure carbon deposits are thoroughly dislodged and removed from the gas system. This improved cleaning action greatly contributes to enhanced reliability and longer functioning shooting periods between cleaning.

### X-TRA GRAIN

Beretta's proprietary X-Tra Grain wood treatment is standard on classic models. This wood surface enhancement process, applied to the walnut of the stock and fore-end is obtained from a new technology that highlights the color contrast of the wood, resulting in a beautiful and rich pattern.

## APPAREL AND ACCESSORIES

**CORDURA**

### UPLAND CORDURA® JACKET

GU6B3570

SIZES M-XL/XXL-XXXL

Constructed of abrasion-resistant, high-performance Cordura, this bi-swing back jacket features ambidextrous recoil pockets, easy-clean no-seam game bag, easy-access full shell box pockets, non-skid shoulder gun rests, and too many other features to list.

**CORDURA**

### HEAVYWEIGHT HIGH-ABRASION

### UPLAND CORDURA® FIELD PANT

CU753570

SIZES 32-44

Field features include articulated knees, zip-open overboot side construction, rubberized waistband, hidden snap flaps and sideseam security pockets. Mesh-lined at the top for comfort.

# APPAREL AND ACCESSORIES

## UPLAND CORDURA® BLAZE CAP

BC139168

SVPD204 O/U OR S/S TO 32½"

SVPD208 O/U OR S/S 2 BBL TO 32"

Our hard canvas cases are built on the same high-quality frames as our leather cases for long-term durability and secure gun protection. The handsome 22-oz. canvas covering is finished with full-grain leather corner protectors and combo locks. USA canvas constructed in Mexico. (Gun will not fit in case with extended chokes attached.)

## APPAREL AND ACCESSORIES

### WAXWEAR FIELD GEAR

Keep your gear dry and organized even in the worst weather. The field-proven, military spec fabric is tear-resistant, dry to the touch, and waterproof. Unlike traditional oil-finished cottons, Waxwear has no oily finish or smell — only all the features needed to meet the demands of the upland hunter and waterfowler.

No Odor — Dry Hand  
**BERETTA WAXWEAR**  
The Preferred Performance Fabric  
*No Oil Migration!*

### GUN CASE PROTECTS WITH WRAPAROUND FOLDER CLOSURE

#### SFOUI0090

Our 54" gun boy case features a wraparound folder that will protect your shotgun from the elements. Comfortable non-skid shoulder strap and hand carry. Leather accents.

Colors: 87)spice, 76)loden.

### FIELD BAG — FLOATS

#### SBSUI0090

This durable bag will float fully loaded with six boxes of shells. Newly designed to give you more pockets, inside and out, including a new padded pistol sleeve behind the choke tubes. All brass hardware and top-quality leather trim. Comfort-curved, anti-slip shoulder strap. 17" x 11" x 12". Colors: 87)spice, 76)loden.

### WATERPROOF TRIPLE GAME BELT

#### SCAU00

Our rugged, waterproof Waxwear cotton game belt carries everything you need for a day in the field in three big pouches: two for shells and one lined for your birds. Sturdy leather belt adjusts to fit 32"-60" waists and wears comfortably fully loaded. Colors: 87)spice, 76)loden.

APPAREL AND ACCESSORIES

**WAXWEAR FIELD JACKET**

**GU422503** Sizes M-XLXXL

Classic hunt outerwear taken to a new performance and comfort level. Take to the field in confidence no matter which way the weather turns with a tear-resistant Waxwear shell and Thermore® insulation barrier between shell and full lining.

**WAXWEAR FIELD VEST**

**GU372503** Sizes M-XL/XXL

The vest has all features of the jacket, minus the sleeves! Hand-wash cold. Line dry. Do not iron or dry clean.

**WAXWEAR FIELD PARKA**

**GU46H2503** Sizes M-XLXXL

An ideal layering piece in wet weather. Vented cape back, attached hood, adjustable wind cuffs and drainage grommets help keep you dry and comfortable.

**WAXWEAR FIELD CHAPS**

**CU342503**

Sizes I (S/M)/II (L-up)

Constructed of 10-oz. cotton canvas, overlaid with Waxwear. Available in two leg-width sizes, I (S/M) and II (L and up). Snaps regulate the length.

APPAREL AND ACCESSORIES

NEW COMFORT MAPPING TECHNOLOGY

Breathability, comfort, warmth and fit — precisely where you need them most. This is what happens when the engineers at GORE-TEX® and Beretta put their heads together. Comfort Mapping Technology strategically uses different GORE-TEX® fabrics in specific locations for the ultimate in performance and comfort. Best of all, this breakthrough technology is constructed in a lightweight, breathable fabric that's easy to layer and easy to pack and carry.

**CORDURA**

COMFORT MAPPING JACKET

GU1E3152      Sizes M-XL/XXL

Innovative Comfort Mapping Technology transforms this coat into the best performing hunting jacket you've ever worn in the field. Cordura®, GORE-TEX® and PaLite, along with heat-formed seams, deliver a waterproof, warm and breathable outer shell that can take on the most extreme conditions.

APPAREL AND ACCESSORIES

**QUILTED MICROFIBER GAMEKEEPER'S JACKET & VEST**

**GU562505 Jacket**

Sizes M-XL/XXL

**GU5922505 Vest**

Sizes M-XL/XXL

Polyfill ensures warmth, while a ribbed knit neck helps keep cold breezes out. Color-coordinated suede leather trim on the pockets matches the two large recoil patches. Rib knit side panels and snap side vents for range of movement; two large shell pockets and two carry gun pockets. Jacket features removable Beretta braces and ribbed internal cuffs. Fully lined.

**BERETTA CLASSIC SHIRT**

**LU777676**

Sizes M-XL/XXL

Classic plaids in an easy wash-and-wear finish. The secret is in the weave and finishing of the pure cotton flannel yarn-dyed twill. Single-button patch pocket styling and center box pleat for easy movement.

INTRODUCING  
AMERICAN WATERFOWLER

Opening day. A time-honored tradition mixed with today's technology and innovation. The feel of your favorite camo jacket brings back memories of satisfying hunts past. Your waders still wear last year's mud as a badge of honor. As you ready for the day, you gather shells, decoys, hot coffee — and your shotgun. Then crouch in a blind with your dog expectant and eager. The thunder of wings above. The hope of the day ahead. Then that one heart-stopping, defining moment: the shot, the splash, the retrieve.

These are the slices of time that stir the soul, that define the American Waterfowler's passion for the pursuit of the wild places. It is a passion backed by the confidence that your Beretta shotgun and gear are absolutely up to this specific challenge—no matter what the elements throw at you. That's a confidence, backed by 500 years of tradition and technological innovation, you can count on with every pull of the trigger or zip of the jacket.

## XTREMA2

### KICK-OFF

Optional Kick-Off hydraulic dampening reduction system reduces recoil dramatically.

SYNTHETIC

AP CAMO

MAX-4 HD CAMO

Whether you are hunting the marshes or the wide open fields, there's a finish to handle the situation. The synthetic stock in black, Max-4 HD Camo, or AP Camo stands up to the elements.

UNTREATED

TREATED

## AQUA

Using accelerated salt spray testing, the unprotected steel barrel section (top) shows corrosive effects while the Aqua-technology protected barrel (bottom) looks brand new.

### XTREMA2 MOLDED CASE

Fitted, lined polypropylene case keeps the many supplied accessories in place. Includes 5 choke tubes, choke tube wrench, sling swivels, Beretta oil and butt plate or recoil pad.

*“Soft shooting, heavy-duty, reliable, and amazingly easy to clean. The Xtrema2 represents quite possibly the final word in 3½-inch semi autos.”*

—Phil Bourjaily, *Field & Stream Magazine*

# AMERICAN WATERFOWLER

WHEN WE DESIGNED A GUN FOR THE MOST EXTREME ENVIRONMENTS,  
WE WERE SURE TO WIN SOME EXTREME AWARDS.

## ***Xtrema2***

### XTREMA2 J391C28

In 2002, Beretta introduced the original Xtrema. This gun quickly garnered *Field & Stream*'s "Best Gun of the Year Award," *Guns & Ammo*'s "Editor's Awards for Gun of the Year," and *American Rifleman*'s "Golden Bulleye Award." In the relentless pursuit of excellence, our engineers have once again set the benchmark for a "do-it-all" shotgun in the form of the new Xtrema2—*Shooting Illustrated*'s "Shotgun of the Year."

This superb autoloading shotgun was designed and built to reliably function 2<sup>3</sup>/<sub>4</sub>-inch, 1-ounce equivalent loads through brutal 3<sup>1</sup>/<sub>2</sub>-inch magnum loads—interchangeably if you so desire. The Xtrema2 has more recoil reduction features than any other autoloading shotgun on the planet!

STANDARD GEL-TEK

### STRESS CONCENTRATION IMAGING

This shows the behavior of the Gel-Tek pad during the shooting cycle. Note the homogenous distribution of stress over the entire surface.

### WHY BERETTA GAS OPERATED VS. INERTIA

Beretta's unique self-compensating semiautomatic gas operation system is considered the best in the world. The soft shooting gas system's recoil reduction, which automatically vents the excess gases of even the most powerful cartridges, simply can't be matched by inertia operated shotguns, which generally transfer the full recoil signature to the shooter. It is completely self-contained with no loose springs or o-rings to lose while field-stripping.

### RECOIL REDUCTION

Beretta's new Kick-Off hydraulic dampening reduction system reduces recoil an astounding 44% more than its closest rival by using two hydraulic recoil dampers incorporated into the stock "spacer" unit. The recoil energy is gradually dissipated by the hydraulic dampers, resulting in superior comfort for the shooter.

## URIKA 2

### AL391 URIKA 2 CAMO AP® J39TVI6

Dressed in camo that disappears in nearly every setting, the AL391 Urika2 All Purpose® is a foil for the gobbler's keen eyesight. This reliable autoloader is a real workhorse, too. Beretta's self-compensating gas system allows for smooth shooting in a wide range of loads, while the Optima-Bore® system reduces recoil and improves pattern performance by easing the shot charge's passage down the bore.

### AL391 URIKA 2 CAMO MAX-4® J39TUI8

A smooth shooting, long-lasting auto shotgun, the AL391 Urika MAX-4® HD features the most effective and up-to-date camo pattern on the market — no matter which flyway you shoot on. Beretta's well-proven, self-compensating gas system provides just the right pressure for a wide range of loads, while the Optima-Bore® overbored barrel cuts recoil and improves your patterns.

### AL391 URIKA 2 SYNTHETIC J39TTI8

For the waterfowler who enjoys his shotgun in basic black and prefers the durability and versatility of a synthetic stock, this sleek autoloading shotgun is the answer. The hammer-forged barrel is chrome lined for corrosion resistance and easy cleaning, while Beretta's self-compensating gas valve lets you shoot the full range of your favorite ammunition.

3901 SERIES

**3901 STATESMAN J390S16**

The 3901 Statesman autoloader is made in America and features semiautomatic gas operation with a self-compensating exhaust valve, high strength steel alloy hammer-forged barrel, Mobilchoke versatility, and a removable trigger group locked in place by a single pin. The Statesman continues the 3901 family tradition of rugged reliability with a simple understated elegance and simple uncomplicated adornment. This is a shotgun to be carried into the field with pride and confidence.

A blued bolt and carrier provide a classic look. Tasteful engravings also lend to the understated elegance.

*“Our shotguns worked fantastically on our recent trip to Argentina. Between the two of us, Frank and I shot 10,725 rounds of ammo through our new Beretta 3901 autoloaders. With the high volume of shooting like this, the low recoil and fast cycle time gave us great shots time after time.”*

— Pete Brownell, Vice President, Brownell’s —  
World’s largest supplier of firearms accessories and gunsmithing tools.™

Beretta's self-compensating gas system diverts gas out the vent to provide just the right pressure to cycle the gun.

## APPAREL AND ACCESSORIES

### WATERPROOF XTREMA GEAR

Xtrema Gear is Beretta's collection of bags designed especially for waterfowl hunting. Built to take what nature dishes up, the bags are sealed on the outside to keep the insides dry. The brushed, 800-denier polyester fabric is coated with polyurethane and RF welded together to be tough, quiet, and waterproof. And they even float — what more could you want?

### XTREMA GEAR FIELD BAG

JA153A

The bottom snaps together in the middle to reduce the bulk and size. Exterior pockets for game calls, shells, maps, and personal extras. Water and dust-proof zippers. 6" x 14" x 12".

### XTREMA GEAR BLIND BAG

JA152A

Insulated thermos or water bottle pocket with drain, map pocket, shell and choke sleeves, exterior and interior pockets for cleaning or personal items. Anti-slip padded shoulder strap and easy-carry removable handle. 9" x 15" x 12". Water and dust-proof zippers.

### XTREMA GEAR GAME BAG

JA154A

A unique sealed inner bag, in combination with a fully sealed outer bag. Inner bag removes easily for cleaning. Easy to carry either over the shoulder or in the hand. 12" x 13" x 17". Water and dust-proof zippers.

### XTREMA GEAR STORMPROOF CAMO SHOTGUN CASE

JA150A

Padded grip handles make it easy to carry in the hand or over the shoulder. Every zipper is sealed, not sewn, with a stormproof urethane coating. Simply hose down to clean. Protects up to 54". Water and dust-proof zippers.

APPAREL AND ACCESSORIES

LONG SLEEVE MOCK TURTLENECK

WIND BARRIER SHORT AND LONG ZIP SWEATERS

PU337019 LONG ZIP

SIZES M-XL/XXL-XXXL

PU347019 SHORT ZIP

SIZES M-XL/XXL-XXXL

You'll find pure wool for warmth and rugged good looks on the outside of this sweater. But inside lies the secret: a barrier lining that keeps the coldest winds at bay. Fleece-lined collar; cotton twill gun patches, ribbed knit cuffs and bottom.

INTRODUCING  
AMERICAN BIG GAME HUNTER

Since the very first day you took to the mountains or the plains to test yourself against the cunning of the world's most sought after game, you've waited for this very instant. Both you and your prey are frozen in time. You've tracked this trophy, not just for hours or days, but since the very first time your father or your grandfather initiated you into the brotherhood of the hunt. With the prize squarely in your scope, you squeeze and put your faith in the hands of your rifle.

For the Big Game Hunter, nothing is more important than accuracy and reliability. No one understands that better than Beretta. Every rifle leaving the factory must be capable of grouping within one inch at a hundred yards—period. Sako and Tikka rifles are not just a benchmark in the industry, they have proudly helped define hunting tradition. Along with Big Game Hunting apparel and accessories, tested time and again by professional guides and hunters, these are the tools that define your heritage.

SAKO 85 HUNTER

SAKO 85 HUNTER JRS1A12

The Sako 85, a celebration of the rifle maker's 85th anniversary, is a superbly executed medley of tradition, technology and precision. Continuing Sako's time-honored tradition of crafting exceptional rifles for the hunter and target shooter, the Sako 85 incorporates the features most sought after by experienced riflemen: controlled-round feeding, an exceedingly fast lock time, a user adjustable trigger, 70-degree bolt handle lift with a silky smooth bolt travel, and broad flat bedding surfaces. The rifle's stock is crafted from select walnut and features the classic straight comb and shadow-line cheekpiece that premium-rifle owners appreciate. Individually factory tested and guaranteed to shoot five-shot groups of 1 MOA or less out of the box.

Classic straight comb with shadow-line cheekpiece.

The new, patented, Total Control Magazine Latch prevents accidental release of the detachable stainless steel magazine under the heaviest recoil or the harshest of hunting conditions. If desired, the magazine may be reloaded without being removed from the rifle.

# WORLD'S FINEST PRODUCTION RIFLE

AMERICAN  
BIG GAME  
HUNTER

# sako

Sako rifles are regarded the world over as the most accurate rifles available out-of-the-box, offering custom rifle performance at production prices. Beretta is proud to call this brand a prominent part of its family.

The Sako 85 Short Claw Extractor commands total control of the cartridge, engaging the extractor groove of the cartridge as the cartridge rises from the magazine, positively guiding the cartridge into the chamber of the rifle. When single-round feeding, most controlled-round feed rifles require the cartridge to first be placed into the magazine. Not so with the Sako 85. The cartridge may be inserted directly into the chamber of the rifle and the bolt closes without any worry of damage to the extractor claw or cartridge rim.

The lengthened rear bolt guide makes an already smooth action even smoother. Typically, the shorter the action the more susceptible it is to bolt bind due to decreased bearing surface area. The lengthened rear bolt guide surface of the Sako 85 ensures the smoothest possible bind-free bolt travel, even in the very popular WSM chamberings.

## PRECISION AND SPEED EQUALS ACCURACY

The Sako 85 offers the shooter a crisp, single-stage trigger; user adjustable between 2.2 to 4.9 pounds, and an incredibly fast total lock time of under 1.3 milliseconds.

The bedding of the receiver is critical to the accuracy of any rifle. The flat bottom and side profiles of the Sako 85 receiver in conjunction with the innovative recoil lug, integral to the stock, allow stockmakers to mate the receiver to the stock with a degree of precision which is far more difficult to achieve with round profiled receivers and conventional recoil lugs. These flat surfaces also reduce the torque twist of the receiver against the stock bedding surfaces that occurs when a rifle is fired, prolonging the accuracy of the bedding.

BIG GAME  
HUNTER

## SAKO 85 FINNLIGHT

### SAKO 85 FINNLIGHT JRSIQ15

When weather is at its worst, determined hunters know there's no substitute for the combination of a stainless steel barreled action and a synthetic stock. No matter how long a downpour drenches these rifles, they'll be ready. Available in .13 calibers ranging from 243 to .300 Win Mag, in four action lengths, there's a Finnlight for almost any game, anywhere, anytime. As with all of our stainless rifles, the Finnlight's inner parts are also stainless.

SAKO REQUIRES  
THAT EVERY  
RIFLE MUST  
FIRE A 1-INCH,  
5-SHOT GROUP  
FROM 100  
YARDS, PRIOR  
TO LEAVING  
THE FACTORY.

Every Sako barrel is cold-hammer-forged and finished in-house to ensure match-grade accuracy. The muzzle crown is carefully cut by hand and final inspection is done using the most complex and highly refined optical fine tuning instrument known to man: the human eye.

### SAKO 85 SYNTHETIC EXCLUSIVES

Synthetic-stocked rifles frequently weigh less than their wood counterparts and, therefore, recoil slightly more. The innovative FinSoft recoil pad system absorbs and dissipates recoil forces away from the cheek, in more than one direction. Left-handed shooters can convert the stock with an accessory cheekpiece (not included).

### SAKO 85 VARMINT JRS1F15

### SAKO 85 VARMINT LAMINATED STAINLESS JRS1G12

Because our customers live the Beretta lifestyle so passionately, they are a rich source of information and feedback on our products. Customers suggested we offer a single set trigger as standard in our Varmint line, as well as the .204 Ruger caliber. We've done just that, updating our Varmint line to include a set trigger and the new calibers. The way this single set trigger works is simple. If used normally, it functions like a standard Sako trigger, adjustable for weight and pull from 2 to 4 pounds. But after you cock the bolt, you can push the trigger forward (instead of pulling it), thus "setting" it for an amazingly light 7.5-ounce pull, making it ideal for target and precision varmint shooting.

This awesome 26-inch-wide buck, taken on *The Bucks of Tecomate* TV show on David's El Cazador Ranch in South Texas, grossed an amazing 190 B&C points and scored high enough to qualify for the Boone & Crockett Record Books as a typical 10-pointer. What a start to the great tradition sure to be established by the Sako A7!

# AMERICAN BIG GAME HUNTER

## SAKO A7 JRSY118

Any rifle can boast technology but in the end it all comes down to accuracy, and Sako rifles enjoy the reputation throughout the world as producing the most accurate production rifles on the planet.

Beretta's new Sako A7 represents the beginning of a new era for the American hunter, joining Sako's legendary Finnish tradition of accuracy and reliability with today's American hunter. With better out-of-the-box accuracy and reliability than any other rifle brand on the market, the new Sako A7 boasts match-grade performance with a price never before seen on a match-grade hunting rifle.

The Sako A7 2-piece bolt utilizes a bolt body machined from a solid piece of forged steel that is strong and reliable while offering a silky-smooth action.

Every Sako barrel is cold-hammer forged and finished in-house to ensure match-grade accuracy. The muzzle crown is carefully cut by hand to maximize match-grade performance.

Known for refined and modern design, the A7 features a sleek, lightweight composite stock with a unique, textured "wave" pattern on the grip and fore end, providing for a sure grip in any weather.

The A7's single stage trigger system is not only crisp and precise but also is adjustable from 2 to 4 pounds of pull weight.

Machined from a solid steel forging, the Sako A7 has one of the strongest, most torsionally-rigid actions made. Available in two action lengths that are perfectly scaled to the available cartridges.

SAKO TRG

SAKO TRG JRSM216

Sako TRG is a total accuracy concept designed for one job only: to hit the target. This spectacular result of 100% Sako innovation gives you performance that transcends the highest demands for accuracy, reliability and versatility. The TRG is designed to meet individual tasks, and adjusts to each shooter's personal style, build and posture. Super target grade barrels, specially made for TRG (Cr-Mo or stainless), are cold-hammer forged. The solid vault-like action is also hammer forged from special steel alloy. The sturdy bolt with three locking lugs feeds rounds unflinching from the centerline of a detachable staggered magazine. Bolt lift angle is only 60° for fast bolt throw. The target trigger is a fully adjustable two-stage unit. The integral 17mm axial rails with recoil stop-slots on the top of the receiver allow a quick and perfect scope mounting.

TRG-BIPOD

Especially designed for sniping, this new bipod lets the rifle "hang" below the hinge-point offering very steady shooting position even with large and heavy scopes on the rifle.

Tactical scope mount for modern three turret tactical scopes (30 and 34 mm tube diameter). The mount has 0.5 degree elevation allowance (30 MOA) for better adjustment range capability in long range shooting.

Now available  
in Desert Tan

BUTT STOCK

Adjustable for height and cast-off/on. Cheekpiece adjustable laterally and with spacers, also vertically. Specially designed contour allowing for steady and firm firing position.

The TRG22 is also available in a tactical folding stock.

# AMERICAN BIG GAME HUNTER

All Sako TRG receivers are drilled and tapped for tactical (Picatinny) rails compatible with USA MIL-STD 1913. Configurations include black or green high-tech aluminum reinforced composite fully adjustable stock (cheekpiece and buttplate). Also available in an all-black stealth configuration featuring black stock with phosphatized barrel and action. Optional TRG accessories include a highly effective 3-chamber muzzle brake, innovative clip-on bipod, extra magazines, auxiliary adjustable sights, mirage strap, scope mounts, Picatinny interface, sling and swivels, cleaning kit, logistic transportation case as well as spacers for cheekpiece and butt plate.

## SAKO TRG 42 JRSM131

The TRG 42 in .300 Win. Magnum and .388 Lapua Magnum is a superlative long-range precision tool already adopted by numerous military and law-enforcement special units worldwide and also eminently suitable for competition and ultra-long range varminting. The TRG 42 can be equipped with various accessories to fulfill the needs of the most demanding tactical shooter.

## SAKO TRG 22 JRSM316

The TRG 22 in .308 Win. incorporates all the technical attributes of the TRG 42 in a design scaled to the .308 cartridge. The TRG 22 is a thoroughbred International Sport Shooting Federation 300 Meter Standard Competition rifle, a CISM (International Military Sports Council) competition winner and is in service with several nations as their primary military and law enforcement tactical rifle.

Highly effective three-chamber muzzle brake.

# AMERICAN BIG GAME HUNTER

One rifle now allows you to own any or all of the four most popular rimfire cartridges available. Truly unique in the world of rimfire rifles, the Sako Quad lets you select any of the four interchangeable cold-hammer-forged rifled barrels and change them in seconds. The barrels may be removed and replaced without change in the point of impact. The Sako Quad features a supersmooth bolt throw with a short 50-degree bolt handle lift, detachable magazine, and user adjustable trigger system. Complete rifles and optional spare barrels chambered for .22 LR, .22 WMR, .17 HMR or .17 Mach2 are available.

## SAKO QUAD HUNTER JRSR4CI

The Sako Quad Hunter features an attractive oil-finished walnut stock that will please even the staunchest traditionalists. Sako craftsmen have created a new checkering pattern integrating a distinctive "shark-gill" with traditional cut checkering. The Quad Hunter features a detachable magazine, adjustable trigger, and minute-of-angle accuracy.

Each barrel and magazine is color coded for easy recognition. Just match the barrel band color with the correct dot color on the magazine. As an added feature, the magazines provide a unique safety system to prevent insertion with the wrong barrel in place.

## BURRIS SAKO QUAD 3-9X32MM SCOPE

Color-coded windage and elevation adjustments are matched to the color coding on the Sako Quad barrels. Once calibrated for each of the calibers, a barrel change requires only a turn of the corresponding dial to zero the scope to the appropriate barrel.

Barrels can be easily changed by using the Sako Quad barrel tool.

TIKKA T3 SERIES

TIKKA T3 HUNTER JRTA312

The Tikka T3 Hunter features a glass-smooth action, a crisp, adjustable trigger, free floated match-grade hammer-forged barrel and a perfect mating between stock and metal. No Tikka T3 is even put on the shipping dock unless it groups 3 shots within 1 inch or less at 100 yards. Besides this fabulous performance, the T3 Hunter features a blend of Giugiaro distinctive checkering with the classic elegance of wood. **Left-hand models available see index.**

TIKKA T3 LITE STAINLESS JRTB312

Synthetic stocks are the choice of hunters who must face tough weather conditions. With its stainless steel finish, the Tikka T3 Lite Stainless offers even better resistance to the elements. The lightweight, injection-molded stock is a godsend to hunters who spend long days in the mountains, as is its guaranteed accuracy. With a Giugiaro-designed stock, this rifle's harmonious and functional layout is both handsome and fast handling. **Left-hand models available see index.**

## TIKKA T3 SERIES

**GIUGIARO**  
DESIGN

### TIKKA T3 LITE JRTE312

Inspired by the strengths of the mighty game animal, the Tikka T3 Lite is perfect for the hunter who chases his quarry in dense woods or from a tree stand, or for the rancher who likes to keep a versatile rifle handy. Just as accurate as its full-size brothers, this synthetic features a quick-handling 19-inch cold-hammer-forged and free-floated barrel. Durable fiberglass-reinforced polymer stock with a straight comb and ambidextrous palm-swell. **Left-hand models available see index.**

<b>MAGAZINE</b>	FLUSH, DETACHABLE. SEE FIREARMS INDEX
<b>SIGHTS</b>	WITHOUT

A short bolt-lift angle of 70 degrees combined with a bolt throw to match the cartridge length means quick and smooth bolt cycling.

### TIKKA T3 VARMINT JRTH312

Serious varmint hunting and benchrest shooting require the hyper-accuracy of the Tikka T3 Varmint. The cold-hammer-forged barrel has a true varmint-style "bull" contour for maximum rigidity and absolute performance. The stable synthetic stock incorporates a high comb and wide forearm for better stability. As with all Tikka T3 rifles, the muzzle crown is concave and hand-turned — a custom feature that will enhance the performance of your rifle by protecting the lands and grooves from anything that may come into contact with the muzzle.

### TIKKA T3 VARMINT

The ridged Tikka receiver is topped off with integral rails for use with Optilock mounts. This action is also drilled and tapped for use with conventional bases.

# AMERICAN BIG GAME HUNTER

## TIKKA T3 TACTICAL

### TIKKA T3 TACTICAL JRTM12

When it comes to accuracy, the Tikka T3 Tactical is in a class of its own. The free-floating barrel is made of match grade Cr-Mo steel and manufactured by a precision cold-hammer forging process. The action and the barrel surfaces are manganese phosphatized for lasting protection against the elements and wear. The modern Teflon-coated bolt has two front locking lugs and springloaded plunger ejector with 70 degree opening angle for fast, smooth and reliable operation. The 2-way safety locks both the bolt and the trigger. The trigger unit is adjustable with hand-honed sear/trigger without creep. Single set trigger is optional.

The detachable straight-feeding single column magazine is silent, durable and non-rusting. The standard 5/6-round magazines are tailored for each caliber for ultimate reliability and performance. New color coded magazines optional make the use of different loads easy to separate.

The stock is made of fiberglass reinforced copolymer polypropylene. The cheek-piece is adjustable at 5mm interval up to 25mm. The adjusting wheel can be fitted on either side of the stock.

### ACCESSORIES

The standard Picatinny rail takes any Weaver or U.S. Mil. Std. 1913 compatible mounts. Scope, scope mounts, bipod, muzzle brake and heavy duty swivel studs are optional, as well as adjustable open sights and fore-and rear-stock fastened military type heavy duty sling studs for hook-type swivels.

## 3901 RIFLED SLUG SHOTGUN

In many areas of the world, the Rifled Slug Shotgun is the firearm of choice for non-dangerous big game hunting and there is no finer choice than the Beretta 3901 Rifled Slug shotgun, featuring a 24-inch barrel with a rifling profile optimized for superior accuracy with sabot-style slugs, chrome-lined chamber and bore for ease of cleaning and rust resistance. The integral cantilever Picatinny scope-mount rail ensures constant ridged alignment of the scope to the barrel for maximum accuracy and accepts common Weaver-style scope rings, such as Sako Optilock and Burris systems.

### 3901 RIFLED SLUG SHOTGUN J390C16

Designed for the American Big Game Hunter, the 3901 Rifled Slug Shotgun is a 12-gauge, gas-operated semiautomatic with a 3-inch chamber. Its ribless and sightless barrel features clean, snag-free lines, making it ideal for negotiating dense woods or the confines of a deer blind. Its heavier contour makes the barrel more rigid and the gun softer-recoiling. The stock is black, high-impact synthetic with traditional point-checkering patterns.

BIG GAME  
HUNTER

APPAREL AND ACCESSORIES

**WINDSTOPPER® CAMO MICROFLEECE COLLECTION**

Keep warm, comfortable and hidden from your prey across a wide range of weather conditions and terrains in this technical fleece gear. Windstopper membrane combines total windproofness with maximum breathability, allowing you to concentrate on the hunt. Full zip jacket features uni-control fleece neck lining, waterproof zippers, handwarmer pockets, back kidney warmer and underarm ventilation zippers. Coordinated fleece pants constructed with articulated knee, built-in waistband back support, and easy on/off boot zippers. Pants are lined in mesh in upper body with an elasticized waist and suspender buttons. Add fleece hat and gloves for complete weather and camo protection.

- Jacket GU6G5061 Sizes M-XL/XXL
- Pant CU825061 Sizes M-XL
- Cap BE625061 One size
- Gloves GL33506 Sizes M-XXL

**HUNTING PACK**

**JA230**

The large main compartment has organized pockets for both field gear and personal items, while the sophisticated mountaineering suspension lets you shoulder a heavy load with ease. This waterproof, 650-denier poly pack features a secure vertical rifle carrier, removable communications pocket, interior hydration bladder pocket, and a waistband that hides away for safe climbing to a treestand.

Each pack comes with a reversible blaze orange & Hardwoods camo rain cover.

**BIS PACKABLE JACKET & VEST**

- GUIM2882 Jacket Sizes M-XL/XXL
- GUIN2882 Vest Sizes M-XL/XXL

At just 14 oz. each and the core of the BIS line, this jacket or vest provides plenty of warmth without weight or bulk. Tabs on the collar and elastic cuff (jacket only) fasten these lightweight liners securely in place. Both feature two-way YKK zippers, two generous pockets and interior zippered pockets where they pack away. Nylon shell/polyester insulation. Washable. Colors: 75)Ioden, 87)AP camo, 99)black. International origin.

APPAREL AND ACCESSORIES

**GORE-TEX® PACLITE JACKET WITH HOOD**  
GU4B3120      Sizes M-XL/XXL

Seam-sealed and constructed of breathable, waterproof GORE-TEX® to meet the most demanding conditions, this lightweight jacket packs into the zip-off hood so you can carry it anywhere. The adjustable-fit hood comes complete with a bill for more complete protection in the rain. Raglan sleeve construction is much more efficient in repelling water. Drawstring waist; adjustable Velcro cuffs.

BLAZE TIKKA CAP

BLACK SAKO CAP

**GORE-TEX® PACLITE PANT**  
CU4B3120      Sizes M-XL

Waterproof and breathable, these seam-sealed performance pants will take on the wettest field conditions. Elasticized waist provides a comfortable stretch; over-the-boot zipper for easy on/off. Washable. Color: 87)AP camo. International origin. Average inseam 30".

**HUNTING PACK WITH STOOL**  
JA235B

This stool carries the load on your back or on the ground. Features padded non-slip shoulder straps and a tubular steel frame to support any load.

### Sako Rifles Star in Versus' *Dangerous Game* TV Series

#### Sako — the Gun of Choice When Your Life Depends on It.

"You get the lion or the lion gets you," wrote legendary scribe Robert Ruark. And that's the premise of *Dangerous Game*, one of Versus' (formerly OLN) highest rated series. "The amps are definitely a little higher in this series than most," says Chris Dorsey of Denver-based Orion Multimedia, the producer of *Dangerous Game* as well as *The World of Beretta*. As the title implies, the series features hunts for the planet's deadliest beasts: elephant, Cape buffalo, lion, leopard, grizzly, and others.

An unforgettable lion charge is captured during the filming of Versus' hit "Dangerous Game" series. The producers selected Sako rifles, for when your life is on the line, you want the best. Editor's note: No hunters were harmed during the filming of this series.

#### KALAHARI SAFARI VEST

##### GU27

The collective experience of our African Professional Hunter Group was the guiding force in the design and construction of this Teflon®-finished, cotton twill vest. It features two signature Beretta recoil pads, shotgun load cartridge loops with flap, and double-entry lower pockets. With function and performance in mind, details such as extra strapping for shell pocket support and back vent for air circulation were built in.

#### KALAHARI SAFARI JACKET

##### GU28

An extraordinarily functional safari jacket that would have done Hemingway or Ruark proud. From the loops for 12-gauge or .375 H&H shells above the left pocket to working epaulets for canteen or binoculars, freedom of movement pivot sleeves, gusseted underarms, and a button-off buckle adjustable belt. Preshrunk heavyweight cotton twill with stain-resistant Teflon® finish. Pleated back affords plenty of shoulder movement; internal load-bearing strapped front pockets.

#### RAZORGRASS OVERLAY PANT

##### CU10

The perfect complement to your Kalahari Safari Jacket or Vest. Made of the same prewashed cotton twill with stain-resistant Teflon® finish, this pant features support strapping to keep their shape when you fill the pockets. Articulated knees keep you comfortable through the longest treks. Nylon abrasion-resistant front pocket liner, quick load shell pockets, and snake boot tabs are a testament to the hunter's needs.

CHIARA CAINERO (ITA) - SKEET - WORLD CUP 2006: GOLD MEDAL. EUROPEAN CHAMPIONSHIP 2006: GOLD MEDAL. WORLD CHAMPIONSHIP 2006: SILVER MEDAL

INTRODUCING  
VICTORY SHOOTER

Olympic gold medals. There's no more reliable gauge of gunmaking excellence. From the 1956 to the 2004 Games, Beretta shooters have stood on the top podium eleven times, and brought home nine silver and eleven bronze medals. Since 1978, world-class competitors have used Berettas to bring home a total of 147 world championship medals in trap, double trap and skeet. The 2008 Olympics in Beijing will once again test the mettle of the world's best shooters and the world's best guns. And while getting to the top is difficult, maintaining dominance is even harder. Beretta is committed to staying on top, and keeping you there, too.

To be the best, Victory Shooters require dependable performance. Not just from themselves, but from their shotgun and the specialized apparel and accessories that work together to give them a competitive advantage. Designed for maximum performance in any event, Beretta's competition guns and clothing are the epitome of the craft, a testament to optimum control and reliability — as gold medal winners worldwide will attest.

# VICTORY SHOOTER

## UGB25 XCEL

UGB25 XCEL JUX5T10

### SHORT BARREL RECOIL

The operating principle of the Beretta UGB25 Xcel semiautomatic gun with break-open barrel is based on short recoil, which keeps the internal parts of the gun clean even after prolonged use. The short recoil (and low barrel axis position) almost completely compensates for muzzle jump during firing, with quicker and easier realignment of the barrel on the target for the next shot. The low barrel axis position transmits the recoil forces in line with the shooter's shoulder, thus minimizing felt recoil.

### RECEIVER

The Beretta UGB25 Xcel features the unmistakable touch of Giugiaro Design. The ergonomically rounded back of the light alloy receiver fits smoothly into the stock, allowing quick and instinctive target acquisition. The polished sides contrast pleasingly with the other matte anti-glare surfaces. The streamlined receiver and the newly designed fore-end with its extended checkered configuration combine to give the UGB25 Xcel an extremely attractive look.

### DOUBLE RECOIL DAMPER FOR BREECH BOLT

The two technopolymer recoil dampers of the breech bolt cushion its impact on the bottom of the receiver, reducing vibration and increasing the life of the gun.

### SIDE FEED, BOTTOM EJECTION

The cartridge carrier receives the second cartridge on the right-hand side of the receiver, making it immediately ready for use. It is chambered automatically through the feeding port after the first round in the cartridge chamber has been fired. The design of the cartridge carrier button and its position on the receiver ensure quick and easy removal of the cartridge on the carrier. The ejection port is in the bottom of the receiver. The ejector expels the spent hull downward, away from the shooter and nearby competitors, and is user-friendly for both right- and left-hand shooters.

UGB25 XCEL

**UGB25 Xcel**

**HAND POSITION INDICATOR ON THE RECEIVER**

In front of the ejection port is a polymer insert used to indicate the position of the hand relative to the fore-end during firing to prevent contact with the hulls as the spent cartridges are ejected.

**TRIGGER PLATE**

The trigger plate is made entirely of high-resistance fiberglass-reinforced technopolymer and features self-lubrication of the firing mechanism, good vibration absorption and thermal stability for improved "feel" in cold weather. It is designed specifically to optimize the ergonomics. The safety button is in the standard position (for right-handed use), but it may be reversed for left-handed use by a qualified gunsmith.

**OPTI-BORE BARREL®, OPTIMACHOKE® TUBES**

All versions of the UGB25 Xcel come with an Optima-Bore® barrel with a lengthened forcing cone for enhanced pattern distribution sensitivity, reduced felt recoil and shot velocity optimization.

Team Beretta shooter Scott Robertson uses the UGB25 Xcel to trick shoot at the 2007 Grand American Trapshoot. The UGB25 Xcel was unveiled during this event.

## DT10 TRIDENT FAMILY

### DT10 TRIDENT SKEET JDT4110

For skeet devotees, there's no finer choice than the DT10 Trident Skeet, no matter what level of competitive shooting you participate in. The skeet version with adjustable stock allows you to regulate your personal sight picture. Beretta's patented "Memory System" lets you remove and replace the comb without losing your individual settings. The Optima-Bore® barrel system with Optimachoke® tubes improves shot pattern distribution and velocity, and felt recoil reduction.

### DT10 TRIDENT TRAP COMBO JDT3130

Designed specifically for American trap, the DT-10 bottom single has an adjustable point of impact, to allow the shooter to control their shot spread to suit their individual needs. In addition, it features a parallel comb with adjustable Memory System stock and the Optima-Bore barrel system with optimachoke tubes, which improves shot pattern distribution and velocity. It is available as a top or bottom single only, and also as a combo with the over/under barrels.

### DT10 TRIDENT

The initials "DT" are an abbreviation of "Detachable Trigger," emphasizing the efficiency and simplicity of the trigger group release system.

## 682 GOLD E FAMILY

CHOOSE YOUR  
POINT OF IMPACT

### 682 GOLD E TRAP BOTTOM SINGLE J682E20

Beretta is proud to introduce the 682 Gold E Trap bottom single version to further complete the 682 E family of products. Designed specifically for the American Trap market. The bottom single features a fully adjustable rib. The bottom single version only (non-combo) will be available solely with the 34-inch barrel with adjustable rib. Two combo versions will also be available: a 34-inch adjustable bottom single with a 30-inch over/under, and a 34-inch adjustable bottom single barrel with 32-inch over/under. All models will be equipped with a factory adjustable comb with Memory System, and the same adjustable trigger shoe that is standard on the 682 Gold E Trap family.

The 682 E family has been established as a premier firearm in competition shooting, building on a tradition of durability, reliability, and performance. With the elliptical graphic on the low profile receiver, and nickel-alloy steel for strength and durability, this family is the perfect blend between technology and style, heritage and innovation.

### FULLY ADJUSTABLE RIB

The 682 Gold E Trap Bottom Single's fully adjustable rib allows the shooter to change the point of impact, making the gun truly customizable to suit the individual shooter's needs.

## 687 SILVER PIGEON FAMILY

687 SILVER PIGEON II SPORTING J687406

687 SILVER PIGEON III SPORTING J6874A0

At the core of the 687 Silver Pigeon III Sporting is our legendary 687-series receiver. This low-profile, positive-locking, low-maintenance action ensures that your off-hand stays as close as possible to the bore-axis; in this manner, whatever you point to is exactly where the shot goes. The receiver is embellished with a scroll and game scene designed by our most experienced Master Engravers in Gardone, Italy. The way this pattern is executed on the receiver makes it virtually as striking as if it had been hand-engraved, but without the price tag to match.

687 DIAMOND PIGEON

**687 EELL DIAMOND PIGEON SPORTING J687956**

One of the most elegant, finely balanced and responsive double barrel shotguns in the world, the 687 EELL Diamond Pigeon 12 gauge is the epitome of luxury and performance for the competitive shooter. Beretta's extensive hand-chased engraving and highly figured select walnut set this shotgun apart from all others. Just like the field version in every luxurious detail with the added benefit of a wider rib for better target acquisition.

Like a beautiful painting on canvas, the EELL Diamond Pigeon's side-plates are exquisitely engraved with game scenes.

**686 WHITE ONYX SPORTING**

Designed to fulfill everything shooters look for in a competition shotgun, the Beretta 686 White Onyx Sporting over-and-under proves that you can still get brilliant results on a reasonable budget. It features a receiver machined with the Beretta distinctive Dura-Jewel pattern and a nickel-alloy finish contrasting with the satin side panels and the gold-plated trigger. The Optima-Bore® barrels reduce felt recoil and the Optimachoke® tubes guarantee a perfect shot pattern and a regular distribution of pellets.

WEIGHTS ARE APPROXIMATE, DEPENDENT ON WOOD DENSITY AND BARREL LENGTH.

# VICTORY SHOOTER

## TEKNYS GOLD FAMILY

**AL391 TEKNYS GOLD TARGET J391T00**

The AL391 Teknys Gold is Beretta's ultimate autoloader. With an added suite of features, it becomes the AL391 Teknys Gold Target, the ultimate autoloader for sporting clays, skeet, and trap. You'll pick it out instantly. The receiver is distinctively engraved with a stylized Beretta logo on the left side, and both sides feature blue-enameled inserts that unite the receiver and buttstock in a stylistic look that distinguishes the Target model from the green-enameled field gun. The self-compensating gas operating system regulates ammunition of varying ballistics, and has been thoroughly proven in the successful AL391 Urika series. Fitted in the buttstock of every Teknys Gold Target shotgun is an 8.5-ounce recoil reducer based on the spring-mass system pioneered in the original 3½-inch, 12-gauge Xtrema. If reduced weight is required by the shooter, the system is easily removed without the need of a gunsmith. Those who want to keep a forward balance and add weight can opt to use the supplied magazine cap weight/balance system. Through the use of secure interchangeable ribs, one truly has the ultimate "do-it-all" Target gun for trap, skeet, and sporting clays. The inclusion of an additional stepped rib provides one the opportunity to have a second sight picture for trap targets.

**AL391 TEKNYS GOLD SPORTING J391T70**

The AL391 Teknys Gold is Beretta's ultimate field autoloader. With an added suite of standard and optional features, it becomes the ultimate autoloader for the sporting clays course. Along with its distinctively engraved Beretta logo and blue enamel inserts, every Teknys Gold Sporting has an 8.5-ounce recoil reducer fitted in the buttstock. Among its many sporting features is a fast bolt release that allows for fatigue-free shootings when shoot-offs last all afternoon.

AL391 URIKA 2

**AL391 URIKA 2 SPORTING J39TJ10**

The Beretta improved gas system of the Urika 2 makes these semiautomatics some of the softest shooting autoloaders – right out of the box – reducing felt recoil and improving second shot recovery. The adjustable drop and cast system ensures a custom fit for every shooter. The optional Recoil Reduction System device can be installed in the X-Tra Grain stock.

**GAS OPERATION**

**THE BERETTA GAS SYSTEM IS TWICE AS FAST AS ANY OTHER OPERATING SYSTEM.**

The gas system has been improved by the addition of a spinning and self-cleaning action. As gas pressure is fed into the gas cylinder, a series of expandable fingers on the piston expand outwardly to clean the gas cylinder as the action cycles. Additionally, the gas piston is imparted with a spinning motion and “scraper teeth” to ensure carbon deposits are thoroughly dislodged and removed from the gas system. This improved cleaning action greatly contributes to enhanced reliability and longer functioning shooting periods between cleaning.

**AL391 URIKA 2 PARALLEL TARGET SL J39TP10**

Made for those who want perfect shooting, the AL391 Urika 2 Parallel Target boasts the same improved self-cleaning gas system and receiver finish of field grade models. It comes with a Monte Carlo stock with parallel comb and reduced grip radius. This facilitates the grip and instinctive pointing, especially for individuals with smaller hands. The shotgun has all the professional characteristics of the Beretta competition semiautomatics.

# VICTORY SHOOTER

## THE BERETTA TEAM

Can you imagine winning the World Shotgun Championship at 16 years old? The U.S.A.'s Vincent Hancock did just that this past year in Lonato, Italy, with an out-of-the-box Beretta DT10. He became the youngest shooter ever to win the world championship.

Hancock joins a prestigious list of some of the most respected and talented names in the sport of competitive shooting who embody the

winning spirit of Beretta. From the Olympics to regional shoot-offs, a Beretta is usually in the hands of the champion. Beretta's gallery of champions from around the world are a testament to their skill, determination and performance under pressure. Like Beretta's competition guns, they represent the epitome of their craft.

### VINCE HANCOCK COMPETES WITH AN EYE TOWARDS BEIJING

At age 16, Vincent Hancock took the world of international skeet shooting by storm, winning a gold medal at his World Championship debut in 2005. Hancock bested the international field using an out-of-the-box Beretta DT10 Trident. Two years later, Hancock continues to dominate as he marches toward his goal of representing the USA at the 2008 Olympic Games. He stills uses a DT10 straight out of the box and he still is setting world records. Now with the U.S. Army Marksmanship Unit, Hancock recently took Gold in the Men's Skeet Event at the 2007 Pan American Games held in Rio De Janeiro, Brazil. His score of 147 + 2 broke his own world record.

### DAN CARLISLE

Member of Team Beretta and one of America's top sporting shooters and instructors, Dan is an Olympic medal winner (Bronze in Skeet at 1984 Games), World Champion and 13-time National Champion. He has the distinction of having won more championships in more shotgun disciplines than any other U.S. shooter. Most recently, Dan and his Beretta DT10 won the 19th NSCA National Championships at the National Shooting Complex in San Antonio, Texas.

### DIANE SORANTINO

Team Beretta shooter Diane Sorantino recently clinched the NSCA National Championships. The current World F.I.T.A.S.C. Woman's Champion, Diane continued her winning streak using her Beretta Teknys Gold. In 2006 she was inducted into the National Sporting Clays Association Hall of Fame. Diane has captured almost every National and World Title in the disciplines of English Sporting and F.I.T.A.S.C. in her competitive shooting career. She proudly serves as the Chief of Police of Cape May, N.J.

## THE BERETTA TEAM

### GREGG WOLF

As a 20-year-old college student, Gregg became the first American, the first Junior competitor, and the youngest person ever to win the World F.I.T.A.S.C Championship. A member of Team Beretta, Gregg shoots a Beretta 687EELL. In a few short years, Gregg has captured 14 World and National titles, including four World Championships as a Junior. During his college years, he was a regular member on the All American Team and Team USA.

### JANET TAUSCH

A six-time Ladies Texas State Champion, two-time Ladies National 20-gauge Champion, and a six-time All-American, Team Beretta shooter Janet Tausch is a dominant force in the sport. Her most recent wins include the Five-Stand ladies title at the NSCA National Championships, the Ladies Concurrent at the 2007 National Sporting Clays Association US Open Championship, the 2007 World English Sporting Clays Championship, and the 2006 NSCA National Championship. Her shotgun of choice is the Beretta 687 EELL Diamond Pigeon.

### SCOTT ROBERTSON

For three-time World Champion and eight-time National Champion, Scott Robertson stepping to the awards stand has almost become as much a part of his life as shooting. A gold medalist at the 2003 ESPN Great Outdoor Games and 19--time All American, Robertson of Flower Mound, Texas, has Pan-American, Caribbean Cup and Ducks Unlimited National championships among his many accomplishments.

Constructed of tough 600-denier pack cloth for years of use, this compact bag has surprisingly spacious pockets to hold everything you need for a day of shooting. Padded, removable shoulder strap. 7" x 9" x 16".

# VICTORY SHOOTER

## APPAREL AND ACCESSORIES

Whether you're a beginner or an expert on the range, you can find comfort and security knowing that Beretta has just the right clothing and accessories to equip you.

### TWO-TONE CLAYS VEST

GT080146

Genuine leather accents this championship vest with functionally cooling mesh back and sides. Expandable front shell pockets; adjustable waist tabs; shooting glasses pocket.

### BERETTA BREAKTHROUGH SHOOTING GLASSES

OC12000109

From the first look you'll know that evolution in this case has given way to revolution. Once you see, feel and try on Beretta's Breakthrough Shooting/Sportsman Glasses, it will confirm your first impression. Three interchangeable lenses climb into a stylish hard case to protect their integrity:

- Yellow for poor atmospheric conditions like overcast skies and fog
- Vermillion for bright, sunny days
- Grey for those days when the weather can't make up its mind

### COMPETITION SHOOTING DOUBLE LOGO T-SHIRT

TS717294

One of the world's longest cotton fibers, Peruvian Tanguis yarn gives Beretta tees an unusually high luster and soft hand, yet greater tensile strength for unparalleled quality, and very little shrinkage. Beretta trademark on both arms, Trident logo on the chest.

APPAREL AND ACCESSORIES

**PINK TRIMMED SHOOTING VEST**

**GT920074 RIGHT-HANDED**

**GT930074 LEFT-HANDED**

A touch of pink piping and embroidery gives this performance shooting vest a dash of style. The shoulder notch on the shooting side allows for ease of fit. Other features include shooting glove pocket, elasticized waist, interior security pockets, ear protection hanger, and easy-breathe rear side panels. Cotton/poly/leather.

**TEAM BERETTA SHOOTER'S TOWEL  
SOG10**

This cotton towel helps keep those sweaty palms dry. The grommet hold and clip allow it to be clipped to a vest, belt, or bag. 16" x 24".

**LEATHER SPORTING CLAYS BELT**

**JA143A**

Top-of-the-line leather pouch is embossed with the Beretta logo and holds 100 shells and two choke tubes. Adjustable belt fits up to a 58" waist.

**WOMEN'S COMPETITION  
CHAMPION POLO**

**MD507298**

HULL POUCH**

**JA144A**

This vegetable-tanned leather and mesh pouch is embossed with the Trident logo and holds 100 shell hulls. Spring-loaded top and a Velcro® easy-unload bottom. Fits a 2" wide belt.

INTRODUCING  
AMERICAN PISTOL SHOOTER

Absolute reliability, consistent accuracy and optimal safety. Whether testing your skills in competition, polishing them at the target range, or defending your home and family, there are certain things you demand from your firearm. And — with no room for error — these are at the top of anyone's list. But beyond these essential traits, your pistol is an extension of your personality. Your preference may run to the fastest or lightest or most technologically advanced. Or to the familiar standbys that still feel perfect in the palm and right on the money at the range.

As a Beretta Pistol Shooter, you can also expect innovation, versatility, and superior design and workmanship. In the pistol stakes, Beretta wins — hands down. The automatic choice of marksmen, sportsmen, and military worldwide, Beretta pistols carry with them their own mystique and reputation. And deservedly so. A Beretta pistol is both a triumph of design and reliable performance, offering the user the most advantageous combination of form and function.

### PX4 STORM JXF9F21

The Beretta Px4 Storm series was built around the belief that a firearm should be individualized to the operator. The Px4 Storm includes multiple trigger operating modes, which include our standard F model - double/single action; C model - constant action; D model - double action only; and the G model - double/single action with return to fire feature. All full size Px4 Storm Pistols feature a rotating barrel which makes for a low profile design with one of the strongest actions available. Also, you have a choice of three backstraps, three magazine release buttons, and two slide catch lever sizes. This is a gun you can make fit for your purposes. Extremely easy to disassemble without tools, the Px4 Storm personifies simplified field stripping: it cannot be reassembled incorrectly! Without compromising on Beretta's legendary ergonomics, reliability and performance, this lightweight technopolymer frame pistol defines Individualized Performance.

Interchangeable grip backstraps and multiple-sized, reversible magazine release buttons allow for customization to the individual's hand size.

# AMERICAN PISTOL SHOOTER

CUSTOMIZE TO YOUR HAND AND SHOOTING STYLE  
INDIVIDUALIZED PERFORMANCE.

Standard Super-Luminova sights give high targeting performance in all types of light conditions. With minimal exposure to light (or flashlight), this luminous material is “charged” and visible in low light.

Military Standard 1913 “Picatinny” standard accessory rail. Allows mounting of optional tactical lights and laser units.

*“I am a single female (mom) and just purchased my first firearm for self-home protection. After contemplating several competitors’ models, I went with the PX4 Storm, 9mm, and I am so glad that I did. The quality of Beretta is what sold me on the pistol. I also like the flexibility the PX4 Storm offers with different sized grips to make a custom fit to my hand.”*

— Brenda, Beretta Customer

## PX4 STORM SUB-COMPACT

### PX4 STORM SUB-COMPACT JXS9F21 (9MM) / JXF4F21 (.40 S&W)

The Beretta Px4 Storm Sub-Compact pistol is the most advanced sub-compact sidearm of its kind. Built around Beretta's latest Px4 modular technology, the Px4 Storm Sub-Compact delivers concealed carry handling with large frame firepower.

Available in two calibers (9mm and .40 S&W), the Px4 Storm Sub-Compact uses a very reliable locked breech and tilt barrel system, providing a more compact and lighter weight system. A stainless steel barrel requires less maintenance and is corrosion resistant, perfectly suited for concealment close to active, perspiring bodies.

No tools are required to replace the interchangeable backstrap and create an individualized fit for the user.

The pistol adapts to different hand sizes easily with interchangeable backstraps (included). An ambidextrous manual safety lever is positioned on both sides of the slide for easy access by all shooters. A reversible magazine release button can be mounted on either side and can quickly be replaced by a smaller and larger size button (optional). An interchangeable slide catch can also be replaced with an optional low-profile configuration. A standard Picatinny Rail (MIL-STD-1913) allows for an array of aftermarket accessories.

Patented SnapGrip™ Magazine Extender: Beretta's patented SnapGrip Magazine Extender flips down easily, maximizing the grip for larger hands.

PX4 STORM .45

**PX4 STORM .45 JXF5F25**

The new Beretta Px4 Storm .45 pistol is the most advanced sidearm of its kind. Built around Beretta's latest Px4 modular technology, the Px4 Storm .45 emphasizes maximum firepower in an ergonomic package while maintaining the same ease of handling and reliability Beretta pistols are famous for. The Px4 Storm .45 emphasizes power, ease of handling, superior performance and reliability.

The Px4 Storm .45 uses an exclusive, innovative Beretta-designed locked breech rotating barrel system, the strongest action ever developed by the Beretta engineering team. The light yet durable frame employs modern thermoplastics and interchangeability of parts, making the Px4 Storm .45 the ideal firearm for law enforcement use as well as personal defense.

## PX4 STORM .45 SD

### PX4 STORM .45 SD JXF5F45

The new Beretta Px4 Storm .45 Special Duty pistol is the most advanced sidearm of its kind, bar none. Built around Beretta's latest Px4 Storm modular technology, the Px4 Storm .45 SD emphasizes maximum firepower in any environment and any purpose.

The Px4 Storm .45 SD was originally designed to meet the rigorous specifications of U.S. S.O.C.O.M. and uses an exclusive, innovative Beretta-designed locked breech rotating barrel system and various materials and finishes capable of withstanding the toughest military applications. The light yet durable frame employs modern thermoplastics and interchangeability of parts, making the Px4 Storm .45 SD today's best choice for military and tactical law enforcement use as well as personal defense and serious pistol enthusiasts.

The ergonomic design, with its snag-free surfaces, ensures trouble-free insertion and holster extraction. A rounded trigger ensures correct hand firing position.

Also standard is a Picatinny Rail (MIL-STD-1913) under the barrel for accessories. An optimal grip angle ensures a correct line of sight and the rear upper part of the grip is curved and recessed to snugly fit and protect the shooter's hand. Thanks to a newly patented modular system, the pistol adapts to different hand sizes easily with interchangeable backstraps (included).

An ambidextrous and interchangeable manual safety lever is positioned on both sides of the slide for easy access by all shooters. In addition, an ambidextrous and interchangeable magazine release button can be mounted on either side and can quickly be replaced by a smaller and larger sized button (optional). An interchangeable slide catch can also be replaced with an optional low-profile configuration.

## PROJECT ALLEGIANCE

At Beretta, we know the dangerous nature of Law Enforcement. We understand the risks they face and the sacrifices they make. We also understand that officer deaths are increasing and in many communities across our nation these risks are unfortunately increasing at an alarming rate. Beretta has been working to deliver advanced, proven and reliable products and services that are designed to protect law enforcement officers and allow them to come home safely. We feel, however, the need to do more and this is why we launched Project Allegiance — a comprehensive effort to deliver new products, services and benefits that directly enhance the safety and well-being of law enforcement officers and their families.

The first benefit that Beretta will be launching under Project Allegiance is a three-year \$10,000 line-of-duty accidental

death benefit available to any law enforcement officer that purchases a Px4 Storm pistol. This line-of-duty-death benefit is offered at no cost to the officer or the agency and it includes other valuable services, like free bereavement, legal and financial counseling, designed to aid law enforcement families during their most critical time of need. No medical exam. No hassle. No questions asked. Project Allegiance will continue launching products and services in the future, to further enhance officer safety and well-being. But we need your help: by participating in this program, you ensure the success of Project Allegiance. Together we can extend these benefits to your fellow officers and work to strengthen the law enforcement community. For more information, visit your Beretta Law Enforcement dealer, or go to **ProjectAllegiance.com**.

## 92FS J92F300M

From the jungle heat of Panama to the sandstorms of Iraq, the U.S. Armed Forces have counted on Beretta pistols for almost two decades of distinguished service. The 92FS, Beretta's premier full metal gun, most resembles the military M9 9mm pistol. Accurate out of the box, this workhorse features an open slide design that virtually eliminates jamming, a safety system that combines decocking with a positive thumb safety, and a combat muzzle crown. Beretta's proprietary black, non-glare Bruniton finish gives your 92FS a wear-resistant coating, which means it will stand up to any special duty.

<b>MAGAZINE CAPACITY</b>	10 AND 15 ROUNDS

*"I was on a recovery mission last year in the Sadr City district of Baghdad trying to recover an M1A1 tank that was hit by insurgents. In the process of conducting the mission, my tank commander was injured, leaving me in command of my tank. With no support on my flanks, I was pretty exposed. A group of Iraqis began to converge on my tank, gesturing for an RPG team. With no room to traverse my turret, I stood up in my hatch and suppressed the group by dispersing them with my M-9. If they had gotten that shot off at my flank, I may not be here today. Thanks, Beretta, for a great product and supporting my platoon."*

— Staff Sergeant Michael Blake, U.S. Army

**M9A1 JS92M9AIM**

Whether for competitive shooting or personal defense, the Beretta M9A1 offers powerful performance, total reliability and the confidence that comes from a pistol that meets the demanding requirements of the United States Marine Corps. Evolved from the base design of the battle-tested and proven M9 pistol, with input from military and law enforcement agencies throughout the world, this tactical version features an aggressive grip and a new PVD-coated magazine designed to function in every environment and every operating condition. Like peacekeeping forces around the world, you can put your trust in this pistol.

The M9 has successfully served America's armed forces on far-flung battlefronts throughout the world—from the chaos of Mogadishu to the deserts of Iraq and the fire-swept streets of Baghdad. Countless soldiers, sailors, airmen and marines have stood guard to preserve the nation's freedom, protected by its accuracy and firepower. Beretta is honored to manufacture the M9, the standard sidearm for the U.S. Armed Forces, and its civilian counterpart, the 92FS—the most reliable and safest semiautomatic pistols ever made.

## 90-TWO J9T9F11

The 90-Two has the great features of our 90 series pistols such as reversible magazine release button, ambidextrous safety, open slide design (which virtually eliminates jamming or stove-piping), loaded chamber indicator, visible firing pin block, and super accuracy.

Here are the new features: one-piece wrap-around grips in configurations for different size hands; automatic disassembly latch that locks when slide is replaced; internal recoil buffer, which decreases received stress and increases service life; additional slide serrations for better grip; captive recoil spring; removable front sight; 17-round magazine (9mm); and, like the USMC's M9A1, it features an integrated Picatinny rail. The 90-Two is available in 9mm and .40 caliber.

The new removable single-piece, ergonomic and modular grip unit allows for quick and easy grip replacement. The rear upper part is precisely curved and relieved for a firmer, more comfortable grip and to snugly fit the shooter's hand.

A Picatinny rail protection cover is included with each 90-Two.

90-Two with Burris Xtreme Tactical Laser Flashlight.

## 84FS CHEETAH AND 87 TARGET

### 84FS CHEETAH NICKEL J84F212M

Back by popular demand, the nickel finish 84FS Cheetah Nickel with checkered walnut grips is light, fast handling and ideal for personal defense. Its .380 Auto caliber is just right for those who prefer the light recoil and report of a higher caliber, smaller pistol. Very accurate out of the box, its ambidextrous safety is easily accessible by the thumb for right- or left-handed shooters.

INTRODUCING  
WESTERN SHOOTER

The cowboy mystique lives on. From the prairies of Nebraska to the deserts of New Mexico, it runs through the veins of those who treasure tradition and revel in glories past. The spin of the cylinder, the glint of the nickel barrel, the sheer thrill of breaking open a six-shooter or the adrenaline rush of firing a fast handling, lever-action rifle. There's nothing that quite compares to that exhilaration. But more than anywhere else, the heritage of the Old West runs deep in the heart of the Western Shooter. And finds its fulfillment in that moment when you test yourself, using those classic firearms that defined a fabled era, against the legends of the American frontier.

Authenticity and performance is what matters above everything else to the Western Shooter. This is why you'll find an extraordinary combination of both in Beretta's lineup of Old West firearms. These fine firearms are for the Western Shooter who demands absolute truthfulness to the 19th century originals as far as dimensions, feel and functioning, coupled with Beretta-style reliability, safety and performance.

# WESTERN SHOOTER

## STAMPEDE FAMILY

### STAMPEDE OLD WEST JEJ1401

It is hard to think about the American Old West without mentioning the Colt Single Action Army revolver, as it has become the icon for all the romance and adventure of the Old West. Often called the “Peacemaker”®, the Single Action Army revolver was the sidearm of choice for legendary figures like Wyatt Earp, Doc Holliday, Bat Masterson, Teddy Roosevelt and notorious outlaws including the Daltons, Billy the Kid and Black Bart.

Today, the legend of the American Old West lives on through the Beretta Stampede Single Action revolver. From the multiple clicks of the hammer to the feel of the grip, the Stampede is true in every detail, bridging Old West authenticity with Beretta’s reliability, safety and performance.

STAMPEDE OLD WEST

Now available in .357 Magnum

STAMPEDE MARSHALL OLD WEST

### STAMPEDE, OLD WEST & OLD WEST MARSHALL

The Stampede, in Beretta’s Old West finish is reminiscent of today’s most sought-after collector pieces. But make no mistake, Beretta’s new Old West finish is as tough and corrosion resistant as any modern firearm. Although they make great collector pieces, these bad boys were born to shoot — perfect for cowboy action shooting, target shooting and close-range hunting.

STAMPEDE MARSHALL

### STAMPEDE MARSHALL JEE1401

The internal features may be the same as Beretta’s other single-action Stampedes, but the walnut birdhead grip gives the Marshall a distinction all its own. Chambered in .45 Colt and .357 Mag, this handsome replica incorporates the most modern safety features. The feel and functioning are just like the originals, with a multiple-click single-action hammer mechanism and a half-cock position that allows the cylinder to spin free.

#### STAMPEDE OLD WEST

<b>GRIPS</b>	WALNUT
<b>CAPACITY</b>	6 ROUNDS
<b>FINISH</b>	BLUE, BERETTA COLOR-CASE, AND OLD WEST

STAMPEDE FAMILY

**STAMPEDE NICKEL JEB1401**

There's no gun more quintessentially American than the single-action revolver. The Beretta Stampede combines the feel and handling qualities of the original "hogleg" with a transfer-bar safety system that makes it safe to carry with all six chambers loaded. The beauty is in the accurate details. The fixed front sight is true to the original. And with the frame dimensions closely matched to the 19th-century originals, the Stampede feels slender and very responsive in the hand.

"I started shooting with a competitor's six gun. I had a hard time keeping the same sight picture every time I drew it from my holster. So I turned it in and bought two Beretta Stampedes. They were dead accurate right out of the box. The grips were thin and fit better in my hands. I have not had any problems wLth them and they look great. I love shooting them."

— Beretta Customer

**STAMPEDE DELUXE JEC1401**

The Stampede Deluxe features a frame finished in Beretta Color-Case, which duplicates the classic look of color-casehardening to capture the romance of the Old West. Select walnut grips and a lustrous charcoal-blued barrel and cylinder complete the picture. Whatever your choice, the transfer-bar safety system will allow you to safely load all six chambers without fearing an accidental discharge.

# WESTERN SHOOTER

## STAMPEDE FAMILY

STAMPEDE PHILADELPHIA  
CUSTOM ENGRAVED MATCHED PAIR  
JEG3501B

Any cowboy would be proud to fill his holster with these matching Stampedes. Inspired by the limited edition Philadelphia Centennial engraving (1876), this matched pair is laser-engraved then hand-finished on the receiver cylinder and barrel. The walnut grips feature checkering and inlaid gold Beretta medallions. Gold-filled "1" and "2" on top of backstrap; paired serial numbers; 5½-inch barrels. Caliber: .45 Colt.

STAMPEDE GEMINI, MATCHED PAIR  
JEG4501R

This handsome matching pair of Stampedes features German silver trigger guards and backstraps. The wood grips are hand-rubbed, oil finished and fitted with a gold Beretta medallion. In addition to matching paired serial numbers, Beretta has stamped the "UGB" inspector cartouche on the outside panel of each grip. These stamps match the side of the serial number prefix. 5½-inch barrels. Caliber: .45 Colt.

STAMPEDE FAMILY

STAMPEDE BISLEY JEF1401

Old West firearm connoisseurs will be pleased by how true to the original this replica looks and feels, although it incorporates a transfer-bar safety and is manufactured of durable modern materials. Instead of taking the easy road and “dressing up” this Stampede as a Bisley, Beretta built this revolver from the ground up around a true Bisley frame — which is somewhat taller than that on its standard single-action cousin. The distinctive Bisley grips in imitation Bakelite, hammer and wide trigger are also a precise replica of the originals as far as dimensions, balance and feel.

<b>CAPACITY</b>	6 ROUNDS		
<b>FINISH</b>	NICKEL OR BLUED		

LARAMIE

LARAMIE

JFA1501

The Laramie is the finest replica ever made of the Smith & Wesson Model 3 break-open revolver which became famous in the old west for its quality, accuracy, and speed at which it could be loaded and unloaded. Upon releasing the top latch located in front of the hammer, the revolver could be instantly unloaded by “breaking it open,” thus allowing all six empty shells to fly out of the cylinder. Beretta has improved upon the 19th-century original by reinforcing the top latch, thus making the revolver much more durable and ensuring you years and years of trouble-free enjoyment.

An accurate reproduction, we made the Laramie considerably safer by designing a rebounding-hammer/hammer-block system that allows you to safely carry it with all six chambers loaded.

## 1873 RENEGADE SHORT RIFLE

### 1873 RENEGADE

<b>CALIBER</b>	.45 COLT, 357 MAG
<b>BARREL LENGTH</b>	20"
<b>CAPACITY</b>	10 ROUNDS
<b>FINISH</b>	BLUED

### BERETTA 1873 RENEGADE SHORT RIFLE JNA1A01

In 1873, Oliver Winchester introduced his new steel-framed lever-action rifle, creating what would eventually be known as the "Gun That Won the West." The Model 1873 was originally chambered in a new, more powerful cartridge, the .44/40—a .44 caliber bullet propelled by 40 grains of black powder. However, one big factor that really ensured the success of the 1873 was that Colt quickly responded by offering its frontier six-shooter chambered in .44/40. A cowboy could have both a lever-action rifle and his "Peacemaker" and need only one cartridge belt. Today, the 1873 is the most popular rifle used in cowboy action shooting. **Beretta's new 1873 Renegade takes this popular design to the next level as the first factory-produced 1873 rifle with a shorter action stroke length, straight butt plate and gold bead front sight—"race ready" right out of the box!** Available in .45 colt and .357 Mag.

## STAMPEDE BUNTLINE

### STAMPEDE BUNTLINE

<b>CALIBER</b>	.45 COLT
<b>BARREL LENGTH</b>	18"
<b>CAPACITY</b>	10 ROUNDS
<b>FINISH</b>	BLUED

### STAMPEDE, BUNTLINE CARBINE (BLUED) JEH1801

In 1873, it is said that dime novelist Ned Buntline presented Colt revolvers with shoulder stocks to the most famous men of the Old West, including lawmen Wyatt Earp and Bat Masterson. The Buntline revolver was one of the first reliable repeating rifles, battle-tested in the Mexican War as well as Indian Wars of the Southwest.

The new Beretta Stampede Buntline revolver is a true working replica of the famous Buntline, featuring the same great performance and reliability as Beretta Stampede revolvers, including the innovative transfer bar safety, which allows the revolver to be safely loaded with six cartridges rather than five and an open chamber. Hooked trigger guard, 18-inch barrel, brass crescent butt plate, checkered stock, inlaid gold Beretta medallion on both sides.

GOLD RUSH/GOLD RUSH DELUXE

**GOLD RUSH RIFLE JHA1B01**

The Beretta Gold Rush Rifle follows the same philosophy as our successful Stampede revolver: combining the looks and feel of the Old West original with modern safety and reliability. Chambered for the .45 Colt and the .357 Mag/38 Special, the Gold Rush is a fast-handling pump-action longarm perfect for Cowboy Action Shooting, small-game hunting and informal target practice. Discrete modifications have been incorporated that greatly enhance safety and reliability.

**GOLD RUSH CARBINE JHA1A01**

Like the Gold Rush Rifle, the Gold Rush Carbine is a testament to authenticity coupled with modern performance. Compared to the original, several enhancements have been made. A solid transfer-bar safety mechanism is housed in the hammer, making the gun absolutely safe to load and unload without having to lower the hammer. Feeding is improved considerably by ensuring that each cartridge is perfectly in line with the chamber. And a redesigned cycling mechanism makes it possible to obtain the desired speeds without jams.

**GOLD RUSH DELUXE JHB1B01**

The Beretta Gold Rush Deluxe Rifle and Carbine exemplify the same high standards in engineering and performance as the Beretta Gold Rush and Carbine, with some important aesthetic differences. Features of the Gold Rush Deluxe include charcoal-blued barrels, jeweled hammer and trigger and German silver medallion inlaid into the stock. The Deluxe walnut stock and fore-end have special fish-scale checkering, oil finish and Beretta "three-arrow" logo engraved in the checkering pattern.

INTRODUCING  
THE 1526 COLLECTION

The sheer beauty is in every luxurious detail. From the rich baroque spirals hand chiseled by Master Engravers to the extraordinary cut of cloth and harmonious stitching found in the world's finest Italian apparel. Here there are no compromises; here only the very best will do. Every shotgun is created of hand-selected wood, hand engraved and hand fitted. Every article of clothing is fashioned from only the finest fabric in impeccable Italian design.

The 1526 Client is the collection that defines Beretta. That represents living at its very best. Not only is this the collection that the Beretta family is most hands-on involved with, this is the lifestyle the Berettas themselves live. This is their legacy; this is their passion. There is, quite simply, no finer example of Beretta's heritage of unflagging dedication to extraordinary performance and outstanding quality than in this collection, which is enveloped in the Italian sense of craftsmanship and style unrivaled worldwide.

# THE 1526 COLLECTION

## SO10 EELL

Seventy years after the first modern Beretta over-and-under (the S1 launched in 1933), a new true sidelock shotgun is born: the SO10 EELL over-and-under. It is the deserving successor of the famous Beretta SO series hunting and competition shotguns that have earned their reputation, on the Olympic podium and on the most exclusive hunts in the world, from Europe to America to Africa, for being the most functional, elegant and exclusive over-and-under in the world. Drawing from this very long experience, and under the dedicated guidance of the Beretta family, the most gifted designers and gunsmiths of the company have created the new SO10 EELL, a synthesis of aesthetic refinement, function and performance that place it at the peak of the world's prestigious over-and-under offerings.

In Italian, EL stands for *extra lusso* (extra luxury). The prized double "E" double "L" designation takes that quality to the highest level of luxury.

Master Engraver Mario Terzi.

## ELEGANCE AND CARE

Entirely hand executed by expert craftsmen, the Beretta SO10 EELL over-and-under case is made of solid wood covered in resistant leather. A full range of handmade cleaning and maintenance accessories is provided. Type and color of leather, wood, finishing and accessories vary depending on the model.

IMPERIALE MONTECARLO

**IMPERIALE MONTECARLO**

A shining example of what can be achieved when free reign is given to Master Gunsmiths in the crafting of personalized luxurious shotguns and when Master Engravers are able to express their artistry in full, the Imperiale Montecarlo is a masterpiece destined to become a part of gunmaking history. The deeply blued Demibloc barrels of the Imperiale Montecarlo side-by-side boast numerous, exclusive qualities that have determined its fame as a great hunting and competition gun. They begin with the special steel that assures extremely high resistance and outstanding tensile strength and conclude with the exclusive cold bluing of the barrels that give them an extraordinary deep glossy black color. The final result will astonish even the most refined connoisseur.

**THE ART OF ENGRAVING**

English scrollwork, hunting scenes, floral motifs, deep relief, mixed technique engravings, portraits and more. Any type of engraving is possible on an Imperiale Montecarlo and is executed only by the most expert Master Engravers.

**IMPERIALE MONTECARLO**

## SO6 EELL, SO5

### SO6 EELL

Embellished with the finest hand engraving proudly signed by the author, the SO6 EELL Premium Grade sidelock shotgun is sought after by connoisseurs who desire to be one of the few to own such a masterpiece. Pick one up and you know it is special—each of its elegant details, from the sophisticated engravings to the gold-inlaid animals to the dimensions of the walnut briar stock and receiver, is executed to suit the personal tastes and requirements of its owner. The Master Gunsmiths' handwork is evident everywhere, from the hand-cut deep diamond checkering to the hand-file cut ventilated rib. Prized for their beauty and uniqueness, each SO6 EELL is built to perform to the highest standards decade after decade, generation after generation.

### SO5

With numerous gold medals in the Olympics and other prestigious international competitions, the best shooters in the world consider the SO5 over-and-under the finest competition shotgun ever made. The SO5 is handcrafted to meet the requirements of every shooting discipline and can be further personalized for peak performance. This elegant champion's sleek profile enhances swing and pointability. Its sideplates are beautifully hand engraved and the trigger plate is embellished with a 24-carat fine gold inlay of the "P. Beretta" signature on the coin silver finish.

### SO6 EELL, SO5 TRAP, SKEET, SPORTING

DT10 TRIDENT EELL, L

**DT10 TRIDENT EELL**

Competitors feel a special admiration for the shotgun that accompanies them to the podium. Since the beginning of international competition, Beretta has accompanied more medalists than any other brand of shotgun. The DT10 Trident EELL over-and-under was developed for discerning shooters, rolling performance and elegance into a truly durable, secure investment. The perfectly coupled components and the elegant, fully engraved, hand-finished receiver put this shotgun into the exclusive category of a Beretta Premium Grade.

English scroll or game scenes engraving extends to the side plates in this premium grade competition overunder.

## GIUBILEO SERIES, 687 EELL CLASSIC

### GIUBILEO

The splendid Giubileo over-and-under, made in 12, 20, 28 and .410-gauge models, is distinguished by rich, baroque spiral and floral engravings on the receiver and sideplates, and by its exquisitely proportioned construction. There are no screws on the plates, allowing the Master Engravers to express their artistry in full, while the internal surfaces and mechanisms are impeccably polished. The elongated trigger guard, the safety and top lever are also completely engraved. The stock and fore-end, made from the highest quality walnut, are finely checkered.

### 687 EELL CLASSIC

Refined pleasures are the rewards of life. One of these rewards is hunting with a prestigious Beretta shotgun like the incomparable 687 EELL Classic. The full side plates boast a fine engraving with birds and are enhanced by intricately detailed ornamental motifs of branches, leaves and flowers which extend to the trigger plate, trigger guard and fore-end iron lever.

455 EXPRESS AND SSO6 EXPRESS

**455 EELL EXPRESS**

In designing the 455 EELL Express, Beretta left nothing to chance in ensuring the absolute mechanical and engineering integrity required to handle the specialized loads mandatory for stalking dangerous game — like the receiver made of special high-strength steel and forged with an elongated 60mm plate to compensate for stress when shooting. Or the reinforced receiver sides that can withstand the tremendous pressure of high-powered cartridges. With the highly detailed game scene engraving and intricate scrolling, this makes for one superbly finished rifle.

**SSO6 EELL EXPRESS**

For dedicated big game hunters worldwide, a Beretta SSO6 EELL Express rifle in the hand means a trophy on the wall. This is no ordinary firearm. The SSO6 Express EELL delivers a potent combination of ultra-strong receiver and carefully crafted barrels to comfortably handle today's powerful ballistics with remarkable accuracy. Hand-finished, hand-checked stocks and fore-ends from highly selected walnut and a color-casehardened receiver sporting 24-carat gold inlaid animals add masterful touches to this magnificent rifle. Hand engraved hunting scenes, on request.

## APPAREL & ACCESSORIES

### ELEGANT ITALIAN STYLE, LEGENDARY BERETTA QUALITY

Not all things are made equal in this world. For those who appreciate the finer things in life, who see the beauty and value in the craftsman's attention to the smallest, hidden details...genuine leather buttons and trim...handpicked English wool and luxurious soft cashmere...field-tested fashions that honor the long tradition of the hunt...to you, only the very finest will do.

For the same reasons you cherish the master artisan's touch on a hand-chiseled shotgun, you treasure the handiwork that goes into the authentic, sophisticated clothing that immeasurably increases the pleasures of your pursuits.

This is time-tested hunting apparel that meets those unrelenting standards. The 1526 Collection is an extension of Beretta's passion and commitment to authenticity, timeless appeal, tradition and legendary quality. Welcome to the best of the best, to a world of luxury and quality without equal.

#### LABRADOR JACKET\*

Our corduroy blazer in wonderful stretch cotton takes its cues from the sport of hunting. The bellows pockets are trimmed in wool flannel and it is outfitted with leather buttons, soft leather elbow patches and leather braided trim surrounding the "shooting" patch. Slimmer European fit.

\* Because fashions change on a seasonal basis this particular jacket may not be available. Contact a Gallery near you to find out about our latest renditions.

APPAREL & ACCESSORIES

A COLLECTION OF THE WORLD'S FINEST

As you travel the continents in search of the finest the world has to offer, you have come to understand that there is no substitute for those special qualities that embody what is truly extra lusso. Such quality, once found, is impossible to retreat from.

Every article has been fastidiously designed, thoroughly tested and found to be worthy of the Beretta family's personal stamp of approval. This is the world's finest—without compromise.

**ENGLISH WOOL  
TWEED COAT  
WITH BUTTON-OUT  
INSULATED LINING GUI26360**

The tweed is English wool at its softest, but everything else about this coat harkens back to all things Scottish. The button-out vest insulated with ultrathin Thermo<sup>®</sup> and the button-up collar will keep you plenty warm. In a nod to modernity, the vest has a special pocket for your cell phone. The bi-swing back, expandable front bellows pockets, won-

derfully supple leather elbow patches, and a slew of pockets inside and out make this the most functional and comfortable tweed you'll ever own.

## GALLERY EXPEDITIONS

Peter Horn II is one of the brainchilds and the business manager of The Beretta Gallery Stores. If you want to get a true sense of hunting, listen to him talk about the smells of the jungle and the colours of Tanzania, his passion for hunting and guns, the challenges and the dangers, and the need to safeguard nature.

Eastern Europe is another one of Peter's favorite hunting grounds and runs high-end excursions four times a year. Choices of areas, food and staff are based on what even the most sophisticated hunter would expect. Peter will be pleased to provide details for anyone wishing to know more about Beretta Gallery Expeditions.

# THE 1526 COLLECTION

*At the core of Beretta is a passion.  
An understanding of the wild places.  
The high grass and the low marsh.  
Rain and sun. Man and dog.  
It's in our genes.  
And so, too, is it in our hearts.  
It's why we exist.  
And it's why we have endured for nearly 500 years.  
Because of one purpose. One passion.*

## COMMUNICATIONS OVERVIEW

Every year Beretta develops a comprehensive communication plan aimed at ensuring that the product displayed on the shelves is always backed up by powerful and effective marketing campaigns in print and television and radio, increasing consumer awareness and demand. Carefully selected multi-million dollar investments allow Beretta to be present whenever the consumer looks for information, be it reading, researching or simply entertaining himself or herself. Here and on the following pages are some examples of how Beretta presents itself through the communications campaign.

### TELEVISION SPONSORSHIPS

Beretta's television presence expands each year through the growth of the various networks on which it runs advertising, and also through the addition of new television sponsorships.

#### *THE WORLD OF BERETTA* ENTERS ITS 5TH SEASON

Hosted by Gerald McRaney each episode features exciting hunting expeditions spanning a rich and varied backdrop of destinations across America and around the globe.

Hosted by renowned whitetail hunter and author David Morris and comedian and deer hunter Jeff Foxworthy.

A new kind of reality series, this show will surprise a lucky contest winner and take him on the hunting or fishing trip of a lifetime.

This groundbreaking series takes viewers along on hunts for the world's deadliest beasts.

Unparalleled sporting action found in some of the world's most memorable places.

### *Under Wild Skies*

Host Tony Makris takes extraordinary safaris to places like the Serengeti, the Okavango Delta and Ngorongoro Crater.

Showcasing some of the finest bird hunting locations and lodges around the world, hosted by Steve Smith and Christ Dorsey.

# COMMUNICATIONS OVERVIEW

## PRINT MEDIA — A MAINSTAY OF THE COMMUNICATIONS PLAN

Over the years Beretta has been present in literally hundreds of print publications. Today, Beretta maintains a print schedule that keeps the brand and its products in front of consumers during key seasons throughout the year.

Our ads are found in a wide range of industry publications reaching the hunting audience as well as the competitive shooter and handgun enthusiasts. More than 50 different magazines are typically on the media plan.

In addition to this endemic effort, Beretta has a limited presence in a select number of publications that expose the brand to consumers who have an appreciation for the outdoors, but are not necessarily participating in the shooting sports. These publications tend to be very targeted either in their readership or geographic coverage.

Beretta ads also appear in many event-specific publications associated with particular sports such as NASCAR, the NFL and the PGA.

# MEDIA

## COMMUNICATIONS OVERVIEW

### RADIO

Radio can be a powerful medium and is especially strong among men between the ages of 18 and 54. In fact more than 72% of all consumers listen to radio each day. This year Beretta has added a radio component to its communication plan.

Hosted by Tom Gresham, *Gun Talk Radio* is the only nationally syndicated radio talk show about firearms, shooting, personal safety and gun rights. The show is distributed through ABC Satellite radio stations, XM Satellite Network, live worldwide internet streaming, and on more than 50 stations across the country.

Dallas-Ft. Worth talk radio station K-SKY is where Beretta runs a weekly schedule of radio commercials promoting Beretta products and the brand throughout the year.

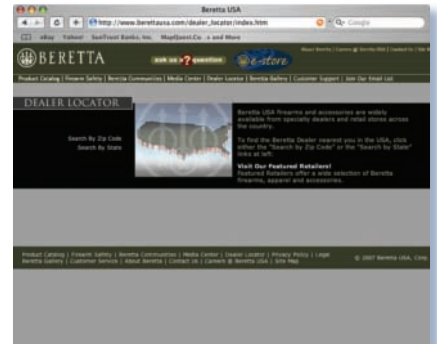

### BERETTA'S MAIL ORDER CATALOG

More than two million catalogs are mailed directly to the homes of Beretta customers each year, featuring our newest, our most popular, and our featured products. These catalogs not only increase top-of-mind awareness, but help us drive online sales of seasonal apparel and accessories. Beretta Dealers are listed in each catalog, letting customers know where they can see and buy locally, as well as purchase firearms that are not available through the mail.

### WEBSITE

One of our most important and widely accessed venues of communication with our customers is through our state-of-the-art, interactive website. Here, we provide a wide range of information on all our products, allow the ease of home shopping, connect customers with each other through our Beretta Communities, and provide a directory to point them to their nearest Beretta dealer.

## COMMUNICATIONS OVERVIEW

### TEXAS MOTOR SPEEDWAY— A UNIQUE OPPORTUNITY

Beretta is the “Official Firearm of the Texas Motor Speedway.” Drawing crowds of more than 1 million people every year, Beretta enjoys a constant presence with track side signage visible not only at the track but on every televised race.

The Beretta sponsorship is highlighted at two Nextel Cup NASCAR races each year when the Dickies 500 pole winner is presented a Giubileo shotgun and the race winner a pair of Beretta Stampedes.

This sponsorship is even further enhanced with souvenir guide advertising, loudspeaker announcements and the presence of the Beretta Mobile Showroom on “vendor row”.

### CONSERVATION PARTNERSHIPS ARE AN IMPORTANT ALLIANCE

Preserving our hunting heritage becomes more difficult with each passing year as the lands on which we hunt continue to disappear. Beretta is proud to partner with a number of worthy organizations to help conserve our natural resources and protect wildlife habitat so that future generations will enjoy our hunting traditions. These partnership are instrumental in achieving that important goal and we urge your support of their efforts.
