Specifications and terms stated in this publication are subject to change without notice. While Walther attempts to provide accurate information, there may sometimes be inadvertent inaccuracies. Walther is not responsible for, and reserves the right to correct, any such inaccuracies.

Over a century ago WALTHER began a legacy of innovation and craftsmanship in its first firearms. That tradition endures as WALTHER continues to set new standards for high quality. The WALTHER line features a full range of products with elite competition pistols, law enforcement and military firearms and safe options for concealed carry for the private citizen.

There is a WALTHER firearm for every need. Military, police, and other government security groups throughout the world have relied on the reputation and rugged durability of the WALTHER P99. The WALTHER PPK and PPK/S combine extremely efficient concealment with sleek elegance. WALTHER P22 and G22 models provide the unique features and design of full-power, centerfire firearms in .22 caliber platforms.

New to the growing WALTHER line are the PPS and SP22 models. One of the slimmest carry options on the market, the

PPS is thin, powerful and attractive with all the safety features one would expect with WALTHER QuickSafe™. WALTHER sporting firearms have also been the competitor's choice since they first appeared in the 1938 Olympic Games. The new SP22 is the latest in 21st century competition sport pistols with superior German engineering and a full range of customization for the competitor and enthusiast alike.

In 1999, Smith & Wesson and WALTHER announced a strategic alliance for Smith & Wesson to be the sole distributor of WALTHER branded firearms and accessories available in the United States. Today, WALTHER continues its long tradition of innovation. WALTHER's technical expertise in the design and production of firearms meets the highest standards of quality with unsurpassed fit, finish, reliability and durability. Welcome to higher performance standards. Welcome to WALTHER.

NEW PRODUCTS 2008

The long tradition of WALTHER technical expertise in both design and production has built a worldwide brand recognized for legendary quality. Innovation and depth of the product line are our priority as we continue to introduce new products with high performance standards.

PPS

SP22

PPS

The new Police Pistol Slim model packs WALTHER quality and features perfect for concealment. It's thin, powerful and attractive. See page 4 for additional details.

Available in 9MM and .40 S&W

SP22

The modular design and customizable features of the new SP22 pistol make it the most versatile pistol for competition or target shooting. View the entire line of SP22 pistols and modular features beginning on page 12.

THE PPK AND PPK/S

Developed in 1931, the WALTHER PPK has been imitated but never duplicated. The elegant lines have caught attention throughout the world for over 75 years. From secret agents to undercover police and beyond, the uncomplicated reliability of the PPK models continue to evolve by popular demand. The double-action PPK and the PPK/S with its additional cartridge capacity remain international bestsellers with legendary followings.

PPK & PPK/S ADVANTAGES:

P99

FULL AND COMPACT

THE ORIGINAL WALTHER P99 SERIES

The WALTHER P99 polymer pistol is an international favorite for military, police and other government agencies throughout the world. The internal striker fired P99 offers numerous safeties including a red-painted striker tip that extends from the rear of the slide when the gun is cocked and also features internal safeties. There is also a Loaded Chamber Indicator on the slide that protrudes when loaded. The P99 has adjustable sights for both windage and elevation, tool-less takedown and is available in full size and compact models.

P99AS & P99QA

The P99 also offers two unique trigger systems in the P99 Anti Stress and P99 Quick Action. As the first pistol equipped with a firing pin lock, the P99AS combines the advantages of traditional double action pull with the Single Action Stress trigger and a decocking button safety integrated directly into the slide to decock the striker. The P99QA, with its uniform short trigger pull and quick reset combined with independent safeties, allows for quick shot delivery. The striker is partially pre-cocked and when the trigger is pulled the striker becomes fully cocked and releases when firing. For more information on the two trigger systems, please see pages 10 and 11.

P99
WALTHER

P99 ADVANTAGES

1. **Cocking Indicator:**
Visible & Tactile Recessed Firing Pin
2. **Loaded Chamber Indicator:**
Visible & Tactile Recessed Red Marker
3. **Interchangeable Backstrap:**
Three Sizes for Optimum Grip Fit
4. **Ambidextrous Magazine Release:**
Integrated Into Trigger Guard
5. **Slide Serrations:**
Positive Grip & Slide Racking
6. **Weaver-style Equipment Rail:**
Quick Attachment of Lights & Lasers

P99 COMPACT

The P99 COMPACT models have the same advanced design features as their full-size counterparts, but in a smaller profile ideal for backup or concealment. Just like the full-size version, both the AS and QA trigger variations are available. The frame backstraps remain interchangeable to fit a variety of hand sizes. The hammerless striker systems and built-in safeties of the P99 remain standard. Each P99 Compact features a rounded frame to prevent clothing snags. The pistol comes equipped with a flat-bottom magazine and finger-rest magazine butt plate as well as a Weaver-style rail molded into the frame to accept lights and lasers.

P99AS

ANTI STRESS

THE P99AS

Traditional Double Action with Anti Stress Mode

By integrating a Single Action Anti Stress trigger into its design, the Double Action P99AS helps prevent unintentional "reflex" firing in stressful situations. After the slide has been pulled completely to the rear, the trigger remains in the forward position for the first shot. This prevents inadvertent firing not only in the double action trigger mode, but also in the single action mode. As a result, the trigger travel is .55" long in the anti stress mode with 4.4 lbs of trigger force that helps to prevent inadvertent firing. On all subsequent shots, the trigger travel is reduced to .314" with the same trigger force for classic P99 quick reset firing.

TRIGGER WEIGHT VS. TRAVEL

P99AS DECOCKING BUTTON SAFETY

The P99AS is equipped with a decocking button that automatically decocks the striker and is integrated directly into the slide to prevent clothing snags if drawn quickly.

P99QA

QUICK ACTION

The Name Says It All: Safety Plus Lightning-Fast Firing

The P99 Quick Action pistol with uniform short trigger pull and independent safeties is the choice for both law enforcement tactical teams and competitive shooters. The P99QA hammerless pistol is capable of being disassembled without the need to pull the trigger. Simply remove the magazine, clear the chamber, press the takedown button and slide the takedown catch to remove the slide. The trigger mechanism incorporates a striker system that is partially pre-cocked. When the trigger is pulled, the striker becomes fully cocked and released, firing the pistol. With approximately .31 inches of trigger travel and 8 lbs. of trigger force, the short trigger pull and reset provides quick shot delivery, especially in competitive situations.

P22

THE P22 SERIES

The WALTHER P22 is a favorite among shooters because of its built in versatility, comfort and customization. Constructed using a modular manufacturing concept, the high-tech design offers several different equipment configurations in a compact frame. When it comes to accessories, changes are almost instantaneous, whether mounting a red dot sight or changing barrels.
