Showing the Way. Real leaders are hard to come by. They understand the risks of being in the lead, and yet relish the challenge. They create new paths and new visions that both inspire and motivate. They also repeatedly deliver on their commitments and perform at a level above their peers.

Federal Premium® remains dedicated to leading. We are focused not only on the ammunition marketplace, but the entire outdoor industry. Far beyond marketing campaigns and new product introductions, Federal Premium strives to innovate. This means not just coming up with product line extensions, and “me too” products, but creating products that give our customers a true advantage.

We're constantly looking for new materials, advanced manufacturing processes, innovative performance solutions, and capabilities

that differentiate us from everyone else. Our recent introductions of TNT® Green™, Trophy Tip, Black Cloud®, Fusion® and the FLITECONTROL® wad are just a few of the new solutions we have brought to the shooting sports marketplace. These are products that enhance performance, leverage new technologies and meet the ever changing needs of today's shooters. They are also just a hint at what we have in-store for the future.

As always, we'll continue to be generous in our support of the shooting sports and wildlife conservation. There's never been a better time to focus on conserving our natural resources, preserving our heritage and protecting our rights

Thanks for your support, enjoy our products and remember—Every Shot Counts!®

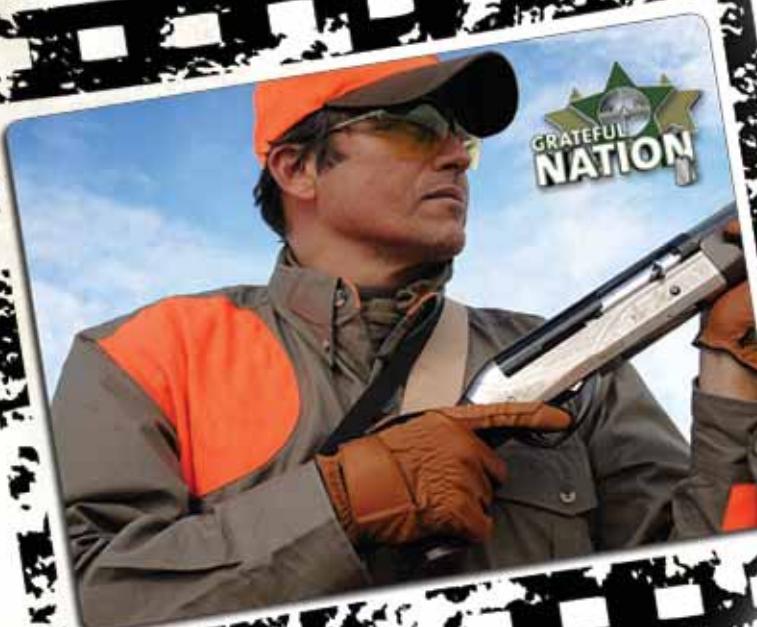

Mark W. DeYoung
President,
Federal Premium Ammunition

EVERY SHOT COUNTS®

PREMIUM® TV

GRATEFUL NATION™

Freedom is coveted most by those who know its price. Join actor and former Army Ranger Tim Abell as he introduces viewers to some of America's finest—soldiers who have been wounded in combat but whose love of hunting has helped them overcome the physical and emotional scars of war. Along the way, you will come to know the sacrifice of these soldiers as they share their experiences in distant lands while at the same time returning to a favorite hunting setting—the kind of place that sustained them from foxholes to hospital wards. These are American stories that you will never forget—especially when you witness the outpouring of support from a truly grateful nation.

ESPN2

DANGEROUS GAME™

Federal Premium® is proud to sponsor this VERSUS series featuring the most exciting dangerous game footage available. Dangerous Game highlights the drama and personalities of the hunters who dedicate their lives to the pursuit of some of the most fearsome animals on the planet. Not only does the series focus on heart-pounding hunts, but it also showcases the key role hunters play in conserving the species and the environments where the animals live.

VERSUS **country**

DIFFERENTIATING WITH INNOVATION

At Federal Premium®, we bring you new products that outperform the rest. Our innovations aren't small changes to existing products, or gimmicks we can put our name on. They're loads and calibers that give you a clear advantage. That's because outside of the workplace, we're hunters and shooters just like you. Staying on the leading edge of ammunition technology takes the skill and knowledge to create products that perform at the highest level—and above all make sense. Our 2009 lineup does just that.

Trophy Bonded® Tip. Last year we introduced this new bullet that combined several technologies to emerge as the clear-cut winner for big game hunters. Improved ballistic coefficients led to better accuracy, exterior skiving meant perfect expansion every time and a proven platform still gave you great weight retention. This year, we expand this line to fill in the loads you need. **See page 10 for details.**

V-Shok® Coyote Shotshell. For the first time, we introduce a 12 gauge shotgun load made especially for coyotes. This offering combines the ultra-dense HEAVYWEIGHT® shot and FLITECONTROL® wad for unbelievable performance. Effective shotgunning range for varmints just got longer. This year, put it to the ultimate test in the field.

See page 36 for details.

Personal Defense® .410 Handgun Shotshells. The Judge from Taurus® has become a very popular handgun for personal defense. Because most personal protection scenarios usually play out in close proximity, a shotshell load makes perfect sense. New this year, we introduce two offerings designed for this specialized platform. Our .410 000 buck and #4 lead shot options give you great patterns and excellent penetration. **See page 27 for details.**

We've also honed in on some key needs of shooters with affordable **American Eagle®** target loads for M1A and M1 Garand shooters (**page 16**). The return of **UltraMatch®** 22 LR load (**page 52**) and several line extensions, including a new **Barnes® Tipped Triple-Shock® X-Bullet™** offering (**page 11**), are just a few of the new products we offer in 2009.

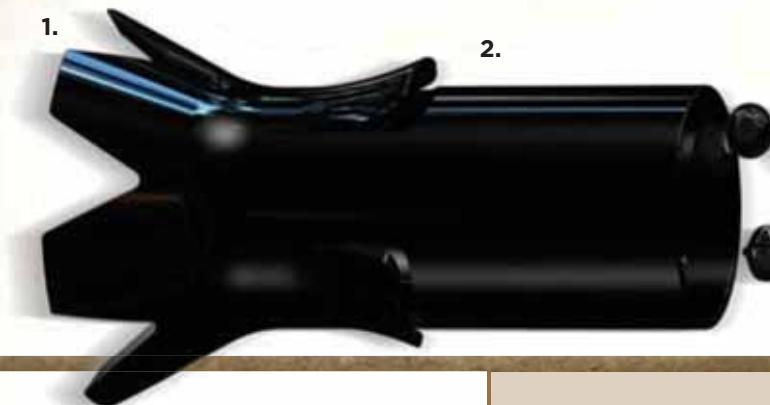

FLITECONTROL® WAD

THE DIFFERENCE MAKER

One thing is for certain; industry-changing innovations like the FLITECONTROL® wad don't come along everyday. The impact this has had on shotshell technology as a whole is unprecedented. Before its introduction, hunters had never seen such devastatingly consistent patterns. The performance alone spoke for itself. And the best part is you don't need some crazy choke, or far-fetched product to get great results. All you need is standard factory chokes and your favorite scattergun. The FLITECONTROL wad revolutionized everything from buckshot to waterfowl loads. This year, 10 and 20 gauge turkey, duck and goose hunters get in the mix. With several new loads available in both the Black Cloud® and Mag-Shok™ lines, Toms and teal alike should take note. Coyotes aren't safe either, as this technology has been incorporated to create an all-new shotgun load for varmints that gives unprecedented performance in the field.

1.

2.

3.

WATERFOWL BLACK CLOUD® FS STEEL™

The FLITECONTROL® Wad was first optimized for waterfowl loads in 2007. It brings Black Cloud® performance to levels never before possible from steel loads. This year, 10 and 20 gauge waterfowlers can get in on this exciting product. **See page 38 for details.**

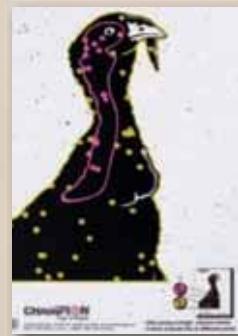

Black Cloud with FLITESTOPPER steel shot

TURKEY MAG-SHOK®

These loads were among the first to feature the FLITECONTROL® wad. This delivery system brings a whole new meaning to devastating turkey loads. Lead and HEAVYWEIGHT® options in 10, 12 and 20 gauge are now available.

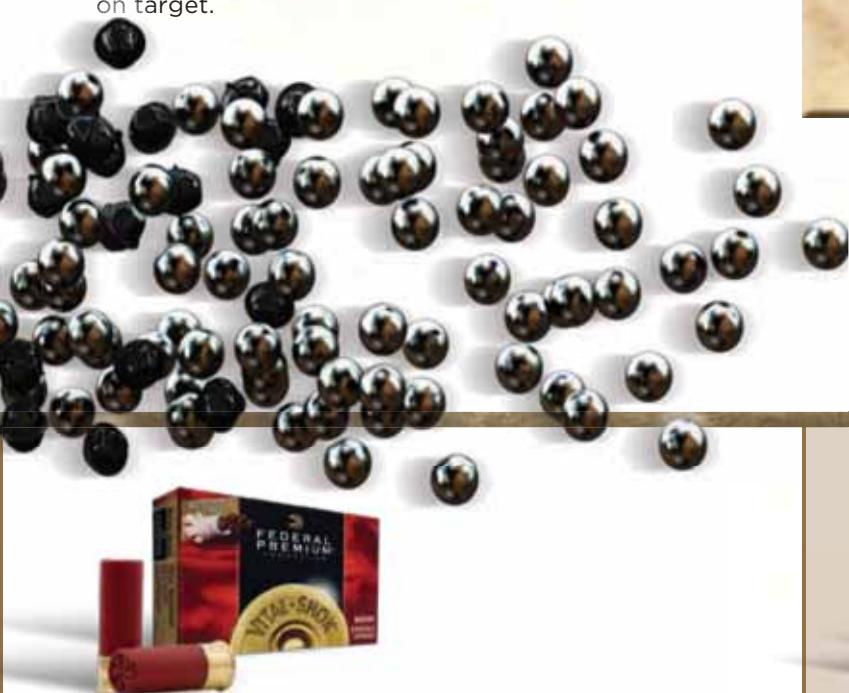

See page 44 for details.

PHT193F 7 with modified choke at 40 yards.
Target shot with Rem. 870.

THE BREAKDOWN

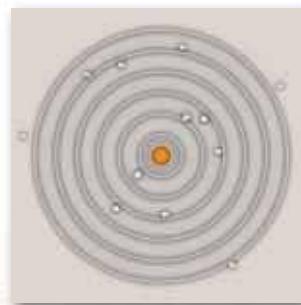

- 1. Petals:** Open in the rear to create an air brake. This separates the wad and shot at the perfect time and leads to consistent, dense patterns.
- 2. Windows:** Open on side of wad to allow air in and help stimulate the payload for separation from the wad.
- 3. Payload:** FLITECONTROL wad is combined with several unique shot types to get better performance on target.

DEER VITAL-SHOK®

The introduction of the FLITECONTROL® wad to buckshot loads brings tight patterns never seen before. These loads put the most pellets on target every time. No exceptions.

See page 37 for details.

PFC157 00 with full choke
12/12 Hits at 30 Yards.
12" target shot with Rem. 870.

10 Gauge

12 Gauge

20 Gauge

COYOTE V-SHOK®

The latest in a long line of quarry to be targeted by the FLITECONTROL® is the coyote. The rear-braking wad and HEAVYWEIGHT® shot combine for unbelievably dense patterns, extending the effective shotgunning range for varmints dramatically.

See page 36 for details.

PHC120 BB with full choke at 40 Yards.
Target shot with Rem. 1100.

PREMIUM BULLET SELECTOR GUIDE

Trophy Bonded® Tip

Built on the heralded Trophy Bonded® Bear Claw® platform for excellent weight retention and penetration. Tipped for improved ballistic coefficient and better accuracy.

Barnes® Tipped Triple-Shock® X-Bullet™

Features Delrin tip for flatter trajectories and deeper penetration. Designed for hyper-velocities and to reduce pressure and barrel fouling. All-copper construction means high weight retention with great accuracy.

Trophy Bonded® Bear Claw®

For over 20 years it's been the standard in stopping power on medium to large dangerous game. Its copper jacket and lead core are 100% bonded for reliable expansion and over 95% weight retention.

Barnes® MRX-Bullet™

Combines an all-copper bullet from its predecessor, the Triple-Shock® X-Bullet™, with a tungsten-based Silvex® core and a poly-tip to provide devastating performance at both short and extended distances.

Trophy Bonded® Sledgehammer® Solid

Bonded-bronze, Jack Carter-designed bullet carries a well-deserved reputation for stopping power. The flat nose minimizes deflection for a straight, deep wound cavity in large dangerous game.

Barnes® Triple-Shock® X-Bullet™

Extremely accurate, and delivers superior expansion and deep penetration. The all-copper design provides high weight retention for outstanding Knockdown Power®. Cape-Shok™, the ultimate ammunition line for the world's most difficult and dangerous game, also offers the 100% non-toxic Triple-Shock® X-Bullet™.

Nosler® AccuBond®

Combines the terminal performance of a bonded bullet with the accuracy and retained energy of a Ballistic Tip®.

Barnes® Banded Solid

These bullets stop dangerous game in their tracks. The copper/zinc alloy construction prevents these tough bullets from disintegrating or deflecting on heavy bone.

Nosler® Partition®

World-renowned bullet features a partitioned lead core and shank that allows the front half to mushroom while the rear core remains intact for deep penetration and stopping power.

Sierra® GameKing®

Designed with a precisely tapered, boat-tail shape that reduces drag and delivers high downrange velocity. Less wind drift, flat trajectory and unmatched accuracy in reaching distant game makes it a must have for long-range hunters.

Nosler® Ballistic Tip®

Proven choice for flat-shooting, wind-defying performance on everything from varmints to medium game. Color-coded poly-tip for rapid expansion and easy identification.

Wooldeigh® Weldcore® Soft Point

Hunters across the world have come to trust this bullet for its accuracy, consistent expansion and tremendous impact. Get up to 85% weight retention.

Speer® TNT® Green™

Lead-free bullet designed for explosive performance. Great accuracy and total disruption make it an ideal varmint round.

Woodleigh® Weldcore® Solid

Safari hunters choose these bullets for their superb stopping-power. These solids perform on even the toughest, most dangerous game.

This chart is intended to provide a general guideline for the types of bullets and calibers that can be used in certain hunting applications. Additional research should be done by the user to determine the optimum caliber/bullet type for specific big game applications.

PREMIUM® V-SHOK®

LEAD-FREE FOR VARMINTS.

Our lead-free Speer® TNT® Green product has established itself as one of the top loads for varmints. Its compressed-powder metal core and lightly-skived jacket gives it what predator and varmint hunters covet most: explosive expansion. Sure this product is lead-free, but what really matters is the performance. If there's one thing varmint hunters don't tolerate, it's poor results in the field. Long shots are a must, and when the time comes to squeeze the trigger, you won't accept a bullet you have to second guess. The terminal performance and accuracy of the TNT Green is second to none. It's great for hide hunters too, because it completely fragments on impact, and virtually eliminates the chance for an exit hole. Find your favorite load today, and be sure to check back soon to see how we've expanded this exciting line.

THE WIND MAY HOWL, BUT YOUR SHOT IS TRUE

Varmint hunters are a unique breed. If you've sat concealed and perfectly still for hours, you know what it takes. Coyotes and other varmints aren't easy targets. Perfect plans are foiled with the slightest misstep. But chance encounters with these wily foes can also result in success. Most of the time, there's no room for error. We load every predator option with this in mind. Our V-Shok™ line offers several wind-defying options that boast impressive ballistic coefficients and superior terminal performance on everything from coyotes to prairie dogs. This year we've added a 22-250 Rem. 55-gr BlitzKing® to keep our varminters happy. No matter what you're after, we've got a load for you.

PREMIUM® VITAL•SHOK®

CONSTANTLY IMPROVING: TROPHY BONDED® TIP

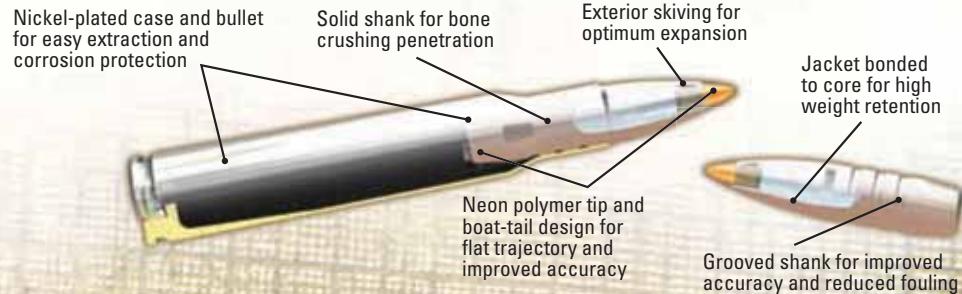

Last year's introduction of the Trophy Bonded® Tip was a huge breakthrough for big game hunters. This bullet combines superb accuracy, advanced design and great weight retention. The result is unparalleled success in the field. While the proven Trophy Bonded® Bear Claw® provides the platform, the new features drive performance levels to new heights. Drastic improvements in ballistic coefficients make for better accuracy, and advancements like exterior-skiving ensure consistent, reliable expansion from this bonded bullet. This flashy bullet caught the eye of countless big game hunters last year, and we're willing to bet not too many of their chambers see anything else again this fall. Look for Trophy Tip to be available in two new calibers and 11 new offerings overall.

SEE THE ENTIRE PICTURE OF SUCCESS

Your time in the field is priceless, regardless of the outcome. As a big game hunter, you're constantly learning and always adapting in hopes of putting it all together. And when you do, the reward is great. But getting there is almost as fun. There's no better feeling than dropping your trophy. For that reason, we make sure you have the best loads to chamber in your rifle. Remember, we succeed when you do. Last year saw some drastic improvements to our Vital-Shok™ line with the addition of the Trophy Bonded® Tip and the Barnes® Tipped Triple-Shock® X-bullet™. One took a proven platform and improved it. The other used the concept of a light bullet traveling at hyper speeds. Keep an eye out for extensions of each line this year. And of course this line wouldn't be complete without our other Premium® bullet offerings from proven companies like Nosler® and Sierra®.

PREMIUM® VITAL-SHOK®

THERE'S NO EXCUSE FOR SECOND BEST

The Federal Premium® Vital-Shok™ line has proven itself to big game hunters of all types in all conditions. We take pride in having many Premium® options ready for you to chamber no matter where your hunt might take you. We're definitely proud of the reputation we've established but that doesn't mean the innovation will cease. We're constantly looking for ways to improve our products and/or extend our lines. This year is a perfect example. We've loaded Barnes Triple-Shock X-bullet for years, but you'll notice a few new calibers are now available in this all-copper offering. Included in these extensions is even a 30-30 option. Sure there has been a lot of cartridge development and caliber introductions over the years, but the 30-30 remains one of the most popular calibers and deserves the best bullets available. Our constant dedication to improving our line results in viable new products because regardless of caliber, there is no substitute for Premium performance.

A SHINING STAR FOR CONSERVATION

Like many great ideas and organizations, the Rocky Mountain Elk Foundation (RMEF) had some very humble beginnings. The thriving organization was started by four hunters after a weekend of hunting. They started working out of the back of a trailer, and by the end of the first year they had recruited almost 2,500 members. After 25 years, they are now responsible for conserving over 5.4 million acres for the continent's million animal elk herd. Because of their continued dedication and success, Federal Premium® is proud to support them with an on-box royalty program. Join one of the 550 chapters and 155,000 members as they strive to carry out the mission statement of this great steward of conservation: Ensure the future of elk, other wildlife and their habitat. www.rmef.org.

PREMIUM® CAPE•SHOK®

THERE IS NO SECOND CHANCE IN ONCE IN A LIFETIME

Anytime you have one of these large caliber rifles in your hands, the stakes are high. One shot is all you get. Not taking full advantage of that opportunity might mean missing out on a trophy, or worse. We load our Cape-Shok™ ammunition for situations just like this. The best components come together to form the finest factory loaded ammunition on the planet. We might build it here in the states, but there's no limit to where it can take you. The .370 Sako Magnum we introduced last year has proven itself in the world of large and dangerous game hunting. Some of the most experienced hunters in the world took it abroad and have sung the highest praises. The full line of soft points and solids up to 470 Nitro Express is also available. New for this year we've added the proven Barnes® Triple-Shock® X-Bullet™ to 458 Lott, and developed a Barnes Banded Solid for the 370 Sako Magnum.

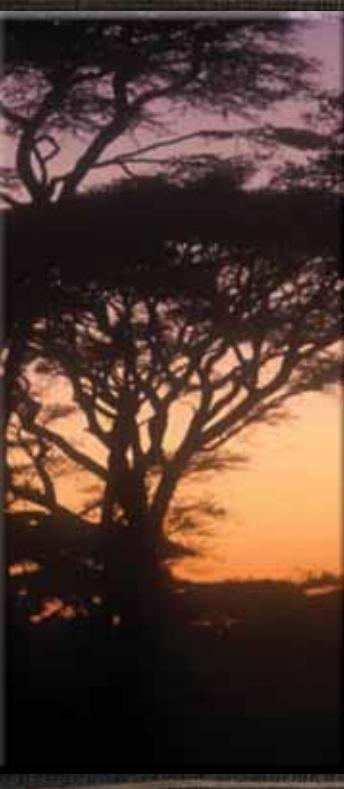

MORE THAN JUST SAFARI

A portion of the proceeds from the sale of this product is donated to SCI.

Safari Club International (SCI) protects the freedom to hunt and the SCI Foundation funds worldwide projects in wildlife conservation, outdoor education and humanitarian services. Despite the name, this membership group isn't just for hunters who travel the world hunting large and dangerous game. While they do a lot of work on other continents, SCI and SCIF are extremely effective advocates for hunting and conservation in North America. Please help support this great organization that helps all hunters by joining today at www.safariclub.org.

PREMIUM® GOLD MEDAL®

SETTING THE STANDARD HIGH

Our Gold Medal® centerfire offerings stand alone not only in our line, but among the competition. The majority of our Premium® loads are dedicated to hunters and their quest for game in the field. Gold Medal has a completely different objective, and the name says it all. We manufacture these loads for the highest level of competition. We know there's no substitute for the feeling you get as you look down range and level those sights. As you control your breathing and gently break the trigger, we want all your practice to result in perfection. That's why Gold Medal loads are held to such stringent standards. Nothing is overlooked. The legendary Sierra® MatchKing® Boat-Tail bullet and our proprietary delivery system raise the bar for factory ammunition. It's the most accurate load available, and just the advantage you're looking for.

AFFORDABLE EXCELLENCE

The M1A and M1 Garand are storied rifles that remain very popular and have a huge following. You know that it is important to feed these rifles the right ammunition. A lot of the hunting ammunition today isn't suitable for these special rifles. This year Federal® introduces two affordable, reliable American Eagle® options. These special loads feature staked primers to reduce the risk of firearm malfunction including slamfires. The M1 Garand load features a 150 grain FMJ bullet and a carefully selected propellant producing pressures that match the gas system design. The M1A load features a 168 grain Open Tip Match (OTM) bullet which gives you match-grade accuracy. **See page 24 for ballistic information.**

Extreme accuracy is the only way to describe the performance of Federal Premium Gold Medal 308 Match. The target shows 10 shots fired at 200 yards.

Usage Key: 1 = Varmints, predators, small game 2 = Medium game 3 = Large, heavy game 4 = Dangerous game 5 = Target shooting, training, practice 6 = Self defense

These trajectory tables were calculated by computer using the best available data for each load. Trajectories are representative of the nominal behavior of each load at standard conditions (59°F temperature; barometric pressure of 29.53 inches; altitude at sea level). Shooters are cautioned that actual trajectories may differ due to variations in altitude, atmospheric conditions, guns, sights and ammunition.

PREMIUM® PERSONAL DEFENSE®

UNFALTERING PERFORMANCE

Personal defense situations aren't planned. They come on without warning and are decided in a matter of seconds. You need ammunition that will perform every time. This year we introduce .410 shotshells designed especially for the Judge that make perfect sense for personal defense. In addition, momentum for the .327 Federal Magnum we introduced last year remains strong. Built on

the .32 platform, it gives shooters .357 Magnum like ballistics without the recoil. Also due to popular demand, NyClad® is back. This proven bullet provides reliable accuracy and increased stopping power.

Target and gelatin shot with PD412JGE 000 load, .410 gauge
2½" 000 Buck, 4 pellets in the Taurus Judge at 5 yards.

PREMIUM® .410 HANDGUN LOAD SPECIFICATIONS

| FEDERAL LOAD NO. | GAUGE | INCHES | SHELL LENGTH MM | MUZZLE VELOCITY | SHOT SIZES | TEST BARREL LENGTH INCHES |
|---|-------|--------|-----------------|-----------------|--------------------|---------------------------|
| FEDERAL PREMIUM® .410 HANDGUN LOAD | | | | | | |
| NEW▶ PD412JGE 000 | 410 | 2½ | 64 | 1200 | 4 pellets—000 Buck | 3 |
| NEW▶ PD412JGE 4 | 410 | 2½ | 64 | 1200 | 7/16 oz.—4 | 3 |

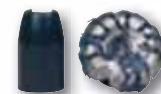

Muzzle velocities measured from the Judge handgun.

HANDGUN SHOTSHHELLS FOR PERSONAL DEFENSE

The distances at which most personal defense scenarios are played out are extremely close. Therefore, shotshell loads for handguns make real sense. Our new .410 2-1/2" loads were developed especially for the Judge from Taurus. They pattern well and give you excellent penetration. Available in both 000 buck and a #4 option.

Abbreviation Key: EFMJ = Expanding Full Metal Jacket, JHP = Jacketed Hollow Point

These trajectory tables were calculated by computer using the best available data for each load. Trajectories are representative of the nominal behavior of each load at standard conditions (59°F temperature; barometric pressure of 29.53 inches; altitude at sea level). Shooters are cautioned that actual trajectories may differ due to variations in altitude, atmospheric conditions, guns, sights and ammunition.

PREMIUM® VITAL-SHOK®

SHORT-BARRELED FIREARMS FOR BIG GAME

Taking down big game is never an easy task, especially when you elect to take your handgun out there to do the trick. Sure, you've got a great trail with outstanding signs of an active trophy; you may have even caught the monster on tape with your new trail camera. It doesn't matter. If you don't make the shot, you're going home empty-handed. And no shot is tougher than with a short-barreled firearm like a magnum revolver. Less length means more room for error. But you've been practicing. You're up for the challenge. Select the right load and make sure you're confident in where it will hit—shot after shot. Federal Premium® offers the all copper Barnes® Expander® for superior expansion, maximum energy transfer on target and ideal performance on deer. Another option is always the proven CastCore®. This hard-cast bullet retains all its weight and shape to give you the bone-crushing performance you need when taking down medium to large game.

WE ARE THE NRA.

One of the great freedoms we enjoy in America is the right to bear arms. Without it we would most certainly lose our close ties to the outdoors and the thrill we feel when entering our favorite blind or walking our honey-hole trail. The Second Amendment is constantly coming under attack and we need to take action to keep it alive and well. Federal Premium® has a long history of strong support for the NRA and its dedicated membership. The NRA's most recent push urges gun owners to "Insure Your Gun Rights", and we couldn't agree more. There's never been a better time to join. Federal supports those groups that keep our sport strong. Join the NRA today at www.nra.org.

PREMIUM® GOLD MEDAL®

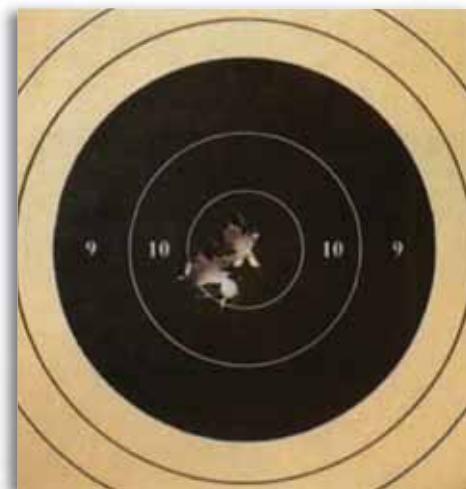

GOLD MEDAL® FOR THE TRUE COMPETITOR.

For the real competition shooter, there is no better choice than Federal Premium® Gold Medal® Match ammunition. We combine top-of-the-line Gold Medal primers and our heralded brass for unmatched performance. Practice is one thing, but when competition time comes around, there's no room for error. You want a load that will perform when you need it most. Impeccable shot placement, as well as superb ammunition performance, leads to the winner's circle. Our Lead Wadcutter, Full Metal Jacket and Full Metal Jacket Semi-Wadcutter Match bullets are unequaled in match-grade performance. Choose from our .38 Special and two .45 Auto pistol loads to seal your victory.

COMPETITIVE SHOOTING PROGRAMS.

Whether you're toeing the line next to your shooting partner at the range, or at one of today's most prestigious handgun events, a little competition is a good thing. And no matter what's at stake, Gold Medal® was created for competition. For those looking to become more involved, the NRA's Competitive Shooting Division offers a wide range of activities in all types of shooting, for everyone from the novice to the world-class competitor. The NRA sanctions over 10,000 shooting tournaments and sponsors over 50 national championships each year. To learn more, log on to www.nra.org.

Gold Medal Match Pistol's award-winning accuracy—
5 shots at 25 yards

FEDERAL® AND AMERICAN EAGLE® HANDGUN BALLISTICS

FEDERAL® POWER-SHOK®

For the cost-conscious handgun hunter, several hot calibers are available in our performance-driven Jacketed Hollow Point loads. Keep the cost down and retain solid performance with Power-Shok.

FEDERAL® PERSONAL DEFENSE®

These are a quality option for those who carry or keep a firearm close at home. Find them in popular boot-gun calibers like .32 H&R Magnum and two .357 Magnum offerings. There are also 9mm, .40 S&W and .45 Auto loads to meet the needs of autoloader users. Keep your confidence with our Jacketed Hollow Point (JHP).

FEDERAL® CHAMPION™

Time at the range goes fast. If you love to shoot, our Champion™ loads are the answer. We offer a good selection of great bullets for target practice. Spend a few hours at the range to sharpen your skills—or just have fun.

AMERICAN EAGLE®

Hitting the range this weekend? Federal's American Eagle handgun loads are the perfect choice for quality target rounds that feature great ballistics and reliable feeding. You'll find these loads more than suitable for honing your skills and an affordable option for the target board. We even have the .327 Federal Magnum available in American

Eagle®. Get to know this exciting caliber by getting more shots at the range for your money. Look for new packaging in 2009.

Usage Key: 1 = Varmints, predators, small game 2 = Medium game 3 = Large, heavy game 4 = Dangerous game 5 = Target shooting, training, practice 6 = Self defense
 These trajectory tables were calculated by computer using the best available data for each load. Trajectories are representative of the nominal behavior of each load at standard conditions (59°F temperature; barometric pressure of 29.53 inches; altitude at sea level). Shooters are cautioned that actual trajectories may differ due to variations in altitude, atmospheric conditions, guns, sights and ammunition.

PREMIUM® VITAL•SHOK® SLUGS

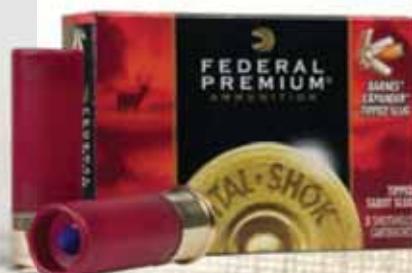

CONTINUING THE REVOLUTION

A few years back, Federal Premium® brought shotgunners the Shotshell Revolution®. This was headlined by several products that made noteworthy improvements. Two major introductions that distinguished the Shotshell Revolution included the FLITECONTROL® wad and the TruBall® slug. Both of these products featured unique delivery systems never before seen in the shotshell arena and instantly improved turkey and deer loads, respectively. Since then, we've seen numerous new offerings spawn from the advancements made. Innovations such as Black Cloud® and the Barnes® Tipped Expander are just a few examples of how the Shotshell Revolution has continued. Before the Shotshell Revolution, improvements across the industry were minimal, and few and far between.

GETTING THE MOST FROM YOUR SHOTGUN

Slug hunters used to give up quite a bit of accuracy and effective range to their rifle counterparts. Today barrel and slug technology has closed that gap. We take slug load development very seriously, and have introduced some tremendous new products over the last few years. The Barnes® Tipped Expander® has proven a legitimate 200-yard performer and gets 150% expansion. We still have the Barnes Expander Sabot Slug, as well as the TruBall® Rifled Slug. This slug remains unmatched in smoothbore accuracy.

PREMIUM® SLUG BALLISTICS

| USAGE | FEDERAL LOAD NO. | GAUGE | SHELL LENGTH INCHES | SHELL LENGTH MM | SLUG TYPE |

Usage Key: 1 = Varmints, predators, small game 2 = Medium game 3 = Large, heavy game
4 = Dangerous game 5 = Target shooting, training, practice 6 = Self defense; *Low Recoil Load

BARNES® EXPANDER® TIPPED SABOT SLUG

- High velocity (1900 fps)
- Controlled expansion
- Flatter trajectory than hollow-point counterpart
- Tip aids in consistent expansion at all ranges
- Capable of 2 inch groups or better at 100 yards and 4 inch groups or better at 200 yards
- Increased downrange energy
- Available in 12 and 20 gauge loads

NOTE: For optimum slug performance, we recommend matching the chamber length to the slug length. For example, use a 3 inch slug in a 3 inch chamber.

TRUBALL® DELIVERS A DEADLY IMPROVEMENT IN SMOOTHBORE ACCURACY

Federal Premium® TruBall® is capable of taking the 5-shot 4.5" spread of conventional smoothbore slugs and shrinking it to 1.4" at 50 yards.

4" test targets were shot with a Remington 870 cylinder bore. Results may vary.

PREMIUM® VITAL-SHOK® BUCKSHOT AND V-SHOK® COYOTE LOAD

SHOTGUNNING FOR COYOTES

Say the word coyote, and almost anyone can picture these wily predators. With a few exceptions, they are sought after everywhere in the United States. From the far northeast to the dry and hot southwest, coyotes walk the hills and fields. In some areas of the U.S., long shots are not only possible, but the only option. Other spots mean 30 yard shots are the most you'll get. If you hunt coyotes in the thick cover, or like to call them in close, this new load is for you. The 12 gauge 3" option is loaded with a 1-1/2 oz payload of HEAVYWEIGHT® BB that no coyote in their right mind wants a part of. This super-dense non-toxic shot moves along at 1350 feet per second, plenty fast to catch up to those cautious predators.

EVEN MORE VERSATILITY

New for this year, we introduce our Federal Premium® V-Shok® Coyote loads. The FLITECONTROL® wad combined with HEAVYWEIGHT® shot provides the platform for this devastating load. This marks the first time we have a shotgun load designed especially for predators. Both the new coyote load and the existing lead buckshot lines now feature the unique rear-braking wad. This versatile component has turned shotshell technology 180 degrees. As the target and gel block show, patterns and penetration are devastating.

BLACK CLOUD® FS STEEL™

MORE POWERFUL THAN EVER

When Black Cloud appeared on the horizon, the prospects were good. It showed great performance from the start. But what has transpired over the last two years is incredible. Never have duck and goose hunters seen such bone-crushing performance from a steel product. The Duck Commander and his boys have been there from the beginning, but we're guessing even Phil is impressed with the wild ride this storm has given them. Even more hunters will get caught up in the turbulence this year, as 10 and 20 gauge offerings are now available. The excuses that you've got a big 'ol goose gun, or don't prefer the recoil of the 12 gauge don't fly anymore. And if ducks and geese know what's good for them, they'll stay grounded too.

www.blackcloudammo.com

MORE STORMS ON THE HORIZON

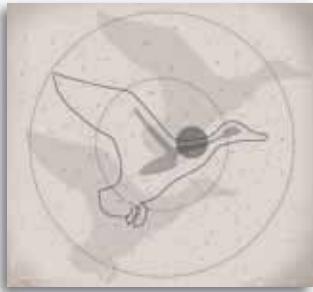

Unbelievable. There is just no other way to describe Black Cloud® and what it has done to waterfowl, and waterfowlers everywhere. The energy around this load is in uncharted waters. The industry has never seen anything like it. If you have yet to shoot it all it takes is one shot, and you'll know what all the hype is

about. The FLITECONTROL® wad combined with a payload of 40% FS Steel™ and 60% Premium Steel takes steel performance to a whole new level. This year, the storm re-energizes. Even the choke companies are getting in on the action. Several leading companies now offer Black Cloud specific chokes. New for 2009, get your hands on both the 10 and 20-gauge loads that are now available. Again this year, look for the special edition Duck commander #3 loads in black packaging.

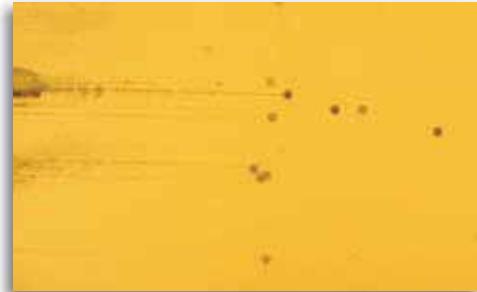

THE BLACK CLOUD® ADVANTAGE

CONSISTENT EDGE TO EDGE PATTERNS

Uniform Black Cloud system puts lethal pellets on birds even outside pattern center (30" target, 40-yards, 12-ga, 3", 1-1/4-oz, #2)

STANDARD STEEL SHOT

Amazing shot construction features a cutting edge that devastates waterfowl on impact. FS Steel creates a massive wound cavity visible in ballistic gelatin. Get cutting power with no loss of penetration.

PREMIUM® ULTRA-SHOK® WATERFOWL STEEL

PRESERVING THE LEGACY

The sound of ducks riding a stiff breeze on a cool crisp morning never gets old. It's the reason we dream about ducks all year. And a reminder to study our species and break out the call in the off-season. And of course it's the reason we listened so intently the first time grandpa described it to us. Now that we know, it's our job to carry it on. When you head out to the blind, make sure you've got the heaviest, fastest steel loads you can get. Our Premium® Heavy High Velocity and High Velocity Ultra-Shok™ loads scream out of the barrel and set the bar for standard steel loads.

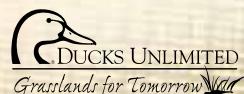

CHOKE GUIDE

| WATERFOWL SIZE | GAUGE | DISTANCE (YDS) | CHOKE | STEEL SHOT SIZES | HIGH DENSITY SHOT SIZES | HEAVYWEIGHT SHOT SIZES |

Federal recommends patterning your gun to determine the optimum choke. F = Full Choke M = Modified Choke IC = Improved Cylinder

KEEP THE DREAM ALIVE

There's no greater thrill than calling in a group of ducks or geese in that early morning light. Waterfowling is a favorite pastime, and we need to keep it that way. Ducks Unlimited has been working hard to ensure we do. One of their recent successes has been the *Grasslands for Tomorrow* initiative. Projects like this have helped DU conserve over 12 million acres of vital habitat in their 70-year existence. With Federal Premium, every box of Ultra-Shok™ ammunition you buy gives money directly to DU. Learn more ways to help the fight at www.ducks.org.

PREMIUM[®] ULTRA-SHOK[®] WATERFOWL HIGH DENSITY[®] AND HEAVYWEIGHT[®]

PURE PERFORMANCE. NO QUESTIONS

When you take to the blind, you want the best ammunition money can buy. Lucky for you, the only choice is what non-tox product you prefer. Our Ultra-Shok™ line carries both High Density[®] and HEAVYWEIGHT[®] options. High Density represents the perfect combination of density, hardness and velocity. The speeds are equivalent to steel, and the downrange energy is high to make these loads ideal for waterfowl. The consistent shot also sports a band around the edge that increases surface area for improved lethality. When you want the densest shot commercially loaded, go right for the HEAVYWEIGHT[®]. At 15 g/cc on the density scale, these pellets are twice as dense as steel. You get the energy of a steel #3 in HEAVYWEIGHT #6, but with 55 more pellets. Have we said enough?

DENSITY DEFINED.

We're all playing the density game—trying to outdo the other with a higher number. So what exactly are we measuring when defining shot density? The official measurement is grams per cubic centimeter or g/cc for short. Simply put, it measures how dense the metal is based on its size and sectional density. So, it is true that higher is better in the density game. So here's a guide for how to compare—that happens to bode well for Federal Premium.[®]

Shot type densities: Steel: 7 g/cc • Tungsten-Iron (High Density[®]): 10 g/cc • Tungsten-based HEAVYWEIGHT: 15 g/cc

PREMIUM® MAG-SHOK® TURKEY

ANSWERING THE CALL SINCE 1973

For over 35 years, the NWTF has worked alongside state agencies and corporate partners to increase the turkey population in North America.

This important organization has amassed more than a half-million members and spent \$279 million on conservation while taking the turkey population from 1.3 million to over 7 million. This increase in population and habitat has provided opportunities for countless sportsmen, and we need to continue our efforts. Every box of Federal Premium NWTF Mag-Shok turkey loads that you buy gives money directly to the NWTF. Learn more at www.nwtf.org.

TIGHT PATTERN ORIGINATOR

We've been in pursuit of ol' Tom for generations. Getting outplayed by a wary gobbler has happened more than once. But so has success. One of the FLITECONTROL® wad's first intended targets was turkeys. This wad opens from the rear—allowing it to be pulled off the shot string. This departs from conventional wad design and leads to the best patterns. Period. This year 10 and 20 gauge options in both lead and HEAVYWEIGHT® will feature the wad. HEAVYWEIGHT® #7 equals the energy of #5 lead at 40 yards. You've got so many effective options, this year it will be Tom's knees that are shaking at the moment of truth.

*Five Pack

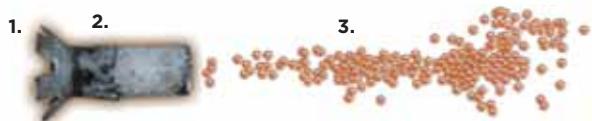

A portion of the proceeds from the sale of this product is donated to the NWTF.

INNOVATIVE TECHNOLOGY DELIVERS UP TO 30% TIGHTER PATTERN.

Conventional wads peel from the front, allowing pellets to scatter widely. This means fewer pellets on target, less impact power, and fewer downed birds.

(photo taken 19 feet from muzzle)

THE BREAKDOWN

- 1. Petals:** Open in the rear to create an air brake. This separates the wad and shot at the perfect time and leads to consistent, dense patterns.
- 2. Windows:** Open on side of wad to allow air in and help stimulate the payload for separation from the wad.
- 3. Payload:** FLITECONTROL wad is combined with several unique shot types to get better performance on target.

NOTE: Best performance achieved with chokes that do not strip wad or reduce muzzle pressure.

PHT193F 7 with modified choke at 40 yards.
Target shot with Rem. 870.

DOWN RANGE PELLET ENERGY IN FOOT-POUNDS — HEAVYWEIGHT®

PREMIUM® WING-SHOK® UPLAND LEAD AND STEEL

25 YEARS AND COUNTING

After helping Pheasants Forever celebrate their 25th anniversary last year, our partnership continues to grow. Just last year we produced our 15 millionth PF shell. Each box of these special loads that is sold gives money directly to PF. Their unique and successful model has lead to one of the greatest success stories in conservation. Another chapter in this story has been the creation of Quail Forever. This organization has made tremendous progress in a few short years. Make sure you're a part of the story, or a big reason it continues. www.pheasantforever.org. www.quailforever.org

SPEED IS RELATIVE, PERFORMANCE ISN'T

Whether it's the first bird of the season, or the last on a great fall weekend, every time a bird bursts from cover, our heart accelerates. We can't get the gun up fast enough, and at times forget to breathe. That feeling is what keeps us coming back. At Federal Premium, we understand that rush, and load ammunition for the exact moment when you need to draw a bead on one of those speedsters. Our loads are fast, and designed for upland birds. Lead or steel, we've got a Premium® option for you. New this year, we extend our 16 gauge line and add a 12 gauge paper flyer load with pigeon shooters in mind. Next time your dog goes on point, or a bird flushes wildly, remember to breathe and squeeze easy: you've got the best we offer.

PREMIUM® GOLD MEDAL® TARGET

FOR THE SERIOUS TARGET SHOOTER

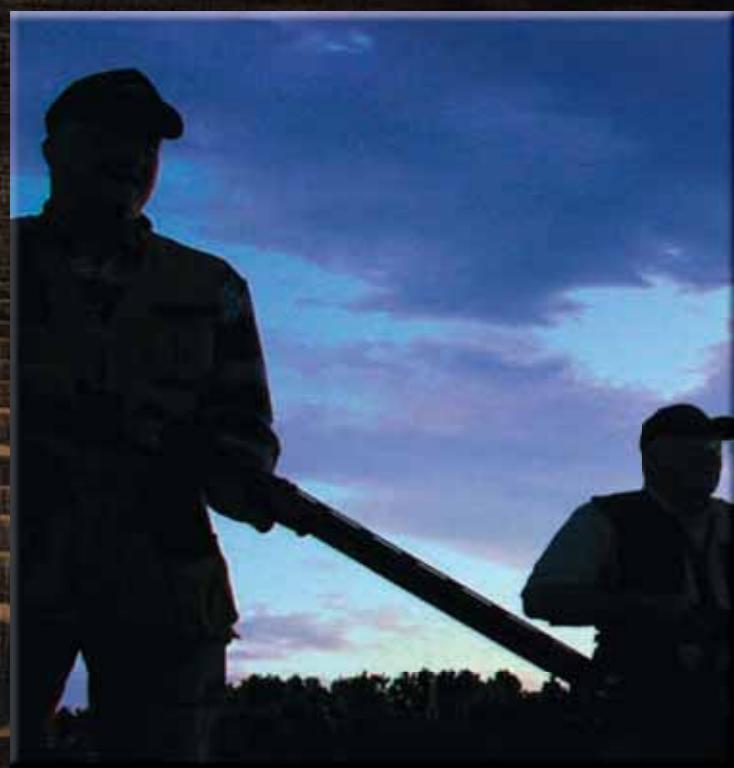

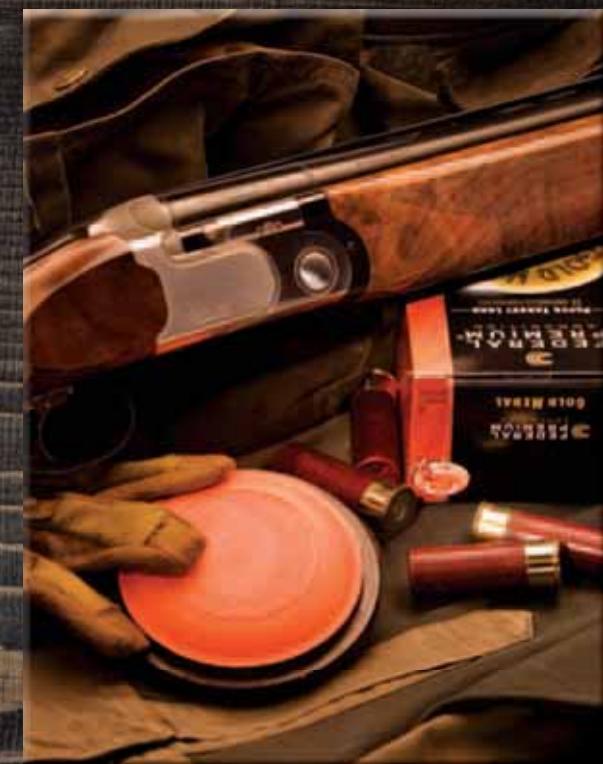

When the trophy is on the line, and you can see the winners circle, you don't want to be shooting second-rate ammunition. At this point, it isn't a matter of who makes the least amount of mistakes, it's who makes the only mistake. The consistent and uniform patterns of Gold Medal® make the difference for great shooters. Extra-hard shot and the hot 209A primer take performance one step further, and make it a must have on the target shooting circuit. Available in handicap, extra-lite and our famous paper hull cartridge, you're sure to find your winning load. And if Sporting Clays is your game, you're joining a passionate bunch who take pride in their shooting. It's the ultimate preparation tool for hunting and a great sport as well. New this year, we introduce a paper load that is FITASC-qualified.

TOM KNAPP SHOOTS FEDERAL PREMIUM.

Tom Knapp has been captivating public audiences with extraordinary skill and a shooting style that emulates the legendary Herb Parsons since 1987. Knapp is sponsored by Federal Premium®, Champion™ Traps and Targets and Benelli® and his live shows are second to none. His exhibitions are not only an impressive demonstration of shooting skill, but an engaging presentation that thrills audiences all over the world. Knapp has set numerous world records, and continues to dazzle spectators with his showmanship and shotgunning prowess. If you haven't seen him yet, track him down on the road sometime soon. To see his upcoming schedule, or to find out more, go to www.tomknapp.net.

FEDERAL® SLUG, BUCKSHOT AND SHOTSHELL

POWER-SHOK® SLUGS

Power-Shok™ is an outstanding slug choice. Available in a standard 1-ounce sabot and a variety of rifled slug weights, you'll be thrilled with the power these slugs bring to the target. The Power-Shok slug line provides you with the widest variety of gauges and a very palatable price.

POWER-SHOK® BUCKSHOT

Many hunters use buckshot to bring home the venison—and with the dramatic power of our available loads, it's no wonder. Each load features a Triple Plus® wad system that gives you better shot alignment and a granulated plastic buffer to keep shot pellets uniform in shape. You get tight downrange patterns and better Knockdown Power® with Power-Shok™ Buckshot.

GAME-SHOK® UPLAND

Choose Game-Shok™ to keep you effective in the field and heavy in the pocket book. Magnum and Hi-Brass loads provide superior performance on your favorite small game.

FIELD AND RANGE STEEL GAME AND TARGET LOADS

Shooters need an affordable steel option that will work on both clays and birds. These loads will give

you the performance you need at a price you like.

Usage Key: 1 = Varmints, predators, small game 2 = Medium game 3 = Large, heavy game 4 = Dangerous game 5 = Target shooting, training, practice 6 = Self defense
These trajectory tables were calculated by computer using the best available data for each load. Trajectories are representative of the nominal behavior of each load at standard conditions (59°F temperature; barometric pressure of 29.53 inches; altitude at sea level). Shooters are cautioned that actual trajectories may differ due to variations in altitude, atmospheric conditions, guns, sights and ammunition.

TOP GUN® TARGET

For the volume shooter who needs consistent performance at a reasonable price, there's our Top Gun® target load. Long a staple of the target shooting community, you're sure to break clay after clay with its superior performance and reliability.

STRUT-SHOK® TURKEY

Turkey hunting is a pursuit of passion. Make sure you have the right load for the job. Strut-Shok™ is designed for the hunter who needs a hard-hitting load that's lighter on the pocketbook.

SPEED-SHOK® WATERFOWL

This load is built for performance with uniformly round pellets for tighter patterns. It also features high quality components and dense plastic wads with gas-sealing for maximum performance and efficiency. High output primers ensure dependability even in cold and wet conditions.

PREMIUM® V-SHOK® AND GOLD MEDAL®

ULTRAMATCH® REBORN

In 1992 we helped the US bring home Olympic medals with our UltraMatch® product. Launi Meili and Bob Foth won gold and silver respectively, winning the first set of medals for an American-made round since the Rome games in 1960. With this in mind, we bring back this highly regarded name with a tremendous new product. We partnered with the rimfire experts at RWS to get unprecedented accuracy. These new 40-grain solid options are loaded to optimal velocities, with consistency that is unmatched.

GOLD MEDAL® GETS NEW MEANING

If you're after the best performance on the range, Gold Medal® is what you need. This year, we introduce two new super-accurate target loads. These loads were developed in conjunction with renowned rimfire manufacturer RWS. They combine the latest bullet and lube technologies, and stringent quality control for unbelievable performance. If you're looking for the most accurate target ammunition offered, you can again look to Federal.

5 shots at 100 yards, 0.164" group center to center (extreme spread)

V-SHOK® HAS MANY MEANINGS

Like their Gold Medal® counterparts, our V-Shok™ loads are extremely accurate. This accuracy is combined with impressive terminal performance for excellent results in offerings from 17 HMR through 22 Win Magnum.

These options are loaded with Premium® bullets like the V-Max and Speer TNT JHP to give varmint and small game hunters the best ammunition available. For small targets at long distances, there's nothing better.

FEDERAL® AND AMERICAN EAGLE®

SHOOT MORE. SPEND LESS.

Federal® knows there are times when you just want to head to the range to do some plinking. Times like this don't necessarily require match-grade ammunition, but loads that are reliable, and affordable. Look for Federal Game-Shok™, Champion™ and American Eagle® offerings to meet your needs. These are great high-volume options that will let you have extra money for upcoming competitions and hunts. These loads feature similar ballistics to our Premium® offerings and are useful for several applications. Whether your targets are paper, aluminum or the occasional varmint, Federal has an affordable option for you.

PRIMERS AND WADS

FEDERAL® PRIMERS.

When affordability and reliability outweigh the need for pin-point accuracy, Federal's Champion® line of primers and wads are the best option.

These products let you shoot all day, and still have money left over to shoot again the next. They're great

for high volume shooters, as well as those learning how to reload.

SPORT YOUR SHOCKWAVE

For decades Federal Cartridge has been known to offer hunters and shooters the best ammunition available. Now known as Federal Premium®, the quality of product has only gotten better. Throughout the process, the Shockwave has emerged as a quick way to identify our superior products. We know you bring that Shockwave into the field with you, so you might as well show it off other places as well. Look for your Premium® gear below. We offer everything from hats to branding irons.

A. DUCK COMMANDER BLACK CLOUD® T-SHIRT: The Duckmen swear by Black Cloud, so let the world know you do too. Size: M-XXXL **\$12.00**

B. BLACK CLOUD® LONG SLEEVE T-SHIRT: This long sleeve T sports the Black Cloud® logo, Realtree® camouflage down one sleeve and the rally call for waterfowlers nationwide: Drop Ducks Like Rain™. Size: M-XXL **\$21.95**

C. FEDERAL PREMIUM® POLO: Look sharp and professional with this 100% combed cotton polo. It is perfect for business casual events at the office, country club or range. Size: M-XXXL **\$24.95**
