12G Upland Fasteel®

Kent Cartridge pioneered the industry when it introduced Fasteel Waterfowl loads over 10 years ago. Now in 2009 they continue to enhance their Fasteel line with the introduction of Upland Fasteel®. As more areas around the world turn to non toxic shot for game shooting, Kent has the product that produces top notch performance. Upland Fasteel® is now available for small birds and pheasant shooting in both 12 and 20 gauges.

TUNGSTEN MATRIX® WATERFOWL

THE BEST PERFORMANCE AVAILABLE

What is Tungsten Matrix?

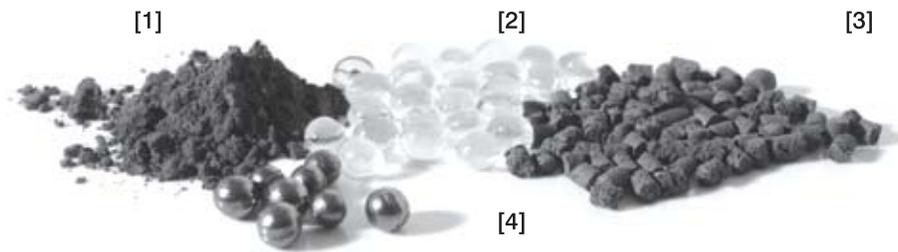

Tungsten Matrix is the only Tungsten-based pellet that is specifically designed to match the physical and ballistic properties of premium quality lead shot. Unlike other non toxic alternatives, Tungsten Matrix is uniform in size, density and responds to all choke constrictions. These loads provide effective patterns and energy transfer for every shot that waterfowl hunting can demand.

Velocity® Diamond shot loads provide a competitive advantage for every clay shooting challenge. An excellent choice for Sporting, FITASC and International Trap & Skeet.

TUNGSTEN MATRIX® Pheasant & Game

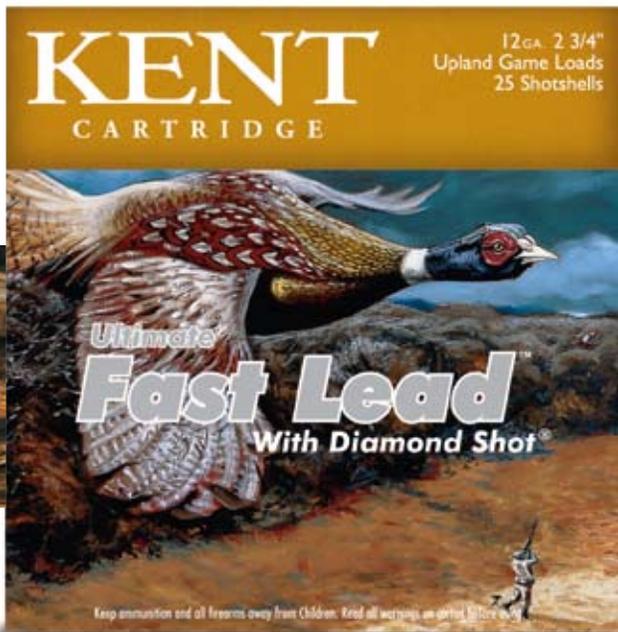

Proven Tungsten Matrix® performance for the Upland Gunner where non toxic is required or a matter of choice. And we haven't forgotten those cherished 16 gauge guns either, with loads suitable for field and marsh. NOTE: Tungsten Matrix shot eliminates the concern for barrel or choke damage.

Also available in 100 round case. Substitute the "K" for a "C" when ordering.

Kent's Ultimate Turkey Loads with Diamond Shot provide lethal patterns. When one shot is all you've got Ultimate Diamond Shot will deliver.

BIO-WAD® Components

GAMEBORE Silver Steel®

Gamebore is pleased to introduce their new Silver Steel® range with an environmentally friendly BIO-WAD®. The BIO-WAD® system is the first fully degradable Steel shot wad. The BIO-WAD® not only protects the barrel of the gun but is also kind to the environment as it immediately starts to break down after firing. The Silver Steel® range features high velocity double base propellant powders, and corrosion resistant Steel Shot.

BIO-WAD® Components after firing

28G Pure Gold

New for 2009. Available in 2 1/2" and 2 3/4" case lengths and shot sizes 6 and 7. The 2 1/2" version is now available with a fibre wad.

20G Pure Gold

The 20 Gauge Pure Gold cartridge is available with a 2 3/4" case. Ballistically produced for those fast and long range birds. Available in plastic or fibre wad with Diamond Shot.

12G Pure Gold

The 12G Pure Gold F2 is available in a true 2 1/2" case specially designed for old English guns. The performance of Pure Gold is second to none. This is a premium game shell that won't disappoint. Pure Gold is available with fibre wads and Diamond Shot.

12G Pure Gold® Paper Case

The Pure Gold® paper offers the same characteristics as the standard pure gold, but for the traditional shot we provide a 2 1/2" varnished paper case. A traditional load manufactured to meet modern day performance requirements. Fibre wad only.
