

Savage Arms

The Definition of Accuracy

THE SCIENCE, ART AND CULTURE OF ACCURACY

THE CULTURE OF ACCURACY

Behind every truly great and lasting thing are certain elements...art, science and culture. Look at any of the ancients who have left their mark. Greeks, Romans, Egyptians. Without trying to come off as too self important, we truly believe those things exist at Savage. Behind the most accurate rifles made you'll find art, science and a culture of accuracy.

When I was a young man in Ireland, some friends of mine encouraged me to join them in the field and try hunting. My experience was probably no different than anyone else's — friends and family members enjoying one another's company with shotguns in the outdoors. Also, like many hunters, my first firearm was a Savage. How could I know that decades later, I would find myself at the head of this iconic brand?

In taking ownership of Savage, I made it my mission to create products that I was proud to be associated with. But creating something as complex as a firearm isn't a one-man job. Literally hundreds of individuals take part in the process. Therefore, the key to creating products that I was proud of was to surround myself with *people* that had the same mission and objectives.

Just as I identify with every Savage product, the individuals who contribute to the manufacture of those products proudly place their identity behind them as well. Each critical component of a Savage firearm carries a unique stamp that identifies the individual who deemed it worthy of the Savage name. These code-like stamps are often placed in obscure areas of your gun, but they tell the story of a sequence of events. More importantly, these marks proclaim a belief — that YOUR Savage is as accurate as any firearm made at any price.

Ronald Coburn
Chairman and CEO

Savage accuracy has become legendary in the circles where accuracy is everything — 1000-yard shooting competitions and hardcore varmint hunting. What few people realize is that every bit of material and attention that goes into one of these long-range precision rifles is identical to what we put into even our most basic sporter rifles.

Bottom line, when the crosshairs settle on that bull elk across the canyon or on the whitetail just up the clearcut from your stand, you can be confident that you're about to unleash a piece of the same Savage accuracy that dominates world-class long-range competition.

How did Savage earn such accolades as Outdoor Life's, "Best Buy" for the money and "Editor's Choice" with the same rifle in 2008? How are we consistently rated "the most accurate out-of-the-box rifle" over decades? The answer is that Savage is far more than a firearms manufacturer. We are a culture where passion fuels a constant drive for precision and innovation. The following pages not only present our products, they tell the story of the culture that builds them.

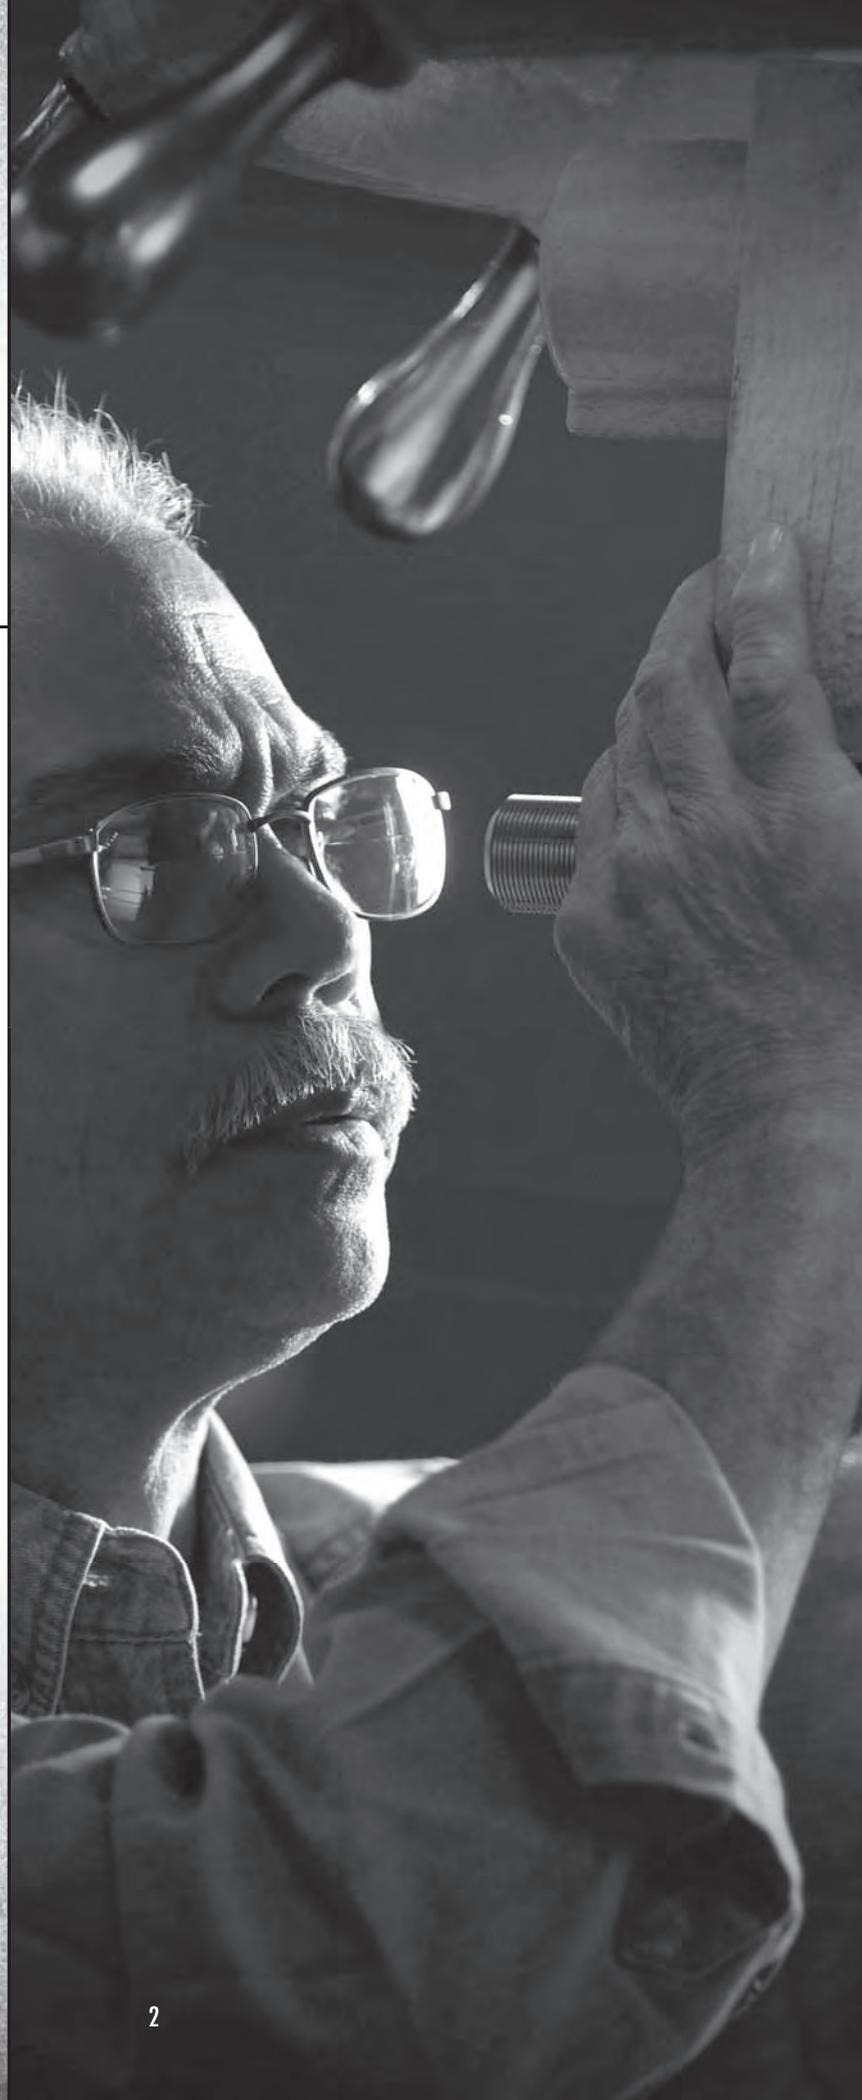

THE SCIENCE AND ART OF ACCURACY

There is a science to building an accurate barrel. The bulk of that science leans on machinery and experienced operators. The straightness of the bore, the uniformity of the rifling geometry, the concentricity of the chamber and the exactness of the crown all rely on consistent, dependable and specialized machinery. Equally important are experienced, trusted and specialized operators. Savage proudly employs both.

There is also an art to building an accurate barrel. All of the computer numerically controlled machinery and laser and micrometer precision-measurement tools simply cannot replace a few steps that require gifted eyes and hands. For example, all metal has certain internal stresses. This is true of the solid billets we machine barrels from. As these precise machines cut and form the barrel, those stresses are relieved. Under these conditions, it is possible for the metal to actually deform slightly.

For this reason, each and every Savage centerfire barrel — from the one going on a Team Savage competitor's F Class rifle to the one going on your kid's first deer rifle — is checked and if needed, hand straightened by the same person and with the same commitment to perfection.

That's consistency. And what is accuracy if not consistency?

ZERO TOLERANCE

Because the Savage floating bolt head is designed to allow a few thousandths of an inch of movement, it can adjust itself for a perfect fit only typically found with hand-lapped locking lugs.

Every barrel is fully threaded into its action then locked in place with a locknut. The resulting dead-nuts tolerance delivers dead-nuts accuracy.

The accuracy of a rifle can be looked at like a complex equation. The sum of the parts determines the overall accuracy. No single element of the equation is independent of another. The most accurate barrel in the world is nothing more than a metal pipe if it's not properly married to the action and a perfectly joined barrel and action depend on proper bedding (see the next page for details) to deliver pinpoint accuracy.

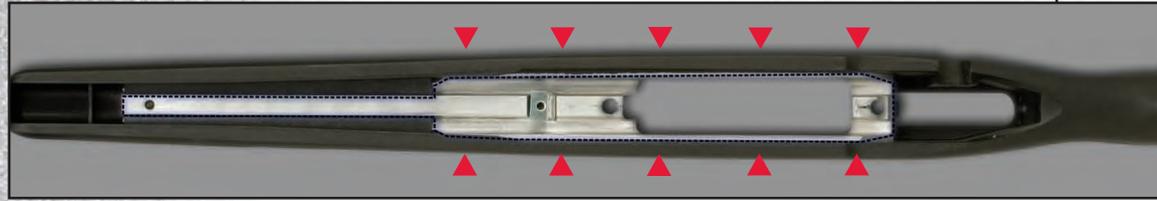

Typically, headspace (the distance from the face of the closed bolt of a firearm to the surface in the barrel chamber on which the cartridge case seats) is discussed in terms of what is acceptable in order to maintain safety in the face of insufficient or excessive headspace and the resulting pressures. Industry standards (SAAMI) for firearms and ammunition are set within acceptable tolerance ranges for safety and, clearly, Savage is committed to safety. However, our commitment to accuracy has caused us to look at headspace in another light.

Rather than working to fall within an acceptable range, Savage engineered a lock-nut system that allows each and every single action to attach to its specific barrel with absolute zero tolerance for unparalleled accuracy. While each barrel-to-action union is 100% precise, Savage went one step further to assure 100-percent locking lug engagement. A floating bolt head enables complete engagement of the bolt face with the cartridge.

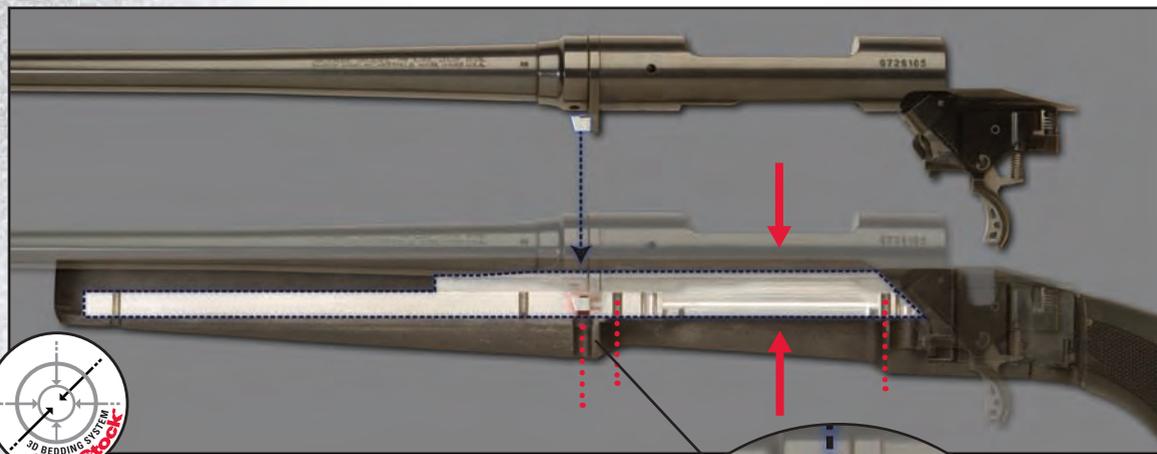

THE ACCUSTOCK™

Patent Pending

An aluminum spine is molded into the stock for enhanced rigidity. More importantly, this spine incorporates a revolutionary three-dimensional bedding system not found on even aftermarket or custom stocks.

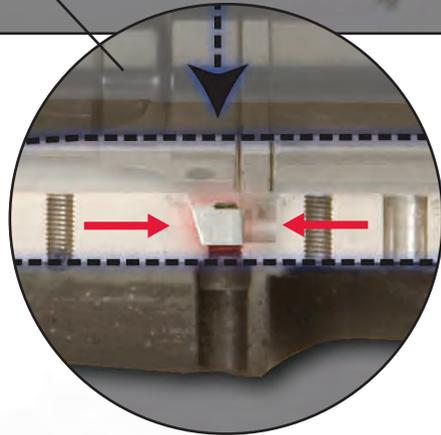

As the action screws are tightened, the action is wedged between the sides of the bedding cradle. These prestressed rails continue to apply horizontal and vertical pressure to the action.

Action screws secure the action to the enormous aluminum bedding surface securing the action on the vertical plane.

A wedge-shaped bolt in the aluminum bedding cradle grips the rifle's recoil lug like a vice, locking down the action fore and aft in a manner far superior to glass bedding.

The energy released when a cartridge is fired creates a series of harmonic waves that travel the length of the barrel. While it may sound counterintuitive, the movement that accompanies these waves factors into the accuracy equation and must necessarily be embraced. For these reasons, any rifle with respectable accuracy will have a "free floating" barrel and a firmly bedded action. "Free floating" is an absolute. Either the barrel is untouched by the stock or it's not. However, a bedded action can come in many shapes and forms.

Traditionally, an action is secured to the stock by one or two screws that pull the action directly downward into the stock. This bedding method provides excellent rigidity on a single, linear plane — up and down. The action cannot jump up and away from the stock.

The new AccuStock from Savage consists of a rigid rail system that is firmly embedded in the stock throughout the length of the fore-end of the rifle. Rather than unidirectionally engaging the action at one or two points, the AccuStock engages the action three dimensionally along its entire length.

Capable of being adjusted by the owner. Trigger pull weight varies by model from 6 oz. to 6 lbs. Crisp release with no creep.

THE ACCUTRIGGER™

US Pat. No. 6,553,706

All of the accuracy advantages built into a Savage barrel, action and stock are delivered into the shot by the shooter himself. The engagement point? The Savage AccuTrigger™. Most triggers found in firearms produced today have a very heavy pull. The reason is quite simple: liability. Because manufacturers cannot afford to build firearms with triggers that could accidentally discharge, they've resorted to heavy trigger pulls. Even though factory triggers can usually be adjusted to some extent, such adjustments can create unsafe conditions and usually void the warranty. Savage challenged its engineering team to design a completely new trigger system that gives shooters what they want — an easily adjustable trigger with a crisp release and no creep. This project took several years, but our revolutionary AccuTrigger meets all of these objectives.

The Savage AccuTrigger gives the flexibility to set trigger pull to individual preferences without having to pay a gunsmith to adjust it. Even when adjusted to its lowest setting, the AccuTrigger is completely safe. When maintained and adjusted as intended, the AccuTrigger cannot accidentally discharge during normal use, even if it is jarred or dropped. Furthermore, the crisp, clean, light trigger pull allows the shooter to maximize the rifle's accuracy potential. A teardrop three-position safety is an additional feature on centerfire rifles with the AccuTrigger. This provides better acquisition of the safety button and operates more smoothly and quietly.

The AccuTrigger is designed with an integrated AccuRelease™ that must be completely depressed or the rifle cannot fire. While the trigger is being pulled, the AccuRelease is intentionally depressed, which unblocks the sear and allows the rifle to discharge. Adjusting the AccuTrigger is easy. Simply remove the stock and rotate the return spring using the tool supplied with the rifle. The AccuTrigger has a single adjustment location and is designed so it cannot be adjusted below the minimum setting.

The AccuTrigger™ has a single adjustment location

12 PRECISION TARGET SERIES

Anyone who shoots a rifle expects accuracy. But there is a special breed of accuracy enthusiast that forever chases the one-hole group. Once they attain it, they begin to chase that group at longer and longer ranges. They demand ultra-heavy barrels, dual port actions, sculpted fore-ends and buttstocks to ride sandbags and bench rests. The 12 Precision Target series is where these guys are finally able to end their chase.

Perhaps the most elite collection of these accuracy purists is Team Savage. They've cleaned the floor with guys shooting custom rigs and had their "production rifle" status called into question because, in the minds of some, a production Savage is just TOO accurate to be an off-the-shelf rifle.

We congratulate Team Savage, and realize that there is no podium large enough to accommodate ALL of the members of the team that consistently earn the top spot: the dedicated employees of Savage Arms.

12 BENCHREST
Target AccuTrigger™

12 PALMA®
Target AccuTrigger™

Savage Target Series rifles are the farthest place in our line from "beginner" rifles. With dozens of decisive world-class titles, these are elite rifles for elite shooters. The rifles on this page are for the accuracy obsessed who want to test their skills on the ultimate playingfield: the 1,000-yard range. The new 12 Benchrest is for 1000-yard benchrest competition. It has a 29" ultra-heavy barrel, dual-port action and Target AccuTrigger. Its laminated stock features a wide forend and a buttstock that is sculpted to ride a bag. Chambered in .308 Win, 6.5 x 284 Norma, and 6mm Norma BR.

The Palma® is for the hardcore few who prefer to shoot their 1000-yard competitions with iron sights (also tapped for regular folks who prefer to mount a scope). It features a multi-adjustable, laminated stock, Target AccuTrigger and 30-inch ultra-heavy barrel. Chambered in .308 Palma only. (Palma 95 chamber)

Our 12 F/TR has a slightly rounded forend with bipod rail, adjustable cheekpiece, and is chambered in .308 Win. The F Class has a three-inch wide ventilated forend with flat bottom, flat butt stock, and is chambered in 6.5 x 284 Norma, as well as 6mm Norma BR — The first factory to offer these calibers.

NEW left-load, right-eject action. The fastest way to get all your shots downrange before the wind conditions change, our new dual-port action is featured in the 12 Benchrest and the 12 LRPV.

Target AccuTrigger™, Scope not included

MODEL 12 F/TR TARGET RIFLE
Target AccuTrigger™, Scope and bipod not included

OUTDOOR LIFE'S "2007 GREAT BUY" AWARD

12 VARMINT SERIES

Savage rifles are assembled by highly-skilled craftsmen who pass through a rigorous training process. Training typically lasts six to eight months before the builder becomes completely proficient.

Prairie Dogs beware. The Varmint series raises the bar on varmint-grade accuracy. Our revolutionary AccuTrigger™ lets you calibrate trigger pull weight all the way down to 6 oz. with certain models. A superlative factory produced rifle, the Varmint Series features button rifled, free-floating barrels and dual pillar bedded stocks. Select different rates of twist to help stabilize heavier bullets during long range shooting — a Savage exclusive.

The top-of-the-line **Model 12 Long Range Precision Varminter** provides legendary Savage accuracy and sets the standard in long-range shooting. An extra-heavy, fluted, one-inch diameter barrel with a smaller ejection port provides more rigidity to the receiver and greater precision. All this, plus an aluminum bedding block chassis system in H-S Precision's Varmint stock. It's easy to see why the Model 12 was named a Field & Stream "Best of the Best" and earned NRA's Shooting Illustrated "Golden Bullseye Award".

The **12 LRPV** is available in a standard repeater configuration and in two different single-shot configurations: right-bolt, left-port and left-load, right-eject. These single shots also come with the Target AccuTrigger, which is adjustable all the way down to an astounding 6 oz.

- MODEL 12LRPV**
AccuTrigger™, Left-Load, Right Eject, Short Action, Single Shot
- MODEL 12LRPV**
AccuTrigger™, Right Bolt, Left Port, Short Action, Single Shot
- MODEL 12LRPV**
AccuTrigger™, Right Bolt, Right Port, Detachable Box Magazine

Right Bolt – Left Port
Smaller ejection port gives more rigidity to the receiver for enhanced accuracy, and the right bolt, left port makes it easier to reload with your free hand.

Dual Port
When the pressure is on to get your shots into the 10-ring before the wind changes, our dual port action is the ticket. As one round is ejecting, another can be in the process of being loaded.

While some manufacturers cast their receivers, Savage machines them from a solid billet. The result is a higher level of precision that is evident in a greater degree of accuracy.

12 VARMINT SERIES

MODEL 12BTCSS
AccuTrigger™, Short Action, Detachable Box Magazine

MODEL 12BVSS
AccuTrigger™, Short Action

All Savage rifles with the AccuTrigger™ feature a teardrop 3-position safety that provides better acquisition of the safety button and operates smoother and quieter. The Varminter bolt handle is oversized for quick acquisition when multiple shots are required.

AccuTrigger™, Left-Hand*, Short Action, Detachable Box Magazine

LIGHTWEIGHT VARMINT SERIES

We use the tightest precision gauges and laser measurements, but those things can't tell you if a rifle or any of its parts "feels" right. Only human hands with experience and a passion for accuracy can do that.

Weighing in at just 8.35 lbs. and measuring 43.75 inches, the **Model 25 Lightweight Varminter** gives you a versatile combination of agility and accuracy. This rifle features a 24" medium-contour, satin blue barrel that's sleeved for added rigidity. It comes equipped with Weaver-style scope bases, and dual pillar bedding. The Model 25 has a 3 lug bolt that features a 60 degree throw that allows you to mount a large diameter scope low on the receiver. The revolutionary AccuTrigger™, adjustable from 2.5 - 3.25 lbs, is standard on the Savage Model 25. So is a 4-round, detachable box magazine, brown laminated stock, with beavertail varmint-style forend and third swivel stud for a bipod.

The **Model 25 Lightweight Varminter Thumbhole** is the same great rifle with a brown laminated thumbhole stock. The **Model 25 Classic** has a 22-inch satin blue sporter barrel, satin lacquer American walnut stock with contrasting black forend tip and wraparound checkering.

The **Model 40 Varmint Hunter** makes it easy to try your hand at the sport without paying a hefty price. The 24-inch, free-floating, medium-contour barrel with a recessed target crown is button-rifled to enhance accuracy. The barrel finish is polished to a deep, high-luster blue. The easily adjustable AccuTrigger™ is standard, and the varmint-style laminated stock with full beavertail provides extra stability when firing from a bench or sand bags. All this, plus a third swivel stud for use with a bipod. Chambered in 22 Hornet, this rifle offers pinpoint accuracy at a very attractive price.

WEATHER WARRIOR SERIES

With a stainless steel action and barrel and synthetic stock, the Weather Warrior is ready to go, even in the most unpredictable conditions. It utilizes our AccuStock™ with its three-dimensional bedding system, button rifling and a free-floating sporter barrel. All Weather Warrior rifles on this page feature the revolutionary AccuTrigger™ and deliver unsurpassed accuracy in sporting rifles.

Weather Warrior options include Savage's patented, adjustable muzzlebrake, which reduces felt recoil by 30 percent. Our feeding system comes in both hinged floorplate and detachable box magazine, both offering a straight-line feed for more reliability. Internal or blind magazine configurations are also available. The left-handed Weather Warrior comes with synthetic stock, hinged floorplate, or internal magazine, and stainless barreled action. So no matter what Mother Nature brings, the Savage Weather Warrior has you covered.

MODEL 16FSS – AccuTrigger™, Internal Magazine, Short Action
MODEL 116FSS – AccuTrigger™, Internal Magazine, Long Action

Detachable Box Magazine
 Savage's new detachable box magazine is a smoother design with a straight-line feed for more reliability.

Hinged Floorplate
 Savage's new hinged floorplate is ergonomically correct — rounds empty out easily into one hand.

Adjustable Muzzlebrake
 Just twist the patented Adjustable Muzzlebrake open and reduce felt recoil by 30%. Shooting prone at the range or hunting in the deep woods with a guide at your side? Turn it closed to reduce muzzle blast.

Hinged floorplate and detachable box models of the Weather Warrior feature our new revolutionary AccuStock, with a three-dimensional bedding system that literally squeezes the action in all dimensions (see page 4). This system not only outperforms current factory riflestocks, but glass bedding and expensive aftermarket stocks as well. (Transparent demonstration stock shown is not available for sale.)

AccuStock models also feature a new trigger-guard-mounted bolt release and smooth barrel lock-nut.

CLASSIC SERIES

MODEL 114 CLASSIC
Long Action, Hinged Floorplate

MODEL 14 CLASSIC
Short Action, Hinged Floorplate

The Classic Series represents a rare combination of craftsmanship and quality at an attractive price. All rifles in this series feature a stock crafted from American walnut, with wraparound checkering, upgraded metal finishes, and the revolutionary AccuTrigger™.

Our Classic Series includes three models, each one subtly different from the others. The **Classic** features a traditional oil finish straight stock with shadowline cheekpiece, matte metal finish and a hinged floorplate. The **Euro Classic** features a detachable box magazine, Monte Carlo stock with cheekpiece, and a traditional oil finish. The **American Classic** has a satin lacquer finish and the elegant lines of a traditional straight stock with a detachable box magazine. The Euro and American Classic boast a high-luster blued metal finish. All three models provide the new straight line feeding system for consistent reliability.

We have added new aesthetic features to the Classic Series comparable to those found on rifles costing several times more. We introduced a jeweled bolt for a touch of elegance. The bolt release is now tucked away in front of the trigger guard for added convenience and a more streamlined appearance. New for 2009, the **American Classic** is now available in **250 Savage** and **300 Savage**.

The Savage Classic line offers a level of performance rarely found in a factory bolt action rifle. For those who appreciate fine craftsmanship and superb quality, this is the hands-down choice.

*A wax mold is made of the chamber,
which is then measured to ensure its
critical dimensions remain within
the tightest tolerances.*

CLASSIC SERIES

Every component of every Savage rifle is precision tested to ensure they are manufactured within exacting tolerances. No one thing makes a rifle accurate. Attention to every detail does.

Free-Floating Barrel
The barrel is floating for enhanced accuracy.

Hinged Floorplate
Savage's new hinged floorplate is ergonomically correct — rounds empty out easily into one hand.

Bolt Release
The bolt release is tucked away in front of the trigger guard for a sleeker receiver profile.

Detachable Box Magazine
Savage's new detachable box magazine is a smoother design with a straight-line feed for more reliability.

MODEL 114 EURO CLASSIC
AccuTrigger™, Long Action, Open Sights, Detachable Box Magazine

Every Savage rifle passes through the hands of many skilled craftsmen. Those who perform the critical steps stamp each gun with their personal mark and they are accountable for the quality of their work.

HUNTER SERIES

Widely acclaimed as the best, most accurate rifle in the industry, the Savage 110 action is the heart and soul of the Savage Centerfire line. This is the gun that has earned Savage its reputation for outstanding accuracy. The Hunter series is available in a variety of calibers and stocks and comes with either detachable box magazine or hinged floorplate. An internal or blind magazine is also available in both short and long actions.

This very popular model is available in many options and configurations. Our youth model incorporates a patented, adjustable muzzlebrake that tames recoil by 30 percent. This model is ideal for women, too. Savage offers more left-handed models than any other manufacturer and you'll find short and long left-hand models in both synthetic and wood stocks, in the Hunter Series. Synthetic stock versions of the 11 and 111 come standard with the new AccuStock™ to squeeze out that extra bit of accuracy. Whatever configuration you choose, this legendary series offers unparalleled reliability and out-of-the-box accuracy.

MODEL 11BTH
AccuTrigger™, Short Action, Hinged Floorplate

MODEL 111BTH
AccuTrigger™, Long Action, Hinged Floorplate

Short and Long Actions

Savage offers rifles in short and long actions. The short actions are almost a full inch shorter and provide a lighter more compact action for all of today's shorter cartridges. The long actions are designed to handle cartridges through the .300 Win Mag.

Hinged floorplate and detachable box models of the Hunter Series with composite stocks feature our revolutionary AccuStock™, with a three-dimensional bedding system that literally squeezes the action in all dimensions (see page 4). This system not only outperforms current factory riflestocks, but glass bedding and expensive aftermarket stocks as well. (Transparent demonstration stock shown is not available for sale.)

AccuStock models also feature a new trigger-guard-mounted bolt release and smooth barrel lock-nut.

PREDATOR SERIES

While the AccuTrigger™ was designed using the most sophisticated computer design software available, each one is still assembled by hand to ensure the precision and accuracy you expect from a Savage.

MODEL 10 PREDATOR HUNTER
AccuTrigger™, Short Action, Detachable Box Magazine

MODEL 10 PREDATOR HUNTER — SNOW CAMO
AccuTrigger™, Short Action, Detachable Box Magazine

The Predator Hunter brings a whole new element of accuracy and concealability for dispatching predators and other game. The Predator Hunter features a 22-inch, medium-contour barrel, synthetic stock with rounded forend and oversized bolt handle. The entire stock, barreled action, trigger guard and bolt handle feature either a Mossy Oak® Brush™ or Realtree® Hardwoods Snow™ pattern camo to help evade detection. The Predator Hunter is chambered in the popular .223, .22-250, .243 and .204 Ruger calibers and features the AccuTrigger™, adjustable from approximately 1.5 to 6 lbs., a Savage Arms innovation.

LAW ENFORCEMENT SERIES

MODEL 10 BAS
All-aluminum AccuStock™, AccuTrigger™,
10-round Detachable Box Magazine,
Muzzle Brake, M4-style Buttstock
Scope and rings not included.

MODEL 10 BAT/S
All-aluminum AccuStock™, AccuTrigger™,
10-round Detachable Box Magazine,
Muzzle Brake, Multi-adjustable Buttstock

The appearance of the new Model 10 BA from Savage is as radical as the extreme accuracy it delivers. The BA's modular design enables the operator to customize it to mission-specific demands by selecting from a virtually infinite selection of aftermarket accessories including buttstocks, magazines, grips, bipods and more. The BA is the new flagship of the Savage Law Enforcement Series — built for pinpoint accuracy.

The BA is built on a machined aluminum version of our new three-dimensional AccuStock™ for absolute consistency. Like all Savage rifles, it features our proven AccuTrigger™. Its modular design is compatible with a wide range of aftermarket M4-style or SOPMOD-type buttstocks, detachable box magazines, bipods and virtually any Picatinny rail mount optic or accessory.

An aggressive muzzle brake tames recoil for faster follow-up shots.

Durable steel and aluminum construction with 10-round detachable box magazine.

Fully compatible with most buttstocks and pistol grips sold for use on AR-type rifles.

Fluted heavy target barrel.

The Savage Law Enforcement Series is now the official precision rifle of the New York State Police Mobile Response Team. Every heavy contour barrel in this series is button rifled for enhanced accuracy and features a recessed target crown. There is no need to lap the bolt, because the floating bolt head ensures both lugs have full bearing on the locking surface. And the headspace on every rifle is set at absolute minimum. Standard features in this series include an oversized bolt handle that permits rapid acquisition for follow-up shots. Our crisp, clean AccuTrigger™ allows the user to easily adjust trigger pull weight from approximately 1.5 to 6 pounds.

HS Precision Package

This complete package is built on a Model 10 FCP with HS Precision stock and includes Leupold 3.5-10x40mm Tactical Scope with mil-dot reticle, Farrell one-piece base, Burris Zee Rings, flip-open lens covers and a Harris Bipod – all enclosed in a high-performance, weatherproof Storm case.

CENTERFIRE PACKAGE SERIES

Ready to go, right out of the box, the Savage Package series offers a rare combination of quality, convenience and affordability. We've built our Package models in a way that takes all the guesswork out of buying a rifle, scope, bases, rings and a sling. No matter what you're looking for — stainless or blued, short or long action, right- or left-handed, wood or synthetic stock — we've got a package to meet your needs.

Standard models are chambered in popular calibers from 223 to 338 Win. Mag., including WSM calibers, and comes with a 3-9x40 scope mounted and boresighted. And all internal magazine models come with Savage's revolutionary AccuTrigger™ for greater safety and accuracy. We've done all the work, so you have more time for shooting!

Because our muzzleloaders are designed to function safely with clean-burning smokeless powder, we are able to test-fire and proof every single gun we sell.

MUZZLELOADER SERIES

While muzzleloading is defined as a primitive sport, the Savage 10ML II utilizes more modern advancements than any other muzzleloader available. It is designed to handle the pressure of shooting smokeless powder. The cleaner burn of smokeless powder means far less frequent cleaning and unsurpassed shot-to-shot consistency. Additionally, the 10ML II also delivers outstanding performance shooting with Black Powder, Pyrodex, Blackhorn and Triple Seven as well.

The 10ML II is the only Muzzleloader that features the AccuTrigger and is capable of shooting 1.5 inch groups at 100 yards. It utilizes 209 primer ignition and can deliver velocities of 2,300 fps with more than 3,000 foot pounds of knockdown energy.

209 Primer Ignition

For ease of use and a sure-fire seal, the 209 primer fits into a primer carrier in front of the bolt face.

Muzzleloading Without the Mess

You choose the propellant—modern smokeless powder for maximum performance or traditional black powder, Pyrodex, Blackhorn or other black powder substitutes.

Modern

The cleaner burn of smokeless powder means better performance, less cleaning and greater shot-to-shot consistency.

Traditional

If you shoot traditional black powder, Pyrodex, Blackhorn or Triple Seven, the ML10 II delivers exceptional performance.

210 SLUG WARRIOR

Before receiving a serial number, every Savage rifle and shotgun is tested, inspected and test fired. After successfully passing each of these steps, a Savage gun "earns" its individual serial number.

SLUG WARRIOR
MODEL 210F CAMO
MODEL 210F

Instead of being a traditional shotgun adapted to hunt big game, the Savage Model 210F is a highly specialized bolt action shotgun with a classic design. It behaves more like a rifle that happens to shoot shotgun shells. The 12 gauge, 3-inch chambered slug shotgun consistently earns accolades for accuracy and reliability.

PRECISION ACTIONS

Induction-hardening of the critical mating surfaces of the receiver is paramount to ensure the superior accuracy of a Savage rifle is maintained for decades to come.

RIMFIRES

Our new line of Precision Actions makes it possible for gunsmiths to add the same action found in our Precision Target Rifles, Varmint Rifles and Hunting Rifles to customized firearms. The actions are available in both standard and .223 bolt heads, and are offered in three configurations: Right Bolt/Right Port, Right Bolt/Left Port and Dual Port options. The stainless Precision Target Actions also come with the Target AccuTrigger™, adjustable from 6 oz. to 2.5 lbs. Actions include bolt assembly, Target AccuTrigger group assembly, barrel locknut, recoil lug, and trigger guard.

 Long Action – Right Bolt, Right Eject, Hinged Floorplate

A phrase you'll never hear uttered at Savage is "just a rimfire." We understand that rimfires represent the doorway into the shooting sports for most people. We believe that if new shooters can experience real accuracy from a quality rimfire, they'll be hooked to this amazing tradition for life.

But rimfires are significant to far more than just the entry-level shooter. As the price of ammunition rises like the price of gasoline, more shooters are rediscovering the all-out fun of rimfire shooting. They're cheap to feed in comparison to centerfire rifles, their accuracy is simply amazing and thanks to the 17 HMR versus 22 magnum fray, there is plenty of room for smack talk among friends and on internet forums. The next several pages highlight our wide range of performance rimfire options.

Because it's not "just a rimfire," but a Savage, most Savage rimfire models feature an AccuTrigger™ specially designed for rimfires that feature a crisp, clean trigger that adjusts down to approximately 2.5 pounds. The AccuTrigger prevents accidental discharge, even at the lowest setting. For economical plinking or small game, the Rimfire is the very definition of versatility.

Savage has some customers that order non-catalog items to their own specifications. In certain cases, these specifications may exclude the AccuTrigger.

MARK I SINGLE SHOT RIMFIRE SERIES

Start your own family tradition. The Savage Mark I 22 has initiated generations of young shooters into the sport, ensuring that fun and safety go hand in hand. The perfect rifle for novices, the Savage Mark I 22 offers the added protection of the AccuTrigger™, single-shot bolt action with one-round-at-a-time shooting. The AccuTrigger cannot accidentally discharge if jarred or dropped — even at the lowest setting — when properly maintained and adjusted.

The **Cub**, our junior youth model, is designed for the youngest shooter. The Cub is a scaled-down conventional bolt action rifle with a peep sight to help perfect every shot. Our **Cub T** model has a laminated, vented thumbhole stock with swivel studs. It even comes in a Pink Laminated Thumbhole model. The **Stevens Favorite**, a traditional falling block model, is available in either a standard or a takedown model. Every rifle in this series offers superior control and unlimited enjoyment for all levels of rimfire shooters. A single-shot model from Savage has fun and safety built in, making it the right choice for beginners.

MODEL 30 STEVENS "FAVORITE" TAKE DOWN

The same dedication and precision that go into the finest Savage F Class centerfire rifle also go into your kids first rimfire.

Peep Sights
The Mark I FVT features an aperture rear sight adjustable for windage and elevation.

MARK II RIMFIRE SERIES

While we utilize the most high-tech computer numerically controlled machinery available, we truly believe it is the skill and dedication to accuracy of each and every operator that makes the difference in Savage firearms.

The Mark II line from Savage gives you match-grade accuracy in a wide range of choices and at a price you'll appreciate. The series offers heavy barrels for precision shooting as well as versions for the left-handed shooter. Stock choices include camo, black synthetic, or the traditional look of wood with Monte Carlo comb. Everything you want in a bolt-action 22 repeater is here — including stainless or blued barrels, peep sights or fiber optic sights.

All models are equipped with our revolutionary AccuTrigger™ as a standard feature. The AccuTrigger features a user-adjustable trigger pull, so there's no need to pay a gunsmith to modify it. The AccuTrigger provides a crisp, clean trigger pull, which enhances accuracy. Our high-performance Mark II BTVS is joined by the Mark II BTV, which features the same thumbhole laminate stock, AccuTrigger and heavy barrel, but with a handsome blued barrel and action.

Every barreled action is precision tested to ensure straightness is maintained during the hand-swinging assembly process.

MAGNUM RIMFIRE SERIES

While some rifles are built with receivers that are merely cast, all Savage rifles are machined from a solid billet of steel. This ensures superior strength, precision and accuracy.

Savage offers the widest selection of 22 magnum rifles available, and every one is built to perform like a Savage. The **Classic** model looks just like Savage's centerfire Classic Series with a high-luster blue barreled action, American walnut stock and wraparound checkering. The **93 BTVS** is heavy-barrelled model with a stainless barrel and an attractive thumbhole stock.

Every model in the series features Savage's AccuTrigger™, a crisp, clean trigger that adjusts down to approximately 2.5 pounds. The AccuTrigger prevents accidental discharge, even at the lowest setting. For economical plinking or small game hunting, the Magnum Rimfire is the very definition of versatility.

Critical parts, such as barrel lock nuts, sears, firing pins, bolts and others are through-hardened to achieve the strength and durability necessary for a lifetime of accuracy and reliability.

Savage has some customers that order non-catalog items to their own specifications. In certain cases, these specifications may exclude the AccuTrigger.

17 SERIES RIMFIRE

Every Savage rifle is meticulously crafted with a delicate balance of modern, high-tech methods and old-world hand craftsmanship to produce legendary out-of-the-box Savage accuracy.

Rimfire shooting has never been more fun. And our popular 17 series of bolt action rimfire rifles gives you more options in these hot new calibers than any other manufacturer. The Savage line includes models chambered in either 17HMR or 17 Mach 2, from the heavy barrel varmint to sporter barrel models. Configurations include laminated, camo, synthetic or wood stocks, blue or stainless barreled actions.

The **93R17 Classic**, has the look and feel of a centerfire rifle. The popular model **93R17 BTVS** features a laminated, vented, thumbhole stock with a heavy stainless steel barrel. For varmint shooting, we offer the **93R17 BV** with a high luster blued finish and varmint-style laminated stock. Our top selling **93R17 BTVS** is joined by the **93R17 BTV**, which features the same thumbhole laminate stock, AccuTrigger and Heavy barrel, but with a handsome blued barrel and action.

Every model in this series comes with the built-in adjustability and safety of the AccuTrigger™. And every model provides tack-driving accuracy powerful enough for dispatching small game and varmints. Whatever you choose — the 2,550 fps of the 17HMR caliber or the laser-like trajectory of the 17 Mach 2 — you'll be right on the mark.

Savage has some customers that order non-catalog items to their own specifications. In certain cases, these specifications may exclude the AccuTrigger.

Savage's all-around line of **Model 64** Rimfire rifles can handle everything from casual plinking to small game hunting. And they're designed to meet the needs of everyone from novices to serious marksmen. The Model 64 family is available in blue or stainless, with wood or synthetic stocks, and comes equipped with a smooth-feeding detachable 10-round magazine. Be sure to check out our heavy-barrel model with a brown laminated thumbhole stock. Savage has been making Rimfire rifles for more than 100 years, and we continue to build on this tradition of excellence. With the Semi-Automatic Rimfire Series, we've created a combination of value and versatility that's hard to match.

RIMFIRE PACKAGE SERIES

Savage craftsmen hand set the firing pin protrusion of every rifle to narrow tolerances to ensure reliable ignition and accuracy.

Savage originated the package model and continues to offer the best out-of-the-box models on the market. A Savage package rifle offers the complete package — rifle, scope, rings and bases included. The revolutionary AccuTrigger™, available on bolt action models, combines safety with adjustability. So whether you're plinking or hunting, the AccuTrigger, when properly maintained, cannot discharge accidentally if jarred or dropped.

All models in the Rimfire Package Series offer scopes that have been mounted and boresighted. The new 64 RD features an electronic red-dot sight. With its quick acquisition, it is ideal for plinking or small-game hunting. Be sure to look at the Camo Rimfire Package models. The stock, barreled action, 3-9x40 scope and rings are all completely covered in the Realtree Hardwoods Snow™ or Mossy Oak Brush™ camo patterns. You won't find cooler looking rimfires anywhere.

STEVENS

Every Savage rifle is meticulously crafted with a delicate balance of modern, high-tech methods and old-world hand craftsmanship to produce legendary out-of-the-box Savage accuracy.

The Stevens rifle is the right rifle at the right price. All barrels in this line are button rifled with painstaking precision by gunmakers trained in the Stevens tradition. The Model 200 is available in both long and short actions, in a variety of calibers, and features a dual pillar bedded gray synthetic stock. All barrels are free floating for enhanced accuracy.

Our rimfire selection offers many options, from the single shot 22 to the popular tack-driving 17 HMR. There is also a scaled-down, youth version, perfect for the beginner, and a package model complete with scope. From centerfire to rimfire, every model delivers reliability, accuracy and unsurpassed value. Stevens is the "must buy" model for discriminating hunters and riflemen who know great value when they see it.

STEVENS SHOTGUNS

The Stevens 512 Gold Wing is a gun you'll be proud to carry at a price that reminds you why Stevens is The Definition of Value. This well-built, reliable over/under shotgun gives you many features usually found only on more expensive models. Built by Turkish craftsmen to Savage's precise specifications, the Stevens Gold Wing box-lock action over/under is loaded with upgrades: chrome-lined barrels, brass mid-rib bead and front sight, gold-plated single selective mechanical trigger and mono-block construction. The single selector switch is integrated into the tang-mounted safety and located right where you want it. The 12, 20, and 28 gauges all come with five screw-in choke tubes, while the .410 has fixed M/IC chokes. And all frames are scaled precisely to the gauge for superior balance.

The Stevens over/under includes a black chrome, sculpted receiver with a raised gold pheasant, laser engraved trigger guard and forend latch. The Turkish walnut stock is finished in satin lacquer and beautifully laser engraved with fleur-de-lis checkering on the side panels, wrist and Schnabel forearm. This feature-rich shotgun is unmatched in quality and lavish in every way — except for the price!

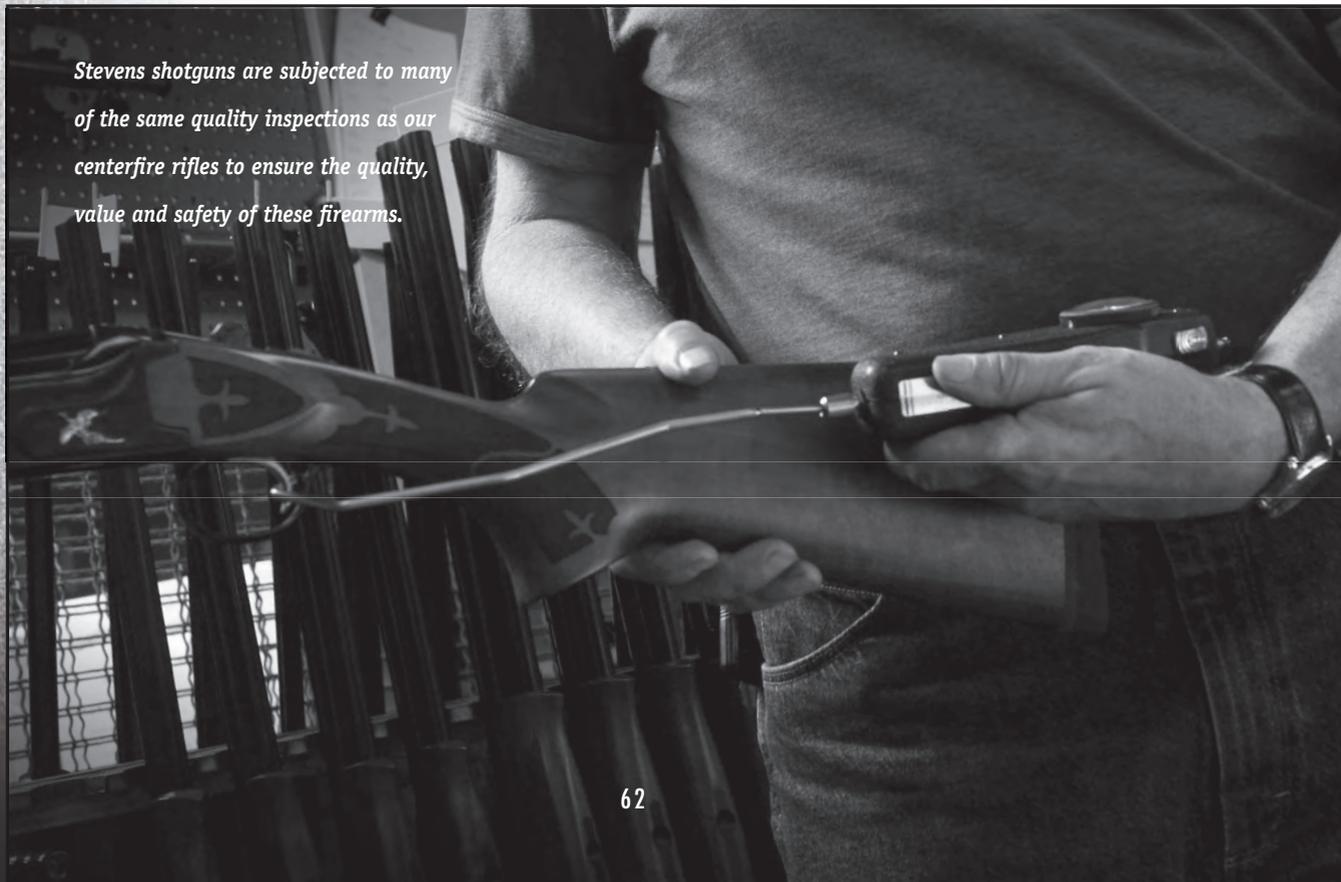

12 GA 20 GA 28 GA .410

All frames are perfectly scaled for superior handling qualities and weight distribution.

MODEL 512 GOLD WING

Stevens shotguns are subjected to many of the same quality inspections as our centerfire rifles to ensure the quality, value and safety of these firearms.

KNIVES

HUNTER'S EDGE KNIFE

HUNTER'S EDGE FIXED BLADE

Designed by Savage, the Hunter's Edge Fixed Blade is a multiple-purpose knife that offers a drop-point blade, a gut-hook, and a saw — all in a single blade knife. It's the perfect compliment to our original Hunter's Edge, a quick-change, multi-blade knife with 4 interchangeable blades. New this year is the Hunter's Edge Compact Fixed Blade. This compact knife comes with a sheath that attaches right to your gun sling. You'll always know right where your knife is when you need it. Visit our online store to see these and other great products by Savage. www.savagearms.com

SPECIFICATIONS

In addition to the broad range of models offered in this catalog, Savage can create a special make-up for a modest fee. Various calibers and components can be configured to make unique rifles for customers whose specific needs are not met by our standard line. Call Effie Sullivan at 800-370-0708 ext. 6 for more details on unique configurations.

*Indoor, outdoor, wet trap, dry trap, shoot house or target.
At Savage, we target perfection.*

Savage Range Systems traps are the industry standard.

Whether for civilian, law enforcement, military or firearms manufacturing, Savage Range Systems shooting ranges are considered the industry standard – delivering a cleaner, safer shooting environment – worldwide!

With the patented Deceleration Chamber at its heart, Savage ranges and bullet traps protect shooters, employees and the environment like no other system. Unlike other steel traps on the market, the Snail® system incorporates low angle ramps which deflect the bullet into the deceleration chamber.

▲ The Scottsdale Gun Club, the world's largest "5-star" rated indoor range.
The Deceleration Chamber is the heart of Savage's revolutionary Bullet traps.

This results in virtually no airborne lead at the trap!

Our range of portable Bullet Traps solve many needs, from bullet collection for forensic study to clearing stations to proof and function testing up to .50 caliber full auto BMG. So whatever you shoot, we have a system to catch it, cleaner and safer than any other range or trap... anywhere!

Superior shoot houses and target systems make PortaTarget the first choice.

PortaTarget has perfected the shoot house! With overlapping bolted steel-to-steel plating, windows that can be bullet-proofed and interiors that are customized to simulate any environment, live-fire teams can safely experience any situation. The overlapping steel plating lets multiple teams operate simultaneously in different rooms, safely!

Unique use of steel allows multiple live-fire teams to operate simultaneously.
Running Man Systems can be motor driven and constructed to any length.

Our target systems are simply superior! Each target has been field tested with over 500,000 rounds, is constructed with through-hardened steel and is cut, welded and assembled for superior quality. Whether indoor or outdoor, with portable reactive and non-reactive targets, portable target stands, pneumatic and electric targets, Savage Range Systems can design a PortaTarget system to meet your specific training goals.

DRESSED TO KILL

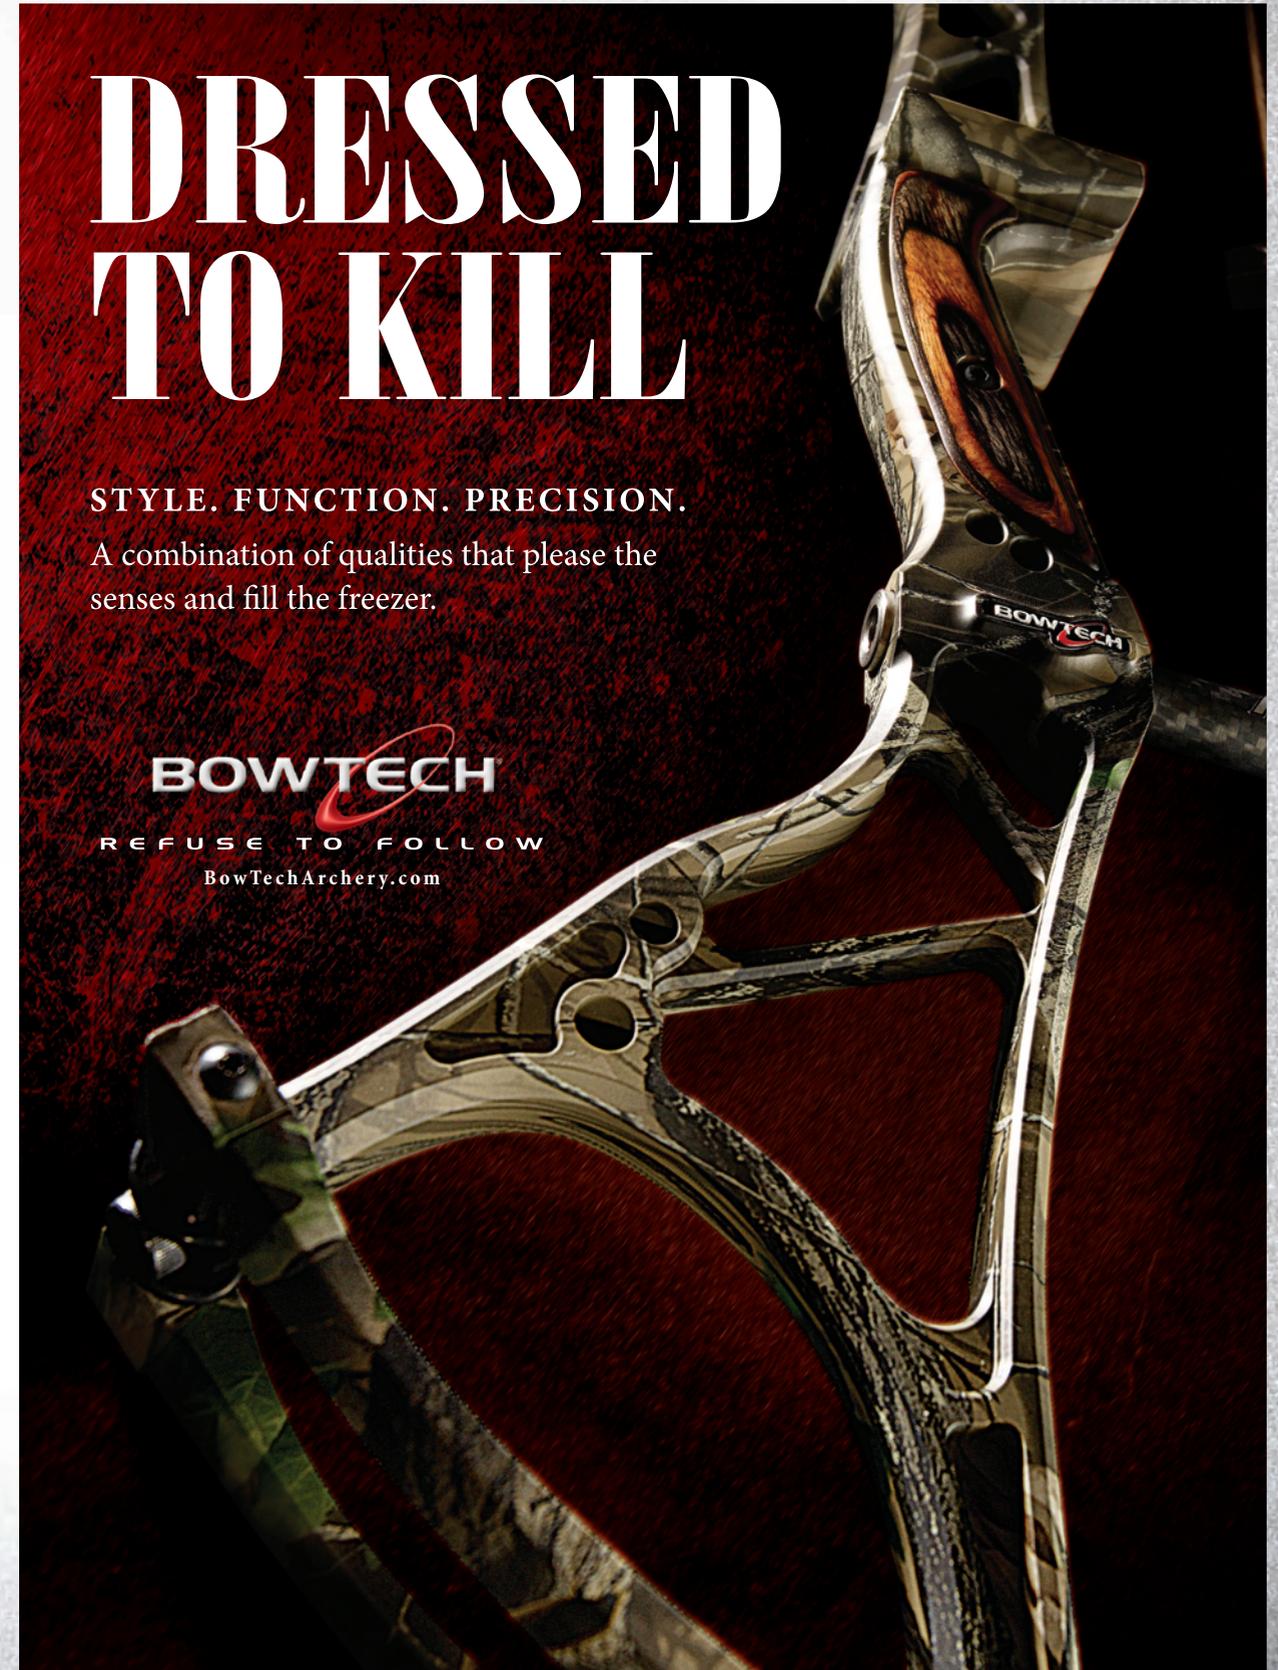

STYLE. FUNCTION. PRECISION.
