### Precision Target Bi-pod

As a company that knows a little something about precision products, RCBS® proudly introduces a bi-pod that possesses military toughness and the precision needed for competitive shooting and varmint hunting. The new RCBS Precision Bi-pod features quickadjust telescoping legs that range from 7-10 inches, 25 degrees of cant adjustment, skid resistant polyurethane feet and tool-free mounting to Picatinny rails. The rapid deployment system goes from retracted legs in the locked position to fully deployed via a large paddle lock which, when depressed, allows the user to push and rotate the legs in one smooth motion. This bi-pod is perfect for AR-style weapons used for both 3-gun competitions and varmint hunting. It can also be converted to non-Picatinny style weapons with the purchase of a Weaver® Tactical 99468 Swivel Stud Picatinny Rail Adaptor.

#### Features & Benefits

- Strong Lightweight 6061 T6 Aluminum with Type III Hard Coat Anodize Finish
- Telescoping legs quick adjust anywhere from 7-10"
- 25 degrees of cant adjustment to compensate for non-level surfaces
- Can be quickly deployed using the large paddle locks
- Legs lock securely in both open and closed positions
- Simple and strait forward design with common fasteners makes future customization possible
- Extremely durable Polyurethane feet provide stable, skid resistant contact points
- Quick, tool-free mounting and removal from Picatinny rails
