

**Ed Brown
Products®**

2011

CUSTOM MANUFACTURER
OF THE WORLD'S FINEST
1911 PARTS AND
1911 HANDGUNS

COMPANY HISTORY

FOR NEARLY 40 YEARS, THE BROWN FAMILY HAS BEEN FAMOUS FOR INNOVATIVE ENGINEERING, PRECISION MANUFACTURING, AND QUALITY HAND CRAFTSMANSHIP IN THE FIREARMS INDUSTRY.

Since 1968, Ed Brown has built his reputation as one of the world's finest custom pistolsmiths, one customer at a time. Ed was named "Pistolsmith of the Year" by his fellow Guild members, a prestigious honor awarded only to those who have shown the highest degree of honesty and craftsmanship in their work. Also an avid competitive shooter, Ed was ranked in the top 16 of the world as a championship combat shooter.

After years of frustration over the second-rate quality of 1911 parts he had to work with, Ed began to envision a full line of quality aftermarket parts of a completely new design. Having been professionally trained as a professional tool and die maker, CNC programmer, and CAD/CAM designer, Ed had the background experience to evolve into a custom manufacturer, and make this dream a reality.

Ed eventually quit his day job to launch his parts business. Within months, it was an astounding success. Ed Brown Products, Inc. incorporated in June of 1992, and in 1998, Ed's two sons, Travis and Wade, joined the business full time. After manufacturing all the major components of the 1911, a new direction was established - the design and manufacture of a complete line of Ed Brown firearms.

Today, Ed Brown Products, Inc. operates in a state-of-the-art 12,500+ square foot facility. Millions of dollars have been invested in the latest, high-tech CNC equipment which turns forgings and bar stock steel into some of the world's finest firearms. In our Missouri-based facility, this leading edge technology is gracefully combined with traditional, old-world craftsmanship under the direct supervision of the Brown family.

MANUFACTURING PHILOSOPHY

Ed Brown firearms are engineered, manufactured, and handcrafted for performance. At our company, it's all about the product. We strive to make the very best high grade, high performance firearms, at a reasonable price and delivery, using our own innovative designs, superior components, and hand craftsmanship. Our manufacturing philosophy is based on the following three pillars:

ENGINEERING EXCELLENCE

The Brown family is well-known for their innovation and excellence in engineering designs of superior performance. We broke all the rules, and originally conceived and CAD/CAM designed our firearms as complete custom firearms. Every part on our firearms has been redesigned, enhanced, or more closely toleranced for one thing: Performance. Only the finest materials are used to meet our precise engineering specifications.

PRECISION MANUFACTURING

We've invested millions in state-of-the-art CNC manufacturing technology specifically for the firearms industry. Housed inside our 12,500+ square foot facility, are the latest in horizontal machining centers, swiss type turning machines, precision broaching, and fine polishing equipment. It is this investment of resources that has made us one of the leaders in the field, and will keep us at the leading edge in the future. Our components are manufactured in-house on CNC machinery by Ed Brown Products, under direct supervision of the Brown family. This means that we have complete control over the quality and delivery of the final product. None of our competitors can match this claim.

HAND CRAFTSMANSHIP

Often it's the little things that make the difference. The Brown family has built a reputation for the highest degree of hand craftsmanship. We go that extra mile by putting more hand fitting and finishing into our firearms than any other manufacturer, resulting in some of the most attractive firearms available anywhere at any price. Each firearm is carefully finished and inspected by one of the Brown's before it leaves our facility.

INNOVATION, NOT IMITATION

ED BROWN 1911 HANDGUNS

ENGINEERING EXCELLENCE

All our components including the frame and slide have been redesigned and improved for reliability, accuracy, longevity, and the highest degree of cosmetics. We have engineered many unique and exclusive features such as the Bobtail™, 25 LPI checkering, Snakeskin, and Chainlink. Ed Brown has engineered and tested specific configurations which have been proven to produce excellent accuracy and flawless reliability.

PRECISION MANUFACTURING

We use the highest quality components, regardless of cost. Frames and slides are made from forgings in-house on our own equipment - no other custom manufacturer can match this quality or control. All holes in the frame are located in one setup for a perfect relationship between the holes, allowing more accurate alignment throughout. Most components are CNC machined from barstock. The slide to frame fit is surface ground, with the final lapping done by hand.

HAND CRAFTSMANSHIP

Meticulously hand-fitted, finished and polished by a Brown family member to the highest standards of excellence, with extreme attention to detail. We strongly believe that Ed Brown 1911's are the most accurate and reliable high performance 1911's made anywhere at any price.

“Designing pistols for combat and competition is a lifetime endeavor for this master gun manufacturer.”

Charles Petty, Writer

“After 40 years of shooting 1911's and owning all the other 'custom' brands, the Ed Brown is by far the best handgun I have ever fired. It is a work of art and a pleasure to shoot.

Thank you for making a superb masterpiece.”

Jerry H. Wassel

TECHNICAL SPECIFICATIONS

- Exclusive Ed Brown forged frame and slide, hand fitted with precision for long lasting wear.
- Ed Brown premium **Hardcore®** components are hand-fitted to the exclusive Ed Brown frame.
- All sharp edges are gently and tastefully dehorned.
- Ejection port is lowered and flared for improved ejection.
- Polished feedramp and hand-fit extractor and ejector ensure feeding with high quality ammunition.
- Ed Brown premium match grade barrel and solid steel bushing for the highest accuracy.
- Ed Brown memory groove beavertail grip safety for a higher and deeper grip than any other on the market. Reduces felt recoil and improves natural pointing ability, leading to better accuracy.
- Trigger guard is undercut to allow the knuckle to fully contact the bottom of the trigger guard as a definite stopping point, allowing a more consistent grip.
- “Commander style” slotted and chamfered hammer mated precisely with Ed Brown Perfection sear and Perfection disconnecter. We are the only makers who fully machine each of these critical parts from the highest quality alloy bar stock steel, making for a light trigger pull and crisp break which will last for thousands of rounds.
- Classic “Three hole style” long aluminum trigger.
- Ed Brown seven round magazine with reliable steel follower. Additional magazines tested with gun optional.
- Beveled magazine well for smooth magazine changes.
- Exotic checkered Cocobolo wood grips with traditional double diamond pattern.
- Firearm is rigorously test fired for function and accuracy.
- Ed Brown Products branded deluxe Cordura pistol rug with internal magazine pockets and external zippered accessory pocket.
- All handguns come with Ed Brown Products 1911 Owner’s Manual, cable lock, and Ed Brown Firearm Lubricant #960.
- **All models can be customized, and personalized with laser engraving.**

*“If there is a better 45 ACP out there,
we’d like to see it!”*

Guns & Ammo Staff

2011 CENTENNIAL EDITIONS

Our tribute to the 100 year anniversary of the 1911 pistol includes a “mainstream” centennial edition Executive Elite, and an “over the top” centennial edition Classic Custom, which has beautiful hand relief engraving. These limited editions will be offered for the year 2011 only.

EXECUTIVE ELITE CENTENNIAL EDITION

In addition to the standard Executive Elite, the Centennial edition includes the following:

- Centennial edition, 1911-2011 special laser engraving on LH side of slide. “Custom by Ed Brown” remains on right hand side of slide.
- Tru-Ivory grips instead of wood grips.
- Solid trigger instead of 3-hole trigger.
- Plain black sights instead of night sights.
- Jewelled barrel hood.
- Special serial number starting with JMB prefix (signifies John Moses Browning).

CLASSIC CUSTOM CENTENNIAL EDITION

In addition to the standard Classic Custom, the Centennial edition includes the following:

- Hand relief engraved package (includes flats of slide and frame, grip screws, and flats of thumb safety, grip safety, slide stop, and mag release).
- Centennial edition, 1911-2011 special laser engraving on LH side of slide. “Custom by Ed Brown” remains on right hand side of slide.
- Custom rib on top of slide (top of slide is flattened, serrated, then relieved on each side to give the appearance of a raised rib).
- Tru-Ivory grips instead of wood grips.
- Jewelled barrel hood.
- Special serial number starting with JMB prefix (signifies John Moses Browning).

SPECIAL FEATURES	SLIM WOOD GRIPS AND "LW" INSIGNIA ON SLIDE, WHICH STANDS FOR "LIGHTWEIGHT"

The Kobra Carry is now available in an aluminum frame version. Aluminum has one major advantage, and a few disadvantages. The major advantage is the lighter weight, being half a pound lighter than the steel version. This weight advantage cannot be over-valued for those who carry frequently.

Our aluminum frame is made from 7075, the strongest aluminum alloy available and the same material used in M-16/AR-15 assault rifle receivers. The tensile strength is more than adequate for the durability requirements. However, no aluminum is as abrasive resistant as steel because it is slightly softer on the surface. This means service life will be somewhat reduced, and the frame is easier to damage.

A steel version might be expected to last many thousands of rounds of shooting. An aluminum frame will also last thousands of rounds, but certainly not as many as steel. As always, the life will depend on many factors such as load strength, maintenance, lubrication, etc. A carry gun is generally expected to be shot enough to assure familiarization with the weapon and then is carried most of its life. Occasional practice is fine, but if you plan on a high volume of shooting, you would be much better served with a steel frame gun. If you mainly plan on carrying the gun and shooting it occasionally, you will find the aluminum is a blessing on your hip. Just keep in mind that the cosmetic finish can be damaged much easier than a steel gun. Shooting with a ring on could cosmetically damage the finish. Getting even mildly aggressive with a mag change will cosmetically damage the inside of the mag well. One just needs to be more careful with aluminum. This is the trade-off for lighter weight.

Normally, the feedramp might be damaged just by hollowpoint rounds impacting it repeatedly, but not with an Ed Brown. We have solved this particular problem by designing a steel insert for the feedramp. Now hollow point or solid nose ammo hits the steel insert and never touches the aluminum frame.

The bottom line: if you intend to carry the gun a lot, and not use it for your "daily shooter", the aluminum version is for you. Otherwise, stick with the steel version.

GRIP SAFETIES, THUMB SAFETIES, HOUSINGS

Memory Groove Beavertail Grip Safety

The number one grip safety in the world! More shooters specify the Ed Brown Beavertail than all others combined. Sweeps so high on the gun it is countersunk so a Commander-styled hammer will drop into it. Our grip safety gets your hand as deep into the gun as possible. This reduces felt recoil because it better aligns the centerline of the bore with the axis of your forearm. It also improves natural pointing ability, leading to better accuracy. This grip safety has Memory Grooves machined into a raised pad on the rear for positive depression of the part. With normal use, your hand becomes accustomed to the feel of the grooves, and will remember where the perfect grip is for consistent shooting. The Memory Grooves also aid in depressing the safety for the shooter with thin hands. No need to pin the grip safety! If you have ever failed to activate a grip safety, you need this part! 3D CAD designed to remove the maximum amount of metal from the frame without weakening it, you simply cannot get a better designed part. Uses a .250 radius cut on the frame centered on the thumb safety pin hole. Complete installation instructions included. See our beavertail installation jig #886 for an easy way to establish this .250 radius.

Beavertail Grip Safety Installation Jig

This is an easy to use jig for installing our beavertail grip safety. This heat-treated tool slips into the frame through the thumb safety hole and allows you to make the .250 radius cut on each side of the frame perfect the first time, even if you only have simple hand tools to work with. The jig is heat-treated super hard so hand filing right up against it is okay. The buttons screw together and hold themselves on the gun for easy installation. It is perfect for gauging as well as fine finishing and has great value as a reusable professional tool. Complete installation instructions included.

Government Model Mainspring Housings

Ed Brown mainspring housings are fully machined from solid bar stock steel. No cheap castings or plastic is used. Sharp checkering is machine cut into each housing for precision and straightness, then finished by hand. The **CHAINLINK** housings have scales instead of checkering, as pictured on the Cobra pistol. The **CHAINLINK** housings have scallops which are perfect for durability and a secure grip in severe applications, as pictured on the Special Forces pistol. The arched housings are grooved 20 lpi for a positive gripping surface. The Government Model housing features drop-in installation in all full-size 1911 pistols including full size Para-Ordnance pistols such as the P-14 and P-16. All housings will work great with any finish or type of steel, including aluminum.

Ambidextrous Safety

The most ergonomic and attractive thumb safety on the market! Widest design 1/4" levers for 'high thumb' shooting style, wider than any of its competitors. This allows the shooter to rest the thumb on top of the safety as Jeff Cooper and others recommend. The tactical version has the levers trimmed to a slender 1/8" profile for better carry and concealment. Shaped for shooting comfort, the lever is angled slightly to keep the thumb from contacting the slide and has a double angle to fit the thumb perfectly. The ambidextrous safety includes both left and right sides needed for the either hand operation. Perfect for certain competitions, left hand shooters, and as a tactical component. May be custom trimmed to any slimmer proportions with no loss of style or function. Designed for all 1911 type frames and made from high quality steel. Requires minor gunsmith fitting for safe operation and includes complete instructions.

Mainspring Housing with Drop-In Maxi-Well

Our standard mainspring housing with a precision machined slot, and a drilled and tapped hole cut into the bottom. This superior two-piece design allows easy, drop-in installation of our included maxi-well, as well as easy removal of the maxi-well in seconds, without disassembling the pistol. Greatly increases magazine well opening for flawless magazine changes and speedy reloading. No grip modifications required.

Bobtail™ Housing

A unique, patented modification to your Government Model frame that transforms it into a round-butt pistol. It consists of a specially manufactured housing and frame modification. The **Bobtail™** removes a full 3/8" of excess metal from the bottom rear of the gun, where the mainspring housing pin is located. This not only reduces the weight, but solves two well-known problems of carrying a 1911. First, it drastically increases comfort during carry. There is no sharp butt to poke you in the ribs. Second, it increases concealment during carry, because the hardest thing to conceal on a 1911 style pistol has always been the sharp, projecting butt. Get our re-useable installation jig to easily locate the new hole in the frame for the **Bobtail™** housing.

BARRELS AND GUIDE RODS

Gun Test Magazine rates the Ed Brown Barrel for 45 ACP #1, Buy It!

Barrel accuracy comes from using the highest quality materials and manufacturing methods. Ed Brown Products is committed to both. Ed Brown barrels are completely manufactured in-house by our own craftsmen, using the most modern CNC machinery and manufacturing methods available. The barrels are made from T-416 modified, gun barrel quality stainless steel bar stock, just like a benchrest rifle barrel. This is without a doubt the best and most reliable way to produce top quality barrels. No forgings are used to try to save a buck. T-416 is certified pure, there are no foreign materials, and no hard or soft spots to worry about. It is stress-relieved and heat-treated prior to final rifling and refinishing. Ed Brown barrels are precision machine cut from a 3 pound chunk bar of this top quality steel. Our barrels are rifled by precision broach in the original six lands and grooves, one turn in sixteen, left hand twist as originally designed by John Browning. This deep cut, broached rifling gives superior accuracy with all types of bullets, including lead. No cheap, quick pass-through button rifling is used. Our barrels are heat-treated by an aerospace certified heat treat facility, and sub zero frozen for maximum strength and stress relief. This means more accuracy and longer barrel life to the shooter. We have also cut the dimensions to max tolerance on the outside of the barrel. This means less fitting work for you, and more accuracy. Gunsmiths and hobbyists love our precise, pre-fit dimensions on our drop-in models. This gets you on the range quicker enjoying the accuracy improvement your new barrel provides. All this extra trouble and expense ensures you the finest, most accurate barrel possible. These barrels are quite simply the best on the market.

Two-Piece Guide Rod Assembly

Machined from high quality 416 heat-treated stainless steel. Two-piece guide rods are preferred for standard 5" guns because they will disassemble much easier. Will drop-in to all 1911 types with correct slide length. Commander length will fit guns with 4 1/4" barrels. Allen wrench and plug included. Guide rods smooth out the cycling of the pistol, extend the life of the recoil spring, and add weight to the front of the gun, thus reducing muzzle flip and recoil.

Slide Recoil Buffers

Precisely molded polyurethane buffers mount on the recoil guide and prevent the metal to metal contact that occurs when the gun is fired. Prevents frame damage. Will last about 1,000 rounds. 6 pack.

805.....Slide Recoil Buffers.....6 pack.....	\$5.95
--	--------

"Thank you for the outstanding barrel installation you did for me. The fit is really great, plus your turnaround back to me was very quick. My thanks to you folks for a very professional job, the accuracy of course is top notch."

Floyd L. Watkins, Linden, VA

FRAME & SLIDE COMPONENTS

Barstock Hardcore® Hammer with chamfered edges

Completely machined from barstock, these hammers are guaranteed for life against breakage. Improved design with a beautiful chamfer machined all the way around the outside, and also inside the hole. Narrowed half-cock notch eliminates sear damage. Commander style spur, finely serrated for positive gripping surface. Sides are narrowed to eliminate drag on slide. Lowered strut pin hole reduces full-cock spring pressure. Hammer hooks precisely machined at 020-.022 perfectly square with sharp corners, ready for light, final stoning. Made from alloy steel or stainless steel, heat treated Rc 52-54. The perfect mate for this hammer is our #874 Perfection Sear.

896 Hammer Blue \$49.95
897 Hammer Stainless \$54.95

Perfection Sear

Computer designed and fully machined from top quality bar stock for the perfect profile. Recommended as a perfect fit with our **Hardcore®** Hammer #896 and #897 for the best trigger pull possible with the least amount of hand labor - no jigs necessary. Hammer contact angle already prepped ready for your favorite clearance angle. Specs: 4340 tool steel, heat treated to 50 Rc.

874 Perfection Sear \$29.95
-----	-----------------------	---------------

Hammer Strut

Our hammer strut has perfected geometry for the longest lasting wear possible. Made of heat treated tool steel, fits all 1911 types. The obvious choice for competition guns and all rebuilds.

823 Hammer Strut \$6.95
-----	--------------------	--------------

Match Grade Sear

Our standard model high quality sear for any 1911. Machine-cut from 4340 Alloy steel for longer-wearing, cleaner breaking triggers. Assures positive sear/hammer engagement. Required for fine match grade trigger pull jobs. Requires small amount of hand fitting to hammer for a perfect trigger pull. We recommend our sear jig #951 for this purpose.

812 Sear \$19.95
-----	------------	---------------

Sear Jig

The one jig you need for the 1911 sear. A larger, rounded design fits comfortably in your hand for ease of use. Packaged with .020 shim and complete instructions that cover every detail of the 1911 trigger job, along with many helpful hints to get the job done right. Made from stainless steel for a rust free life on your bench.

951 Sear Jig \$37.50
-----	----------------	---------------

National Match Trigger

The classic three hole design long trigger made from strong yet lightweight aluminum, with heat-treated steel bow. Finely serrated pull surface for better feel and control. Includes stainless steel adjustable overtravel set screw. Slightly oversize in height for precise hand fitting to your frame.

1001 National Match Trigger for single stack frames \$19.95
1001-SOLID Solid Long Trigger for single stack frame \$19.95
1001-SHORT Solid Short Trigger for single stack frame \$19.95

Perfection Disconnecter

Fully machined from bar stock steel. The only product of it's kind. The strongest available, and heat-treated for long life and extreme service use. Machined surfaces are finely finished and dimensionally exact. Designed to work perfectly with our Perfection Sear and **Hardcore®** Hammer for precise trigger jobs every time. Will work with all 1911 pistols including the Hi-Capacity types.

811-M Perfection Disconnecter \$19.95
-------	-------------------------------	---------------

Plunger Tube

High quality steel plunger tube fully machined from bar stock, with extra length studs for positive crimping. Will work with all 1911 types including the Hi-Capacity types. Don't let a loose, poor quality plunger tube tie up your gun.

821 Blue \$14.95	821-S Stainless \$15.95
-----	------------	---------------	-------	-----------------	---------------

Steel Extractors

One of the most common causes of malfunction in the 1911 pistol is a poor extractor. Install one of these and eliminate feeding/extraction problems before they start. Fully machined from aircraft quality heat-treated 4340 alloy steel bar stock for long wear and extra strength.

1301 Extractor, 45ACP 70 Series Blue \$23.95
1301-HC Extractor, 45ACP, Hardcore® 70 Series Blue \$28.95
1302 Extractor, 45ACP 80 Series Blue \$24.95
1302-HC Extractor, 45ACP, Hardcore® 80 Series Blue \$29.95
1303 Extractor, 38 Super, 9mm 70 Series Blue \$24.95
1304 Extractor, 38 Super, 9mm 80 Series Blue \$25.95
1300 Extractor, 40S&W, 10mm 70 or 80 Series Blue \$25.95

1911 Firing Pins

Factory firing pins are often weak and subject to failure. These top quality firing pins are precision turned from heat-treated tool steel. Proper weight for positive ignition with heavy duty springs and any type primer. Usable with all 1911 type pistols including Colt Series 80 and 70. Springfield 38 Super and 9mm slides use the oversize diameter pin for heavy loads. At present we are the only manufacturer making the correct size pin for the Springfield 38 Super slides. All Ed Brown, Baer and newer Caspian slides use the 38 Super firing pin, Part #825. If you are unsure which pin you need, measure the diameter near the tip where the pin strikes the primer and compare to the listings. The **Hardcore®** firing pin has a LIFETIME guarantee against breakage.

824 Firing Pin, 45ACP 70 or 80, .090 Diameter \$5.95
824-HC 45 ACP, Hardcore® 70 or 80, .090 Diameter \$9.95
825 Firing Pin, 38, 9mm, 10mm 70 or 80, .065 Diameter \$5.95
825-T Titanium Firing Pin, 38, 9mm, 10mm 70 or 80, .065 Diameter \$19.95
826 Firing Pin, 38, 9mm Springfield, .075 Diameter \$5.95

Firing Pin Stop

A high tolerance heat treated alloy steel firing pin stop for all 1911 pistol types. Made to max tolerance on width for a snug fit with the extractor. The standard part is for Series 70 guns, but we also offer an 80 series part which has a relief cut for the 80 series components. Also available as a super tough **Hardcore®** part, which carries a LIFETIME guarantee against breakage.

820 Firing Pin Stop Blue \$9.95
820-S Firing Pin Stop Stainless \$10.95
820-HC Hardcore® Blue \$15.95
820-HCS Hardcore® Stainless \$16.95
820-80 Firing Pin Stop for 80 series Blue \$9.95
820-S-80 Firing Pin Stop for 80 series Stainless \$10.95

Extended Ejectors

One thing you will need for sure in building a reliable pistol is an extended ejector. Essential insurance against failed ejection. Made from heat treated 4140 alloy steel. Requires minor fitting.

1305 Extended Ejector, 45 ACP Blue \$21.95
1306 Extended Ejector, 38 Super, 9mm, 10mm Blue \$22.95

SIGHTS & OTHER COMPONENTS

Magazine Bumper Pads

The same bumper pad as is shipped with our magazines. Durable plastic with the Ed Brown logo molded in. Standard hole spacing. Shipped with two 4-40 self tapping screws for each pad.

807 Magazine Bumper Pads 6 pack \$8.95

Grip Screw Bushings

High quality replacement grip screw bushings. Supplied as a set of four.

813 Blue, set of 4 \$5.49
813-S Stainless, set of 4 \$6.95

Hex Head Grip Screws for 1911 Pistols

An easy way to improve the looks of any 1911. Precision machined hex head grip screws made from high quality tool steel, or 400 series stainless. Heat treated for long lasting wear. Attractive hex head design prevents screwdriver slips. Contoured screw heads blend beautifully with grip panels. Set of four with Allen wrench included.

803 Blue \$6.95 804 Stainless \$7.50

Exotic Cocobolo Wood Checkered Grips

These are the finest grips available for the 1911 frame. Natural exotic wood, no stains or artificial colors are used. Not only are they attractive but they are extremely functional because the wood is so hard the checkering will hold up far better than any walnut can. Favored on all custom guns and match guns alike. Checkered in the original diamond pattern.

45812 Government, Angle cut bottom, Cocobolo \$39.95
45815 Government, Bobtail™, Cocobolo \$49.95
45816 Government, slim grips \$39.95
45816-BT Government, slim grips, Bobtail™ \$49.95
45817 Government, flush bottom cut for Maxi-well \$39.95

Rebuild Kits for 1911 Frame

Includes Mainspring Cap, Mainspring Housing Pin Retainer, Hammer Strut Pin, Hammer Pin, Sear Pin, Mainspring Cap Pin, Magazine Catch Lock, Safety Lock Plunger Assembly, Barrel Link Pin, Ejector Pin, Mainspring Housing Pin, Mainspring, Mag Catch Spring. Every pin and spring needed to rebuild or complete a 1911 style frame.

814 Rebuild Kit Blue \$14.95
814-S Rebuild Kit Stainless \$17.95

Dovetail Front Sights

The best dovetail front sights available. Dependable low mount fixed sights for all types of 1911 pistols. Rounded rear corners designed for smooth carry, but deep precisely machined internal notch for an outstanding sight picture. Cross dovetail front design installs with a single cross cut using the same 65 degree cutter as the rear, is then locked in place with a single roll pin. No more hammering or swaging. Can be installed to work with any rear sight.

1624 Front Sight, Cross Dovetail Post \$19.95
1620-180 Front Night Sight, Cross Dovetail, .180 height... Ramp \$54.95

Ed Brown Fixed Rear Sight

Superior for concealed carry and abusive use. The Ed Brown fixed sight has slightly rounded edges so it won't snag on clothes or holsters, and a rebated blade for glare free shooting. Requires machining for correct installation. The night sight has tritium inserts with high visibility white outlines.

LMC 01 Fixed Rear Sight, Plain Black \$32.95
LMC 03 Fixed Rear Night Sight, Tritium inserts with white outline \$89.95

Standard Magazine Release

The original design for the 1911 pistol. Drop-in fit, machined from solid bar stock and heat treated for durability. Beautiful machine cut checkering on button. Fits all single stack 1911 frames. Use existing magazine catch spring and magazine catch lock.

854 Standard Magazine Release Blue \$19.95
855 Standard Magazine Release Stainless \$21.95

Extended Tactical Magazine Release

This part is identical to our Standard Magazine Release, except the button is extended an additional .060 for easier reach and faster magazine changes. Drop-in fit, machined from solid bar stock and heat treated for durability. Beautiful machine cut checkering on button. Does not interfere with tactical style holsters. A positive stop is machined in to prevent over-travel. Fits all single stack 1911 frames. Use existing magazine catch spring and magazine catch lock.

854-E Extended Tactical Magazine Release Blue \$19.95
855-E Extended Tactical Magazine Release Stainless \$21.95

Overize Magazine Button and Screw Only

An oversize button allows faster and easier magazine changes without shifting your grip. Great for competition or speed shooting. Beautifully checkered 40 lines per inch. The .375 diameter button has a positive stop and the 4-40 hex screw is included. Requires drilling and tapping of a standard factory magazine release.

840 Magazine Release Button Only Blue \$9.49
841 Magazine Release Button Only Stainless \$9.49

Overize Magazine Release Catch

Identical to the standard magazine catch, but drilled and tapped for our .375 diameter oversize button. The oversize button allows faster and easier magazine changes without shifting your grip, great for competition or speed shooting. Drop-in fit, machined from solid bar stock and heat treated for durability. Button has beautiful machine cut checkering at 40 lines per inch. Includes oversize button & screw. Fits all single stack 1911 frames. Use existing magazine catch spring and magazine catch lock.

842 Magazine Catch Blue w/ Blue Button \$30.49
844 Magazine Catch Stainless w/ Stainless Button \$32.49

Glock Front Sight Installation Tool

The Glock front sight is held on with a screw. Neat idea, but up until now there was no way to get to it. If you own or work on Glocks, you need this tool! This specially designed tool will slip into the many types of magnetic screwdrivers, and allow a professional installation of the Glock front sight screw. Fits all Glocks. Certain Glocks may require opening the hole in the slide just slightly.

952 Glock Sight Tool \$12.50

Ed Brown Adjustable Rear Sight

These sights are made to withstand the shock of service ammunition, with rugged, dependable features designed to please the competitive pistol shooter. Works perfect with our #1624 front sight. We recommend installation by a competent gunsmith. Available in blue only. Beware of the cheap copies being marketed for less. These are the highest quality and tightest tolerances available. Fully adjustable for both drift and elevation. Engraved "ED BROWN" on the side.

954 Ed Brown Adjustable Rear Sight \$68.95
955 Ed Brown Adjustable Rear Night Sight, 2 dot tritium inserts \$109.95

"Your quality parts and magazines I have used are beyond 1st rate. Nothing but Ed Brown Products for me."

David Keith McGuire, Sequatchie, TN

GUNS SPRINGS & ACCESSORIES

1911 Bench Reference CD-ROM

A complete manual on the 1911 written by Ed Brown, 1991 Pistolsmith of the Year. This CD gives you step-by-step instructions and detailed photos for disassembly, reassembly, maintenance and proper handling. It then goes into complete installation and fitting instructions for practically all accessories. Also included are chapters on trouble shooting and reloading. Packed full of valuable information. A must for all who work on the 1911! Use the electronic search feature, zoom in on photos or diagrams, or print a hardcopy for insertion in a three ring binder as you prefer. Runs on PC or Mac with CD-ROM drive and graphics type operating system such as Windows. Adobe Acrobat Reader included.

950-CD.....CD-ROM Bench Reference \$31.95

Ed Brown Gunsprings

Most shooters set up the gun to suit themselves depending on their load, bullet weight and grip on the gun. You should have the ejected brass land from five to ten feet away from your feet. If the brass falls on your feet, or fails to eject, you need a lighter spring. If the brass lands fifteen to twenty feet away, you need a heavier spring. It is always a good idea to have a replacement spring on hand.

Recoil Springs for Government Models

9165-G16.5 pound (Standard)\$9.95
 918-G18 pound (Heavy Duty).....\$9.95

Recoil Springs for Commander Models

918-C18 pound (Standard)\$9.95
 920-C20 pound (Heavy Duty).....\$9.95

Sear Spring

High-quality, tempered spring with extra length on the center leg that allows precise tuning of the disconnector. Helps prevent disconnector failure and gives positive sear engagement.

822Sear Spring\$4.95
 822-HC.....**Hardcore**.....\$6.95

Heavy Duty Firing Pin Spring

For use on all guns for upgrade or replacement.

908Heavy Duty Firing Pin Spring\$2.00

Light Mag Release Spring

For use on competition guns for faster magazine changes.

909Light Mag Release Spring\$2.00

Competition Mainspring for 1911

Mainsprings wear out due to age and use and should be replaced. We recommend this spring rather than the factory standard for a lighter, longer-lasting trigger pull. Plenty of power to set off even the hardest of primers.

919Competition Mainspring for 1911.....5 pack.....\$6.95

Ed Brown Pistol Bag

Combination of a padded pistol pouch, 4 padded magazine pouches, and zippered accessory pocket in navy blue Cordura with heavy handles and Ed Brown Logo patch.

965.....Ed Brown Pistol Bag\$39.95

Ed Brown Ball Cap

Top quality ball cap with Ed Brown logo. One size fits all.

961.....Ball Cap\$12.50

Ed Brown Firearm Lubricant

A special blend of synthetic oil intended for the lubrication of Ed Brown 1911's. Works perfect with both stainless and blue steel, as well as our Gen III coating.

960.....1/2 ounce bottle\$4.95

Ed Brown 1911 Bushing Wrench

Perfect for disassembling guns with a tight bushing, giving you the extra leverage needed. Made from tough polymer material which won't mar the finish on your gun. One side fits Government bushings, the other Officer's. Ed Brown Products, Inc. logo molded in. Fits all 1911 style pistols including Officer's. Color: Black.

966.....Ed Brown Bushing Wrench, Black\$3.95

"Your parts are all great quality and the 1911 Bench Reference is easy to follow for a novice like me."
Shay Ben-David

ED BROWN MAGAZINES

ED BROWN 8-PACK™ THE MOST RELIABLE, HIGHEST QUALITY 8-ROUND MAGAZINE AVAILABLE

The Ed Brown 8-Pack™ was engineered as a true 8 round magazine. It has all the features of the original 7 round magazine that has proven itself over the last century. Features that you know it should have, like a steel follower, heavy duty spring, and super-tough base pad.

The magazine tube has been lengthened and the base pad wraps around securely, to properly accommodate the 8th round while keeping the original ultra-reliable follower design. The integral base pad easily removes for disassembly and cleaning of the magazine. A special hydro-finish process makes this magazine tube and follower very slick, while staying dry to repel dirt and burnt powder. This makes it super easy to load and insert in the gun by eliminating any extra friction against the follower.

The non-slip, oversized base pad allows for a secure grip no matter what the conditions. The 88 blank number templates on the bottom allows you to easily number and track usage of your mags from 0 up to 99 if you desire (think digital numbers on a standard alarm clock). Large, easy to read numbers are laser engraved on both sides of the magazine, in addition to the 8-Pack™ logo.

If you want the most reliable, highest quality 8 round magazine you can buy, look no further than the Ed Brown 8-Pack™.

848..... 8-Pack™ 8-round Magazine..... 45 ACP\$34.95
848-PAD..... 8-Pack™ spare bumper pad & base lock.....\$6.95

NEW & IMPROVED! 7 ROUND MAGAZINE

The classic, most reliable design, still the best available. A heat treated stainless steel body with steel follower and heavy duty spring provides flawless feeding. Outstanding reliability with all types of ammo. Comes with Ed Brown removable base pad installed. When base pad is removed, magazine fits flush with frame and reduces printing, making a perfect fit with Ed Brown Bobtail™ 1911's, or full size 1911's intended for concealed carry.

Now incorporating a new follower and lip design which allows more reliable feeding with today's popular hollow point bullets. High visibility numbers are lasered on both sides of the mag so you can see at a glance how many rounds are in the magazine. The best 1911 mag just got better!

847 7 Round Magazine.....45 ACP.....\$29.95

KOBRA CARRY T-SHIRT
