Protecting
Your Investment

For All Your Scopes

The Devtron Scopecoat™ is constructed of the highest quality neoprene (2mm or 6mm thick) laminated with nylon. Its simple design safeguards any kind of scope from dings and scratches, dust, dirt and moisture. The Neoprene has a 5% moisture absorbency which takes moisture (condensation and sweating) away from the scope and helps protect it from rust & corrosion. The nylon shields against the elements.

All Scopecoats are available in our standard colors of Black and Camouflage unless otherwise noted. XP-6 Flak Jacket Scopecoats are available in Black only.

Scopecoat Sizes Available	
 <p>2 mm Nylon Neoprene Nylon</p>	2 mm Standard actual thickness (2mm)  Black, Camo and Custom Colors
	XP-6 Flak Jacket actual thickness (6mm)  Black Only

What Size Scopecoat Should I Use?

The correct fit is personal preference - either relaxed or snug - both are correct.

Scopecoat is made from 2 and 6 mm-thick Neoprene™ and will stretch approximately 10% in length and circumference. Scopecoat fits a variety of scopes. We also make Scopecoats for specific models of scopes. When deciding the right size Scopecoat, measure the overall length of your scope in inches and the objective in millimeters.

Listed are the standard Scopecoat sizes. If your optic doesn't match the sizes, types or models listed, contact Scopecoat for a custom order. For custom orders, provide length of your scope in inches and objective diameter in millimeters.

STANDARD SCOPECOAT – 2 mm thick

Mini	5.75" X 20 mm	Large	12.5" X 42 mm
Small	8.5" X 20 mm	Large 50.....	12.5" X 50 mm
