

# BSA<sup>®</sup>

S P O R T   &   R E C R E A T I O N A L   O P T I C S

Once famous for hunting rifles and those classic old British motorcycles, BSA is now gaining the same kind of excellent

reputation for hunting scopes and keeping them at affordable prices. BSA has two different types of hunting scopes, one strictly for hunting and the other for hunting and target/varmint shooting. Our hunting scopes are as bright and tough as we can make them, and our target/varmint scopes have all of the features and newest innovations needed to make shooting with them accurate and a pleasure. A varied selection of specialty scopes are offered, plus nine spotting scopes in different price ranges. And to top it off BSA offers 3 different families of binoculars from entry level to mid-range. We would like to go along with you the next time that you go shooting. Take a good look at BSA. You'll like what you see.

## BSA BIGCAT

The BigCat has all of the features that an avid hunter could ask for. A longer eye relief. Finger adjustable windage and elevation knobs. A three piece objective lens system for sharper resolution, less distortion and better color. And for *extra* brightness, the lenses are 14 layer, *fully multi-coated*. They are finished in BSA's Shadow Black®, a sprayed-on, baked rubber coating which creates a soft, non-glare finish. There are six BigCat models, all with one piece tubes, 3 come with large 30mm tubes. For a list of complete specifications, see page 22/23.

BC 3.5-10 x 42

BC 1.5-4.5 x 42

BC 3-9 x 42

BC 4.5-14 x 52

MODEL NO.	MAGNIFICATION
BC27X42	2-7X
BC3510X42	3.5-10X
BC4514X52AO	4.5-14X
BC1545X42/30	1.5-4.5X
BC39X42/30	3-9X
BC3510X42/30	3.5-10X

See page 22 for a list of complete specifications.

## BSA CATSEYE

The BSA CATSEYE was created to help hunters see game better when it gets hard to see. Camera quality glass was used, to give them a clear, undistorted, image. The objective and ocular lenses were then *multi-coated* to provide the brightest possible view without glare and reflections. The ocular lens was also made with a larger diameter than most scopes, helping to create a big 4" to 5"

eye relief without reducing your field of view, and a larger exit pupil that allows your eye to receive as much light as possible. When you add up all of the design features, plus how bright they are, you'll agree that the BSA CATSEYE is a very smart hunting scope. All BSA CATSEYE models are made of one-piece aluminum tubing\*, and then covered in Shadow Black, a sprayed-on, baked, rubber coating that gives them a reflection-free, soft black finish.

FM 1.5-4.5 x 32. Its compact size and low magnification make this scope ideal for black powder and shotguns.

FM 3.5-10 x 50

### FULLY MULTI-COATED

A new look for Catseye. This year we fully multi-coated all of our lenses. This gives a brighter, more contrasty subject when hunting. That's Catseye's objective.

All Catseye scopes are waterproof, fogproof, and shockproof, and come with a limited lifetime warranty.

FM 4-16 x 50 AO

There are three BSA CATSEYE models with Power Bright reticles.

A very nice scope to have when the day turns dark and nasty. It has an illuminated reticle that gets brighter each time you push the 7 position brightness control button. You'll never lose sight of your reticle. A three volt lithium battery is included. You also get all the features of other BSA CATSEYE models.

FM 1.5-4.5 x 32 IR

FM 3-10 x 44 IR

FM 3.5-10 x 50 IR

The Power Bright reticle turns a bright red when switched on. This is a tremendous aid when hunting in low light conditions.

MODEL NO.	MAGNIFICATION
FM1545X32	1.5-4.5X
FM310X44	3-10X
FM3510X50	3.5-10X
FM416X50*	4-16X
FM624X50*	6-24X
FM1545X32IR	1.5-4.5X
FM310X44IR	3-10X
FM3510X50IR	3.5-10X

Finger adjustable windage and elevation knobs with 1/4 MOA click adjustments. Caps can be removed to re-set the turret knobs to zero.

See page 22 for a list of complete specifications. \*These models have two-piece aluminum tubes.

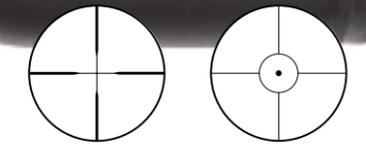

Finger adjustable windage and elevation knobs have knurled caps and ball bearings to make them easy to turn even when wearing gloves.

The focusing ring easily adjusts for your eye so that your viewing image and reticle always look sharp, even if you wear glasses.

The heavier posts on the reticle not only help you to see better in low light, they help make quick target acquisition easier. The center is designed for precise shot placements.

# BSA HUNTSMAN HUNTING SCOPE

BSA Standard Reticle Deer & Turkey Reticle

HM 3-9x44

HM 3-9x40

HM 4-16x40

Here's an all-purpose hunting scope that has everything a hunter could wish for, including a surprisingly affordable price.

It has *multi-coated lenses* to make game appear bright and sharp with less reflections.

A *long eye relief* to make it easier to get on target when game is on the move. Easy, *finger adjustable windage and elevation* adjustments.

*Fast focus eyepiece*. A simple, clean design with *one piece aluminum tubing* that is covered with a non-reflective black matte finish. It is *waterproof, fogproof and shockproof*, plus it has a limited lifetime warranty. The Huntsman has just about everything that the expensive scopes have except for the expensive price.

MODEL NO.	MAGNIFICATION

HM39X40TV	3-9X
HM39X44	3-9X
HM312X50	3-12X
HM416X50	4-16X
HM618X40AO	6-18X
HM4X32DT*	4X
HM1545X32DT*	1.5-4.5

\*with BSA's new deer & turkey reticle

See page 22 for a list of complete specifications.

# BSA DEERHUNTER HUNTING SCOPE

The BSA DEERHUNTER was designed for the hard working man that hunts the same way. He wants a quality scope that is accurate and will hold up day after day. He knows that when he's not hunting, his rifle will be hanging in the back of a pickup truck, not over his mantle. He also wants a bright scope that has all the necessary features, but doesn't want to pay as much for it as he did his rifle. The BSA DEERHUNTER is bright, accurate, tough and priced right. In now comes in a new black matte, non-glare textured finish.

DH 3-9 x 32

DH 3-9 x 32SIL

DH 2.5 x 20 For Shotgun and Black Powder. Also available in 1.5-4.5 x 32

Camera quality glass lens are ground to give an undistorted, clear image. They are fully coated on all air to glass surfaces to eliminate reflections and glare.

ALL OF THE TEXTURED DEERHUNTER MODELS COME WITH A ONE PIECE, ONE INCH TUBE

DH 3-9 x 40

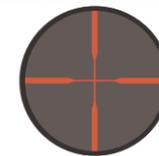

A DH 3-9 x 50 is also available. All Deerhunter scope chambers are filled with nitrogen gas and then sealed to make sure they are waterproof and fogproof.

DH 3-9 x 40 SIL

DH 3-9 x 40IR

The 3-9 x 40 IR is available with an illuminated reticle that glows bright red when switched on. Just dial the 11 position rheostat to make it as bright as you want. Great for dark backgrounds.

FINGER ADJUSTABLE windage and elevation turrets have 1/4 clicks and easy to remove caps.

MODEL NO.	MAGNIFICATION
DH25X20	2.5-20X
DH4X32	4X
DH39X32	3-9X
DH39X32SIL	3-9X
DH39X40	3-9X
DH39X40SIL	3-9X
DH2510X44	2.5-10X
DH39X50	3-9X
DH1545X32	1.5-4.5X
DH39X40IR	3-9X

See page 22 for a list of complete specifications.

Amber tinted dust covers are included. They also keep your lenses clean when not hunting.

Easy focus eyepiece keeps reticle sharp for your eyesight.

# BSA PLATINUM TARGET SCOPES

This is a scope that a varmint/target hunter will love. It has all of the "good looks" that you could ask for, but its real beauty comes from within. The optical and mechanical tolerances inside the scope are extremely close and tight so the consistency of accuracy is great. The lenses are camera quality and the 1/8 MOA clicks on the windage and elevation turrets are precise. And you can forget about parallax problems when dialing in your distances. All of the mechanics of a good target scope were done right.

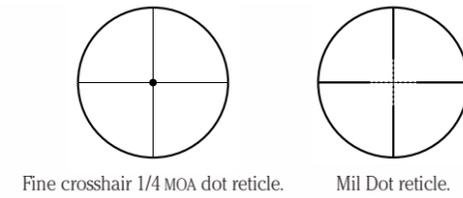

Dial in your distance and forget parallax problems.

Finger adjustable "reset to zero" knobs let you change elevation and windage in precise 1/8 MOA click adjustments. The capless knobs have large easy to read numbers, and are oversized so they can be manipulated even when wearing gloves.

MODEL NO.	MAGNIFICATION
PT625X44TS	6-25X
PT832X44TS	8-32X
PT624X44MD*	6-24X
PT832X44MD*	8-32X

\*with Mil Dot reticle

See page 22 for a list of complete specifications.

Included are two (3" and 5") sunshades that can be screwed together if you need to shoot almost directly into the sun. Screw on metal dust caps standard.

The 1/8 MOA clicks are measured very exactly so that when you make adjustments you can be sure that each click will be consistent with the others. The system is strong enough to hold zero through years of shooting.

For our lenses we use very pure grades of expensive optical glass, ground and polished to exacting standards for a perfect optical curve. They are then chemically multicoated (including the outer surface) to eliminate glare and reflections and to provide maximum light transmission.

Adjustable focus ring keeps your reticle always looking sharp even if wearing glasses.

A generous eye relief of 3.5 to 4 inches helps relieve tunnel vision.

Super smooth focusing. Our zoom system will stay on target when changing power. The tracking cells which hold the lenses, fit into the tube with absolute minimum tolerances. They won't shift under recoil so your point of impact won't either.

PT 6-24 x 44TS

The nitrogen filled scope chambers are multiple sealed which makes them waterproof, fogproof, and shockproof.

For a complete list of Platinum models and specs, see page 22.

# BSA CONTENDER TARGET/VARMINT/BIG GAME

The Contender's clean new design and thoughtful innovations make it a tremendous buy for the experienced shooter. The combination of its many shooting features alone, make it a best seller, not counting its new appearance and the sharpness of its lenses. No one else offers a rifle scope of this quality with as many nice touches for the money as BSA.

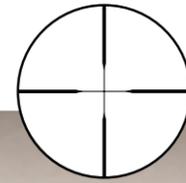

The BSA winged logo is stamped in the Shadow Black® coating on the eyepiece. The large gold numerals on the rubber trimmed power ring have been intentionally angled toward the shooter. This makes them more visible and easier to see when you are in a shooting position.

The objective and ocular lenses are multicoated to make your target look brighter and to give it more contrast. The coatings also help to reduce bright glare and reflections. Another nice touch to the Contender's overall Shadow Black® finish is the contrasting non-slip, rubberized coating on the focusing ring, power ring and turret caps.

All of the new BSA Contender models come in Shadow Black® finish and have standard BSA reticles.

CT 3-12 x 40

CT 6-24 x 40

The eyepiece focuses from a -4 diopter to a +4 diopter, which allows any shooter to clearly focus his eye on the duplex reticle.

A 4" glare resistant sunshade and screw-in metal dust covers are included.

The BSA Contender has finger adjustable windage and elevation knobs. A lot of scopes have 1/4 MOA click adjustments, but the BSA Contender has 1/8 MOA click adjustments to provide the most precise adjustment possible. Caps can be removed so that the turret knobs can be re-set to zero.

See page 22 for a list of complete specifications.

\*with illuminated reticle

The focusing mechanism on the adjustable objective lens is designed so that it is possible to focus as sharply at 10 yards as it is at 300 yards.

Here's an example of how the re-set to zero knobs work. Sight in your rifle for windage and elevation (say at 100 yards) at the range. Then reset the knob to zero. When in the field shooting, and you want pinpoint accuracy at 300 yards, just dial up. After shooting that distance, redial back to zero (your original mark). It makes distant shooting simpler.

# BSA RED DOT

The BSA Red Dot is a wonderful light weight sight for all types of shooting, especially close in.

It is the perfect sight for pistols and an ideal sight for mounting on a shot gun when hunting turkeys. Bow hunters have even discovered it. When you turn the sight on, a small bright red dot (4MOA) appears in the center of your scope. You can then adjust the brightness of the dot, depending on the brightness of your surroundings. Our Red Dots come in BSA's new Shadow Black rubber coating, silver or matte black anodized finish, and you can choose either a push-button brightness control, or 11-position click rheostat.

PD 30 shown without extension tubes, as it is used on most pistols.

The PD 30 comes in Shadow Black or Silver. They are shown from both sides below, with rings and extension tubes (included).

PD 30 BK

PD 30 SIL

An illuminated red dot, engineered for hunting, plinking, and target shooting with guns, bows or pistols. An 11-position rheostat switch has a full range of light intensities. Dot reticle has been pre-focused so the aiming point always appears against the target. 30mm tube reveals a 30% wider field of view than standard tubes.

The Red Dot RD30SB, shown mounted on bow, makes a great archery sight.

The matte black anodized models come in 2 sizes. RD30 (30mm tube) and RD42 (42mm tube).

RD 30

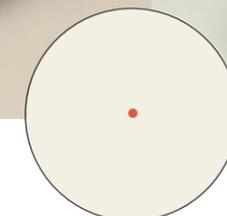

RD 30/22 SIL

RD 30 SIL

RD 30 SB Shadow Black

Our 11-position click rheostat Red Dot, comes in matte silver. Great on stainless finish guns or for two-tone combinations.

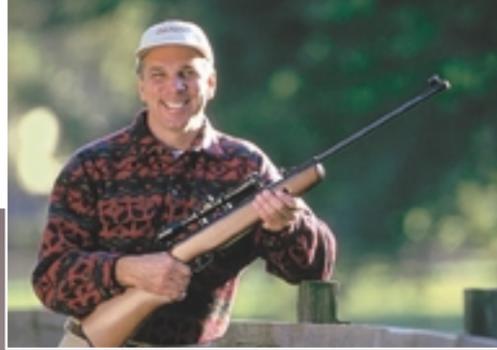

5 MOA size red dot.

Dial in how bright you want your red dot, with the 11-position click rheostat. 4 sizes in Shadow Black. RD 30 SB, RD 30/22 SB, RD 42 SB, and RD 50 SB.

*BSA's Shadow Black coating is a special heat process that bonds a strong rubber skin directly onto the aluminum, making a beautiful, non-glare, soft black finish.*

# RIMFIRE & AIR RIFLE SCOPES

S 4 x 32 WR

## .22 RIFLE SCOPES

S 4 x 32 WR (.22 Special) It comes with rings and is parallax-free at 50 yards. It's not only a great rimfire scope, it's ideal for air rifles. A 3-9 x 32 is also available and both sizes come in Silver. S39X32WR, S39X32WRSIL, S4x32WRSIL.

MODEL NO.	MAGNIFICATION

A fixed 4 power  
Air rifle scope  
with A/O down  
to 10 yards.

## LASER SIGHT

Unbeatable for shooting from medium to close range. It projects a laser beam that looks like a small red dot onto your target. Adjustable for windage and elevation. Comes with two sets of mounting rails. .22/Air rifle and "Weaver style" bases. Has two switches, one on top of the body and the other is a momentary pressure sensitive switch and wire that mounts on the gun.

## CROSS BOW SIGHT

CB4x32. This ultra compact scope, 8.75 inches long, has 5.5 inches of eye relief and a special reticle which provides the crossbow user with a variety of aiming points, depending on the distance of the target. The CB4x32 is fully coated, waterproof, shock proof, has finger adjustable windage and elevation and is parallax free at 40 yards.

## PISTOL SCOPES

PS2x20. A simple but effective pistol scope. Parallax set for 50 yards and the click value is 1MOA. This scope also comes in a matte silver finish, PS2x20SIL.

## BSA BORESIGHTER

BS 30. It allows you to sight in your scope before fine tuning your shots. Save time and ammunition. Has 16 studs for .177, .22, 6mm/.243, .25, 6.5mm, .270, 7mm, .30, .32, .338, .35, .375, .44, .45, .50, adjustable, 16-12gs. calibers and shot gun gauges. Heavy duty hard case included.

# BSA SPOTTING SCOPES

KBC1030X50

There's nothing better than staying on top of your sport. Whether you are target shooting, scoping a distant hill for game, or just wanting to see something better. BSA makes a range of spotting scopes from expensive to low budget so that everyone can enjoy the fun of taking a look at something close up.

## BSA SPOTTING SCOPE FIELD KITS

BSA offers three spotting scope kits. In addition to the spotting scope, each kit includes a tripod, a window or fence rail mount and a hard, PVC, carrying case. KBC 10-30 x 50; KCE 20-60 x 60; KDH 20-60 x 60.

## THE BIGCATS™

Compact. Waterproof. Wide angle. Fully multi-coated. Bright. They're top of the line by anyone's standards. These two Shadow Black BigCats are really something. The BigCats have three piece, camera quality, objective lenses and come with a tripod. This means sharper resolution, less distortion, and better color. It's hard to believe that all of this is so compact...so easy to take with you. BC 15-45 x 60; BC 10-30 x 50.

BC 15-45 x 60

DH 20-60 x 60  
Zoom power scope with 60mm objective and deluxe tripod. Scope comes in Shadow Black. Also available: DH 15-45 x 50.

# BSA BINOCULARS

*They just look right.*

These rugged, yet beautifully-styled binoculars, have all the features you want for sharp, easy to focus viewing including multi-coated, wide angle lenses. They're perfect for observing nature, sporting events, hunting or any outdoor activity. Finished in a tough, black rubberized coating, these binoculars will stand up to what ever you can dish out. Comes with neckstrap and carrying case. AT8X40WA; AT10X50WA; AT832X50WA.

## BSA CROSS COUNTRY

Nitrogen filled, waterproof and fogproof binoculars. Because of their pop-up eyecups, they are great for eyeglass wearers. They have attached objective lens covers and come with carrying case and neck strap. Two medium sizes: 8 x 32 and 10 x 42mm and two compacts with the same great features: 8 x 26 and 12 x 26.

CC 8 x 32

CC 10 x 42

BSA makes large and compact entry level binoculars for general use. They are rubber covered to make them shock resistant and to prevent slipping. There are 6 large size binoculars 7 x 35, 10 x 50, 12 x 50, 20 x 50, 7-21 x 40. And there are 5 compact size binoculars in all. 3 in Black; 8 x 21; 10 x 25; 12 x 25; and 2 in camo; 8 x 21; 10 x 25.

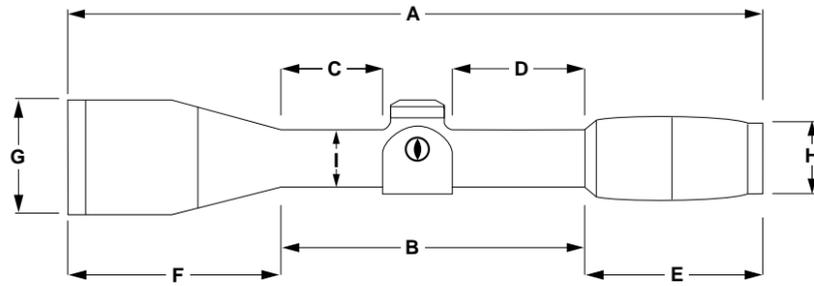

Full size 20 x 50 binocular.

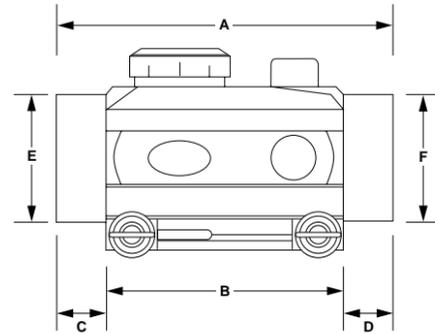

Compact 10 x 25 Camo and black 8 x 21 shown.
