### BASIC RULES OF FIREARMS SAFETY

- Learn the mechanical and handling characteristics of the firearm you are using.
- Always keep the muzzle pointed in a safe direction, finger off the trigger, and safety 'on.'
- Firearms should be unloaded and securely stored when not in use.
- Be sure the barrel is clear of obstructions before using.
- Be sure of your target and what lies beyond it before you shoot.
- Wear shooting glasses and hearing protection when you shoot.
- Never climb a tree or fence with a loaded firearm.
- Don't shoot at a hard surface or at water.
- Never transport a loaded firearm.
- Avoid alcoholic beverages or drugs when shooting or handling a firearm.

See also p. 46 for gun safes and p. 48 for a Free safety offer.

- S H O T G U N S -

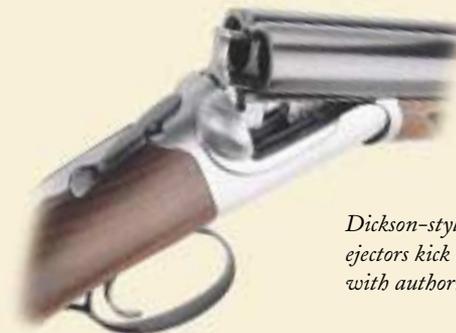

At last, there is an American made side-by-side in production that can compete with the finest European and British handcrafted double shotguns. In the Ruger Gold Label, Ruger's modern manufacturing techniques and materials combine precision and durability with aesthetic and dynamic harmony, once achieved only through months of skilled hand labor. The result is a premium quality shotgun with the performance and reliability you expect from Ruger.

At only 6 1/3 pounds, the Gold Label balances gracefully, with the lively responsiveness demanded by the upland game hunter. Lightweight hammer-forged barrels, relieved forcing cones, and thin, steel-shot-compatible screw-in choke tubes ensure uniform patterns, pattern flexibility, and superb handling dynamics. A matte steel rib and gold bead sight draw the eye naturally to game or clays as surely as the graceful stock and splinter forend guide the hands toward the target.

The Gold Label is a work of art, to be cherished during your lifetime, then passed on to another who exults in the joy of being afield on a crisp fall day.

*Round, finely polished, brushed stainless steel receiver has clean lines with no exposed pins or screws.*

*Dickson-style selective ejectors kick out empties with authority.*

# RUGER RED LABEL OVER-AND-UNDER SHOTGUNS

*Superior performance backed by years of experience*

For over 25 years, Ruger has been producing high quality over-and-under shotguns that offer the unique combination of classic beauty and legendary Ruger reliability. Since the Red Label's introduction, a wide range of models has been added to meet the unique needs of game hunters and competition shooters alike. So, whether you hunt mallards, flush quail, or compete at skeet or sporting clays, there's a Ruger shotgun designed for your specific purpose.

You can choose a Ruger Red Label shotgun in 12, 20, or 28 gauge, each with a frame perfectly scaled to its gauge. Or, if you prefer .410 bore, a tube set is available for your 28 gauge Ruger shotgun. Your shotgun can be ordered with either a pistol grip stock or a straight grip English-style stock, a choice of three different barrel lengths, and a plain or engraved receiver. Blued models feature finely polished brushed stainless steel receivers, hammer-forged alloy steel barrels and premium American Walnut stocks, while All-Weather models feature stainless steel components and black synthetic stocks. All exposed stainless steel components on Target Grey® models feature Ruger's unique, corrosion resistant, low-glare finish. In total, Ruger offers a family of 27 superior shotgun models that provide dependable service for every shotgun sport.

The Ruger Red Label over-and-under shotgun features hammer-forged steel barrels, virtually unbreakable firing pins, and a dovetailed, free-floating rib. The locking system, sleek and compact, is considered among the strongest ever built for over-and-under shotguns, and the barrels are back bored for softer recoil and more uniform patterns. In every detail of styling, fit and finish, it meets standards set by handmade guns...except the Ruger Red Label will fit well within your budget.

Robert R. Stutler is a retired U.S. Marine Corps Officer, the son of an Arizona gunmaker, and a 17-year veteran of Sturm, Ruger & Co., Inc. Bob manages both Ruger Firearms and Ruger Investment Castings operations in Arizona. He is an avid hunter and competitive shooter. He first appeared in the January 1956 American Rifleman magazine for a 341-yard one-shot kill of a Pronghorn antelope in 1955 when he was 12 years old. He is shown here with a magnificent Cape buffalo he downed in Africa in 2002 with a Ruger M77 MKII Magnum Rifle in 458 Lott.

# RUGER CENTERFIRE BOLT ACTION - RIFLES -

Since its introduction in 1968, the original Ruger M77 and its descendants have been recognized as the leaders in the field of centerfire bolt action rifles. The Ruger diagonal front-screw bedding system firmly anchors the receiver into the stock inletting more effectively than any other system devised. Its one-piece bolt has proven to be one of the strongest on the market, standing up over the years to such magnum cartridges as the 375 H&H and 416 Rigby.

Today, Ruger centerfire bolt action rifles are available in both blued and stainless steel, in right- and left-handed configurations, and in twenty-seven calibers ranging from the **New** 204 Ruger at 4,225 feet per second to the powerful 458 Lott. Ruger M77 Mark II rifles are suitable for a wide variety of shooting requirements. For hunters who trek far into the wilderness for their game, there is the 5 3/4 pound M77 Mark II Compact; for those who confront the largest and most dangerous game, the deluxe Ruger Magnum rifle will fill the bill; and for long-range target shooters, the heavy-barrel, supremely accurate Ruger M77 Mark II Target Model with target trigger is the rifle of choice.

# RUGER CENTERFIRE BOLT ACTION RIFLES

*A broad range of choices*

When you choose a Ruger centerfire bolt action rifle, you have a wide range of options before you. All now have precision hammer-forged barrels for superb accuracy, in lengths ranging from 16 1/2" for the Compact Rifle to 26" for the supremely accurate Target Rifle. Material choices include blued alloy steel or stainless steel barreled actions, and American Walnut, laminated hardwood, or All-Weather synthetic stocks. All exposed stainless steel components on Target Grey® models feature Ruger's unique, corrosion resistant low-glare finish. In total, the M77 Mark II family includes over 100 top quality rifles to meet your exact needs.

The M77 Mark II rifle will also meet your need for a reliable, accurate and convenient scope mounting system. You will never have to buy traditional separate scope mount bases, because M77 Mark II rifles are produced with Ruger's patented integral scope mounting system. Ruger scope rings attach directly to the receiver's machined mounting surfaces, eliminating a potential source of looseness and inaccuracy in the field. Ruger scope rings are included at no extra cost, a \$60 value. No other American rifle maker offers this system, but you get it with every Ruger bolt action rifle.

The **New** 204 Ruger is the most sensible of all the latest smallbore centerfire cartridges. This 32 grain, 20 caliber bullet offers an amazing 4,225 feet per second muzzle velocity with a standard headsize case.

Stepping up in power, Ruger M77 Mark II's are now available in the compact but powerful new 7mm WSM and 270 WSM cartridges. For close-range big game stopping power, the 350 Rem. Mag. is now back. Ruger rifles let you choose which caliber is right for you.

# RUGER 17 CALIBER ROTARY MAGAZINE BOLT ACTION RIFLES

*Higher velocity, flatter trajectory, superior accuracy*

Two-thousand-two marked the debut of the Ruger Model 77/17 rifle. This rotary magazine bolt action rifle is chambered for the exciting new 17 caliber Hornady Magnum Rimfire cartridge. The 17 HMR is a high-velocity performer that is the answer to a varmint hunter's prayers. The 17 HMR propels a 17-grain, 17 caliber high-performance jacketed synthetic-tip bullet at over 2,550 feet per second, more than 25% faster than a 22 Magnum. This ultimately means a flatter trajectory and superior accuracy for the target range and for small game hunting and, since it's a rimfire, it's quiet and economical to shoot.

Choose from three popular models of the Ruger 77/17 including blued with walnut or synthetic stock or the Target Grey® 77/17 Varmint Model with low glare stainless steel components and a black laminate stock. All Ruger 77/17 rifles incorporate a Ruger patented nine round detachable rotary magazine and Ruger's patented scope mounting system with integral scope bases and medium-height rings at no extra charge.

*Ruger has more 17 HMR options to choose from, including the Ruger 10/17 Autoloading Rifle (see page 21), the Ruger Model 96/17 Lever Action Rifle (see page 19), the Ruger New Model Single Six, and Ruger New Model Single Six Hunter Single Action revolvers (see pages 36 & 37).*

*Only Ruger rifles feature Ruger's dependable rotary magazine which first appeared in 1964.*

*Patented Ruger Scope Mounting System's integral scope bases and medium-height rings are included (a \$60 value).*

### COMPARATIVE TRAJECTORIES

# RUGER ROTARY MAGAZINE BOLT ACTION RIFLES

*Bolt action quality...rotary magazine convenience*

In 1983, Ruger responded to the many shooters who desired a high quality, adult-size 22 rimfire rifle, built to centerfire standards of strength, accuracy, and aesthetics. The result was the Ruger Model 77/22 rotary magazine bolt action rifle. Unique among rimfire rifles, the Model 77/22 incorporates Ruger's patented detachable rotary magazine, plus the three-position safety of the centerfire Ruger M77 Mark II. Elegant, innovative, and moderately priced, the 77/22 has brought a new level of quality and technical excellence to small-game hunting and target shooting.

1990 marked the debut of the 22 Win. Magnum Rimfire version of the Ruger Model 77/22, followed in 1994 by a centerfire 22 Hornet version. The action design was so sound that in 1998, the Ruger Model 77/44 was introduced in the powerful 44 Magnum cartridge, a proven brush and timber caliber for whitetail deer-sized game. All feature rugged and reliable Ruger detachable rotary magazines.

Like the larger M77 Mark II rifles, Ruger's rotary magazine bolt action rifles offer you many choices: five calibers; American Walnut, laminated hardwood, or synthetic stocks; and blued alloy steel or corrosion resistant stainless steel components.

## S I N G L E   S H O T   R I F L E S

*The best modern single shot... 22 calibers to choose from*

Today, one name stands out far above the rest in the challenging sport of single shot marksmanship – the Ruger No. 1.

The No. 1 is the ultimate evolution of the single shot rifle. Its smooth, sculptured lines are reminiscent of the hand-made firearms of a less hurried era. The breech mechanism is strong, simple, and compact, and is ideally suited to handle both today's powerful cartridges and the classics of yesteryear. The ejector mechanism, which can be adjusted to provide extraction only, is designed to provide maximum leverage at the point where the ejector engages the cartridge case. The sliding shotgun-type tang safety provides instant visibility and accessibility.

The Ruger No. 1 is available in a wide variety of chamberings, from the exciting **New** 4, 225 fps 204 Ruger to the powerful 458 Lott cartridge. Configurations range from Light Sporter to Varminter to Tropical and International. Whatever the caliber, the Ruger No. 1 is a rifle attuned to the needs of a very special class of shooter...one who is confident in the ability to deliver the goods with one well-placed shot, whether the target is a 400-yard X-ring or a charging Cape buffalo.

Ruger No. 1 Light Sporter • 1-A

Ruger No. 1 Standard • 1-B  
*Now available in new 204 Ruger.*

*New 204 Ruger features a 32 grain, 20 caliber bullet and a 4,225 fps muzzle velocity!*

RUGER MODEL 96  
LEVER ACTION RIFLES

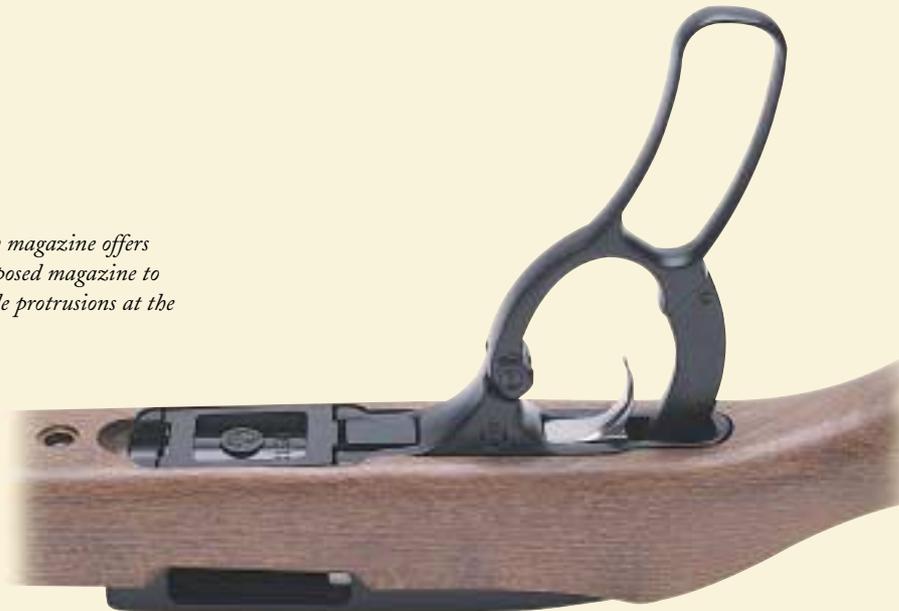

*The speed you need... in rifles that are rugged, reliable, and ready*

For those seeking a rifle with Old West styling and the practical performance demanded on the American frontier, Ruger offers its Model 96 lever action rifles. Ruger lever action rifles are compact, rugged, and reliable, and offer quick follow-up shots when needed, with just a brief flick of the wrist. The enclosed action design protects against dust, rain, or snow, making these lever actions dependable companions for the open range.

Ruger lever action rifles are designed to accommodate a low, centrally mounted scope for comfortable, instinctive, and accurate shooting. On the 96/44, the patented Ruger scope-mounting system is manufactured integrally with the steel receiver, so that today's advanced optical sights can be solidly mounted. A pair of medium-height Ruger scope rings is included at no extra charge. The 17 HMR and 22 WMR caliber lever action models feature a **new** scope base that accommodates either Weaver-style rings or standard tip-off mounts, so you can mount the optical sight of your choice.

All Ruger Model 96's feature a sliding cross-button safety and Ruger's virtually indestructible, detachable rotary magazine, constructed of high-impact polymer with stainless steel lips and ramps to guide the cartridge into the chamber. Ruger Model 96 magazines have a capacity of four 44 Magnum cartridges and nine cartridges in either 22 Magnum or the new, high-velocity, flat shooting 17 HMR version.

*Unique, removable rotary magazine offers superior reliability, no exposed magazine to dent and no uncomfortable protrusions at the rifle's balance point.*

*Short-throw lever (only 54 degrees) operates with a flick of the wrist for fast repeat shots when needed.*

# RUGER RIMFIRE AUTOLOADING RIFLES

*Celebrating 40 years as the World's leading autoloading rimfire rifle*

Since the first Ruger 10/22® was introduced in 1964, over 4 million have been produced - making it one of the most successful rimfire carbines ever offered. In order to celebrate the tremendous success of the Ruger 10/22 over the past 40 years, Sturm, Ruger is proud to offer three exciting new models for 2004. The 10/22RB-40 is a special anniversary edition of the original 10/22 carbine and includes a unique nickel-silver medallion inlaid into its hardwood stock. In addition to the standard black magazine included with all Ruger 10/22's, each 40th Anniversary Ruger 10/22 carbine also includes a unique 40th Anniversary Edition clear magazine with a red rotor.

Also new for 2004, Ruger is introducing a rifle version of the 10/22. The 10/22RR Rifle features a slimmer stock, longer barrel, flat rifle buttplate, ramp front sight, and no barrel band for a cleaner appearance. For the shooter who enjoys the feel of a quality rimfire rifle, the 10/22 Rifle is the choice for you.

Finally, Ruger is proud to introduce the 10/17 Rifle, chambered in the extremely popular, flat-shooting 17 HMR, which took the shooting world by storm last year (see trajectory chart, page 13). The Ruger 10/17 Rifle features a solid steel receiver and integral scope mounts like the popular 10/22 Magnum but incorporates the new 10/22 Rifle stock. It also has luxury sporting rifle details such as a 20 inch tapered barrel and a centerfire band-type rifle front sight.

Ruger 40th Anniversary 10/22 Carbine • 10/22RB-40

# RUGER CENTERFIRE AUTOLOADING RIFLES

*A wide range of choices for forest, range or ranch*

Ruger offers you an outstanding choice of compact, lightweight, autoloading rifles and carbines in both rifle and pistol calibers. Each is Ruger-reliable and will serve you well for many hunting seasons.

The Ruger Mini-14 rifle is chambered for the popular and proven 223 Rem. cartridge and has an adjustable rear sight. The Mini-14 employs a simple, rugged version of the Garand breechbolt locking system, with a fixed-piston gas system and self-cleaning moving gas cylinder. Since its introduction in 1974, the Mini-14 has proven itself many times over, in farm and ranch use, and in law enforcement and security applications.

In 1982, Ruger introduced the Ruger Ranch Rifle, an updated Mini-14 with integral scope bases, a patented recoil buffer system, and side ejection to clear a low-mounted scope sight. The Ruger Mini Thirty made its debut in 1986. Chambered for the widely accepted 7.62 x 39mm cartridge, the Mini Thirty has proven itself an ideal autoloader for deer-size game at medium ranges.

Chambered in 44 Magnum, the Ruger Deerfield Carbine is the result of over 40 years of continuous improvement. The Deerfield Carbine employs a patented, flush mounted, 4-round detachable rotary magazine, perfectly adapted to rimmed cartridges. The Deerfield is powerful, light, handy, and lives up to Ruger's reputation for reliable service in the field. It's the perfect deer rifle for the 21st century.

# RUGER CARBINE

*Time-tested concept. Modern refinements and materials.*

Lightweight and compact, the Ruger Carbine is a versatile firearm that fully accommodates the needs of sporting use, personal defense, and law enforcement. Ruger engineers have combined 10/22 and P-Series features to create a reliable autoloading rifle that uses the same magazines and ammunition as the Ruger P-Series pistols.

The Ruger Carbine has built-in safety features including a combination firing pin block and bolt lock. The firing pin and bolt lock is deactivated only when the trigger is pulled. In addition, a manual cross-bolt safety is located at the rear of the trigger guard. For inspection and cleaning, a slide stop locks the slide open.

Ruger has made full use of its expertise in precision manufacturing techniques and advanced synthetics to maximize the Carbine's performance and to keep it within your budget. The Ruger Carbine features a chrome-molybdenum steel barrel, receiver, slide and music-wire recoil spring, and features a high-impact synthetic stock with a rubber buttpad. Integral scope mounts are part of the receiver design, and rear sights include either open or Ghost Ring options.

*Receivers are machined to accept patented Ruger scope mounts.*

*Adjustable "Ghost Ring", large aperture rear sight is available on PC4GR and PC9GR models.*

# RUGER MUZZLELOADING RIFLES

*A favorite of black powder sportsmen around the world*

Ruger introduced its first muzzleloading rifle in 1997 to satisfy those hunters who enjoy the challenge of this traditional black powder single shot sport but want the advantages offered by modern designs.

The Ruger Model 77/50 in-line muzzleloading rifle is an advanced black powder bolt action single shot design offering significant advantages over traditional side-hammer percussion rifles. The flame path from the cap through the one-piece stainless steel nipple/breech plug is short and direct, providing quick, reliable ignition of the powder charge. The coil-spring bolt action mechanism produces a very fast lock time, with less chance to disturb the aim than side-hammer muzzleloaders. The 77/50's bolt can be drawn back two full inches, allowing ample access to the nipple for capping or decapping. And, an accessory nipple is available for large musket caps, providing a hotter primer flash for more positive ignition.

Like its centerfire counterparts, the Ruger 77/50 incorporates a three-position manual safety, permitting loading, unloading, capping and decapping with the safety in the "on" position. In addition, the patented Ruger scope-mounting system is manufactured integrally with the steel receiver, so modern optical sights can be securely mounted.

Ruger 77/50 • 77/50RSP

Ruger Stainless 77/50 • K77/50RSBBZ

*1" medium-height scope rings, breech plug wrench, breech plug wrench handle, and cleaning tube included with all Ruger 77/50 models.*

# RUGER CENTERFIRE - PISTOLS -

The Ruger P-Series pistols, introduced in 1987, were the first firearms produced at Sturm, Ruger's Prescott, Arizona plant. Designed by practical shooters, they were the result of a long development program to build quality centerfire pistols, offering unmatched reliability under adverse conditions. Over the years, the P-Series pistols have been used extensively by outdoorsmen, action target shooters, and in law enforcement and government applications worldwide, and have earned a solid reputation for rugged reliability. They continue to be, unquestionably, some of the most durable centerfire pistols available.

Each metal-frame P-Series pistol is made of hard-coated A356T aircraft-quality aluminum alloy, Ruger's proprietary Terhune Anticorro stainless steel slides (chrome-molybdenum steel in blued models), and nearly indestructible polycarbonate grip panels. Ruger P95 and P97 polymer pistol frames are made of a custom compounded polymer with long-strand fiberglass filler that is a natural shock absorber.

Ruger pistols are designed to be easily maintained. P-Series pistols are easily field-stripped into five major subassemblies for cleaning, without the need for special tools. Ruger offers a wide choice of ambidextrous variations on the proven P-Series double action design in 9mm, 40 S&W and 45 Auto.

A lifelong firearms enthusiast and collector, Sturm, Ruger President Steve Sanetti has been with the Company since 1980. He was a 3-year rifle team varsity letter winner at the Virginia Military Institute, and was President of VMI's Rifle and Pistol Club. More recently, he was captain of the Ruger pistol team, its Sportsman's Team Challenge squad, and the Company's Shooting Industry Masters Team. His first pistol was a Ruger, and when competing he uses only Ruger firearms. He is also an NRA-certified Firearms Safety Instructor, and enjoys recreational shooting with his family.

R I M F I R E   P I S T O L S

*The number one 22 pistol in the world*

In 1946, William B. Ruger applied for a patent on an entirely new 22 pistol design. It was elegantly simple, and featured an internal cylindrical bolt rather than the traditional moving slide construction. Its smoothly contoured and comfortably angled grip frame was fabricated from sturdy steel components. The barrel and receiver served as a solid, one-piece base for the sights, for permanent alignment and a consistently higher accuracy potential than conventional designs with moving slides and sights.

The Ruger 22 pistol has more than proven itself since its introduction over a half century ago. The original Ruger 22 pistol was appropriately named the Ruger Standard Model because today it is the standard by which all others are judged. The Mark II Standard Model is perfect for small-game hunting, plinking, or training.

The Ruger Mark II Target Model is chosen overwhelmingly for target competition. Today's Ruger 22 pistols are the result of an ongoing program of product improvement since the first Ruger Standard 22 pistol came off the line in 1949. Beginning in 2004, all adjustable sight 22 pistols come drilled and tapped for an included Weaver-type scope base adapter that readily accepts today's preferred optical sights.

*All models have a manual safety that positively locks the sear.*

*New for 2004:  
All Ruger adjustable sight 22 pistols  
are now drilled and tapped for an  
included Weaver-type scope base  
adapter.*

Ruger Standard Mark II • MK-4

Ruger Mark II 6" barrel • MK-6

Ruger Stainless Mark II 4 3/4" barrel • KMK-4

Ruger Stainless 22/45 • KP-4

*Ruger Mark II pistols use 22 Long Rifle ammunition in a detachable ten-round magazine that is standard on most models (Ruger 22/45 models use a different ten-round magazine).*

*Ruger 22 pistol magazines are designed with a follower button to provide easy insertion of cartridges.*

# RUGER 22 CALIBER RIMFIRE PISTOLS

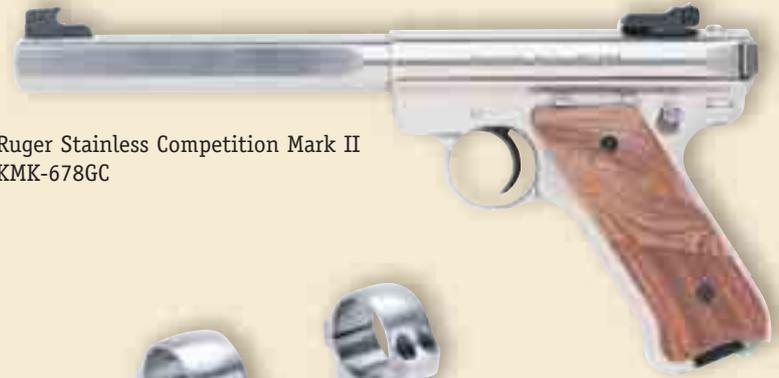

*More choices, more value*

In 1951, the Ruger Mark I Target Pistol was introduced with an adjustable rear sight and a 6 7/8" barrel. In 1982, Ruger introduced the Mark II 22 pistol. Its most noticeable improvements included a bolt stop thumbpiece on the left side of the frame and shallow indentations on the rear of the frame for a better grip on the bolt. The magazine capacity was increased to ten rounds, and the safety was redesigned so the bolt can be manually operated while the safety is in the "on" position. In 1992, Ruger introduced the 22/45 pistol featuring a fiberglass-reinforced polymer grip frame and a push-button magazine release, virtually replicating the feel of the 1911 Model 45 ACP pistol.

Today, with over 3 million sold, Ruger offers a wide range of 22 pistols – in Standard and Target models, six different barrel lengths, fixed or adjustable rear sights, five different barrel configurations, and a choice of blued alloy steel, stainless steel or polymer frames - all direct descendants of Ruger's first 22 caliber pistol. **New** for 2004, all adjustable sight Ruger 22 pistols are drilled and tapped for an included scope base adapter to allow for easy mounting of today's optical sights.

For well over a century, the single action revolver has earned its place as both a working tool and a treasured icon of the American West. At the outset of World War II, however, single action revolver production was halted and was not resumed after the war. The 1950s saw a tremendous demand for this historic firearm, due largely to the popularity of Western-themed epics and the desirable features of these guns for knowledgeable shooters. It was in 1953 that Ruger accepted the challenge of meeting this demand with the introduction of the Ruger Single Six 22 caliber revolver, and later, the Blackhawk and Super Blackhawk centerfire revolvers. While totally traditional in outward appearance, these single actions incorporated technological and metallurgical advancements that placed them a quantum leap beyond their predecessors in strength, accuracy and reliability.

## S I N G L E A C T I O N R E V O L V E R S

*The top choice of single action shooters*

Introduced in 1953, Ruger's pioneering Single Six 22 caliber revolver had the familiar look and wonderful feel and balance of the traditional Old West single action. Five decades later, the New Model Single Six continues to offer outstanding performance and classic styling. Among the New Model Single Six's descendants are the Ruger New Bearcat, Bisley, and Old Army models...all combining outstanding good looks with significant mechanical refinements.

The New Bearcat fulfills the ideal of a smaller "kit gun"-style 22 caliber single action revolver, a favorite of hikers and campers. Its styling and one-piece frame are reminiscent of the old Remington Civil War-era revolvers. The unfluted cylinder displays a roll mark with a bear and cougar design. It is now available in corrosion-resistant stainless steel to meet the demands of the trail.

The Ruger Bisley is immediately recognizable by its distinctive Ruger-designed grip style, for added shooting comfort with powerful cartridges. The hammer and trigger are also gracefully curved for the needs of the target shooter. The Ruger Bisley is chambered for popular target and hunting calibers from 22 to 45.

A consistent winner at blackpowder matches, the Ruger Old Army 45 caliber cap-and-ball revolver is now available with a choice of 5-1/2" or 7-1/2" barrel, blued alloy or stainless steel, and fixed or adjustable sights. It's easily disassembled without special tools, making blackpowder clean-up far quicker and easier, especially in its stainless steel version, another Ruger first.

# RUGER NEW MODEL SINGLE ACTION REVOLVERS

*More single action choices than any other manufacturer*

The Ruger New Model Blackhawk, New Model Super Blackhawk, New Model Single Six and Vaquero are the most convenient, reliable, and durable single action revolvers ever offered. **New** for 2004 are the Ruger Single Six Hunters, featuring a target crowned barrel with new sights and an integral barrel rib cut for both Ruger's patented scope rings (included) and tip-off scope bases. You also get black laminated wood grip panels and your choice of either the flat-shooting 17 HMR or the 22 convertible model which includes both 22 LR and 22 WMR cylinders.

The New Model Single Six is equally at home on the target range, trail or campsite. New Model Super Single Six models incorporate click adjustable rear sights and ramp front sights. All 22 LR models accept 22 Short and 22 Long cartridges and also include an extra 22 Magnum cylinder that can be quickly changed, without the use of tools. The 32 Magnum version is available in classic Vaquero styling, and with black micarta "Bird's Head" grips, 4-5/8" barrel, and a choice of stainless or blued steel.

The New Model Blackhawk, in calibers ranging from 30 Carbine to 45 Colt, combines adjustable sights, target-grade accuracy, and a traditional Western-style grip, long acknowledged to be the most comfortable and natural pointing of any revolver.

The New Model Super Blackhawk was designed specifically to exploit the full potential of the 44 Magnum cartridge. New Model Super Blackhawk Hunters are specifically designed for scope use and include a barrel rib and Ruger scope rings that make these advanced single action revolvers the standard of big game hunters the world over.

The Vaquero is a fixed-sight version of the New Model Blackhawk with Ruger's own "color case finish" on the steel cylinder frame and a blued steel grip, barrel and cylinder or polished stainless steel components. Its proven action has made it the favorite of Cowboy Action Shooters nationwide. Ruger's Bisley Vaquero combines the Old West look of the Vaquero with the practical elegance of the Bisley-style hammer, grip frame, and trigger; and the **New** Bisley Hunter adds a scope-ready barrel to these unique Ruger features.

*Advanced, heavy-frame revolvers for target shooting and hunting*

Since its introduction in 1979, the Redhawk name has been the definition of powerful double action revolvers. Designed specifically to handle the powerful 44 Magnum cartridge, the Redhawk pioneered the patented Ruger “single-spring” mechanism for both hammer and trigger. Ruger also patented a mechanism to positively lock the cylinder into the frame at the front, rear, and bottom of the cylinder for positive alignment and increased strength.

The Super Redhawk features an extended frame designed for scope mounts, longer barrel threads, cushioned grip panels, and a number of improved mechanical features. Both Redhawk and Super Redhawk are unmatched for strength and rugged reliability.

Ruger double action revolvers are the top choice among shooters that shoot frequently for one simple reason: reliability. Both Redhawk and Super Redhawk designs emphasize extra metal in the top strap and in the critical areas below and surrounding the barrel threads. With no side-plate, both sidewalls serve as integral parts of the frame for maximum strength and rigidity. More than just big revolvers, these are strong revolvers...easily withstanding the stresses imposed by the most powerful new handgun calibers.

The massive Super Redhawk, in 480 Ruger and 454 Casull, is ideal for meeting the challenge of using a revolver to hunt big game. The six-shot cylinder capacity adds an extra measure of confidence. These potent revolvers are also popular among metallic silhouette shooters. The 454 also accepts 45 Colt cartridges. The new 480 Ruger cartridge offers approximately one-third more energy than the powerful 44 Magnum. It can stop big game reliably at typical handgun distances, with less recoil than the mighty 454 Casull.

*Strong extended frame and patented Integral Scope Mounting System in the wide top strap provide solid, reliable scope-mounting, making the Super Redhawk perfect for big-game hunting.*

## DOUBLE ACTION REVOLVERS

*Sophisticated engineering and quick takedown without tools*

Ruger GP-100 Series double action revolvers and their smaller-framed counterparts, the SP101 Series, offer an array of sophisticated design features that make traditional revolvers obsolete.

Strength, simplicity, and ease of maintenance are keys to their design. The cylinder is triple-locked by latches at the rear and bottom of the cylinder and at the front of the crane by a locking bar that engages a matching slot in the frame. Frame widths are increased in critical areas that support the barrel; both sidewalls are solid, integral sections of the frame, with no removable side-plates to compromise the frame's integrity. While some may say that Ruger double action revolvers are over-built, we say that only the strongest revolvers get to bear the Ruger name. Ruger revolvers are built to perform reliably, shot after shot.

Because these revolvers consist of a group of integrated subassemblies, takedown for cleaning is quick and simple, requiring no special tools. The grip portion of the frame is a post onto which standard or custom grips in a variety of sizes, shapes and materials can be fitted. Ruger's unique cushioned grips provide comfort, with no exposed metal to impact the shooter's hand during recoil.

*All Ruger double action revolvers incorporate a patented Ruger triple-locking mechanism that securely locks the cylinder into the frame at front, rear and bottom.*

# RUGER FIREARMS

## ACCESSORIES

Ruger announces a **new** gun safe to help our customers meet their responsibility to store Ruger firearms safely. Its 23 cubic feet capacity easily stores 12 long guns, with shelf space for handguns and accessories. It weighs 580 pounds and is 30" wide, 60" tall, and 22" deep. Standard features include: 3/4" thick composite door plate; Sargent & Greenleaf Group II lock; internal ball bearing hinges; recessed doors to inhibit prying; active door bolts to prevent frame damage; embedded diamond plate protection to help prevent the lock from being drilled out; six one-inch diameter chrome plated bolts; Teflon bolt guides to reduce door/bolt abrasion, rusting and squeaking; relockers to deadlock the boltworks if the safe is attacked by torching, drilling or attempted forced entry; and Class I fire protection

shell providing a fire rating of 1250° F for 45 minutes. Finished in a durable, textured jade black finish with accenting stripe and Sturm, Ruger logo. This gun safe is a California-approved firearms safety device ("acceptable safe") that meets the requirements of California Penal Code Section 12088 and regulations issued thereunder. Call Sturm, Ruger at (603) 865-2442 for details and ordering information.

## RUGER ACTIVE NOISE COMPRESSION HEADSETS

Hear what you've been missing! Top quality Ruger noise compression headsets feature advanced electronic circuitry to allow shooters to hear all normal sounds but reduce loud noises to safe levels. Unlike noise cancellation headsets that block all sound each time a loud noise occurs, Ruger noise compression headsets reduce loud noise to safe levels while allowing for uninterrupted listening and amplification of soft noises! Both models feature independent volume controls for each ear. Low profile Sportsman model is designed to prevent the ear cup from hitting your rifle or shotgun stock. Made in U.S.A.

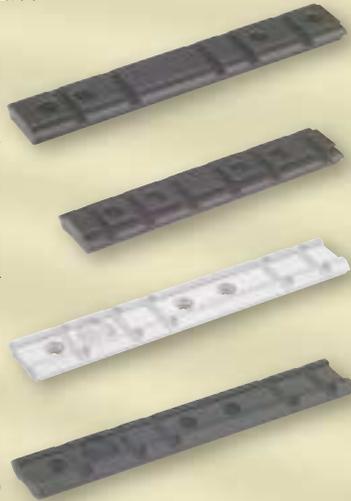

Sportsman	21 db NRR	\$179.00
Range Master	26 db NRR	\$199.00

Tel: (603) 865-2442  
Fax: (603) 863-6165

NOTICE: Weights of all Ruger firearms, and rifles in particular, may vary from published weight because of variations in wood density, bore size, barrel length and style. All weights specified in this catalog are approximate. All ammunition that appears in this catalog is shown actual size only when noted. Sturm, Ruger & Co., Inc. does not manufacture scopes and scopes are not included with any firearm purchase.

All prices in this catalog are suggested only. At Sturm, Ruger & Co., Inc. we list suggested retail prices because we feel this information is an aid to our customers in examining our products. Sturm, Ruger & Co., Inc. does not sell firearms directly to consumers. Ruger products are stocked and sold by thousands of federally-licensed independent retailers in the United States and in many foreign countries. We believe there are many benefits in purchasing firearms from a specialty firearms store where you can receive the advice and knowledge of an experienced retailer.

The Sturm, Ruger & Co., Inc. eagle logo, 10/22, All-Weather, Bearcat, Blackhawk, GP-100, M77, Mini Thirty, Mini-14, Old Army, P85, Redhawk, Ruger, 77/22, 77/44, 77/50, SP101, Vaquero, Security-Six, Service-Six, Single Six, and Speed Six are registered U.S. trademarks. P90, P91, P93, P94, P95, P97, 22/45, Model 96, 77/17, Gold label, Target Grey, and Arms Makers for Responsible Citizens are Ruger trademarks. "Deerfield" is a registered trademark of Blount, Inc.

All specifications and prices are subject to change without notice.

# A FREE SAFETY OFFER FROM RUGER

Do you own an "old model" (pre-1973) Ruger Single Six, Blackhawk, Super Blackhawk, or Bearcat single action revolver like these?

*Three frame screws identify the "old model" Single Six, Blackhawk, and Super Blackhawk made from 1953 to 1972.*

*Serial numbers below 93-00000 identify old Bearcat and Super Bearcat models made from 1958-1972.*

Three frame screws identify the "old model" Single Six, Blackhawk, and Super Blackhawk made from 1953 to 1972. Serial numbers below 93-00000 identify old Bearcat and Super Bearcat models made from 1958-1972.

The patented Ruger Conversion Kit is an entirely new operating system for these revolvers. **It can help prevent accidental discharges caused by a drop or blow to the hammer if the user has failed to take the basic safety precaution of keeping the hammer down on an empty chamber. That's very important!**

This mechanism can be factory-installed without any further alteration. The frame and other major parts will not be affected by this Conversion. The value of the gun will not be impaired, and we will return your original parts for collector's purposes.

To receive a **free** factory safety conversion, write to us at Sturm, Ruger and Company, Inc.; Lacey Place, Dept. KC; Southport, CT 06890. We will provide you with a shipping container and instructions. You only pay initial shipping to our factory. We will cover all other charges including return shipping costs. Please write to us without delay if you have one of these guns, and tell your friends about the availability of this kit. Remember that the safest way to carry any older single-action revolver, regardless of manufacturer, is with the hammer down on an **empty** chamber.

Please write to us at:  
Sturm, Ruger & Co., Inc.  
Department KC  
Lacey Place  
Southport, CT 06890  
for full details and a **FREE** shipping box.

*If your revolver has the words "New Model," "Bisley," or "Vaquero" on the frame, this offer is not applicable.*

All Ruger® firearms are proudly designed and built by  
American workers and are manufactured at Ruger factories  
entirely in the United States of America.
