Savage Arms 2004

Sam

The Definition of Accuracy

Dear Valued Customer

The Shooting Industry Academy of Excellence honored Savage with both "Manufacturer of the Year" and "Rifle of the Year" awards in 2003. A diverse panel of judges, representing all facets of the shooting sports, bestowes these awards. While we strive to satisfy our customers first and foremost, getting recognition from one's peers is both humbling and satisfying at the same time. We thank SIAE and all those in our distribution channels for their contribution to our success.

The history of Savage Arms has always been one of innovation, value, and industry-leading accuracy. The introduction of the revolutionary AccuTrigger[™] in 2003, established a higher standard by which to judge all other factory triggers. Adding the AccuTrigger[™] into most centerfire hunting rifles for 2004, reinforces our commitment to giving shooters the very best technology currently available, regardless of price.

As hunters and shooters ourselves, we take a great deal of pride in engineering and manufacturing our rifles. The results of our hard work are products specifically designed for beginners through professional shooters/hunters and another reason why Savage offers the very best value in the industry-period.

For Savage Arms,

- Infinitely adjustable
- Trigger pull approximately 1-1/2 lbs. to 6 lbs.
- Capable of being adjusted by the owner
- Completely safe no danger of accidental discharge even at the lowest setting
- Crisp release with no creep

Savage AccuTrigger™ has a single tool adjustment location.

Introducing the new SAVAGE ACCUTRIGGER™

A revolutionary design that will forever change the way shooters expect triggers to function.

Savage is constantly searching for new products and innovations that provide a true benefit to shooters. The trigger is one significant area that captured Savage's attention.

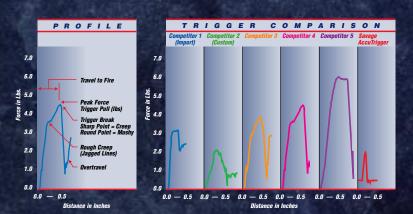

Most triggers found in firearms produced today have a very heavy pull. The reason is quite simple...liability. Manufacturers cannot afford to ship firearms with triggers that could accidentally discharge; therefore, they design firearms with heavy trigger pulls.

Almost all triggers can be adjusted to some degree. Some have a screw that can be adjusted in order to reduce spring pressure on the sear mechanism, while others require a gunsmith to polish the mating components to reduce sear engagement. Adjustments to factory triggers can create an unsafe condition and usually void the warranty.

Savage challenged its engineering team to design a completely new trigger system to give shooters what they desired. It took several years, but Savage's revolutionary AccuTrigger[™] meets every shooter's objective.

The AccuTrigger[™] is Easily Adjustable

In centerfire hunting models for 2004, the AccuTrigger[™] is adjustable from approximately 2-¹/₂ to 6 lbs, giving the

shooter the flexibility to set the trigger pull to individual preference without paying a gunsmith to adjust the trigger. In the 12 Series Varmint and Law Enforcement Series, the AccuTrigger[™] is adjustable from approximately 1-1/2 lbs to 6 lbs.

Adjustment of the AccuTrigger[™] is easy. Simply remove the stock and rotate the return spring with the tool supplied with the rifle. The AccuTrigger[™] has a single adjustment location and is designed so it cannot be adjusted below the minimum setting.

The AccuTrigger[™] is Completely Safe

The AccuTrigger[™] is completely safe and cannot accidentally discharge during normal use from being jarred or dropped when maintained and adjusted as intended. The trigger is designed with an integrated AccuRelease[™] that must be completely depressed or the rifle cannot fire. While pulling the trigger, the AccuRelease[™] is intentionally depressed, which unblocks the sear and allows the rifle to discharge.

A newly designed teardrop safety is an additional feature on rifles with the new trigger. It provides for better acquisition of the safety button and operates smoother and quieter.

The AccuTrigger[™] is Extremely Crisp and Exhibits Negligible Creep.

Savage used sophisticated software to compare objective measurements of their new AccuTrigger[™] with competitors' triggers. These comparisons confirmed there is a graphic and repeatable difference between the AccuTrigger[™] and all other triggers tested. This objective method of testing demonstrated the new Savage system has a lighter pull than all the other major brands. In fact, the AccuTrigger[™] was lighter than a top-of-the-line imported brand and a custom aftermarket trigger. Testing also revealed the AccuTrigger[™] was much smoother, crisper, broke cleaner and demonstrated less creep than any other factory-built trigger tested.

See and use the future of the industry—the Savage AccuTrigger[™]—the system that makes all others obsolete.

AccuTrigger and AccuRelease are trademarks of Savage Arms, Inc. US Pat. No. 6,553,706

12 Series Varmint

Savage varmint rifles are widely acclaimed for their out-of-the-box accuracy. With a host of features like freefloating, button rifled barrels and dual pillar bedding, this series offers all you've come to expect in a Savage rifle. The revolutionary AccuTrigger^M, now a standard feature in the 12 Series Varmint, gives the shooter the added flexibility to adjust the trigger pull to his or her preference. Hands down, this series gives the hard-core hunter an unsurpassed selection

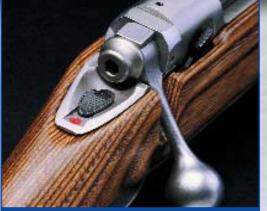

of varmint rifles to choose from.

The newest to the series, the 12 Varminter Low Profile, has all the features you asked for in a varmint rifle. With a 26" heavy fluted stainless barrel and a low profile, brown laminated stock, we've added an extra wide beavertail forend for more stability when shooting from a bench or sandbags. It's another outstanding addition to Savage's time-tested, award-winning varmint series.

Savage varmint rifles offer the revolutionary AccuTrigger[™] along with legendary out-of-the-box accuracy

3-Position Safety and Oversized Bolt Handle

All Savage rifles with the new AccuTrigger[™] feature a newly designed teardrop 3-position safety that provides better acquisition of the safety button and operates smoother and quieter. The bolt handle is oversized for quick acquisition when multiple shots are required.

Pillar Bedding is used to enhance accuracy by providing maximum stability for the action. "Dual Pillar" bedding is accomplished by permanently embedding two steel pillars in the stock. Front and rear action screws are inserted through the two pillar sleeves into the receiver to provide steel-to-steel contact points.

Model 12 VARMINTER LOW PROFILE Model 12 VARMINTER LOW PROFILE – Single Shot

40 Varmint Hunter Series

Varmint hunting has always held an allure as the sport for the ultra-accurate rifle. The notion that varmintgrade accuracy means a high price has deterred many an avid hunter from trying his hand at the sport. Now, Savage has changed all that. The Model 40 Varmint Hunter brings single shot, pinpoint accuracy to the value-minded shooter. Don't think that popular price means it's short on features, either. The Model 40 features a sleeved, free floating, heavy-contour barrel, button rifled with a recessed target crown. The varmint styled laminated stock provides extra rigidity that resists accuracy-robbing movement. The forend has a full beavertail for firing from sand bags or a bench; there's a third sling swivel for use with a bipod. Choose the popular .22 Hornet for built-up areas or the proven .223 Rem to handle every varmint shooting scenario. If you've always wanted to try varmint hunting, price is no longer a problem; just ask for the Savage Model 40 Varmint Hunter!

The Model 40 Varmint Hunter brings pinpoint accuracy to the value-minded shooter

NEW Model 40 VARMINT HUNTER – Single Shot AccuTrigger" is not available on this model.

Weather Warrior Series

Outstanding performance in the worst weather conditions

Some hunters are afield on days when the rest are warming their feet by the fire. For them, Savage offers the Weather Warrior, a rifle tough enough for any conditions. It starts with a stainless steel action and barrel for maximum corrosion resistance. The barreled action is dual pillar bedded into a synthetic stock impervious to moisture. Savage's revolutionary AccuTrigger[™] lets you safely set trigger pull weight just the way you want it. This diverse line includes left-hand models in both short and long actions. The patented muzzlebrake is

adjustable on the AK model so you can tame the recoil on even the largest of calibers.

Adjustable Muzzle Brake

Just twist the patented Adjustable Muzzle Brake open and reduce felt recoil by 30%. Hunting in the deep woods with a guide at your side? Turn it closed to reduce muzzle blast.

Muzzleloader Series

Shooting and hunting with muzzleloaders has always had one big drawback: cleaning the dirty, corrosive mess of black powder at the end of the day. Many hunters who might otherwise have enjoyed an extended season took a pass rather than scrub a filthy muzzleloader.

Savage has changed all that with the 10ML-II. It's versatile. You choose the propellant. Use smokeless

powder, black powder, Pyrodex or other black powder substitutes. This .50 caliber rifle, with 209 primer ignition, can deliver 1-¹/₂" groups at 100 yards and produces velocities exceeding 2,300 fps with more than 3,000 ft lbs of knock down energy. And, if you use smokeless powder, you won't have to clean it before sundown.

Now featuring Savage's revolutionary AccuTrigger™,

High performance, unparalled accuracy, no mess... Now with the revolutionary AccuTrigger[™] ____

209 Primer Ignition

For ease of use and a sure-fire seal, the 209 primer fits into a primer carrier in the front of the bolt face.

Muzzleloading Without the Mess

You choose the propellant. Modern smokeless powder for maximum performance or traditional black powder, Pryrodex or other black powder substitutes. the 10ML-II is muzzleloading perfection that caters to every taste. Choose adjustable fiber-optic sights or a package model with scope. Take your pick of stocks in laminated, RealTree Hardwoods HD camouflage or black synthetic with stainless or blued action. Set the trigger pull weight to your own requirements. The model 10ML-II is everything a hunter could want in a muzzleloader and only available from Savage. US Pat. No. 6516.549

Accessory Kit

Accessory Kit contains: 5 Powder Vials, 2 Vent Liners, Vent Liner Pick, Powder Dippers, 20 Hmr Bullets, 20 MMP Sabots (packed with bullets), Gun Cleaning Patches, TW25 B High Tech Lube, .50 Cal. Cotton Bore Mop, and .50 Cal. Bronze Bore Brush.

Ultra Light and Classic Series

Designed for discriminating hunters with distinctive needs

New AccuTrigger"

All Savage centerfire rifles have "laser-etched" bolts featuring a custom Savage Logo for the unique touch of quality and class.

CONTROLLED ROUND FEED ON THE MODEL 116SE: Provides a positive feeding action when chambering a cartridge, As a cartridge feeds from the magazine, it is held in place under the extractor on the bolt as it moves forward into the chamber, insuring reliable feeding. A standard weight rifle is fine for shooting on the range or hunting near home. But when you're chasing the most elusive quarry in the hardest country, you need a rifle that's a pleasure to carry, even at the end of the longest day.

For the no-compromise hunter there's the Sierra, a

six-pound package with a synthetic stock and 20" barrel that will help tame the toughest terrain. Its short action handles everything from the .243 Win to the potent .300 WSM.

Prefer a lightweight gun, with traditional styling? The Ultra combines a high-gloss American

EXPRESS SIGHT: Offers precision adjustability and immediate compensation for range changes. Available on Model 116SE.

walnut stock with contrasting forend tip and deep, rich bluing. It handles proven long-action calibers from the .270 Win to the .300 Win Mag.

Going after dangerous game? Select the Safari Express, chambered for the hard-hitting .458 Win Mag. It's ready for any dangerous animal, with controlled

> round feeding and an adjustable muzzle brake that can be opened or closed as the situation requires.

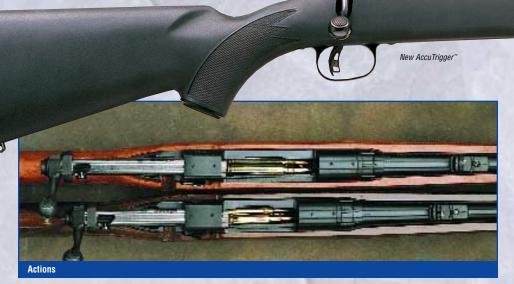

Every rifle in these series features Savage's revolutionary AccuTrigger[™] that lets you safely set trigger pull weight to your personal specifications.

Hunter Series

Accuracy. Reliability. Value. The backbone of the Savage hunting rifle For many years, the Savage Model 110 has given the American hunter unmatched accuracy, reliability and value. A mainstay of the Savage line, the hunter series offers legendary out-of-the-box accuracy in a time-tested, proven design.

Today, there's a value-packed Savage rifle for every hunter. Choose a traditional long action that will digest ammunition from the .25-06 to the .300 Rem Ultra Mag. Or select a short action that shaves almost a full inch

SHORT AND LONG ACTIONS: Savage offers rifles in short and long actions. The short actions are almost a full inch shorter and provide a lighter more compact action for all of today's shorter cartridges. The long actions are designed to handle cartridges through the .300 Rem. Ultra Mag.

Pillar Bedding is used to enhance accuracy by providing maximum stability for the action. "Dual Pillar" bedding is accomplished by permanently embedding two steel pillars in the stock. Front and rear action screws are inserted through the two pillar sleeves into the receiver to provide steel-to-steel contact points.

from the receiver length and will feed everything from the .223 Rem to the .300 WSM.

Every option. Every feature. Savage has you covered. Left-handed models, detachable magazine, synthetic or hardwood stock—Savage has them all. They even have a gun for that growing youngster in three popular calibers. Every Hunter model comes equipped with Savage's AccuTrigger[™] for easy, safe trigger adjustment.

*X*X*X*X*X*X*X*

Superior accuracy combined with rugged durability and unfailing reliability, all at an unprecedented value, make the Law Enforcement Series a must for today's security forces. Savage's® LE Series is built on its time-tested 110 action. Heavy barrels are button-rifled and free-floating to provide unparalleled accuracy. Dual pillar bedding and a recessed crown offer custom features to this outstanding series. Oversized bolt handles permit rapid acquisition for followup shots. A third swivel stud permits use of a bipod with a sling. The specialized package model features a Leupold® 3.5-10x40mm scope with Mil Dot reticle and flip-open lens covers, and a Harris bipod. All LE models feature the revolutionary Savage AccuTrigger[™], and offers standard, Choate or McMillan stocks.

Heavy Duty Case

Standard with Model 10FPXP models, heavy duty aluminum case with four-latch/three-digit combination lock for added security.

SAFETY TIP

Always keep your finger off the trigger until ready to shoot.

 Aufliger

Specialty Series

Based on the proven Savage 110 rifle action, the Savage 210F is a slug gun with all the accuracy and reliability you'd expect in a Savage rifle. A classic design, this 12 gauge 3" chambered shotgun delivers the utmost in bolt-action shotgun performance. When you want the finest slug shotgun on the market today, look no further than the model 210F.

Savage gives a traditional European idea an all-American twist in the model 24F rifle/shotgun combination. Offering unparalleled versatility, this classic combination gun is offered in a variety of matching gauges and calibers. Whatever the requirements, you'll be ready with the versatile model 24F!

The perfect hunting combination

Striker Series

The Savage Striker a powerhouse in a hunting handgun Whatever game you're after, Savage has a hunting handgun that masters the job. The Sport Striker series handles all small game with guns in .17 HMR, .22 LR and .22 Mag. There's even a package with a 1.5-5x28 scope included. For big game hunting, the Striker is chambered in calibers from .243 Win to .300 WSM. You can tame the recoil of the most powerful rounds with the patented adjustable muzzle brake and the ambidextrous grip design has a left-handed bolt with right side ejection. Add an all-stainless barreled action and a dual pillar-bedded stock, and the Striker delivers rifle-like accuracy with a big punch.

.22 LR Rimfire Series

For hunting small game or casual plinking, you can count on a Savage .22 semi-auto. This is a proven line of value-packed rifles. Choose blue or stainless steel, wood or synthetic stock. There's even a heavy-barreled model for pinpoint offhand shooting. Every member of the Model 64 family comes equipped with a smoothfeeding detachable 10-round magazine. Select the package model that includes a 4x15mm scope and rings.

Accuracy. Reliability. Value. Features built into every Savage .22 autoloader

Magnum Rimfire Series

While the .22 LR reigns supreme for economical plinking and the smallest game, certain shooting conditions call for the extra stopping power of the .22 WMR. Savage offers the widest selection of .22 magnum rifles available. The traditionalist will gravitate to the falling-block Stevens Favorite, a revival of a classic design from a century ago. The modern hunter will like the looks of the Model 93FVSS, which combines a receiver and heavy target barrel, both made of stainless steel, with a synthetic stock that can shrug off any weather. It's even available as a package with rings and a 3-9x40 scope.

A .22 magnum for every shooting situation

Single Shot Rimfire Series

Start 'em right… with a Savage Single-Shot .22

Aperture rear sight adjustable for windage and elevation. The traditional "beginner rifle" was a .22 single-shot, and today this type still remains the perfect "first" rifle. Great-granddad may well have learned on a Stevens Favorite, and that's a family tradition you can carry on, choosing either the standard or takedown model. For the youngest shooter, the Cub, a scaled-down conventional bolt-action rifle, features a target-style peep sight, and two-position safety. Style-minded youngsters can specify a Realtree Hardwoods HD camo finish or color laminated wood. Start your own family tradition with a Savage .22 single-shot.

Mark II Rimfire Series

Unmatched variety with many choices

Savage's Mark II line lets you have a .22 rifle the way you want it. Matching handsome good looks with target grade rifle accuracy, this series offers a wide range of configurations. Need a heavy barrel for long-range shooting? The Mark II FVXP fits the bill, with an ultra-stable synthetic stock and a 3-9x40 scope. Want to blend in while tramping the deep woods? Choose the Mark II Camo in Realtree's Hardwoods HD pattern. Still like the traditional look? Select a wooden stock with Monte Carlo comb. There are even versions for the oft-forgotten left-hander. Whatever you need in a bolt-action .22 repeater, Savage offers it in the Mark II.

.17 HMR Series

Leading the way in .17 HMR rifles

Few ammunition developments have taken the shooting world by storm like the .17 HMR. As soon as shooters heard about it, they had to have it. How did Savage respond? By leading the way, with the largest selection in this popular caliber. From the heavy barrel varmint to the sporter barrel models, these bolt-action rifles come in almost every popular configuration: laminated, camo,
