

**THE LEUPOLD GOLDEN RING
FULL LIFETIME GUARANTEE**

Leupold and Stevens, Inc. is an American, family owned, fifth generation company that has been designing, machining, and assembling precision optical instruments in the U.S. for nearly 100 years. Leupold's success has been built on our commitment to your absolute satisfaction and our commitment to building the best high performance outdoor optics. It's for these reasons that we offer the Leupold Full Lifetime Guarantee.

If any Leupold Golden Ring product is found to have defects in materials or workmanship, we will, at our option, repair or replace it. FREE. Even if you are not the original owner. No warranty card is required. No time limit applies.

**THE LEUPOLD WIND RIVER
LIMITED LIFETIME WARRANTY**

A solid warranty and superior service. Leupold Wind River optics are engineered and manufactured to standards set and monitored by the design engineers at Leupold's Oregon factory. The goal is to provide you with reliable performance at a reasonable price. Should service ever become necessary, these fine optics are covered by the Leupold Wind River Limited Lifetime Warranty. All service work is performed by the same Leupold Product Service Specialists who work on our Leupold Golden Ring products here in Oregon.

If you would like more information regarding the construction or use of your precision-engineered Leupold Wind River optics, visit our Web site at: www.leupold.com.

**LEUPOLD & STEVENS, INC. IS A PROUD SPONSOR
OF THESE AND OTHER FINE ORGANIZATIONS:**

American Bird Conservancy, American Birding Association, Audubon Society of Portland, Birders' Exchange, Cornell Lab of Ornithology, Crane Meadows Nature Center, Jackson Bottom Wetlands, Last Chance Forever, Nature Conservancy, Natural Resources Defense Council, Royal Society for the Protection of Birds, and World Series of Birding.

**TITLE SPONSOR OF OREGON
CASCADES BIRDING TRAIL**

The Oregon Cascades Birding Trail is a network of prime birding destinations linked by existing highways and byways throughout the Oregon Cascades. The trail extends more than 1,000 miles along 2 north-south routes traversing the Eastern and Western Cascades, showcasing the region's spectacular scenery and wildlife for birders from around the globe. The routes, which include over 100 prime birding sites, are linked by crossings throughout, as well as the Columbia Gorge section at the north end and the Mt. McLaughlin loop at the south. Leupold & Stevens, Inc. is very proud to have joined with the American Bird Conservancy and the National Forest Foundation as a title sponsor of such an important and forward-looking project as this. For more information on the Oregon Cascades Birding Trail, visit the trail Web site at www.oregonbirdingtrails.org.

**LEUPOLD VIRGINIA SOCIETY OF ORNITHOLOGY
ROVING RAVENS BIRDING TEAM:**

*Leupold team members

(team captain), Linda Fields,
Kurt Gaskill*

Leupold & Stevens, Inc. offers its profound thanks to the members of the Audubon Society of Portland, Oregon Field Ornithologists, and Oregon Birders On-Line who volunteered their time to provide the photographs for this catalog. It is for these dedicated enthusiasts and all like them around the world that we are committed to providing the best possible optics and optical accessories. Thank you all.

2005
BIRDING / OBSERVATION
OPTICS

LEUPOLD
AMERICA'S OPTICS AUTHORITY™

Why do you bird? For some, it's about the quest for the rarity, the truly coveted sighting that can become the jewel of a life list. For others, it's about appreciating the birds around the state, around town, or around the neighborhood, learning to identify the song you hear or the bird you see, and that you'll be able to enjoy it all again tomorrow.

At Leupold, we're ready to help all birders, from the world-traveler to the backyarder. Our high-quality, rugged, waterproof optics will show you every nuance and every variation that makes each bird unique, and separates the long-known bird from the lifer.

We know we're not the reason you bird. We're simply proud to offer the products that let you enjoy birding to the utmost.

At Leupold®, Birding is in Our Blood

Leupold & Stevens, Inc., a fifth generation, family owned company in Beaverton, Oregon, has a long history of birding enthusiasts in our ranks, all the way back to Norbert Leupold Sr. We enjoy birding as much as you do, and we proudly sponsor many great birding groups, as well as supply optics that will help you get the most out of birding.

We also believe birding should be open to all, and we know not everyone has unlimited resources to purchase optics. That's why we created the Leupold® Wind River® line. We design them using our nearly 100 years of experience of bringing the most rugged, reliable, high-performance optics products to our customers.

Their Green Ring™ means what you see through them will be bright and crystal clear,

with superb color fidelity, no matter what the light or weather conditions (indispensable attributes when trying to identify an uncooperative bird). Plus, they're built durable, filled with nitrogen and sealed against moisture—a process Leupold pioneered—so they'll be 100 percent waterproof and fog proof. Finally, they're covered by the Leupold Wind River Limited Lifetime Warranty.

Our Golden Ring® optics are designed, machined, and assembled at our Beaverton, Oregon, factory. The distinctive Golden Ring is your guarantee that they'll give you legendary Leupold ruggedness, absolute waterproof integrity, and outstanding optical performance. They're covered by the Leupold Full Lifetime Guarantee, the best consumer protection in the industry.

In short, we put 100 years of optics and birding experience in the palm of your hand.

Norbert Leupold Sr., son of Leupold & Stevens founder Fred Leupold and seven-term president of the Oregon Audubon Society (now Audubon Society of Portland), along with John Scharff, Harold Moulton, and then president of the National Audubon Society Carl Buckheister, at the dedication of the observation blind at Malheur National Wildlife Refuge in 1960. The blind was dedicated to the renowned wildlife conservationist William L. Finley and the noted wildlife photographer Herman T. Bohlman in honor of their 1908 and 1912 studies of the area.

New for 2005

New! Leupold Golden Ring® Binoculars

We sacrificed nothing in the creation of the new full-size Golden Ring 8x42mm and 10x42mm binoculars. The Index Matched Lens System™ delivers an image that is impeccable in its clarity, brightness, and color fidelity. See page 5.

New! Leupold Golden Ring 12-40x60mm HD Spotting Scope

The new Leupold Golden Ring 12-40x60mm HD spotting scope features fluoride-based HD lenses as well as our Index Matched Lens System, plus folded light path technology. See page 7.

New! Leupold Digital Camera Adapter

Capture images of wildlife or any outdoor event using this adapter, your digital camera, and a Leupold Golden Ring 12-40x60mm spotting scope. Fits most popular digital cameras. See page 22.

LEUPOLD GOLDEN RING®

B I N O C U L A R S

GOLDEN-WINGED WARBLER
(*VERMIVORA CHRISOPTERA*)

The beautiful Golden-winged Warbler frequently hybridizes with the Blue-winged Warbler to create either the "Brewster's Warbler" or the less common "Lawrence's Warbler."

With the new Leupold Golden Ring 8x42mm and 10x42mm binoculars we have seriously raised the bar for optical performance.

The key is Leupold's exclusive Index Matched Lens System. Each lens coating is matched specifically to the type of glass and the lens placement in the binocular. The result is a standard of brightness, clarity, and color fidelity like you've never seen before.

For sensing those subtle variations of color and shade, or pulling out crucial details for a positive ID, these are the binoculars you'll want in hand.

Interpupillary Distance Lock (IPD) — lock in the distance between your eyes, so no adjustments are necessary during use. You can easily use your binoculars one-handed.

Phase coated prisms — super reflective prism coatings work with the lens system to eliminate diffraction and ensure peak clarity.

 **Index Matched Lens System™** — extraordinary light transmission, and incredible brightness, clarity, contrast and color fidelity.

Seven-foot close focus — even butterflies can use these outstanding binoculars.

Generous eye relief and twist-up, retractable eyecups — easy and comfortable to use with glasses or without.

Ergonomic design — easy to grip, with a good in-hand fit, they actually become more comfortable the longer you hold them.

New unique coloring — much like the birds you enjoy viewing, these binoculars have unique coloring, with a deep brown protective exterior finish.

Wider perspective — with a field of view of up to 386 feet at 1,000 yards, for quick acquisition of birds on a branch or on the wing.

Accessories included — your Golden Ring binoculars come with neck strap, case, and custom one-piece eyepiece and objective covers.

Rugged, waterproof, guaranteed for life — like all Leupold Golden Ring optics, these binoculars will perform in even the worst conditions, and are covered by the Leupold Full Lifetime Guarantee.

Golden Ring Binocular Alumina™ Accessory Kit — sold separately this kit will protect your investment and help you get the most from your time afield. The kit includes a custom case with detachable field accessory pack and unique Leupold Alumina™ flip-open adapters which accept all Leupold Alumina accessories. SKU #58420

LEUPOLD GOLDEN RING®

S P O T T I N G S C O P E S

BOTTERI'S SPARROW
(*AIMOPHILA BOTTERII*)

While it is possible to distinguish the Botteri's Sparrow from its fellow *Aimophila* genus member, the Cassin's Sparrow, most prudent birders rely upon song to identify one from the other.

New! Leupold Golden Ring 12-40x60mm HD Spotting Scope

The new Leupold Golden Ring 12-40x60mm High Definition spotting scope features our new fluoride-based HD lens and an Index Matched Lens System. It takes clarity, color fidelity, and brightness to levels you've never seen before.

The new HD lens — this fluoride-based objective lens is not only more than eco-friendly...it offers substantially enhanced resolution, color, and contrast, especially at 40x. In other words, the subtle color variations and physical features that differentiate species just became easier to identify.

The Index Matched Lens System — along with folded light path technology, maximizes total light transmission, for a sight picture that's unbelievably bright and sharp.

Digital camera compatibility — record your best birding moments quickly and easily. See page 22 for more information.

New soft-side, form-fitting case — in desert tan, it provides extra protection and can remain on the scope during use. Included with the HD spotting scope.

The Leupold Golden Ring 12-40x60mm Spotting Scope

A mere 37 oz and 12.4" long — it's a welcome addition to any birding trip.

Powerful, clear, bright optics — even at 40x magnification, you'll still get a crystal clear, bright image for positive identifications.

Multicoat 4° lens coatings and anti-glare interior — these enhance brightness, clarity, and color fidelity.

Soft-side, form-fitting case — included with the spotting scope, it can remain on the scope during use, for extra protection.

New! Leupold Golden Ring 12-40x60mm HD Spotting Scope Kit

The new Golden Ring 12-40x60mm High Definition Spotting Scope Kit includes the HD spotting scope, Leupold Compact Tripod, new Window Mount, and Digital Camera Adapter, all in a rugged, hard-side case with custom-molded interior padding.

RHINOCEROS AUKLET
(*CERORHINCA MONOCERATA*)

Easily identifiable by its "horn" while in breeding plumage, the Rhinoceros Auklet molts its namesake marking in winter and is often misidentified when seen swimming in the waters of the Pacific Ocean.

Absolute ruggedness and waterproofing, lightweight construction, and impeccable optical quality. You get everything you're looking for in a Leupold Golden Ring Compact spotting scope, in a smaller package. We don't believe birders should have to sacrifice, so we sacrificed nothing in their design and construction. Our attention to detail has resulted in compact scopes that work flawlessly in all conditions. Each Leupold Golden Ring Compact spotting scope gives you legendary Leupold optical quality, durability, absolute waterproof integrity, and finally, each is covered by the Leupold Full Lifetime Guarantee.

Leupold Golden Ring 15-30x50mm Compact Spotting Scope

This unique optic fills the niche between our 12-40x60mm spotting scopes and our 10-20x40mm Compact spotting scope.

Just 21.5 oz and 11" long — this spotting scope is powerful, yet lightweight enough to take anywhere.

Multicoat 4 lens coatings — Leupold's own proprietary lens coating system optimizes light transmission for a crisp, bright picture with excellent contrast and color fidelity.

New! Leupold Golden Ring 15-30x50mm Compact Spotting Scope Kit

With this kit, you get the Leupold Golden Ring 15-30x50mm Compact spotting scope, along with its custom padded belt case, padded strap, mounting adapter and lens covers, plus a sturdy table top tripod, all in a durable, hard-shell case with custom-molded padding to keep everything in place.

PINNACLES™ SERIES

B I N O C U L A R S

CLIFF SWALLOW
(*PETROCHELIDON PYRRHONOTA*)

Made famous by their centuries-old annual return to the Mission San Juan Capistrano, Cliff Swallows frequently belie their name by building their nests under the eaves of houses.

Birders demand clarity, contrast, brightness, and color fidelity. The Leupold Wind River Pinnacles™ Series has it all, thanks to the fully multi-coated lenses and phase coated, silver enhanced prisms in both the Pinnacles 8x42mm and Pinnacles 10x42mm binoculars. They're also tough and waterproof, as well as slim, lightweight, and ergonomic. In short, they may just be your new favorite birding binoculars.

Slim, ergonomic design — these binoculars fit well in any size hand.

Fully multi-coated lenses and phase coated, silver enhanced prisms — these optical elements give you a sight picture with exceptional brightness, superb resolution, and color fidelity in all light conditions.

Close focus distance — focus at distances as short as six and a half feet, making them ideal for close-in viewing.

Generous eye relief — viewing is enjoyable and comfortable even for long periods.

Built rugged and 100 percent waterproof — they can endure the harshest conditions the outdoors has to offer.

Tough, rubber armor coating — added protection from bumps and spills, and improves your grip in wet weather.

Interchangeable eyecups — quickly and easily switch between vented, retractable contoured eyecups and twist-up eyecups especially suited for users with glasses.

OLYMPIC™ SERIES

B I N O C U L A R S

RED-EYED VIREO
(*VIREO OLIVACEUS*)

Known to sing even in the heat of the day when most other birds are silent, the Red-eyed Vireo can be tricky to see by remaining stationary and hidden by foliage for prolonged periods of time.

The premium quality Leupold Wind River Olympic™ 8x42mm, 10x50mm, and 12x50mm center focus, phase coated, roof prism binoculars deliver the kind of performance birders haven't thought possible in a binocular that is both affordable and lightweight. Even the 10x and 12x models are light (only 25.7 oz each) and well-balanced enough to use as your full-time birding optics. When you start identifying birds you couldn't before, and seeing new birds altogether, you'll be glad you have that added power, without the added weight.

Color fidelity, brightness, and clarity — are optimized by phase coated, aluminum enhanced prisms and fully multi-coated lenses.

Close focus distance — all models offer close-up focusing, ideally suited for birding.

Twist-up eyecups and ample eye relief — making extended viewing a pleasure, even with glasses.

Built rugged and 100 percent waterproof — even in the worst conditions you can count on them for durability and waterproof performance.

Ergonomic design — all Olympic models offer excellent fit and balance, even in smaller hands.

Advantage Timber® HD™ Camouflage — available on the Advantage HD™ Olympic 10x50mm.

Olympic™ Compact Series Binoculars Get the same outstanding performance and many of the same features as the full-size Olympics, in an even lighter-weight package.

KATMAI™ SERIES

B I N O C U L A R S

BALTIMORE
ORIOLE,
first winter male
(*ICTERUS GALBULA*)

Emily Dickinson described the oriole as "A Pleader – a Dissembler / An Epicure – a Thief / Betimes an Oratorio / An Ecstasy in chief." Those who have spent time watching these birds understand exactly what she meant.

Leupold Wind River Katmai™ Series binoculars give you all the performance of a full-size binocular in a compact package that's lightweight, and easy to carry or pack.

The key is the Katmai's 32mm objective lens and L-coated™ prisms that work together to transmit a greater amount of light to your eye than traditional compacts, which usually employ a much smaller objective lens. The Katmai has another advantage as well: it may be the ultimate family binocular. Its compact size and generous interpupillary adjustment range makes them easy for children and adults alike to use.

32mm objective lenses — these full-size lenses give you the light transmission of full-size binoculars in a compact body.

L-coated™ prisms and fully multi-coated lenses — L-coat is Leupold's own 64 layer, anti-reflective coating. Applied to the prisms, it's incredibly effective in improving light transmission. Multiple lens coatings also work to enhance light transmission and brightness.

Clear, bright sight picture — the 32mm objective lenses, multi-coated lenses, and L-coated prisms work together to provide you with a vivid, bright sight picture with excellent color.

Close focus distance — crystal clear focusing at a mere 4.9 feet makes them a superb choice for close-up viewing (butterflies will love them as well).

Ergonomic, compact design — they fit all hand sizes, and their small size makes the Katmai easy to carry or stow in a waistpack.

Twist-up eyecups and generous eye relief — the Katmai is comfortable to use, even with glasses, for extended periods.

Built rugged and absolutely waterproof — they're built to last, waterproof, and fog proof, no matter what the weather brings.

Tough rubber armor — this gives you extra protection from knocks and falls, and also enhances your grip in wet conditions.

CASCADES™ SERIES

B I N O C U L A R S

SWAINSON'S
THRUSH

(*CATHARUS USTULATUS*)

The ethereal flute-like song of the Swainson's Thrush as it echoes through the conifer forest has caused many to pause in rapt admiration.

Leupold Wind River Cascades™ 8x42mm and 10x42mm center focus, roof prism binoculars give you the sharp, bright image, full contrast, and color fidelity serious birders demand, even when the light is low. Plus, their in-line design makes both models trim, lightweight, and a real pleasure to use, whether you're in the backyard or away at more far-flung locales.

Outstanding low light performance — for excellent early morning or late evening birding.

Slim, ergonomic in-line design — they'll fit naturally in all sizes of hands.

Long eye relief and twist-up eyecups — the Cascades are comfortable for long periods of viewing, even with glasses.

Center focus dial mounted lockable diopter adjustment — this will keep your diopter setting secure against accidental bumps.

Close focus distance — focus perfectly even under 10 feet, so they're great for up-close birding.

Built tough and 100 percent waterproof — like all Wind River optics, they're ready to go wherever you do, and will provide rugged, waterproof performance no matter the conditions.

Shock-absorbing rubber armor — adds extra protection, and also enhances your grip when wet.

New! Advantage Timber® HD™

Camouflage — new for 2005, you can get realistic Advantage Timber® HD™ camo on a pair of rugged, waterproof Leupold Wind River Cascades 10x42mm binoculars. This pattern is also available on our Olympic 10x50mm, and Mesa™ 8x42mm and 10x50mm full-size binoculars.

MESA™ SERIES

B I N O C U L A R S

SORA
(PORZANA CAROLINA)

Only the very fortunate glimpse the secretive Sora as it emerges from the edge of the cattails into the open and cautiously probes the soft mud in search of snails.

The Leupold Wind River Mesa™ 8x42mm and 10x50mm center focus, porro prism binoculars may have the classic binocular styling, but we've given them the same advanced features, outstanding optics, and high-performance lens coatings you'd give them if you designed them yourself.

Porro prism lens system — this type of lens system does an excellent job transmitting a three dimensional image, which aids in picking birds from cover and in positive identification.

Advantage Timber® HD™ Camouflage — available on the Mesa 8x42mm and 10x50mm.

Multi-coated lenses — these coatings optimize light transmission for enhanced brightness, clarity, contrast, and color fidelity.

Twist-up eyecups and generous eye relief — the Mesas are comfortable to use for long periods, even with glasses.

Built rugged and 100 percent waterproof — you'll get years of birding enjoyment from your tough, waterproof Mesas.

Tough rubber armor — this armor adds protection against bumps and falls, and will give you a better grip in wet weather.

Mesa™ Compact Series Binoculars
You'll enjoy many of the same features of our full-size Mesas in an inverted porro prism design that's unusually compact.

Aspheric lenses — the Mesa Compacts provide an enhanced image without increasing the size of the binocular.

Roll-down eyecups — the compact's roll-down eyecups offer versatility for birders with glasses.

TUFTED PUFFIN
(FRATERCULA CIRRHATA)

Instead of building a nest, the Tufted Puffin excavates one, digging a burrow that may be as deep as nine feet into a turf-covered seaside slope.

Our Leupold Wind River Sequoia™ 15-45x60mm spotting scope gives you a huge range of magnification, combined with an impeccably clear, sharp image with the contrast you demand. Choose between 2 models for comfortable birding: one with a straight eyepiece or a 45° angled eyepiece model.

Versatile magnification — you'll see excellent detail at all practical distances with these outstanding birding spotting scopes.

Fully multi-coated optics — these optics deliver maximum amounts of pure light to the eye, for superb brightness, clarity, and color.

Long eye relief and a twist-up eyecup — both models of Sequoia spotting scopes are comfortable to use for long periods, even with glasses.

45° angled eyepiece — this offers you versatility and easy viewing from a variety of positions.

Built rugged and 100 percent waterproof — they feature the same durable rubber armor as our binoculars for added protection from falls and bumps.

ACCESSORIES

New! Leupold Digital Camera Adapter for Spotting Scopes

Capture images of wildlife or any outdoor event using this adapter, your digital camera, and the Leupold Golden Ring 12-40x60mm spotting scope. The adapter itself snaps onto any digital camera with a 58mm lens. With the plates included with the kit, you can convert the adapter to fit 28mm, 37mm, 43mm, and 52mm digital camera lenses.

SKU #58380

New! Leupold Monopod

Get the benefit of a sturdy walking staff with a retractable, spiked foot as well as a steady viewing platform for your Leupold spotting scope or any camera with a standard mount port, from the smallest digital to the serious DSLRs. It's lightweight and stowable too, collapsing from 65" to just 20", and weighing a scant 1 pound.

SKU #58410

Leupold Compact Tripod

When a full-size tripod is just "too much equipment" to take into the field, our compact tripod gets the job done. The 4-section legs extend to 31.5" and collapses to a mere 15". The adjustable ball head with quick-release base gives you incredible viewing versatility.

SKU #56446

Leupold Full-Size Tripod

Our full-size tripod is sturdy, stable, and compact when folded. Extends to 65" and collapses to 30". Features three-section legs, and a three-way panning head with quick-release base that makes it easy to find and follow the birds.

SKU #56441

New! Leupold Window Mount

For rock-steady viewing from your vehicle, use the window mount with nearly any spotting scope. Includes a detachable mounting plate that's interchangeable with Leupold tripods, so you can make a quick switch from vehicle to field viewing.

SKU #58400

Leupold Binocular Tripod Adapter

With the binocular tripod adapter, you can enjoy the same steady view with your binoculars that's normally reserved for spotting scopes. Fits Mesa, Pinnacles, and Olympic 8x42mm models.

SKU #48826

Leupold X-treme™ Binocular Strap

Even the lightest binoculars can get heavy after hours of hanging around your neck. Now, with the new X-treme™ binocular strap, the weight is taken off your neck and evenly distributed across your back through the "X" shaped design of the strap, keeping your binoculars close to your body to prevent swinging yet ready at hand at a moments notice.

SKU #55895
