Big Bore Lever Action Rifles

Model 1895M in 450 Marlin Working together, Marlin and Hornady Manufacturing developed a potent 45 caliber belted cartridge that is an upgrade of the classic 45/70 Government. It's the most powerful cartridge ever offered in a Marlin lever action rifle. We've harnessed all this power into a compact 7 pound package. Like the Model 1895G Guide Gun, this Marlin lever action features an 18½" Ballard-type cut rifled barrel, a 4-shot tubular magazine, and a checkered straight-grip American black walnut stock with ventilated recoil pad and swivel studs.

Model 1895G "Guide Gun" The hunter who's looking for plenty of power in a compact, stow-anywhere package will find the ideal solution in our Model 1895G. The mighty 45/70 Government cartridge has proven its worth on every species of large North American game from Maine to Alaska. This rugged lever action rifle weighs only 7 pounds, and features an 18½" barrel with Ballard-type cut rifling.

Model 1895GS The lever action 45/70 carbine that can take on any kind of game can also take on any kind of weather. Our best-selling Model 1895G Guide Gun is available in stainless steel. The receiver, barrel and all major metal parts are machined from stainless steel, and most other metal parts are nickel-plated. It features an 18½" stainless steel barrel with Ballard-type cut rifling, a 4-shot tubular magazine, an adjustable semi-buckhorn folding rear sight and ramp front sight with brass bead and Wide-Scan™ hood. The stock is American black walnut with cut checkering and a ventilated recoil pad.

The Classic Model 1895 This is the tried and true configuration of this famous 45/70 rifle. It features a 22" barrel with deep-cut Ballard-type rifling and an American black walnut pistol grip stock with cut checkering and swivel studs.

Model 444 A big bore favorite that combines the power of the big 444 Marlin cartridge—which generates nearly 1½ tons of muzzle energy—with the quick and super-smooth Marlin lever action system. Its 22" barrel makes the 444 a real joy to handle, no matter what the conditions.

Model 1895M in 450 Marlin

Model 1895G "Guide Gun"

Four safety features: Every Marlin centerfire lever action has these safety features: (1) **Two-piece firing pin.** The rear section of the pin drops out of alignment with the front until the locking bolt is fully engaged. (2) **Trigger block.** This device prevents the trigger from being pulled until the lever is closed. (3) **Half cock hammer position.** This is the traditional lever action hammer safety position. (4) **Hammer block safety.** When engaged, it prevents the hammer from striking the firing pin, even if the trigger is pulled.

Lever Action Centerfire Rifles

It's hard to think of a time when the Marlin lever action centerfire hasn't been regarded as *the* American hunting rifle. No ifs, ands or buts. For well over a century, these classics have been virtually synonymous with dependability, flawless performance and accuracy, at a reasonable price. The action, for example, is as smooth as any you've ever experienced. There's a clean, flat, solid top receiver that not only keeps out rain, snow and debris, but also makes a perfect base for mounting a scope, low and centered. There's also true side ejection, instead of the "angle ejection" you'll find in some top-opening lever action rifles.

Model 336Y "SpikeHorn" Here's the first Marlin lever action to offer the proven deer-getting power of the 30/30 cartridge in a compact format, ideal as a woods gun and equally suited to the younger or smaller-statured hunter. Only 34" in length, featuring a 16½" Micro-Groove®-rifled barrel, it weighs just 6½ pounds. And the 336Y SpikeHorn features a short (12½" length of pull) American black walnut pistol grip stock with fluted comb and cut checkering. Sights include an adjustable semi-buckhorn folding rear, and ramp front sight with brass bead and Wide-Scan™ hood. The solid-top receiver is tapped for a scope mount, and the SpikeHorn comes complete with offset hammer spur, right or left hand, for scope use.

Model 336SS Foul weather won't faze this stainless version of our field-proven Model 336 in 30/30. Most of its major metal parts are machined from stainless steel forgings, others are nickel-plated. The American walnut pistol grip stock features classic cut checkering, and sights include an adjustable rear and ramp front sight with brass bead and removable Wide-Scan™ hood.

Model 336C Known for its rugged styling, pinpoint accuracy, and incredible dependability, this popular pistol grip carbine has a flat, solid top receiver and hammer block safety. The 336C has become one of the most popular rifles in North America. Its genuine American black walnut stock is enhanced with fine cut checkering. In addition to 30/30 Win., the 336C is also available in 35 Rem., a cartridge favored by many hunters because of its reputation as a hard-hitting brush-buster.

Model 336W Created for the no-nonsense deer hunter, the Model 336W lever action has a 6-shot capacity, in 30/30 Win. The 20" Micro-Groove® barrel features adjustable rear and bead front sights, and the receiver is tapped for a scope mount. It features a gold-plated steel trigger and a blued steel barrel band. The walnut finished hardwood stock has cut checkering and comes with swivels and a padded nylon sling.

Model 336A A gutsy, no-frills 30/30 with classic styling, a 6-shot tubular magazine and 20" Micro-Groove® barrel, the 336A has a lot of the same features as the 336C, but at an even more attractive price. Its hardwood stock has cut checkering and swivel studs.

Model 1894 Centerfire Rifles

NEW Model 1894CL The return of a classic. This new '94 is reminiscent of our original 32/20. It features a half-magazine tube that holds six rounds, a 22" barrel and a squared finger lever. Sights consist of a Marble semi-buckhorn rear, and a Marble carbine front. The straight-grip American Walnut stock has a hard-rubber butt plate.

Model 1894 Reminiscent of the sporting lever action rifles of an earlier era, this elegant short rifle in 44 Magnum/44 Special features a 20" barrel with Ballard-type rifling, an American black walnut straight-grip stock, cut checkering and a rubber rifle butt pad. Sights include an adjustable semi-buckhorn folding rear, and ramp front sight with brass bead and Wide-Scan™ hood. The solid-top receiver is tapped for a scope mount, and the rifle comes complete with offset, right or left hand, hammer spur for scope use.

Model 1894FG Enthusiastic supporters of the 41 Magnum urged us to return this caliber to our line of lever action carbines. The 1894FG offers the ideal combination of classic contours with a potent and easy-shootin' caliber. The American black walnut pistol grip stock features cut checkering, rubber rifle butt pad and sling swivel studs. The Micro-Groove® 20" round barrel is equipped with an adjustable semi-buckhorn rear sight and Wide-Scan™ hooded ramp front sight.

Model 1894SS Any weather is ideal weather for an outing with this stainless steel 44 Magnum/44 Special rifle. The 1894SS is a brush buster that spits out 10 fast shots with incredible knock-down power (in 44 Mag.), making it a favorite for deer and black bear. The stainless steel finish is complemented by a cut-checked American black walnut straight-grip stock. Deep-cut Ballard-type rifling maximizes accuracy with both jacketed and cast bullets.

Model 1894C Chambered for 357 Mag./38 Spl., the 1894C is the natural sidekick to the 357 Magnum or 38 Special revolver. An 18½" barrel with deep-cut Ballard-type rifling, and superb balance, together with five machined solid steel forgings and a checkered American black walnut straight-grip stock, make this an extremely quick-handling little carbine.

Lever Action Cowboy Rifles

Model 1894 Cowboy Competition Carbine For serious Cowboy Action shooting competitors or anyone who wants a lightning-fast carbine, our 1894 Cowboy Competition is the perfect choice. This model is chambered in 38 Special and 45 Colt. It is “factory-tuned” to meet the demands of competitive shooters, and features a 20" octagon barrel for quick sight alignment, and a western-style straight-grip walnut stock. Sights are traditional Marble adjustable semi-buckhorn rear and Marble carbine front. The receiver, bolt, trigger guard plate and lever of the 38 Special are color case-hardened for an authentic 19th Century look. (The 45 Colt has a blued bolt.) To accommodate tang sight installation, the serial number is located on the left side of the receiver.

Model 1894CB in 32 H&R Magnum. For Cowboy Action Shooters who love the sport but would appreciate a lot less recoil, the Model 1894CB-32 lever action carbine fills the bill. It's chambered for the low-recoil 32 H&R Magnum cartridge, which still has more than enough power for metal Cowboy targets. It's also been designed to have a 10% shorter lever throw for added speed. It will also appeal to small game hunters and plinkers looking for a low recoil, low report centerfire rifle. It features convenient loading through a port in the tubular magazine, just like our all-time classic Model 39A rimfire rifle. Weighing in at only 6½ lbs, the 1894CB-32 has a 20" octagonal barrel. The tubular

magazine holds a full ten rounds, and the American black walnut straight-grip stock features a hard rubber butt plate. To accommodate tang sight installation, the serial number is located on the left side of the receiver.

Model 1894 Cowboy This handsome rifle, available in 45 Colt, 357 Mag./38 Spl. and 44 Mag./44 Spl., has become the standard by which cowboy rifles are judged. From its elegant tapered 20" octagon barrel, with deep-cut Ballard-type rifling, to its straight-grip walnut stock and squared finger lever, this rifle is pure Old West. To accommodate tang sight installation, the serial number is located on the left side of the receiver.

Model 1895 Cowboy For top performance in those tough long-range events, the Model 1895 Cowboy is a must for Cowboy Action Shooters. It's also an ideal big game rifle for hunters who appreciate the nostalgia of 19th Century-style firearms. This authentically Old Western-styled 45/70 features a 26" tapered octagon barrel with deep-cut Ballard-type rifling, 9-shot tubular magazine, adjustable Marble semi-buckhorn rear and Marble carbine front sight. The American black walnut stock has a straight-grip, a hard rubber butt plate and a blued steel fore-end cap. To accommodate tang sight installation, the serial number is located on the left side of the receiver.

Model 1895 Cowboy

Lever Action 22 Rifle

Model 39A The incomparable Marlin Golden 39A represents the oldest shoulder firearm design still being made anywhere in the world. In fact, the 39's great grandfather, the Model 1891, was the first repeating rifle to be chambered for the 22 Long Rifle cartridge.

And over the years, Marlin 22's have become legendary among people who know rifles. The fact is, the Model 39 is still the standard by which all other 22 sporting rifles are judged. Understandable when you consider the clean, flat, solid

top receiver, and an action machined from solid steel forgings, which are then heat-treated for greater strength.

The Model 39A also features a rebounding hammer, a hammer block safety, and it disassembles in seconds with only a coin. And the stock is crafted from genuine American black walnut and features fine cut-checkering. Thanks to Micro-Groove® rifling, a special process that produces less bullet distortion and a better gas seal, the 39A gives you the kind of accuracy most other 22's can't touch.

Model Golden 39A

Solid steel forgings: The breech-bolt, hammer, trigger, lever and two-piece receiver are all carefully machined from solid steel forgings, then heat-treated for even greater strength and durability.

Lever Action Shotgun

The Marlin Model 410 shotgun is a reintroduction of a model made in the 1920's. It's an updated version of the original Model 410, a lever action 410 shotgun, and is built around the proven 336 action.

The Model 410 has a 22" cylinder bore barrel, and a 4-shot (5 with some brands) tubular magazine. It's chambered for all

2½" shells (only), including rifled slugs, and is an ideal shotgun for small game and pests. Sights include a folding open rear, and a green fiber-optic front sight. The receiver is drilled and tapped for a scope base. Its walnut stock features a pistol grip, cut checkering, a blued steel fore-end cap, and rubber butt pad.

NEW Self-Loading and Bolt Action Rimfire Rifles Chambered for the new 17 Mach 2 cartridge

Another new mini-magnum rimfire cartridge is on the scene, and so are hot new Marlin repeaters.

The 17 Mach 2 cartridge is a shorter version of the super-accurate 17 HMR. Its 17-grain V-Max bullet leaves the muzzle at a sizzling 2100 feet-per-second. It's an ideal round for small game and varmints.

NEW Model 717M2 This is the ultimate rimfire self-loading carbine! It's a brand new design that is reflected in its sleek, modern lines. The 717M2 features a 7-shot clip magazine, an 18" barrel, and a hardwood stock with pistol grip. It also has an automatic "last-shot" bolt hold open. The receiver is grooved for a scope mount.

Model 917M2 The Marlin 917M2 is a blued bolt action repeater with our innovative new T-900™ fire control system. It features a 7-round clip magazine, and has a cut-checked, walnut-finished hardwood Monte Carlo stock with swivel studs. The 917M2 has a 22" heavy barrel, is grooved for a tip-off scope mount, and is drilled and tapped for Marlin scope blocks, which are supplied.

Model 917M2S The stainless steel Model 917M2S also has the new T-900 fire control system, and features a 7-shot clip magazine, and a rugged black/grey laminated hardwood Monte Carlo stock with swivel studs. It has a heavy 22" stainless steel barrel.

The receiver is grooved for a tip-off scope mount, and drilled and tapped for Marlin scope blocks, which are supplied.

Self-Loading 22's with Tubular Magazines

Nobody in the world sells more self-loading 22 rifles than Marlin. In fact, we've made well over eleven million to date. And it's pretty easy to see why they're so popular, once you see what goes into them. Their simple, fast actions are known far and wide for uncompromising reliability, and their ability to stand up under the wide range of conditions you'll encounter when shooting or hunting.

Model 60 An economically priced rifle that's earned the title of "most popular 22 in the world." Since the Model 60 was introduced in 1960, it has continuously represented a great value. It has a 19" Micro-Groove® rifled barrel, cross-bolt safety, manual bolt hold-open and a patented automatic "last-shot" bolt hold-open, a safety feature that locks the bolt open after you've fired the last shot, allowing you to see into the open action. And with features such as its sleek walnut-finished laminated hardwood stock, a brass inner magazine tube, which completely eliminates the rust problems you come up against with steel tubes, and a precision-crowned muzzle for enhanced accuracy, it's easy to see why the Model 60 continues to be one of America's best selling rifles.

Model 60DL The ever-popular Model 60 is available with an American hardwood Monte Carlo stock finished in Walnutone™, an amazingly tough coating that closely replicates the handsome colors and grain patterns of premium-grade walnut, while sealing the wood from external moisture. The new Model 60DL features a 19" Micro-Groove® rifled barrel, cross-bolt safety, manual bolt hold-open and a patented automatic last-shot bolt hold-open.

Model 60C The world's most popular 22 rifle is also available with a camouflage stock. With features identical to the Model 60, the Model 60C comes with a hardwood Monte Carlo stock featuring the popular Mossy Oak® "Break-Up™" camouflage pattern.

Model 60SSK Here's the self-loading 22 rifle that earns its keep when the weather's not fit for man nor beast. The stainless steel Model 60SSK features a black fiberglass-filled synthetic stock with molded-in checkering and nickel-plated swivel studs. Like all Model 60's, it has a 14-shot tubular magazine, cross-bolt safety, manual bolt hold-open, and automatic "last-shot" bolt hold-open.

Model 60SS How do you improve upon the simplicity and reliability of the world's most popular 22 self-loader? We've given it the all-weather versatility of stainless steel. The barrel is made from stain- and corrosion-resistant stainless steel. Most other metal parts are nickel-plated. The deluxe 60SS features a 19" tack-driving Micro-Groove® barrel, 14-shot tubular magazine, positive cross-bolt safety, manual bolt hold-open, and our patented "last-shot" bolt hold-open, which locks the bolt open after the last shot is fired. The handsome Monte Carlo stock is crafted from a striking grey/black hardwood laminate, and sports a full pistol grip, swivel studs and a rubber rifle butt pad.

Model 60SB America's favorite self-loading 22 rifle also comes in weather-proof stainless steel, with a walnut finished laminated hardwood stock. The tubular magazine holds 14 Long Rifle cartridges. The adjustable semi-buckhorn rear sight is complemented by a ramp front sight with high-visibility post and cutaway Wide-Scan™ hood.

*If rifle is loaded with the bolt closed (which is not recommended and should not be done), the magazine will hold one more round.

** Laminated stocks are available as replacements for some current and previously manufactured Marlin 22's. Contact your dealer for details.

Cross-bolt safety. All Marlin 22 caliber self-loaders feature a convenient cross-bolt safety located in the rear of the trigger guard.

Brass inner magazine tube. All Marlin tube-loading 22's have brass inner magazine tubes. Unlike steel tubes, brass can't rust.

Automatic "last-shot" bolt hold-open. An important safety feature on all Marlin self-loading 22's, our patented automatic "last-shot" bolt hold-open locks the bolt open after the last shot has been fired, allowing the shooter to see into the open action.

Laminated Stocks.** The Models 60SS, 983S and 982L feature laminated hardwood stocks. In addition to their ruggedness and good looks, laminated stocks are noted for their stability through a wide range of temperature and moisture variations.

Model 60SS

Model 60SB

Self-Loading 22's with Clip Magazines

If you're looking for a rifle that gives you the flexibility of a removable clip magazine, at a reasonable price, Marlin has 22 self-loaders that are right on target. And right on the money.

Model 7000 The super-accurate Model 7000 features an 18" heavy target barrel, a black fiberglass-reinforced synthetic stock with molded-in checkering and swivel studs, a nickel-plated 10-shot clip magazine, and an automatic "last-shot" bolt hold-open. No sights are provided . . . it's built to be scoped. 1" scope ring mounts are provided.

Model 795 This rugged, economical 22 self-loader has the wide appeal that's made it a winner. The lightning-fast Model 795 features an 18" barrel, 10-shot nickel-plated clip magazine, and an automatic "last-shot" bolt hold-open. Its stock is black fiberglass-reinforced synthetic with molded-in checkering and swivel studs. It's fitted with an adjustable open rear sight and a ramp front sight.

Model 795SS Marlin has taken the popular Model 795 self-loader and replicated it in weather-beating stainless steel. The Model 795SS is designed and built to be an all-season favorite, with a virtually indestructible black fiberglass-reinforced polycar-

bonate stock with molded-in checkering and swivel studs. An 18" Micro-Groove® rifled barrel makes for optimum 22 Long Rifle accuracy.

Model 70PSS Stainless If you like to take a rifle with you when you're backpacking, boating, four-wheeling or just taking a hike, the Model 70PSS, with its 7-shot clip magazine, is a natural for you. You can take it apart or put it together in a matter of seconds. And, the all-weather "Papoose" enjoys the versatility of stainless steel construction, combined with a rugged fiberglass-filled black synthetic stock. It's also equipped with an automatic "last-shot" bolt hold-open, as well as a manual hold-open. It comes in a padded carrying case with built-in flotation.

Automatic "Last-Shot" Bolt Hold-Open.
In addition to a manual bolt hold-open, all Marlin self-loading rifles have a feature that holds the bolt open after the last shot has been fired.

Model 70PSS

The 70PSS is an easy-to-transport, quick takedown self-loading 22 you can take with you just about anywhere in its padded, floatable Cordura® carrying case.

22 Win. Magnum Rifles – *with the T-900™ Fire Control System*

At first glance, it's hard to tell these sleek, good-looking 22's aren't true "big game" rifles. With their Monte Carlo stocks, heft and balance, they are as close to a centerfire rifle as a 22 rimfire ever gets.

All models feature legendary Marlin Micro-Groove® barrels. Unlike conventional rifling, our exclusive Micro-Groove® rifling results in considerably less distortion of the bullet and a better gas seal, for unrivaled accuracy.

And just to make sure that every rifle we make is as accurate as we say it is, each one is sighted-in on our test range, and verified by closed circuit TV.

Model 983T If you're looking for a 22 Win. Magnum bolt action rifle at a very attractive price, and with the toughness and stability of a fiberglass-reinforced polycarbonate stock, our Model 983T fills the bill. It features a 22" Micro-Groove® barrel and a 12-shot tubular magazine.

Model 983S This was the first stainless bolt action rifle with the Marlin name on it. The barrel is made with 400 Series stainless steel. The handsome Monte Carlo two-tone brown laminated stock is equipped with swivel studs and a rubber rifle butt pad. The rear sight is an adjustable folding semi-buckhorn, and the ramp front sight has a high visibility post and cutaway Wide-Scan™ hood. The 983S has a 22" barrel, featuring famous Micro-Groove® rifling, and a tubular magazine with a big 12-shot capacity.

Model 983 Similar to the 983S, the Model 983 has a traditional walnut stock with cut checkering, and a blued steel finish. It features a semi-buckhorn folding rear sight, and a ramp front sight with a brass bead and Wide-Scan™ hood.

Red Cocking Indicator. All Marlin bolt action models show a red dot on top of the striker knob when the firearm is cocked.

T-900 Fire Control. All Marlin bolt action rimfire rifles — in 22 Long Rifle, 22 WMR, 17 HMR and 17 Mach 2 — are equipped with Marlin's T-900™ Fire Control System. This innovative trigger and safety system features a wide, serrated finger-contact surface conducive to an easy pull, a noticeably improved and consistent trigger, plus an easily activated safety, with positive SAFE and FIRE positions.

Model 983S

Model 983

17 HMR Magnum Rifles and 22 WMR Magnum Rifles

NEW Model 917VSF A handsome new addition to the 17 Hornady Magnum Rimfire line of bolt actions. It has all the features of the 917VS, plus a fluted barrel. Flutes not only enhance the graceful lines of the rifle, they also dissipate heat and slightly reduce barrel weight.

Model 917VS Varmints beware! The Marlin Model 917VS bolt-action repeater also chambers Hornady's hot 17 HMR cartridge, at a muzzle velocity of 2,500 fps, the fastest rimfire round ever. It fires a high-performance 17-grain V-MAX boat-tail jacketed bullet. This 7-shot, clip-fed rifle features a heavy 22" stainless barrel. The handsome grey/black hardwood laminate Monte Carlo stock is stable in the worst of weather, and comes complete with nickel-plated sling swivel studs.

Model 917V Here's fast company for smallbore hunters. Our Model 917V was the blued steel launching platform for the 17 HMR. Firing a high-performance V-MAX boat-tail jacketed bullet, it generates at least 25% more muzzle velocity than the 22 Win. Mag. The Model 917V features a heavy 22" barrel, double bedding screws, and special inletting to enhance accuracy. It also has a 7-shot clip, and a rugged walnut finished hardwood Monte Carlo stock with sling swivel studs.

Model 982S with Fire Sights® The ideal 22 Winchester Magnum Rimfire bolt action for those shooters who thrive on nasty weather. The 7-shot, clip-fed 982S features a stainless steel barrel. The Monte Carlo stock is made of super-rugged black fiberglass-filled polycarbonate with handsome molded-in checkering and nickel-plated swivel studs.

Model 982 The 982 Magnum sports a 7-shot clip magazine for quick loading and unloading. Other features include a thumb safety, 22" Micro-Groove® barrel and a genuine American black walnut stock with handsome cut checkering and swivel studs.

Model 982L This rifle offers the features of the Model 982 with the addition of a super-tough laminated hardwood stock. Proven to be very stable, even in extreme temperature and moisture conditions, laminated stocks also have a dramatic appearance.

Model 982VS Here's a real treat for varmint hunters. The Model 982VS is a tack-driving stainless steel 22 Magnum bolt action repeater with a heavy 22" Micro-Groove® target barrel, anchored with double bedding screws. The 7-shot clip magazine is nickel-plated. We've fitted this rifle with a black fiberglass-reinforced synthetic stock with molded-in checkering and nickel-plated swivel studs.

Model 925M This economical 22 WMR comes with a 7-shot clip magazine, and a Monte Carlo walnut finished hardwood stock with swivel studs.

Model 925MC The economical Model 925M 22 WMR is also available with a camouflage stock. With features identical to the Model 925M, the Model 925MC comes with a hardwood Monte Carlo stock featuring the popular Mossy Oak® "Break-Up™" pattern.

Bolt Action 22 Rifles

Classic looks and loads of features.

These bolt action 22's have the styling and features you would expect from Marlin. Our receivers are machined from solid steel bars. What's more, the barrels of all Marlin 22 rifles have our exclusive Micro-Groove® rifling to give them superior accuracy. These rifles also feature a red cocking indicator that clearly appears on top of the striker knob whenever the rifle is cocked, and a safety with high visibility "FIRE" and "SAFE" positions. Bolt handles are shaped so that you can mount most 1" scopes.

Model 980V This heavy target barrel rifle was designed to meet the demand for a highly accurate "Squirrel Rifle". It has a 7-shot clip magazine and a black synthetic stock with swivel studs. Add a barreled action with double bedding screws and you have the ideal 22 repeater for difficult shots at squirrels, other small game, and varmints.

Model 980S This handsome bolt action repeater has a barrel crafted from stainless steel. It also features a rugged black synthetic stock, adding even more durability and weather resistance.

Model 981T If you prefer an economically priced, tube loading repeater with classic looks and features, the Model 981T is the perfect choice. It has a 22" Micro-Groove® barrel, and a black fiberglass-filled synthetic stock with swivel studs and molded-in checkering. And its full length magazine holds 25 Short, 19 Long or 17 Long Rifle cartridges.

Model 925 This clip-loading 22 rifle represents one of the best buys around in a bolt action repeater. It features an all-business hardwood stock with swivel studs, a 22" Micro-Groove® barrel and a 7-shot clip magazine.

Model 925C Based on the sturdy, economical Model 925, this 22 clip-fed bolt action rifle has everything you want. It comes with a 22" Micro-Groove® barrel and an adjustable rear sight. The Model 925C comes with a hardwood Monte Carlo stock featuring the popular Mossy Oak® "Break-Up™" camouflage pattern. Perfect for blending into the woods.

Model 915Y Single Shot Beginning shooters start right with the Model 915Y 22 youth rifle. This single shot is scaled down for smaller frames, it cocks on opening, and features an easy-load feed ramp and a thumb safety that can be left engaged while loading and unloading.

Model 915YS Single Shot Regardless of the weather, any day spent shooting with the grown-ups is a great day for a youngster. And here's a great beginners' single shot that can shrug off rain, snow and mud. The Model 915YS is the stainless steel version of our Model 915Y, with the same easy-load feed ramp and positive safety features. The Monte Carlo walnut-finished hardwood stock features a full pistol grip.

If you're looking for long-term value and dependability in a bolt action 22, you don't need to look any further.

NEW L.C. Smith Shotguns

A grand old brand name returns to the Marlin line. Back in 1945, Marlin bought The Hunter Arms Company, of Fulton, New York, maker of the legendary L.C. Smith side-by-side shotgun. Nicknamed the "Elsie", this sidelock double gun was made for a few years in the Marlin plant, before being phased out because of high manufacturing costs.

Although we have not been able to bring back the L.C. Smith as an American-made gun, we are having one of Italy's finest shotgun companies build models worthy of the great L.C. Smith name. These new side-by-sides are crafted with false side plates to echo the look of the original Smith guns.

And, although there were no over-and-under L.C. Smiths, we are offering 12 and 20 gauge models with the same excellent level of quality.

NEW Model LC12-DB This 12-gauge double barrel features a 3" chamber, a single trigger, selective automatic ejectors, three choke tubes (IC, M, F), 28" barrels with a solid rib and a bead front sight. Its walnut stock is checkered, and has a fluted comb, a beavertail forearm and a recoil pad.

NEW Model LC20-DB This 20-gauge side-by-side model has the same features as the 12-gauge, except its barrels are 26".

NEW Model LC12-OU This handsome over-and-under features a 3" chamber, a single selective trigger, selective automatic ejectors, three choke tubes (IC, M, F), 28" barrels with ventilated rib and bead front sight. It has a checkered walnut stock with a fluted comb and recoil pad.

NEW Model LC20-OU The 20-gauge version of the L.C. Smith over-and-under has all the same features as the 12-gauge, except its barrels are 26".

Scope Mounting Bases

Scope Mounting Bases are available for Marlin bolt action rimfire rifles with drilled and tapped receivers. To order, see your dealer, or visit our website at www.marlinfirearms.com.

Drilling and tapping of older bolt action models can be done by the Marlin Gun Service Department. Call 203-239-5621 for details.

The Comprehensive History of Marlin

Written by the late William S. Brophy, Marlin's Senior Technical Manager and Official Company Historian for many years, this prodigious book details the history of the Marlin Firearms Company and its products through 1990. The hard-bound volume contains 696 pages and over 2,000 illustrations.

For more information, write to Marlin Firearms Co., 100 Kenna Dr., Dept. H, P.O. Box 248, North Haven, CT 06473-0905.

Take aim at the best collection of firearms in the world.

The Other Branch of the Family

In November of 2000, Marlin purchased the assets of H&R 1871, Inc., a Massachusetts-based manufacturer of shotguns and rifles.

Founded in 1871 (one year after Marlin), the original company started in a plant in Worcester, Massachusetts.

The company subsequently moved to Gardner, Massachusetts, and today employs over 200 people. Marketing its products under the brand names of Harrington & Richardson® and New England Firearms®, H&R 1871® is the largest manufacturer of single shot shotguns and rifles in the world.

Support Your Sport

If we are going to preserve cherished hunting and shooting traditions, we must all get involved in spreading the truth, as well as contributing time and money to worthwhile conservation organizations.

Join a sportsmen's club. Buy Duck Stamps. Write letters to editors. And join the NRA. Learn the advantages of National Rifle Association membership. Write: National Rifle Association, 11250 Waples Mill Road, Fairfax, VA 22030.

Congressional Sportsmen's Foundation

The Congressional Sportsmen's Foundation serves as American sportsmen's link to Congress in order to ensure that current and future generations will have the right and opportunity to hunt, fish, and trap.

Governed by a Board of Directors comprised of industry and conservation leaders, the Congressional Sportsmen's Foundation educates Members of Congress, staff, and federal officials to better understand and represent their hunting, angling, and trapping constituents. In this way the CSF promotes legislation and policies favorable to conservation and responsible management of our nation's fish and wildlife resources.

To learn more about CSF activities and how to become a member, write: The Congressional Sportsmen's Foundation, 110 North Carolina Avenue, SE, Washington, DC 20003, Phone: (202) 543-6850, Fax: (202) 543-6853, or online: www.sportsmenslink.org.

Marlin proudly supports the
Hunting & Shooting Sports Heritage Fund.

Safety Notes

Marlin firearms are packed and shipped with an Owner's Manual. To assure safe and proper use, you should read and understand it before you load and fire your firearm. If you do not get one with your firearm, write to us, giving the model number and serial number. Write: Owner's Manual, Marlin Firearms Co., 100 Kenna Dr., P.O. Box 248, North Haven, CT 06473-0905.

Marlin firearms are designed and manufactured to handle standard factory-loaded ammunition which conforms to SAAMI® (Sporting Arms and Ammunition Manufacturers' Institute Inc.) standards with dependability and safety. Due to the many bullet and load options available, the element of judgement involved, the skill required, and the fact that serious injuries have resulted from dangerous handloads, Marlin does not make any recommendations with regard to handloaded ammunition.
