PLEASE NOTE THE FOLLOWING AMMUNITION RECOMMENDATIONS FOR USE WITH THE MODEL 1100™ STEEL SHOT BARREL.

When used with Model 1100™ Magnum shotguns:

- Use 2 3/4" magnum or 3" magnum steel shotshells.
- Use 2 3/4" magnum or 3" magnum lead shotshells.

When used with Model 1100™ non-Magnum shotguns:

- Use 2 3/4" magnum or 3" magnum steel shotshells.
- Use 2 3/4" magnum lead shotshells. Do not use 3" magnum lead shotshells in non-Magnum Model 1100™ shotguns, as this will cause extra wear and decrease the life of the gun.

3 Express® 20-ga. Fully Rifled Deer barrel has 2 3/4" chamber. Model 870™ extra barrels with 2 3/4" chambers will fit both Magnum and 2 3/4" receivers. Use only 2 3/4" shells in these barrels.

† Camo Mossy Oak® Break-Up® Pattern.

Model 11-87™ Deer barrels are not equipped with a pressure-compensating gas system, and will not function with target or light field loads.

Fitting Standard Barrels on Light Contour Shotguns

— The fore-ends on our Light Contour Model 11-87™ shotguns are shaped to follow the curve of the slimmer-profiled LC barrel, which means that a standard Vent Rib or Deer barrel cannot be fitted to your gun unless you do one of two things: have your LC fore-end wood opened up by a competent gunsmith or stockmaker; or purchase a standard profile fore-end from our Arms Service Division by writing to: Arms Service Division, Remington Arms Co., P.O. Box 700, Madison, NC 27025-0700 or visit our website at: www.remington.com.

1 Cantilever Rem™ Choke Deer barrels supplied with Improved Cylinder and Extended Rifled Choke tubes.

2 Rifle-sighted Rem™ Choke Deer barrels supplied with Rifled and Improved Cylinder Choke tubes.

3 2 3/4" chamber.

4 3 1/2" chamber.

† Camo Mossy Oak® Break-Up® Pattern.

1 NOTE: LT-20, 20-gauge Lightweight barrels (4000 Series) will not fit pre-1977 20-gauge Lightweight or standard 20-gauge Model 1100™ shotguns. (Refer to parts list for pre-1977 barrels.)

2 Rifle-sighted Rem™ Choke Deer barrels supplied with Rifled and Imp. Cyl. Choke tubes.

3 Supplied with Full Choke only.

HOME SECURITY / SAFES

The good old days of displaying your cherished gun collection behind glass in the family room are gone. The fire, safety, and theft risks are just too great – but that doesn't mean your guns have to be stored in the closet. Thanks to the exquisite styling and high-end construction of Remington safes, you can store your guns in any room of the house without worry.

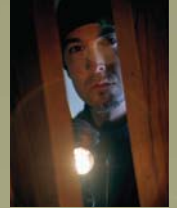

FIRE. Remington uses a true 1200° Fahrenheit test for its fire rating system. Unlike other tests that allow the fire to build over time to reach 1200°, Remington tests its safe at 1200° for the entire time, resulting in a more accurate test and fire rating system.

SAFETY. To help ensure the safety of your family, your guns should be properly stored – and Remington safes offer the perfect solution. Safety tip: Always empty and lock your guns, storing ammo in a separate, secure location.

THEFT PROTECTION. Thieves know they don't have much time. They smash, grab and take anything of value – but they can't take what they can't touch. Remington home security safes provide an excellent defensive barrier and offer the Underwriter's Laboratory's (UL) Residential Security Rating.

FIRE PROTECTION PERFORMANCE

CERTIFIED FIRE PROTECTION. The Remington Fire Protection Package is one of the finest available. Remington offers 3 levels of Fire Protection. 30 minute rated safes are factory certified for 30 minutes at a full 1200° outside temperature with the internal temperatures not to exceed 350° during that period. 45 and 60 minute safes are Omega Point Laboratory tested at either 45 minutes or 60 minutes at a full 1200° outside temperature with the interior not exceeding 350° during that period. To achieve such performance, we install multiple layers of 5/8" fire insulation, along with a Palusol® fire-seal door gasket that expands seven times it's original size to effectively seal out heat and gases.

All Remington® Safes Are U.L.-Listed Burglarproof. The best safe-crackers in the business never steal a dime. They work for Underwriters Laboratories (U.L.). Since 1921, U.L. has tried to outsmart and overpower the most sophisticated security devices in America. Using state-of-the-art techniques, they test each safe to its limit – trying to force open the handle, pry attacks on doors and drill the bolt mechanism. You can rest assured that all Remington safes exceed these rigid standards and proudly bear U.L. security certification.
