GAME CALLS with **flexitone**[®] Technology

2003 CATALOG

WATERFOWL CALLS Wingmaster™ Series

EAT MORE DUCK

Now Remington can put more ducks in your sights and on your plate. Flexitone® technology provides you with a more natural sound that ducks can't resist.

flexitone® technology

Wingmaster™ Series

A GENUINE AMERICAN CLASSIC

Hunters have relied on their Remington® Model 870™ Wingmaster™ shotguns for over 50 years and have made it the world's best selling shotgun of all time. Known for its ruggedness, dependability, and versatility the 870 Wingmaster is trusted to bring home the game. Now that same dependability in shotguns is available in a series of Wingmaster™ game calls. Manufactured with the same principles of good design, rugged materials, and in-the-field performance, the Wingmaster™ game calls carry on the legacy of the original Remington Model 870 Wingmaster shotguns. You can now trust Remington Wingmasters to bring in game as well as to bring it down.

All Remington Wingmaster series waterfowl calls features flexitone® technology. This innovation in game call design utilizes a soft flexible vinyl exhaust bell to more accurately mimic the soft tissues of a duck's or goose's neck and tongue. These calls also feature a hand tuned one piece toneboard and an incredibly durable polycarbonate barrel. This design not only provides the durability and performance you expect from Remington but also delivers the most natural sound available.

MODEL WMDRM
Wingmaster™ Double
Reed Mallard

MODEL WMSRM
Wingmaster™ Single
Reed Mallard

MODEL WMW
Wingmaster™ 6 in 1
Whistle

MODEL WMCG
Wingmaster™
Canada Goose

The **Wingmaster™ Double Reed Mallard Call** has a raspy, nasty, low end as well as plenty of volume when needed. It is easy to use and perfect for flooded timber, marsh, or backwater sloughs.

The **Wingmaster™ Single Reed Mallard Call** is an exceptional finesse call that can handle anything from loud hail calls to soft raspy quacks. It is ready for any hunting situation and is just as capable on open water or a rice field as it is in the marsh or timber.

The **Wingmaster™ 6 in 1 Waterfowl Whistle** is a more versatile duck and bird whistle. This call will produce the sounds of pintail, widgeon, teal, mallard drake, quail and hawk. Not only can you mimic the sound of individual birds, but by squeezing and releasing you can mimic the whole flock.

The **Wingmaster™ Canada Goose Call** makes it easy to master a full range of natural sounding goose calls. Controlling back pressure by squeezing and releasing the exhaust bell allows users to produce the sounds of multiple geese and double cluck with ease. The polycarbonate barrel gives this call enough volume to impress even the competition trained caller.

WATERFOWL CALLS

Sportsman™ Series

HARD CORE

If you describe your waterfowl hunting habit as hardcore then the Sportsman™ Series was built for you. Nothing fancy, only the durability, versatility and natural sound you would expect from Remington Game Calls.

flexitone® technology

waterfowl

MODEL RS1.5M
Sportsman Series
1.5 Reed Mallard

MODEL RSWD
Sportsman Series
Wood Duck

The Remington Sportsman™ Series Waterfowl Calls feature patented **flexitone®** technology. Each Express Series Waterfowl call features a rigid toneboard surrounded by a soft, flexible call body. This innovation in game call design provides a truer more natural sound by mimicking the soft flexible tissue of a game animal's neck and tongue. This design not only provides a more natural sound but also gives you enhanced control of volume and tone as well as the durability you would expect from Remington.

The **Remington® Sportsman Series Mallard Call** has a reed and a half design that gives you the range of a single reed as well as the ease of use of a double reed. Its versatility makes this the perfect call for the beginner as well as the experienced hunter alike.

The **Remington® Sportsman Series Wood Duck Call** is easy to use and capable of producing full range vocalizations of the wily wood duck. Just squeeze and release to produce the flying squeal, the water whine or any sound in between.

Speckle Belly Goose

MODEL RSSG
Sportsman™ Series
Snow Goose

The **Remington® Sportsman™ Series Canada Goose Call** is an easy to use short reed type goose call that has an incredibly natural sound thanks to **flexitone®** technology. Controlling back pressure by squeezing and releasing the exhaust bell allows users to produce the sounds of multiple geese and double cluck with ease.

The **Remington® Sportsman™ Series Speckle Belly Goose Call** also features our self tuning reed assembly and since speck calling is all about back pressure you'll be sure to love this call. The soft flexible barrel allows you to blow hard or soft and squeeze the exhaust bell to create just the right amount of back pressure so the reed breaks right every time.

The **Remington® Sportsman™ Series Snow Goose Call** also features our self tuning reed assembly and was designed to meet the demands of serious goose hunters. It is easy to use and the big barrel offers incredible volume when you need it.

DEER CALLS

SILENCE IS DEADLY

One of the many things that makes our deer call deadly is its silence. The soft flexible design makes these calls silent when accidentally coming in contact with your gun or bow which could be the difference in coming home with your trophy or just coming home.

flextone® technology

MODEL RD
Remington®
All-N-One Deer Call

The **Remington® All-N-One Deer Call** features the amazing versatility of the patented **flextone®** design allowing the All-N-One to be just that-one call that produces all kinds of sounds. Depending on where you press the soft flexible barrel you can create buck grunts, doe grunts, doe estrus bleats, fawn bleats, fawn distress calls and control volume. The barrel is even labeled to make the process easier. There's no need to disassemble the call or mess with O-rings. Our flexible design is ready to give you a wide variety of natural sounds instantly.

The **Remington® Hands Free Deer Call** is perfect for the bow hunter. This model enables you to keep your hands on your bow or gun and call the trophy all the way in, or stop the animal right in your shooting lane. The flexible end also gives you more control of volume and inflection. The reed assembly has grooves on the bottom so you can find the exact spot to produce the sounds of fawns, does, or bucks.

The **Remington® Wrist Strap Mini Grunter** enables you to strap this call to your wrist, it is compact and out of the way until you need it, like when you are at full draw or have your gun mounted. This call features the natural sound that Flextone offers and can be adjusted to produce the sounds of bucks, does, or fawns.

The **Remington® Fawn Bawl** is excellent for early season bow hunting or predator hunting. The natural sound of **flextone®** technology and the ability to control volume and inflection make this an awesome fawn bleat or bawl. This call produces the distress calls that get excellent results on does in the early season or predators.

The **Remington® Rattle Bag** features stretchable material that keeps the inside from making unwanted noise when walking, and flexes to give you added force when rattling. The 8" bag is the perfect size to produce natural sparing and fighting sounds without the bulk of real antlers. Each bag also contains our Acrylic Volume Rod for extra volume when needed. Use with one of our Remington™ deer calls to produce a deadly combination of sounds.

PREDATOR CALLS

SHOTGUNNING FOR PREDATORS

The whining and pleading sounds of our dying rabbit call are so natural you'll be able to bring them into shotgun range. Although, it is nice to know that there is the legendary Model 700 so you don't have to.

flextone® technology

deer & predator

The **Remington® Dying Rabbit Call** makes it impossible for predators to resist investigating the natural whining and pleading sounds of **flextone®** technology. The flexible design gives this call lots of inflection and volume control, just squeeze the end closed for a quiet whine or release for increased volume. It's a coaxer and long distance call all in one.

The **Remington® Coon Squaller** has the natural sound, durability, and control of **flextone®** technology in a compact design that is sure to make him look.

The **Remington® Coyote Howler** is the perfect long distance call and locator. The soft flexible barrel allows the user to control volume and backpressure by squeezing the end, enabling you to produce natural sounding yelps, barks, and howls. As with all of our Remington® Calls with **flextone®** technology it is silent if accidentally coming into contact with your gun or bow.

(see Deer Calls page)

Sometimes it may not be the object of the hunt that ends up being the story. Sometimes an early season bow hunt for a mature doe ends up as a successful predator hunt. One thing that doesn't change is getting game animals to respond to our natural sounding calls.

TURKEY LOCATORS

FIRED UP

Our turkey locators have the volume to get an old wily tom fired up and have the natural sound to get you close so he can be fired on.

flextone® technology

The **Remington® Crow Call** is the ultimate call for turkey and crow hunters alike. The big, flexible barrel gives you the versatility to produce amazing shock gobbles at various volumes by simply squeezing the tube. Likewise, crow hunters can squeeze and bend the call in different directions to control volume and tone while producing the sound of multiple crows. A truly impressive call.

The **Remington® Owl Hooter** lets you get an old wily tom fired up. Our soft, flexible design gives you unmatched control of volume, tone and backpressure so you can produce truer, more natural owl calls every time. And no matter what abuse you put this call through, it will spring back to work perfectly because of its superior durability.

Crow Call

MODEL ROH
Remington®
Owl Hooter

Everybody has a story about "the unkillable turkey". He'll gobble his head off; you think you've got him, but you go home without him. No matter what you try he is one step ahead. Well, turkeys are not that smart. They may be scared to death which makes them tough. Next time try locating him with a more natural sounding locator and maybe it will put you one step ahead.

LANYARDS AND GAME TOTES

QUALITY

You can't be carrying around calls this good without a well made lanyard to ensure you don't lose them.

turkey locators & lanyards

Remington® Lanyards and Game Totes

These are top quality hand braided camo lanyards and game totes.

Remington® Four Loop Lanyard

This is a heavy duty diamond braid camo lanyard with noose type loops, a whistle clip, and a logo duck band.

Remington® Six Loop Lanyard

The same as our heavy duty four loop lanyard with two additional drop down loops to help keep your calls separate.

Remington® Six Ring Game Tote

Heavy-duty diamond braid camo tote with six super strong harness rings can carry more ducks and geese than you will want to tote.

Hunters depend on Remington®, America's Oldest Gun Manufacturer, to deliver ruggedness, dependability, and versatility. Now you can depend on your game call to deliver those qualities as well as natural sound. Remington® Game Calls, developed by Tom Wiley with Wiley Outdoor Products LLC., feature patented **flexitone®** technology.

Each Remington® Game Call features a rigid toneboard surrounded by a soft, flexible call body. This innovation in game call design provides a truer more natural sound by mimicking the soft flexible tissue of a game animal's neck and tongue. This design not only provides a more natural sound but also gives you enhanced control of volume and tone as well as the durability you would expect from Remington®.
