To Our Loyal Ruger Customers:

Last year we introduced our first catalog devoted exclusively to Ruger® logowear and accessories. We must have done this correctly, as we have received many compliments and demand has soared! Look around at any rifle range and you will likely see shooters wearing or using some symbol of Ruger – the largest and finest American firearms manufacturer.

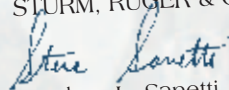

We've listened to your many thoughtful comments and suggestions, and for 2005 we have added a number of attractive new items. As always, before the Ruger name or logo goes on anything we ask ourselves, "Would we be proud to own or display this item?" Nothing goes in this catalog that doesn't meet this basic test.

With dozens of new sportswear products and our many new firearms introductions shown in the free "Ruger Catalog of Fine Firearms", we have never had more items to offer our customers. We hope you like our new products and hope that they enhance your sport shooting activities. Please continue to enjoy them safely and responsibly, as we intend.

Your displaying the handsome and distinctive Ruger logo while responsibly enjoying the shooting sports will set an example for others. You can show the world that you are proud to associate yourself with the finest American traditions of quality, craftsmanship, and safety, which have been our special hallmarks for over 55 years.

On behalf of the 1,400 American workers and their families who make up Sturm, Ruger, I sincerely thank you for your loyal support. Please let us know what else you'd like to see us offer!

Sincerely,  
STURM, RUGER & COMPANY, INC.

  
Stephen L. Sanetti  
President

X = Model rings shipped with firearm. X = Alternate size and configuration rings available for your firearms. All rings are for 1" tube diameter scopes EXCEPT those marked 30mm tube diameter scopes.

\*Offset Rings feature one or two rings (single, double) that are offset to the rear by 1/2 inch to allow rearward positioning of the scope.

**NOTE:** Different ring heights are available to ensure needed clearance between the scope and barrel. Scope cap covers, barrel contours and objective diameters can affect height requirements.
