Unlimited Lifetime Repair Policy™

Contents

Simply stated, we will repair your Taurus firearm (imported or manufactured by Taurus International Manufacturing, Miami) FREE OF CHARGE should it ever require repair, for the lifetime of your firearm. If you purchase a pre-owned Taurus firearm, Taurus' lifetime repair policy follows it, remaining in effect. The only exclusions are damages caused by customer abuse, modifications and accessories, rust/corrosion, sights or (after one year) cosmetic defects.

+P Rated for Duty Use®

Handguns are engineered Taurus tough and built Taurus strong to accept a steady diet of factory new Plus-P (+P) ammunition built to SAAMI specifications. All Taurus handguns, including the Ultra-Lite hammer forged aluminum alloys, Titanium, blue steel and stainless steel accept Plus-P ammo. Rest assured, your Taurus will be ready, especially when you're counting on it.

Taurus PT1911

Here's the hottest version of the ever popular 1911 at a great price. Already hot-rodged with polished feed ramp on the barrel, lowered ejection port, ambidextrous safety, beavertail grip safety with memory pad, excellent lock-up, custom grip panels, ventilated trigger, adjusted for minimum over-travel, and sporting the dominant Heinie Sights. This gun is accurate right out of the box and will compete with anything out there. You will love the light, smooth trigger pull, the out-of-the-box accuracy and the just right pricing.

1911B
.45 ACP
Blue Steel

1911SS
.45 ACP
Stainless Steel

Let's review the features:

- *Forged slide and frame*
- *Excellent fitting of slide to frame*
- *Ventilated and lightened trigger with minimum over-travel*
- *Skeleton hammer lightened for quick lock time*
- *Ambidextrous safety and internal firing pin block*
- *8 Round Magazine with bumper pad*
- *Equipped with Genuine Heinie Sights*
- *Solid metal spring guide and custom fitted bushing*
- *Hardened barrel lugs lock solidly to slide*
- *Taurus Lifetime Repair Policy*

All at a really great, affordable price. Shoot it in Stock Gun Classes right out of the box!

Family of Hunters

Handgun of the Year

M454SS8
454 Casull

M627SS6
.357 Magnum

Led by the award winning Raging Bull, the Taurus Family of Hunters is a full line of hunting handguns, rifles and carbines. From the .22 LR Model 62 to the powerful 454 Casull, there is a Taurus hunter for you.

The Taurus Family Of Hunters

Fellow Hunters, The Taurus Family of Hunters is growing because we're serious about the use and enjoyment of our products. Like an increasing number of Americans, we hunt with Taurus firearms, target shoot and plink with them, and rely on them for protection of ourselves and loved ones. We also

listen to our fellow hunters. That's why we produce the premium, award winning firearms you want, delivering superior accuracy and reliability at an affordable price and actively support our rights. Taurus means quality, features, and models no one else can manufacture, backed by our Lifetime Repair Policy.

Taurus Executive VP Bob Morrison with a Russian boar taken with one shot from his Raging Bull™.

Taurus Model 63

The Model 63 is a faithful reproduction of the long beloved rifle that we all learned to shoot with, right down to the blue steel buttplate. Taurus has taken this timeless design and added in all of the refinements new manufacturing technology offers.

The Model 63 features a manual safety on the rear of the trigger guard and the unique Taurus Security System mounted on the bolt. As soon as you pick this rifle up, you will know you are holding a piece of history and shooting tradition.

Adjustable Rear Sight

Steel Butt Plate and Loading Tube

The stock mounted loading chute and the top quality hardwood stocks complete this shooting package. The Model 63 takes down easily for pack carry by means of a thumb screw on the back of the receiver. An adjustable rear sight allows for the kind of accuracy you can expect from this rifle. Model 63 holds 10 rounds of .22 LR and the optional Taurus Rimfire Recharger Tubes give you the chance to shoot all day with quick and easy reloading. Check out a Model 63 at your local dealer. You will want to take it home.

Authentic, Realistic, Genuine and The Finest all go to describe this six-gun right from the pampas.

It's a tool straight from the gaucho who uses it daily in his rough and tumble work herding and caring for cattle in some of the meanest territory south of Texas. Taurus has been providing firearms to these tough men for almost 70 years and is proud to bring that heritage to you "Northerners."

The Gaucho represents the refinement of the single action revolver with integral transfer bar and the famous Taurus Security System. Like all Taurus firearms, the Gaucho has our Unlimited Lifetime Repair Policy.

Polished Stainless Steel

C357BR
.38 Special/.357 Magnum
Blue Steel

Hammer Mounted Decocker Button on Thunderbolt allows for safer decocking without touching the trigger. The hammer lowers to the intercept notch and stops before striking the firing pin.

- NEW Hammer Mounted Decocker
- .38 Special/.357 Magnum or .45 LC.
- Beautiful Hardwood Stock and Forend
- Solid Metal Curved Crescent Butt Plate
- Stock Sanded and Finished to Match Each Individual Rifle

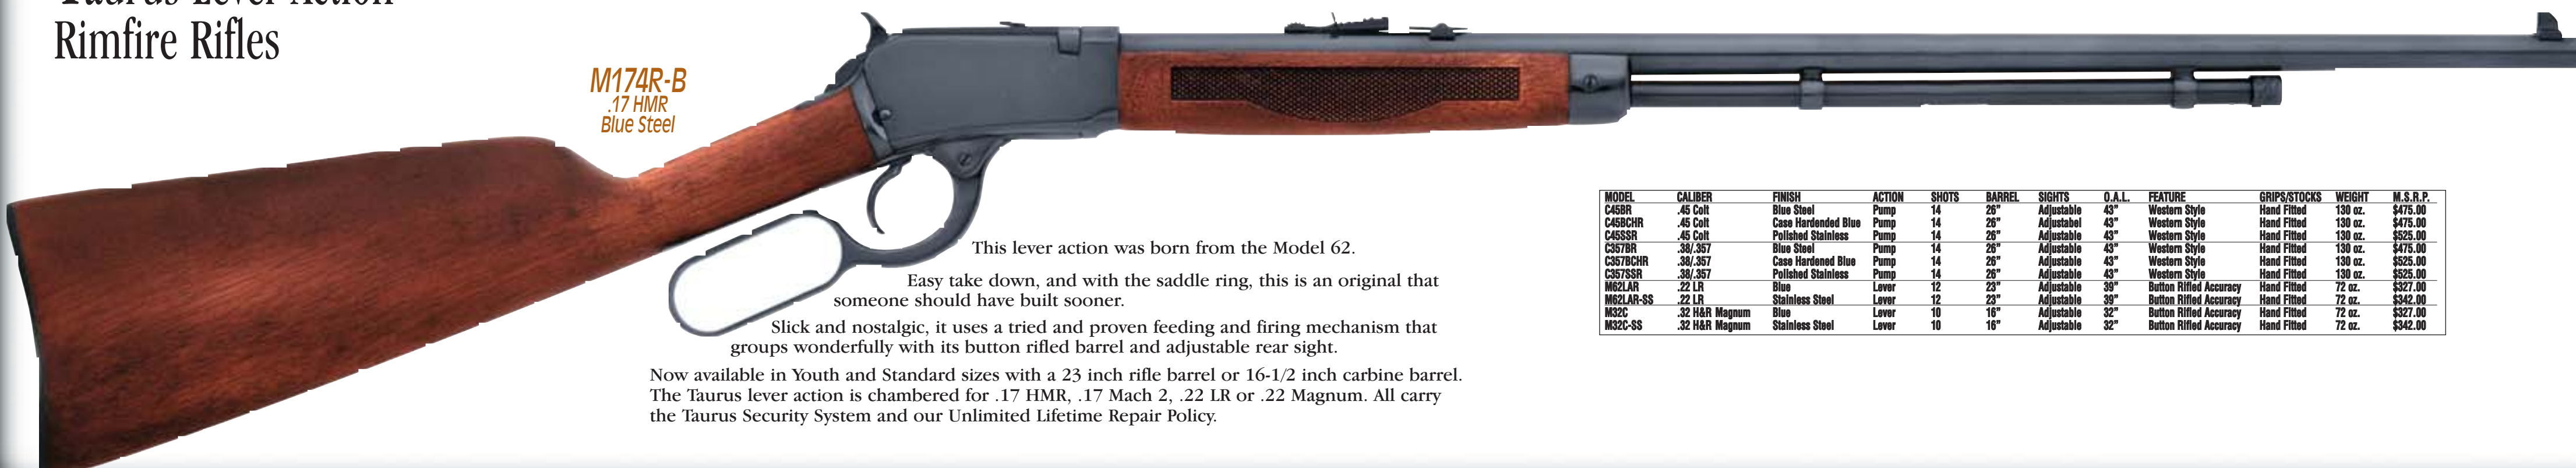

- Authentic Long Horn Adjustable Rear Sight
- Easy Function Feed Gate
- 14 Round Capacity
- Super Fast Short Action Pump
- Great Trigger

- Button Rifled Barrel
- Excellent Balance and Natural Feel
- Beautiful Blue or Polished Stainless Finish
- Taurus Security System

You can further enhance the extreme accuracy of the Taurus Thunderbolt with the Taurus Tang Sight. Some dealers offer the tang sight installed or the sight can be purchased separately from your local dealer or at www.taurususa.com.

Taurus Lever Action Rimfire Rifles

M174R-B
.17 HMR
Blue Steel

M174R-SS
.17 HMR
Stainless Steel

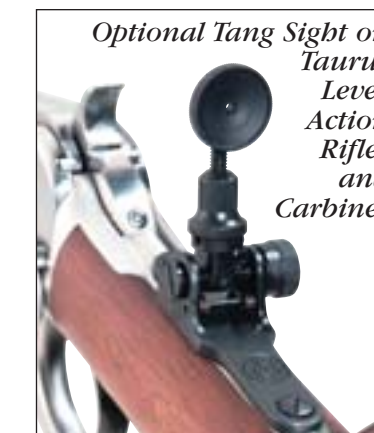

This lever action was born from the Model 62.

Easy take down, and with the saddle ring, this is an original that someone should have built sooner.

Slick and nostalgic, it uses a tried and proven feeding and firing mechanism that groups wonderfully with its button rifled barrel and adjustable rear sight.

Now available in Youth and Standard sizes with a 23 inch rifle barrel or 16-1/2 inch carbine barrel. The Taurus lever action is chambered for .17 HMR, .17 Mach 2, .22 LR or .22 Magnum. All carry the Taurus Security System and our Unlimited Lifetime Repair Policy.

Taurus Pistol Safety and Security

Loaded Chamber Indicator on Taurus Pistols

Safety first is the motto of every law-abiding gun owner. With that in mind, Taurus provides a loaded chamber indicator on all compact, medium and large frame pistols. As with all Taurus safety and security innovations, the indicator in no way interferes with the operation of your pistol and is provided at no extra cost, but allows you to verify with your finger or "at-a-glance," that there is a round in the chamber. When a round is in the chamber, the extractor pops out of the slide, just behind the ejection port. While any loaded chamber indicator is no substitute for common sense and safe firearm handling, it is one more example of Taurus' commitment to outstanding firearms. Do not rely on the loaded chamber indicator or any other safety device. Always clear any pistol by removing the magazine, pulling the slide back and visually confirming the chamber is empty. Always remember to "Open and Show Clear."

3-Position Safety is a Taurus Innovation

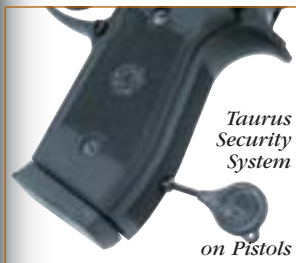

Fig. 1

Try the ambidextrous Three-Position Safety on any Taurus pistol capable of firing in both single action and double action. It's easily operated and provided at no additional charge. Depress with your thumb (Fig. 1) and safely drop the hammer to de-cock the pistol. The safety returns to the OFF position, ready for double action shooting. Push the safety up (Fig. 2) and your cocked pistol is safe to carry in the single action mode. When applied to a de-cocked pistol, safety is ON and the first shot is double action.

Fig. 2

Taurus Pistol Security System

Taurus Security System on Pistols

This innovative and patented system is now on the complete line of Taurus pistols. Just like the revolver version, a quarter turn of the key locks the action, preventing the hammer and trigger from moving, and prohibits racking of the slide. Just a quarter turn of the key returns the gun to complete readiness. The Taurus Security System is always included at no additional cost.

Taurus Security System on PT22 and PT25

Taurus Millennium Security System

Taurus Security System on Millennium Pistols

The Taurus Millennium® family of semi-auto pistols features the Taurus Security System, which provides instant-ready defense with built-in ability to secure your pistol and make it inoperable at the turn of a key. When the Security System is engaged, the Millennium cannot be fired, cocked, or disassembled, and the gun's manual safety cannot be disengaged. As with our revolver Security System, the device is part of the firearm and cannot be lost, and the same special Security Key works for both the revolver and pistol systems (two keys come with each new gun).

Taurus pistols, with the exception of Models PT22 and PT25, do not have an integral magazine disconnect and will discharge with a round in the chamber and the magazine removed.

Need information on new 2 1/4 barrel models

Taurus .17 HMR Revolvers

- Taurus is first to offer D/A-S/A revolvers chambered in .17 HMR
- Target Crown to protect muzzle and improve accuracy on 4 inch and 5 inch models only
- Adjustable sights
- Solid steel or lightweight aircraft aluminum alloy construction
- Yoke detent lock-up for added cylinder stability
- 2 inch Ultra-lite models available
- Taurus Security System to help deter unauthorized users
- Lifetime Repair Policy

Formerly only the most expensive custom-built revolvers came with a highly desirable Target Crown. Why? Simply because it is acclaimed to be the finest way to enhance accuracy. The .17 HMR achieves high levels of accuracy at high velocities and is a flat shooter. Knowing this, Taurus includes it...FREE on the .17 HMR revolver line.

Raging Bull

★ .500 Magnum - New for 2005 ★

Taming the recoil of the new and powerful .500 Magnum round, the proven Raging Bull design, this newest and largest Taurus comes straight to you after a full year of design and engineering know how. Not satisfied with another "Me Too" approach to just being the biggest, Taurus is bringing you the ultimate in big bore.

Raging Bull is the proven design for handgun hunting and our careful attention to detail assures a clean shot every time. Larger in every dimension, this best of the big boys brings you comfortable shooting at an equally comfortable price.

- Dimensioned to shoot big bullets comfortably
- Impeccable Balance
- Authentic Raging Bull Grips and Profile
- Barrel Frame and Cylinder are Hammer Forged
- Beautiful Sights
- Soft and Easy Staged Double Action
- Crisp and Light Single Action
- Optional Scope Mount Base
- Superb Accuracy
- Taurus Security System
- Dual lockup for maximum stability
- Unlimited Lifetime Repair Policy

Scope Mount Bases accept Weaver-style rings, and are specially made for Taurus Raging Bull series revolvers.

Why Titanium

- Titanium is 2/3 the weight of steel and 10 times stronger
- Stronger...Hammer Forged Titanium makes the world's strongest handguns. None stronger
- Super light pistols and revolvers packing a full strength punch
- Corrosion and rust resistant
- The most modern gun material available
- Total Titanium? Just about...every part that can be titanium, is titanium
- Shadow Gray Titanium looks like stainless steel but weighs only 2/3 as much
- Taurus Titanium Millennium Pistol - the only Titanium pistol made
- Taurus Titanium revolvers and pistols in 9mm, .38 Special +P Rated, .357 Magnum, .41 Magnum

When You Think
Titanium, Think Taurus

Taurus Security System™

The patented Taurus Security System renders the firearm inoperable by use of a special key. For those with concerns about unauthorized use of their Taurus firearm, the integral Taurus Security System provides an additional measure of assurance. All Taurus firearms include either the Taurus integral security system or an appropriate external locking mechanism. All new Taurus firearms feature the Taurus Security System at no extra charge.

Taurus Revolver Security System

Engagement (Secure)

Insert the key into the mechanism and turn clockwise until a click is felt or heard. The mechanism now partially protrudes above the surface of frame or hammer. The action is locked in place and cannot function.

Disengagement (Ready-to-Fire)

To place the revolver in a firing condition, insert the key into the mechanism and turn it counter-clockwise. The mechanism is now virtually flush with the surface. The revolver can now be fired.

Taurus Security System on CIA Model Revolvers

Taurus Security System on Protector Revolvers

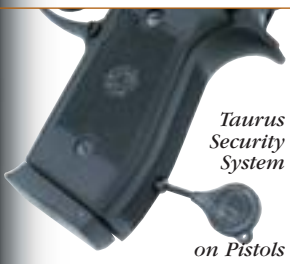

Taurus Millennium Security System

The Taurus Millennium™ family of semi-auto pistols features the Taurus Security System™, which provides instant-ready defense with built-in ability to secure your pistol and make it inoperable at the turn of a key. When the Security System is engaged, the Millennium cannot be fired, cocked, or disassembled, and the gun's manual safety cannot be disengaged. As with our revolver Security System, the device is part of the firearm and cannot be lost, and the same special Security Key works for both the revolver and pistol systems (two keys come with each new gun).

Taurus Security System on Millennium Pistols

Taurus Pistol Security System

Taurus Security System on Pistols

This innovative and patented system is now on the complete line of Taurus pistols. Just like the revolver version, a quarter turn of the key locks the action, preventing the hammer and trigger from moving, and prohibits racking of the slide. Just a quarter turn of the key returns the gun to complete readiness. The Taurus Security System is always included at no additional cost.

Taurus Security System on PT22 and PT25

Taurus Long Gun Security System

Taurus Model 62, 72 and 172 Rifles and Carbines feature the unique Taurus Security System.

All Taurus Long Guns carry the Taurus Security System. On the pump action guns, the system operates in the same way the revolver system does. On our semi-automatic rifles, the system locks the bolt and firing pin with a turn of the special key. The Taurus Security System is always included at no additional cost and 2 keys come with each new gun.

Taurus Security System on Model 63

Taurus Copper Bullet Handgun Cartridges

It gets no better than Taurus' advanced 99.95% Pure Copper Premium Ammunition.

When the FBI underwent their performance and barrier material gelatin block testing, they concluded that in 10% ballistic gelatin, minimum penetration need be 12". Tests show Taurus HEX[®] Pure Copper Bullets meet and exceed the FBI's minimum requirements with ease.

Take a good look at the Taurus HEX Bullet. What you see is a wide, deep hollow-point cavity lined with six expansion scribe marks inside the hollow point cavity and deep down in the cavity you will see a dimple that acts as a storage area for any cloth accumulation it may encounter upon penetration. The storing of debris in this dimple is what allows the HEX bullet to consistently expand to the rose petal shape shown.

Our bullets are not bonded together and there is no jacket so there is no weight loss or splitting and shattering. Try a box of these straight shooting rounds and find out for yourself why the Taurus Copper Bullet is already ranked as a #1 personal protection load.

ORDER NUMBER	CALIBER	BULLET WEIGHT	FEATURES	ROUNDS PER BOX	M.S.R.P.

Taurus Design Features Available On Selected Revolvers

Yoke Detent

- **Yoke Detent.** To insure the cylinder remains closely aligned within the frame at the moment of firing, we have added a spring-loaded detent system to the top of the yoke, a feature previously offered on custom revolvers from premium gunsmiths.

Extended Ejector Rod

- **Extended Ejector Rod.** Adding the new Yoke Detent system has allowed us to add extra length to the cylinder ejector rod, which enables much more positive extraction of fired cases than previous short-design snubnose revolver ejector rods.

Ribber Grip™

- **Ribber Grips[®].** The patented new Taurus pliable grip will conform to the precise shape and form of your hand as you grasp it, comfortably cushioning magnum and +P recoil while remaining absolutely secure without movement or slip, even in rapid fire.

Products may vary from those depicted, and Taurus reserves the right to modify, change or discontinue products, pricing or features at any time without prior notice.

Taurus 44 TEN™

What?

A 410 Revolver that also shoots a .44-40 Rifle Cartridge and the venerable .45 LC

Are you kidding?

Just wait a while and this most versatile idea grows on you.

It becomes one of those "I really need that gun."

We have them in a specially designed standard frame with a newly designed, elongated cylinder to accommodate all these various shells.

So grab a case of 410's and head for the clay bird range. You'll find yourself hitting aerial targets like Annie Oakley.

Then head for the steel plate range and practice your cowboy routine with the 45LC.

Then to the rifle range to test the 44-40.

All in one afternoon with one Taurus 44 TEN!

And remember...It's not a bad snake gun, bird dog training gun and handy to have around for other pesky varmints.

Call it out when you need the ONE Gun for the most fun

The Taurus 44 TEN!
