blazer[®] ammunition

GREAT ECONOMY THROUGH GREAT TECHNOLOGY. If casual practice is getting expensive, look to Blazer. Blazer uses aircraft-grade aluminum that's heat-treated to make an economical cartridge case. As the case is the most expensive component of any cartridge, our aluminum case lets us give you a cartridge that has all the performance of brass-case ammo at a more attractive price.

We load Speer bullets and CCI primers, both with a long record of happy users. You also get selection, from 25 Auto to 45 Colt. Blazer also features a selection of bullet weights and styles, something you can't get in typical "white box" ammunition or imports. Blazer is a great option to reduce the cost of practice. It lets you shoot more, and more often.

blazer[®] clean-fire[®] ammunition

LEAD-FREE SHOOTING THAT'S EASY ON YOUR BUDGET. We make Blazer[®] with CCI[®] Clean-Fire primers and Speer[®] TMJ bullets. Designed for indoor ranges, Blazer Clean-Fire virtually eliminates airborne lead, barium and antimony at the firing point, and gives you realistic recoil and point-of-impact. The air, your gun and your hands stay cleaner. Make your training time on the indoor range count with this great product.

the visible
difference

Spent Clean-Fire cases look almost unfired when compared to traditionally primed ammunition. The heavy metals have been removed, producing a clean burn.

Abbreviation Key
FMJ—full metal jacket

FN—flat nose
HP—hollow point

L—lead
J—jacketed

TMJ[®]—encased-core full jacket
RN—round nose

Test barrels are used to determine ballistic figures. Individual firearms may vary. These figures are approximate and are shown for reference. V = Vented test barrel simulating revolver performance.

blazer® shotshell ammunition

PEST CONTROL WITH YOUR HANDGUN. Do you want to use your favorite handgun for close-range pest control? Think Blazer®. We make more handgun shot cartridges than anyone else.

There's the 45 Colt Shotshell, with a big payload of #9 shot. The 44 Shotshell now chambers in both 44 Special and 44 Magnum revolvers for greater versatility. The 9mm Luger, 40 S&W, and 45 Auto* shotshells are designed to function in most semi-automatic handguns. In some cases manual cycling will be required. They are packed in reusable boxes of ten shotshells.

Caliber	Part #	Shot Size	Approx. Payload Wt, grs†	Muzzle Velocity, ft/sec			Box Count
				4" barrel	5" barrel	6" barrel	
Blazer® Shotshells							
9mm Luger	3706	#12	64	1450	—	—	10
38 Spl/357 Mag	3709	#9	109	—	—	1000	10
40 S&W*	3970	#9	105	1250	—	—	10
44 Spl/Mag	3979	#9	140	—	—	1000	10
45 Auto*	3567	#9	117	—	1100	—	10
45 Colt	3972	#9	150	—	—	1000	10

Intended for short-range pest control; not recommended for self-defense
†—actual shot charge determined by volume; approx. weights provided for reference only
*—40 S&W and 45 Auto use an extended cartridge case instead of a plastic capsule; 45 Auto shotshell is not intended for revolvers
WARNING: Do not use these or any other shot cartridge in handguns having ported recoil compensators

blazer® brass handgun ammunition

ECONOMIC RELIABILITY. Blazer® Brass brings shooters the reliability and quality of ammunition built to SAAMI standards, and is backed by stringent ISO certified quality systems. Blazer Brass is loaded in reloadable brass cases for added value. Standard Boxer-type primers and primer pockets mean you can reload Blazer Brass cases just like any other case. Blazer Brass is loaded with a protected-base FMJ bullet. CCI® primers insure reliable ignition, and we load clean-burning propellants. Blazer Brass is available in 9mm Luger, 380 Auto, 38 Special, 357 Magnum, 40 S&W, and 45 Auto calibers with standard-weight bullets.
