Hydro-Press™

Swage .17 cal. to 25mm bullets and reload up to 20mm, draw precision jackets and extrude lead wire. Make lead-free powder

metal bullets. The rugged Hydro-Press is the heart of custom bullet firms and ballistic labs around the world.

CHP-1... \$6450

Type -H Dies from \$160.

Ideal for a retirement business!

Swaging (sounds like paging) is forming bullets with high pressure instead of heat.

• **You don't have to melt lead.**

There are no fumes, no burns, and very little prep or clean up afterward. You cut a piece of lead wire, drop it in the die, and pull the handle!

• **Swaging gives you...**

- ...More time to shoot, because it is so fast.
- ...Ultra high precision (up to 100 times rounder).
- ...Amazing weight control.
- ...Adjustable weight: one die = 1000+ moulds!
- ...Power to draw high precision jackets at home.
- ...Power to make lead-free powder metal bullets.

• **Corbin will help you get started!**

Check out our websites for procedures and price! Send a drawing, sample, or description of the bullet for a quote to get exactly the right tools.
