Unlimited Lifetime Repair Policy™

Contents

Simply stated, we will repair your Taurus firearm (imported or manufactured by Taurus International Manufacturing, Miami) FREE OF CHARGE should it ever require repair, for the lifetime of your firearm. If you purchase a pre-owned Taurus firearm, Taurus' lifetime repair policy follows it, remaining in effect. The only exclusions are damages caused by customer abuse, modifications and accessories, rust/corrosion, sights or (after one year) cosmetic defects.

+P Rated for Duty Use®

Handguns are engineered Taurus tough and built Taurus strong to accept a steady diet of factory new Plus-P (+P) ammunition built to SAAMI specifications. All Taurus handguns, including the Ultra-Lite hammer forged aluminum alloys, Titanium, blue steel and stainless steel accept Plus-P ammo. Rest assured, your Taurus will be ready, especially when you're counting on it.

Taurus Security System on 24/7 Pro Pistols

- NEW Unique SA/DA Trigger System
- Flared Bushingless Barrel
- Picatinny Accessory Rail
- Indexed Memory Pads™
- Manual Safety
- Low-Profile Magazine Release
- One Piece Slide Rails
- Taurus Security System®
- Loaded Chamber Indicator
- Tuned and Lowered Ejector Port
- Flush Fit Magazine with Finger Rest
- Overmolded Ribber Grip® on 9mm and .40 Cal. models.
- One Piece Guide Rod and Flat Wound Captive Spring
- All Models Come With 2 Blue Steel Magazines
- Heinie Straight Eight Sights

24/7 Pro features a Picatinny rail system to accommodate any slide-on light or laser sight. Taurus has put both the #1 and #3 notches in along with the 'keyhole' for those accessories requiring it.

Taurus 24/7 Pro™

Indexed Memory Pads along the grip frame provide an automatic finger locator for safe firearm handling as well as an aid to quick and accurate aim when using a traditional two-handed grip.

The 24/7 PRO trigger system solves the double action/single action dilemma once and for all. Figure 1 shows the trigger at full rest when a round is chambered. The trigger will travel freely to a single action short crisp pull. The firearm will have a short reset (Figure 2) for continual single action pull. If the round misfires then release the trigger and it will reset the trigger automatically (Figure 1) for a secondary strike capability.

The 24/7 Pro has the genuine Heinnie 2-dot 'Straight Eight' sight system as standard equipment on all models.

The description Mother of Pearl and Rosewood fits common accepted industry usage for decorative composition products. The phrase Gold indicates the component parts are 24-kt gold plated steel parts.

What's so great about
the Taurus PT 1911?

EVERYTHING

**A bold statement we know, but the new Taurus 1911
does have everything and then some.**

The new Taurus PT 1911 has an in store price of \$599 for the stainless model, less for the blued version. Check out the features list at retail value compiled by famous firearms experts as an average of parts and fitting charges from five U.S. pistolsmiths based on a Mil-spec Model 1911 pistol as a starting point.

Not only is the Taurus 1911 destined to become the standard that all 1911 pistols are compared against for quality, they are an **UNBEATABLE VALUE**. They have **EVERYTHING**.

TAURUS PT 1911 FEATURES AT RETAIL VALUE

Taurus Model 63

The Model 63 is a faithful reproduction of the long beloved rifle that we all learned to shoot with, right down to the blue steel buttplate. Taurus has taken this timeless design and added in all of the refinements new manufacturing technology offers.

The Model 63 features a manual safety on the rear of the trigger guard and the unique Taurus Security System mounted on the bolt. As soon as you pick this rifle up, you will know you are holding a piece of history and shooting tradition.

Adjustable Rear Sight

Steel Butt Plate and Loading Tube

The stock mounted loading chute and the top quality hardwood stocks complete this shooting package. The Model 63 takes down easily for pack carry by means of a thumb screw on the back of the receiver. An adjustable rear sight allows for the kind of accuracy you can expect from this rifle. Model 63 holds 10 rounds of .22 LR and the optional Taurus Rimfire Recharger Tubes give you the chance to shoot all day with quick and easy reloading. Check out a Model 63 at your local dealer. You will want to take it home.

Manual Safety mounted on trigger guard.

Rimfire Recharger®
Speedloader tubes fit your tubular magazine long gun.

Taurus Model 62 and 72 Rifles and Carbines feature the unique Taurus Security System.

Taurus Long Gun Security System

All Taurus Long Guns carry the Taurus Security System. On the pump action guns, the system operates in the same way the revolver system does. On our semi-automatic rifles, the system locks the bolt and firing pin with a turn of the special key.

The Taurus Security System is always included at no additional cost and 2 keys come with each new gun.

Taurus Security System®

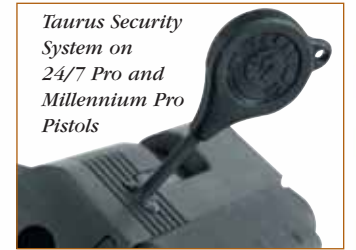

The patented Taurus Security System renders the firearm inoperable by use of a special key. For those with concerns about unauthorized use of their Taurus firearm, the integral Taurus Security System provides an additional measure of assurance. All Taurus firearms include either the Taurus integral security system or an appropriate external locking mechanism. All new Taurus firearms feature the Taurus Security System at no extra charge.

Taurus Security System on CIA Model Revolvers

Taurus Security System on Protector Revolvers

Taurus Security System on 24/7 Pro and Millennium Pro Pistols

Taurus Security System on PT22 and PT25

Taurus Security System on Model 63

Taurus Revolver Security System

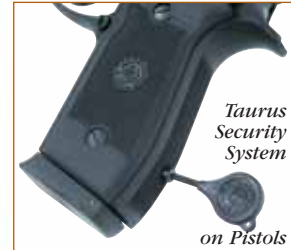

Engagement (Secure)
Insert the key into the mechanism and turn clockwise until a click is felt or heard. The mechanism now partially protrudes above the surface of frame or hammer. The action is locked in place and cannot function.

Disengagement (Ready-to-Fire)
To place the revolver in a firing condition, insert the key into the mechanism and turn it counter-clockwise. The mechanism is now virtually flush with the surface. The revolver can now be fired.

Taurus Polymer Frame Security System

The Taurus Millennium Pro™ family of semi-auto pistols features the Taurus Security System™, which provides instant-ready defense with built-in ability to secure your pistol and make it inoperable at the turn of a key. When the Security System is engaged, the Millennium Pro--- cannot be fired, cocked, or disassembled, and the gun's manual safety cannot be disengaged. As with our revolver Security System, the device is part of the firearm and cannot be lost, and the same special Security Key works for both the revolver and pistol systems (two keys come with each new gun).

Taurus Pistol Security System

Taurus Security System on Pistols

This innovative and patented system is now on the complete line of Taurus pistols. Just like the revolver version, a quarter turn of the key locks the action, preventing the hammer and trigger from moving, and prohibits racking of the slide. Just a quarter turn of the key returns the gun to complete readiness. The Taurus Security System is always included at no additional cost.

Taurus Rifles and Carbines feature the unique Taurus Security System.

Taurus Long Gun Security System

All Taurus Long Guns carry the Taurus Security System. On the pump and lever action guns, the system operates in the same way the revolver system does. On our semi-automatic rifles, the system locks the bolt and firing pin with a turn of the special key. The Taurus Security System is always included at no additional cost and 2 keys come with each new gun.

Taurus Long Guns

- Sharp Crisp trigger pull
- Button rifled barrels for accuracy
- Choice of 16-1/2 inch carbine or 23 inch rifle
- Easy one-screw takedown for carry and storage
- Manual safety on all models
- Integral Taurus Security System®
- Walnut finished hardwood buttstock and corn cob forend, with hard rubber butt plate
- Adjustable rear sight with a blade front sight
- Optional Scope Mount Base
- Lifetime Repair Policy

Order accessories for your Taurus Long Gun.

A scope mount base, tang sight and Rimfire Recharger reloading tube. All make for hours of pleasurable plinking or hunting. Details are on Page 19.

Taurus Gaucho™ Single Action

Authentic, Realistic, Genuine and The Finest all go to describe this six-gun right from the pampas.

It's a tool straight from the gaucho who uses it daily in his rough and tumble work herding and caring for cattle in some of the meanest territory south of Texas. Taurus has been providing firearms to these tough men for almost 70 years and is proud to bring that heritage to you.

The Gaucho represents the refinement of the single action revolver with integral transer bar and the famous Taurus Security System. Like all Taurus firearms, the Gaucho has our Unlimited Lifetime Repair Policy.

Decocker Button

Hammer Mounted Decocker Button on Thunderbolt allows for safer decocking without touching the trigger. The hammer lowers to the intercept notch and stops before striking the firing pin.

Optional Tang Sight on Taurus Lever Action Rifles and Carbines

This lever action was born from the Model 62.

Easy take down, and with the saddle ring, this is an original that someone should have built sooner. Slick and nostalgic, it uses a tried and proven feeding and firing mechanism that groups wonderfully with its button rifled barrel and adjustable rear sight.

The Taurus lever action is chambered for .22 LR and carries the Taurus Security System and our Unlimited Lifetime Repair Policy.

Taurus FORTY-FIVE/410™

What?

A 410 Revolver that also shoots the venerable .45 LC?

Are you kidding?

Just wait a while and this most versatile idea grows on you.

It becomes one of those "I really need that gun."

We have them in a specially designed standard frame with a newly designed, elongated cylinder to accommodate both of these rounds, including 2-1/2 inch 410 shells.

So grab a case of 410's and head for the clay bird range. You'll find yourself hitting aerial targets like Annie Oakley.

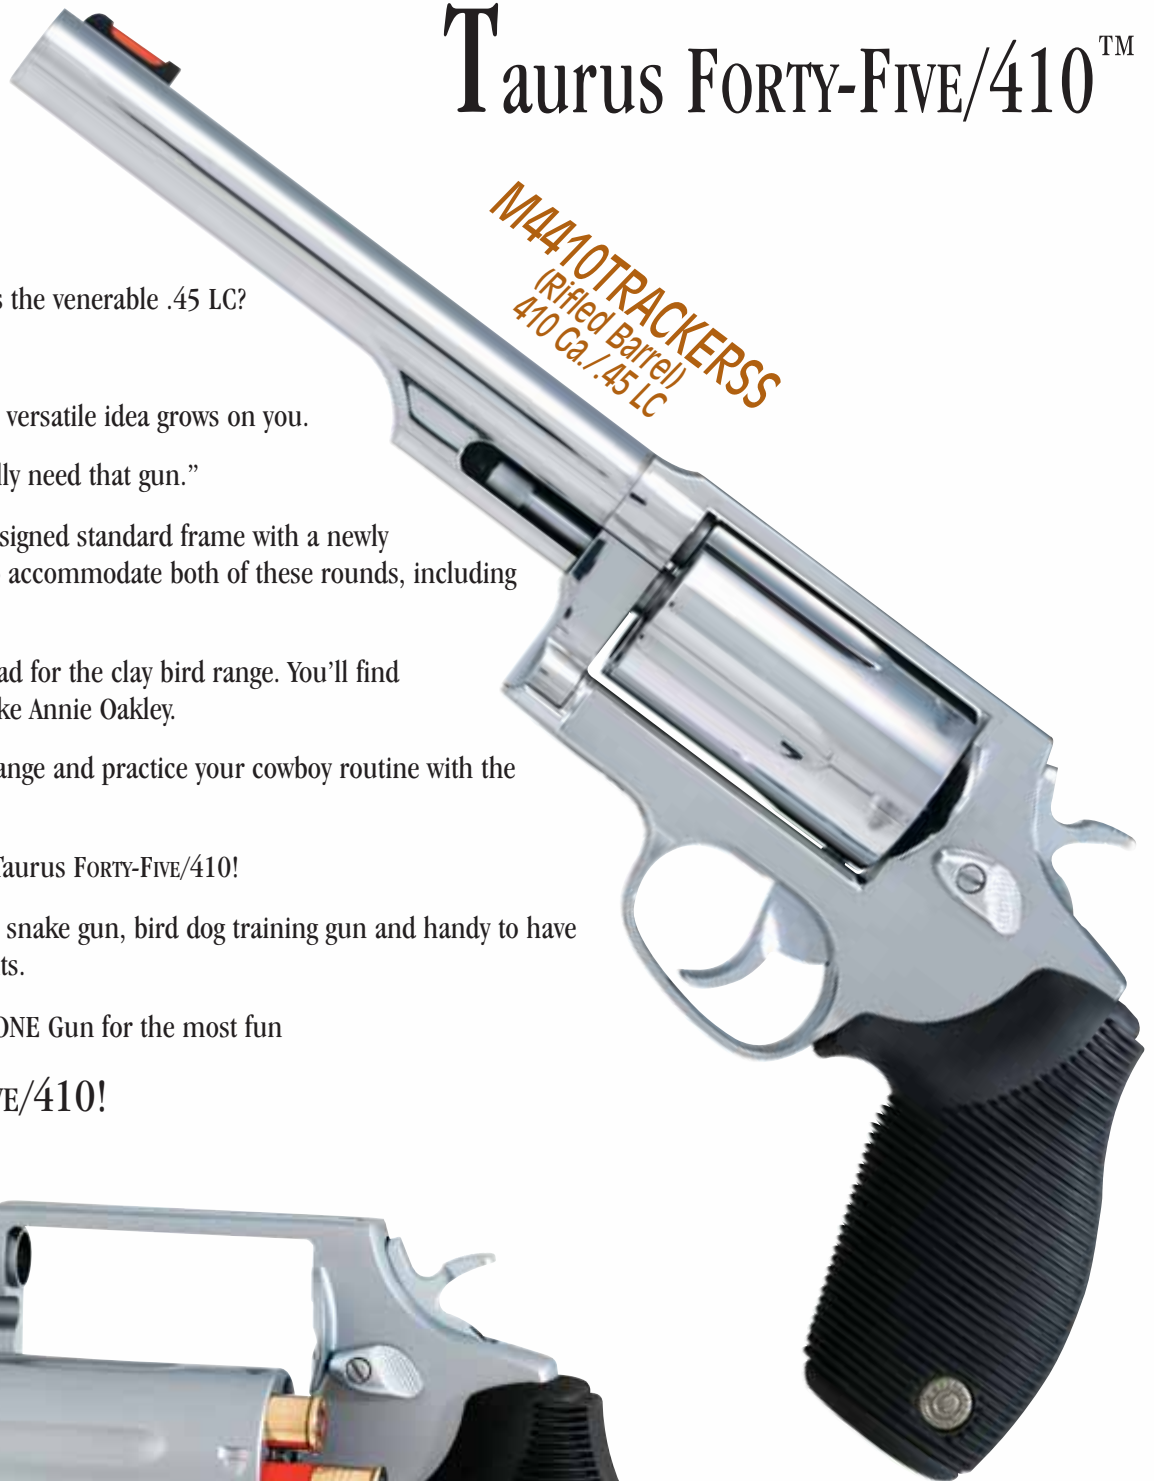

Then head for the steel plate range and practice your cowboy routine with the 45LC.

All in one afternoon with one Taurus FORTY-FIVE/410!

And remember...It's not a bad snake gun, bird dog training gun and handy to have around for other pesky varmints.

Call it out when you need the ONE Gun for the most fun

The Taurus FORTY-FIVE/410!

TITANIUM[®]

Why Titanium

- Titanium is 2/3 the weight of steel and 10 times stronger
- Stronger...Hammer Forged Titanium makes the world's strongest handguns. None stronger
- Super light pistols and revolvers packing a full strength punch
- Corrosion and rust resistant
- The most modern gun material available
- Total Titanium? Just about...every part that can be titanium, is titanium
- Shadow Gray Titanium looks like stainless steel but weighs only 2/3 as much
- Taurus Titanium 24/7 Pro and Millennium Pro Pistols -the only Titanium pistols made
- Taurus Titanium revolvers and pistols in 9mm and .38 Special +P Rated

*24/7 Pro Titanium 9
9mm
Titanium Pistol*

*Model 85 MULTI

and Aluminum*

When You Think Titanium, Think Taurus

Family of Hunters

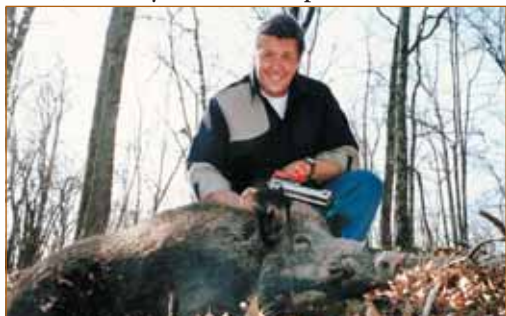

Led by the award winning Raging Bull, the Taurus Family of Hunters is a full line of hunting handguns, rifles and carbines. From the .22 LR Model 62 to the powerful 500 Magnum, there is a Taurus hunter for you. The handgun side of the family features barrel lengths from 3 inches all the way to our 10 inch hunting revolvers.

For 2006, we are introducing 2 new Hunters to the family. The 500 Magnum and the unique Taurus FORTY-FIVE/410 that chambers both cartridges in a snub-nose revolver.

Taurus hunting handguns come in Blue or Stainless Steel.

The Taurus Family of Hunters also features our pump action and semi-automatic long guns for smaller game. At Taurus, hunting is something we do ourselves and with these very firearms. Check one out at your local dealer and join the family.

Fellow Hunters, The Taurus Family of Hunters is growing because we're serious about the use and enjoyment of our products. Like an increasing number of Americans, we hunt with Taurus firearms, target shoot and plink with them, and rely on them for protection of ourselves and loved ones. We also

Taurus President and CEO Bob Morrison with a Russian boar taken with one shot from his Raging Bull™.

listen to our fellow hunters. That's why we produce the premium, award winning firearms you want, delivering superior accuracy and reliability at an affordable price and actively support our rights. Taurus means quality, features, and models no one else can manufacture, backed by our Lifetime Repair Policy.

Taurus Copper Bullet[®] Handgun Cartridges

It gets no better than Taurus' advanced 99.95% Pure Copper Premium Ammunition.

When the FBI underwent their performance and barrier material gelatin block testing, they concluded that in 10% ballistic gelatin, minimum penetration need be 12". Tests show Taurus HEX[®] Pure Copper Bullets meet and exceed the FBI's minimum requirements with ease.

Take a good look at the Taurus HEX Bullet. What you see is a wide, deep hollow-point cavity lined with six expansion scribe marks inside the hollow point cavity and deep down in the cavity you will see a dimple that acts as a storage area for any cloth accumulation it may encounter upon penetration. The storing of debris in this dimple is what allows the HEX bullet to consistently expand to the rose petal shape shown.

Our bullets are not bonded together and there is no jacket so there is no weight loss or splitting and shattering. Try a box of these straight shooting rounds and find out for yourself why the Taurus Copper Bullet is already ranked as a #1 personal protection load.

Taurus Design Features Available On Selected Revolvers

Yoke Detent

- **Yoke Detent.** To insure the cylinder remains closely aligned within the frame at the moment of firing, we have added a spring-loaded detent system to the top of the yoke, a feature previously offered on custom revolvers from premium gunsmiths.

Extended Ejector Rod

- **Extended Ejector Rod.** Adding the new Yoke Detent system has allowed us to add extra length to the cylinder ejector rod, which enables much more positive extraction of fired cases than previous short-design snubnose revolver ejector rods.

Ribber Grip[™]

- **Ribber Grips[®].** The patented Taurus pliable grip will conform to the precise shape and form of your hand as you grasp it, comfortably cushioning magnum and +P recoil while remaining absolutely secure without movement or slip, even in rapid fire.
