BenelliUSA®

MASTER CATALOG

NEW 2007 DVD CATALOG

The new 2007 DVD catalog contains detailed information on the entire product line and all of the new products currently available from Benelli, Franchi, Uberti, Stoeger and Stoeger Books. This exciting DVD is over 60 minutes of action videos showcasing the Benelli USA products with interactive presentations, printable PDFs of all the 2007 catalogs, links to all of the Benelli websites and much more.

BENELLI

Benelli® offers the largest selection of semi-automatic shotguns in the world; no other company even comes close. There are more than 120 different models to choose from. Benelli offers dozens of different waterfowl models, but there's a whole lot more. There are turkey guns, youth guns and youth turkey guns. You'll find the perfect pheasant gun, a feather-light 20-gauge for quail, woodcock and grouse. There are target guns, tactical guns and a combat shotgun for the Marine Corps. Benelli shotguns come with fancy walnut, synthetic and camo stocks, Crio® Chokes, ported, cantilevered and rifled barrels. There are even more than a dozen left-handed models. Benelli's innovations in design, technology and manufacturing are cutting edge and always will be, because with a Benelli, you can expect every feature you need and none that you don't.

No matter your sport, Benelli's got your gun.

NEW MONTEFELTRO SILVER — 12 AND 20-GA, 3"

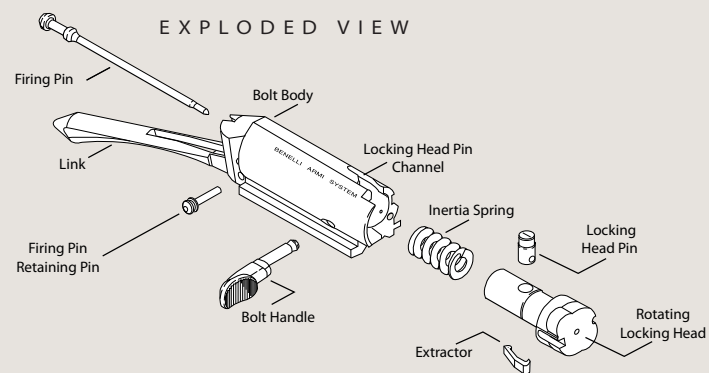

INERTIA DRIVEN® SYSTEM

INERTIA DRIVEN® is the best operating system ever devised — Period!

- **SIMPLE** — Inertia Driven® is simple with only three primary parts: the bolt body, the inertia spring and the rotating bolt head. Simple is better.
- **FASTER** — With a greatly reduced mass of parts Inertia Driven® is faster.
- **CLEANER** — Gas, smoke and burnt powder stay in the barrel where they belong, rather than being channeled into the gun's mechanism as they are in gas systems.
- **STRONG** — The massive steel locking lugs on the Inertia Driven® system's rotating bolt head not only lock steel-to-steel into the gun's barrel; the lugs are locked-in tighter during firing as well.
- **LOW MAINTENANCE** — The Inertia Driven® system is much cleaner so gun cleanup takes a fraction of the time that it takes to clean a gas system gun.

- **LIGHT WEIGHT** — The Inertia Driven® system is not only incredibly simple; it is also lightweight, allowing Benelli shotguns to be some of the lightest semi-automatic shotguns ever produced.
- **PERFECT BALANCE** — With no springs, action bar linkage or heavy gas cylinder under the fore-end, Benelli's Inertia Driven® shotguns balance like a fine game gun should.
- **RELIABLE** — The Inertia Driven® system never needs adjusting and will cycle anything from field loads to 3½" magnums with consistent reliability, year, after year, after year. In fact, there are Inertia Driven® Benelli shotguns that have fired over 500,000 rounds, still in the field and functioning perfectly.

EXPLODED VIEW

"THE LAW OF INERTIA" — is Newton's First Law of Physics and is as consistent and unchangeable as The Law of Gravity. Benelli has harnessed this basic law of physics in the Inertia Driven® system to operate the World's fastest, simplest and most reliable semi-automatic shotguns. It's not boasting, it's the law — The Law of Inertia.

BENELLI'S INERTIA DRIVEN® SYSTEM

Cartridge drop lever (Works three ways)

- 1 Pulling back on the operating bolt handle and pressing the cartridge drop lever locks the bolt to the rear.
- 2 With bolt forward, pressing it releases a shell onto the carrier.
- 3 Visibility of the red dot indicates the hammer is cocked.

STEP ONE: CHAMBERING

As the bolt assembly moves into battery, the locking head pin moves along a curved track in the bolt body to rotate the steel bolt head into engagement with the steel barrel extension. The cartridge drop lever is down, the red dot indicating that the gun is cocked.

STEP TWO: FIRING

When the trigger is pulled, every part of the shotgun except the bolt body moves rearward. The curved track in the bolt body, which is moving forward relative to the rest of the gun, presses against the locking head pin, turning the bolt head even tighter into the barrel extension. At the same time, the inertia spring is compressed between bolt head and body. The cartridge drop lever moves up, allowing a shell to move from the magazine to the carrier.

STEP THREE: RECOIL

Near the end of the recoil cycle, chamber pressure drops to a safe level and the gun's rearward motion slows. The heavy inertia spring then thrusts the bolt assembly rearward, unlocking the rotating bolt head, extracting the spent shell from the chamber and pulling it against the ejector.

STEP FOUR: EJECTION

As the empty shell exits the receiver, the energy of the moving bolt assembly recocks the hammer and compresses the recoil spring in the buttstock. The recoil spring then thrusts the bolt assembly forward, lifting the on-coming shell into position and chambering a fresh cartridge. The gun is ready to fire again in a fraction of a second!

BENELLI'S INERTIA DRIVEN® BOLT

Comes standard with all Benelli semi-auto shotguns. With the Inertia Driven® system, fouling and gases are expelled out the barrel, not into the operating system. Because there are no complicated linkages or o-rings to malfunction and without heavy weights and pistons in the fore-end, gun balance and swing are superior with a Benelli.

NEWTON'S THIRD LAW –
"For every action there is
an equal and opposite reaction."

Constructed from a shock absorbing synthetic material developed for the medical industry, the ComforTech™ recoil pad is ergonomically designed to fit the shooter's shoulder pocket. Consequently, the ComforTech™ gel recoil pad spreads energy over a wider area than conventional buttpads to greatly reduce felt recoil.

Benelli engineers developed specialized machinery to accurately measure and graph recoil.

COMFORTECH™ SYSTEM

Benelli's ComforTech™ system revolutionizes firearms technology. For centuries, the laws of physics have defined shooting comfort. If you wanted less recoil, your choices were to make the shot charge lighter or the gun heavier. One limited on-target effectiveness, the other the speed and liveliness of the shotgun.

You can't repeal the laws of physics, but sometimes you can fool Mother Nature. Benelli reached outside the firearms industry to materials scientists, computer specialists and design engineers to take a fresh look at recoil and how to tame it. The result? A new stock system that reduces felt recoil by as much as 48% over the competition!

It's often said there's nothing new in guns, but the ComforTech™ system is unlike anything ever seen before. Previous generations of firearms designers never had access to the computer modeling, high-speed photography and state-of-the-art synthetics that make this revolution in shooting comfort possible.

How the competition stacks up against the ComforTech™ system:

- **WEIGHT COMPARISON** – the competition weighs 13% to 15% more (on average – that is a pound or more!)
- **RECOIL COMPARISON** – the competition kicks up to 48% harder.
- **MUZZLE CLIMB COMPARISON** – the competition recovers as much as 69% slower. To put it simply, Benelli engineers have created the lightest, softest kicking shotgun on earth. It gets back on target faster than any other and don't forget, Benelli is already the fastest cycling auto-loading shotgun in the world!

At Benelli, we can't break the laws of physics, but we can bend them just a little.

AirTouch™ dimpled checkering design provides secure wet/dry grip.

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

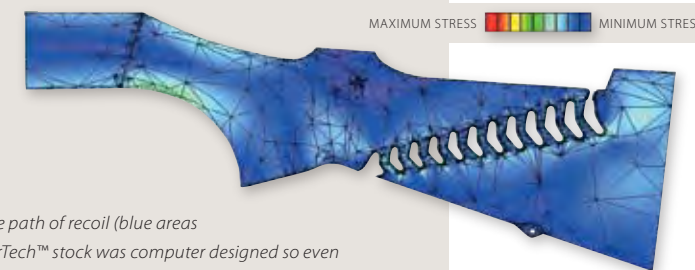

Synthetic Recoil-Absorbing Chevrons

To test durability the stock was subjected to 100,000 brutal cycles with the recoil pad removed in a fixture exerting 20% more force than the most powerful 3½" magnum loads available. Testing was conducted at temperature extremes ranging from 150° F to -75° F. In the end the ComforTech™ stock looked and performed as well as it did when new!

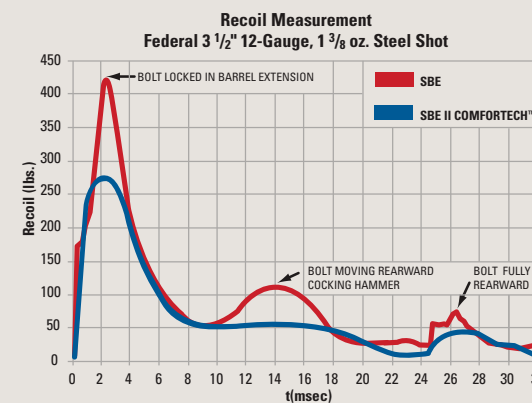

COMFORTECH™ STOCK

THE COMFORTECH™ STOCK is split diagonally from the heel of the buttstock to a point just behind the pistol grip. Connecting the two pieces are eleven synthetic recoil-absorbing chevrons that form a highly effective recoil barrier.

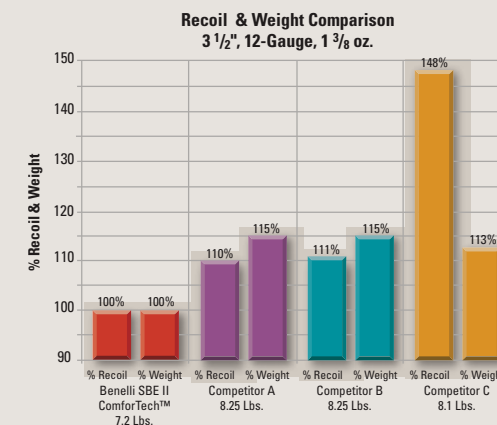

COMPUTER SIMULATION showed Benelli engineers the path of recoil (blue areas are minimum stress) through a gun stock. The ComforTech™ stock was computer designed so even the exterior shell flexes to dampen recoil.

COMFORTECH™ RECOIL MEASUREMENTS

Benelli engineers developed specialized machinery to measure and graph recoil. Here a Benelli Super Black Eagle is plotted along with an SBE II with ComforTech™. A dramatic reduction with ComforTech™ can be seen in all three peaks of recoil — firing, bolt cocking the hammer and the end of bolt travel.

The Super Black Eagle II does what many thought was impossible; it is both the lightest gun in its class and the softest-kicking. Imagine how fresh you'll be at the end of a long hunting day with that combination!

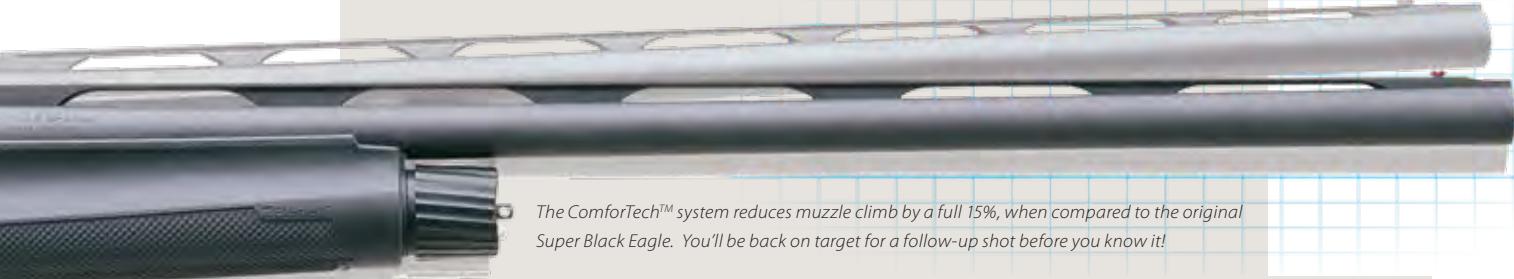

COMFORTECH™ GEL RECOIL PADS & COMB INSERTS

Optional ComforTech™ gel recoil pad inserts, to customize and adjust the length-of-pull to the shooter. And, ComforTech™ comb inserts to adjust the drop-of-comb, for better target acquisition (Not available for wood gun stocks).

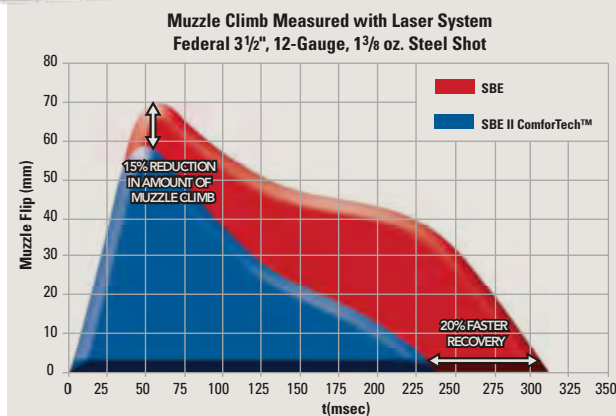

COMFORTECH™ SYSTEM

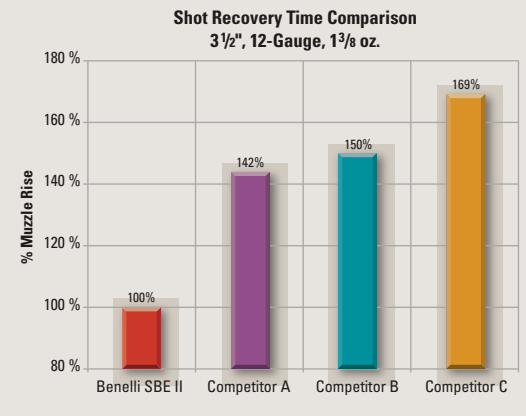

COMFORTECH™ SYSTEM REDUCES MUZZLE CLIMB

The ComforTech™ system reduces muzzle climb by a full 15%, when compared to the original Super Black Eagle. You'll be back on target for a follow-up shot before you know it!

Forget about losing sight of a fleeing flock. You'll get 15% less muzzle climb and 20% faster recovery with the Super Black Eagle II. Bagging doubles will become the rule, not the exception.

They'll wonder how you do it. You'll know the reason is that your recovery time is as much as 69% faster than competitive shotguns. You'll bag birds while they're still trying to get back on target.

COMFORTECH™ GEL RECOIL PADS

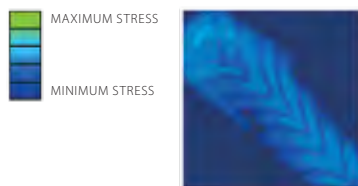

OLD STYLE

LEFT RECOIL PAD

RIGHT RECOIL PAD

GEL RECOIL PADS

COMPARISON CHART

The gel recoil pad puts more shock-absorbing material against your shoulder to spread recoil. There are no hard inner structures to jab against you. It's like having a pillow against your shoulder rather than a board.

GEL RECOIL PADS

COMFORTECH™ GEL RECOIL PADS: The ergonomics of the gel recoil pad are so carefully engineered that there are separate versions for left- and right-handed shooters. The pad is shaped to conform to the contours of the shoulder for maximum contact.

CRIO® SYSTEM

Cryogenic physics has revealed that strange things happen when matter is taken to temperatures of -300° F; gases become liquids and solids, ceramics become conductors of electricity and steel is changed at the molecular level.

When a Benelli barrel is cryogenically frozen, all of the stresses caused by hammer forging are relieved and the surface of the bore takes on a more even-grained, slicker surface that offers less resistance to wads and shot charges. With a smoother and more uniform surface, Benelli Crio® Barrels not only pattern better, they stay cleaner longer.

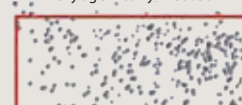

Crio® Chokes are the second part of the Benelli Crio® System. Extra long choke tubes, with a more gradual constriction, coupled with the slick surface created by the cryogenic treatment, puts more pellets on target. The Benelli Crio® System improves patterns by as much as 13.2% and yields denser, more uniform shot patterns.

The Crio® System combines a barrel frozen to -300° F with a specially designed longer choke tube that is also cryogenically treated. The result is a denser, more uniform pattern with up to 13.2% more pellets on target.

BENELLI'S CRIO® SYSTEM TECHNOLOGY

Cryogenically Treated

BETTER SHOT PATTERN

With high speed cameras Benelli engineers caught shot strings in flight. Crio® Barrels and chokes threw patterns with substantially denser and more uniform shot patterns than common shotgun barrels.

Untreated

Cryogenically Treated

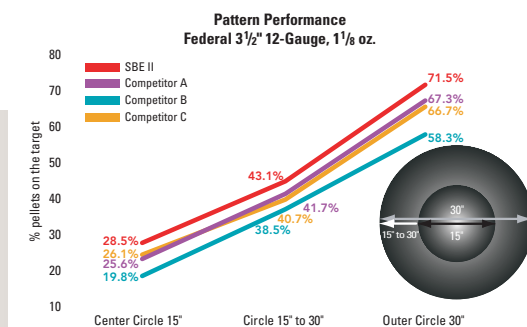

WHY FREEZE A BARREL?

Hammer-forging induces stresses in the barrel steel caused by an uneven grain structure (left). Freezing the barrel to -300° F changes the steel at the molecular level, leaving a more even grain structure. The result? The barrel flexes more predictably and has a smoother bore surface that resists fouling.

CRIO® CHOKE SYSTEM

The specially designed longer choke tubes of the Crio® Choke System allows for more gradual constriction of the shot charge, which reduces pellet deformation. Frozen to -300° F, Crio® Chokes have a more evenly grained and slicker surface that provides less resistance to the shot charge as it passes through.

When coupled with a Crio® Barrel, the result is as much as 13.2% more pellets on target.

When compared to the competition, the new Crio® Barrel puts 13.2% more pellets in a 30" circle. That's bird-busting power you'll see in the field! This sort of pattern performance once required special barrels and aftermarket choke tubes. With the Super Black Eagle II, you get it right out of the box!

SUPER BLACK EAGLE II

The Super Black Eagle II sets the standard for styling, versatility and performance by which all other semi-auto shotguns are judged. That judgment is based on unfailing reliability—the kind of reliability that you can count on, shot, after shot, after shot. As the original 3½" semiauto shotgun, the Super Black Eagle was on the cutting edge of shotgun development, and was followed by the newly-designed Super Black Eagle II featuring the innovative recoil-reducing ComforTech™ stock. The Super Black Eagle II uses the proven Benelli Inertia Driven® bolt mechanism that allows the Super Black Eagle II to shoot 2¾", 3" and even 3½" magnum ammunition without adjustments. In addition, the Super Black Eagle II incorporates some basic improvements, such as a drilled and tapped receiver.

The new ComforTech™ system reduces recoil up to 48% over the competition, without adding any moving parts or weight. Compared to competing brands, the Benelli weighs 13 to 15% less — on average, that's more than a pound less! The ComforTech™ system also reduces muzzle climb by 15%. for fast follow-up shots. This allows shooters to get back on target up to 69% faster than the competition.

The buttpad, made of a shock-absorbing gel originally developed for the medical industry, works with the ComforTech™ system to soak up recoil. Benelli engineers created an ergonomic design so refined that left- and right-handers have entirely different recoil pads. A corrosion-resistant recoil spring and guide remain free of rust and ride in a recoil tube that is easily cleaned by removing the quick-detachable recoil pad.

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

SUPER BLACK EAGLE II, COMFORTECH™ — 12-GA, 3½" MSRP \$1,635
Advantage® Max-4 HD™

SUPER BLACK EAGLE II, COMFORTECH™ — 12-GA, 3½" MSRP \$1,545
Black synthetic

SUPER BLACK EAGLE II, NON-COMFORTECH™ — 12-GA, 3½" MSRP \$1,480
Satin walnut

See Super Black Eagle II Slug models on page 27.

This special synthetic gel comb insert not only cushions the shooter's cheek during recoil, it also has a slippery surface that allows the cheek to slide along the surface for added comfort. Available in 3 comb sizes, ComforTech™ stocks only.

The trigger guard has 30% more room, so even in the coldest waterfowling weather, the heaviest gloved finger will fit easily.

The SBE II's magazine cap has heavier ribs so that take down is easier, even with gloved hands.

Adjustable length-of-pull with optional ComforTech™ gel recoil pad.

FEATURES

STANDARD FEATURES

CHOKE TUBES: Crio® C, IC, M, IM, F and wrench.
FINISHES: Realtree® APG HD™, Advantage® Max-4 HD™, Advantage® Timber HD™, Black synthetic or Satin walnut.
GEL PADS: ComforTech™ gel recoil and comb pads (ComforTech™ models only).
SHIM KIT: For adjustment of drop and cast.

OPTIONAL FEATURES

CHOKE TUBES: Extended chokes for pass shooting, over the decoys waterfowl shooting and extra-full turkey.
GEL RECOIL PADS: Three options to customize length-of-pull to 13½", 14" or 14½".
RAISED COMB PADS: Three options to customize sight plane for different shooting scenarios from target shooting to scoped hunting.

Extra-high Comb

Raised Comb

Standard Comb

AirTouch™

A dimpled grip checkering pattern called AirTouch™ gives the shooter a firm grasp on the pistol grip and fore-end, hot or cold, wet or dry.

INERTIA DRIVEN

ComforTech™

M2 FIELD

NEW M2 FIELD, COMFORTECH™ — 20-GA, 3" MSRP \$1,335
Realtree® APG HD™

The M2 Field is the workhorse of the Benelli semi-auto line. Light, nimble, but ruggedly built, the Benelli M2 is built around the ultra-reliable Inertia Driven® bolt mechanism. The Inertia Driven® system allows the M2 to digest nearly any 12-gauge cartridge, from 2¾" target loads to the heaviest 3" magnums.

Benelli engineers have also adapted the ComforTech™ recoil system for the M2. This revolutionary system reduces felt recoil by up to 48%, and cuts muzzle climb by 15%. When combined, this puts the shooter back on target up to 69% faster than with any other comparable semi-automatic shotgun. The M2 is not only faster, but with the new ComforTech™ system, it may be the most comfortable shotgun you will ever shoot.

The M2 is a workhorse with the speed of a thoroughbred.

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

M2 FIELD — 12 GAUGE

NEW M2 FIELD, COMFORTECH™ — 12-GA, 3" MSRP \$1,335

M2 FIELD — 20 GAUGE

NEW M2 FIELD, COMFORTECH™ — 20-GA, 3" MSRP \$1,215
Black synthetic — with GripTight™ coating

NEW M2 FIELD, COMFORTECH™ — 20-GA, 3" MSRP \$1,335
Advantage® Timber HD™

NEW M2 FIELD RIFLED SLUG, COMFORTECH™ — 20-GA, 3" MSRP \$1,280
Black synthetic — with GripTight™

Benelli's M2 trigger guard and safety are a blend of style and function that comes together on the Benelli M2.

The M2's magazine cap has heavier ribs so that take down is easier, even with gloved hands.

The AirTouch™ dimple checking pattern on the M2's pistol grip and fore-end gives a secure grip, in any kind of weather.

AirTouch™

Adjustable length-of-pull with optional ComforTech™ gel recoil pad. (Not available for wood gun stocks).

Optional Short Pad 13½" L.O.P.
Optional Medium Pad 14" L.O.P.
Standard Pad 14¾" L.O.P.

FEATURES

STANDARD FEATURES

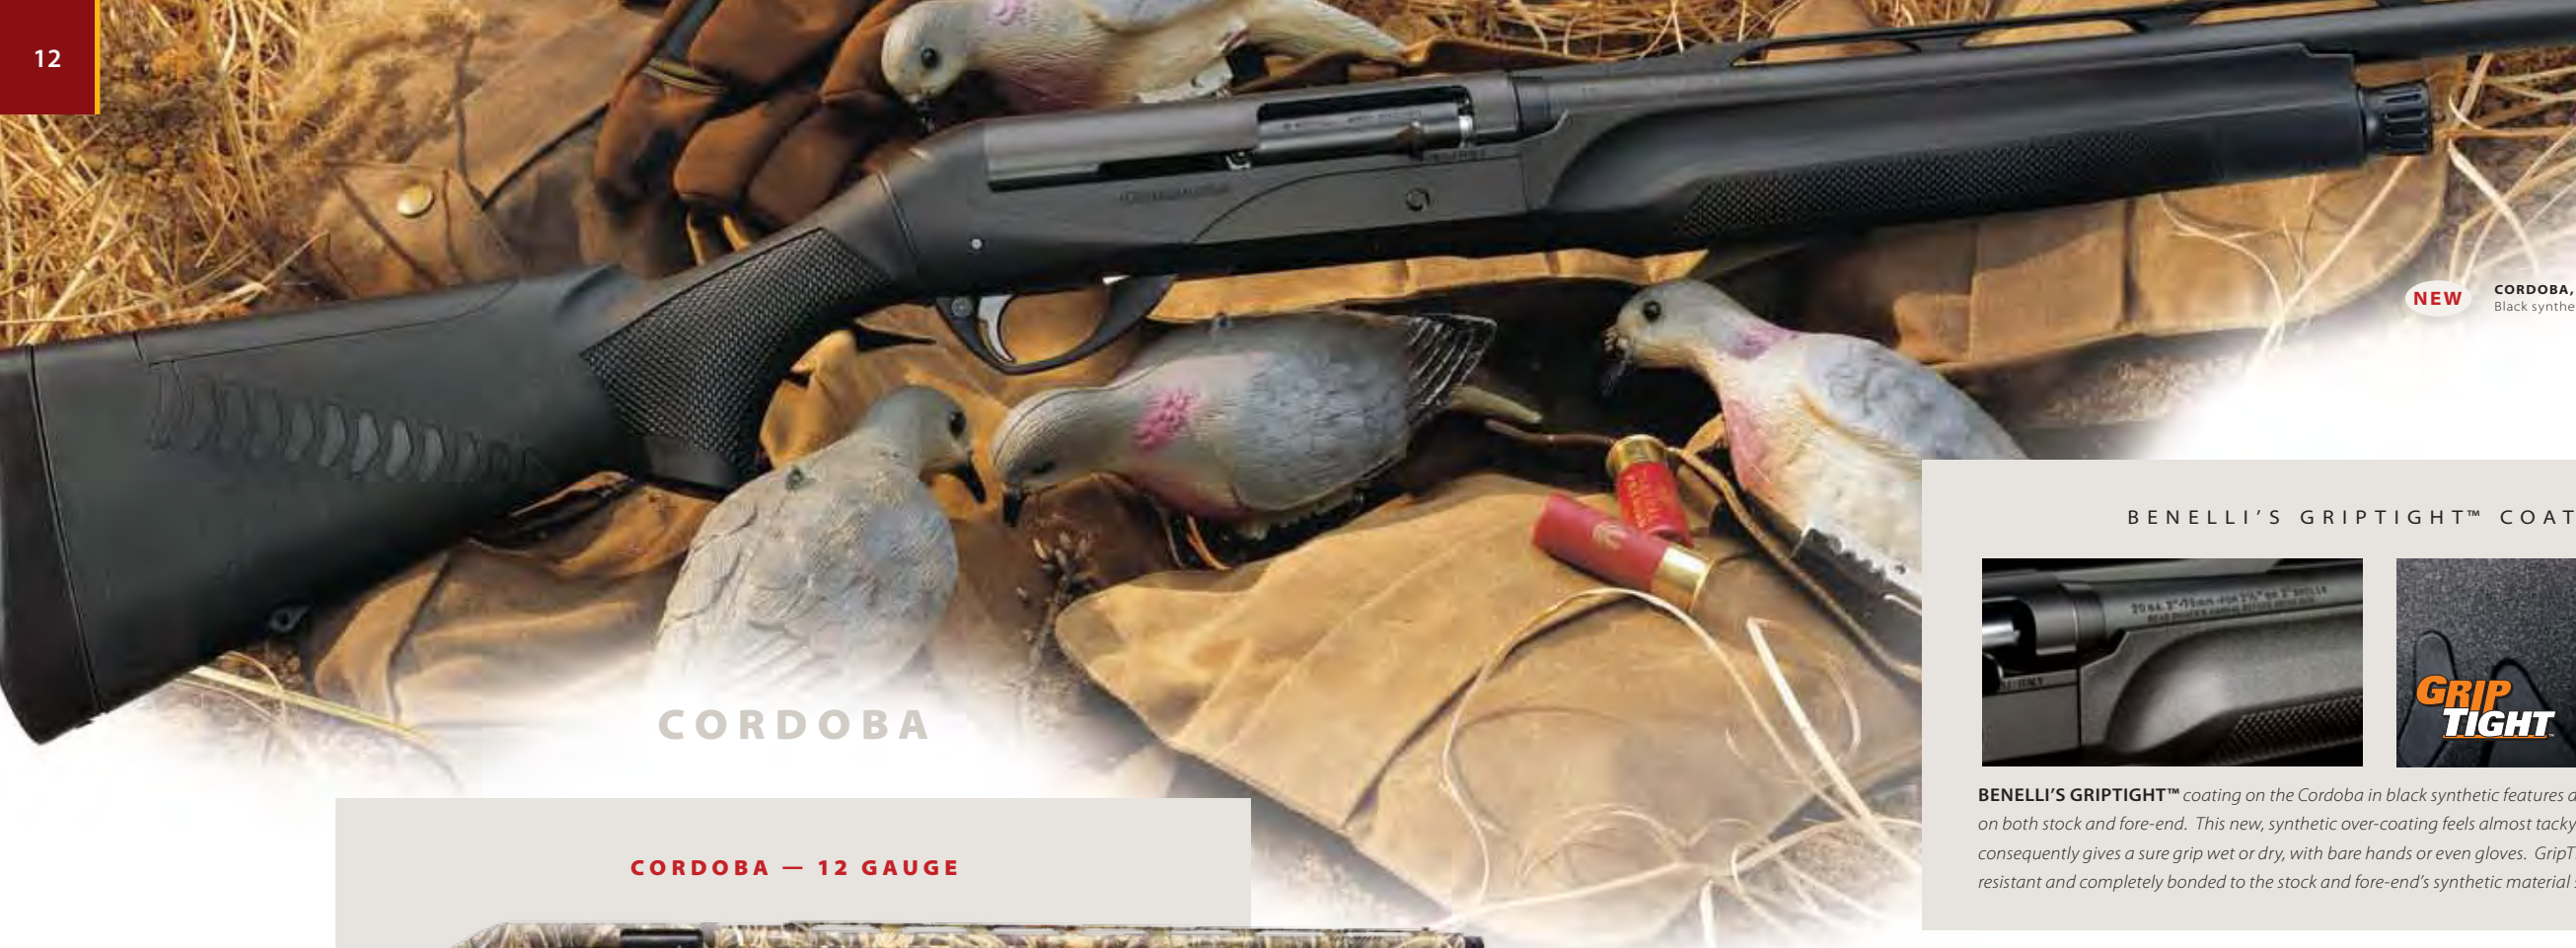

- CHOKE TUBES:** Crio® C, IC, M, IM, F and wrench.
- FINISHES:** Realtree® APG HD™, Advantage® Max-4 HD™, Advantage® Timber HD™, Black synthetic or Satin walnut.
- GEL PADS:** ComforTech™ Gel recoil and comb pads (ComforTech™ models only).
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

OPTIONAL FEATURES

- CHOKE TUBES:** Extended chokes for pass shooting, over the decoys waterfowl shooting and extra-full turkey (12-gauge only).
- GEL RECOIL PADS:** Three options to customize length-of-pull to 13½", 14" or 14¾".
- RAISED COMB PADS:** Three options to customize sight plane for different shooting scenarios from target shooting to scoped hunting.

The corrosion-resistant recoil tube and stainless steel spring can be accessed easily by removing the quick-detachable recoil pad.

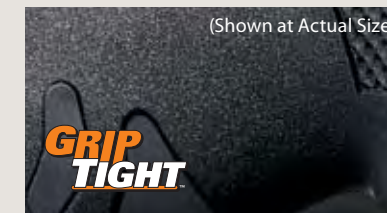

CORDOBA

NEW CORDOBA, COMFORTECH™ — 20-GA, 3" MSRP \$1,735
Black synthetic — with GripTight™ coating

BENELLI'S GRIPTIGHT™ COATING

BENELLI'S GRIPTIGHT™ coating on the Cordoba in black synthetic features a high-tech texturing on both stock and fore-end. This new, synthetic over-coating feels almost tacky to the touch, and consequently gives a sure grip wet or dry, with bare hands or even gloves. GripTight™ is totally weather resistant and completely bonded to the stock and fore-end's synthetic material surface.

CORDOBA — 12 GAUGE

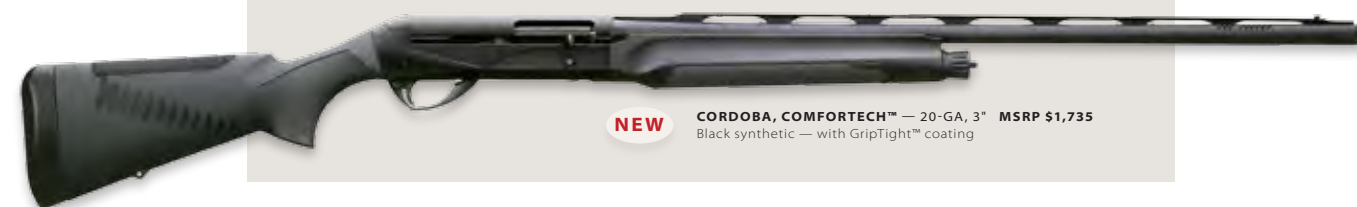

NEW CORDOBA, COMFORTECH™ — 12-GA, 3" MSRP \$1,865
Advantage® Max-4 HD™
(Shown with optional raised comb pad insert)

CORDOBA, COMFORTECH™ — 12-GA, 3" MSRP \$1,735
Black synthetic — with GripTight™ coating

CORDOBA — 20 GAUGE

NEW CORDOBA, COMFORTECH™ — 20-GA, 3" MSRP \$1,735
Black synthetic — with GripTight™ coating

Inspired by the high volume dove shooting found around Cordoba, Argentina, Benelli engineers designed the Cordoba as a lightning fast hunting gun with all the advanced features of a serious sporting clays shotgun. Incorporated into the new Cordoba is the 10-mm tapered sporting rib favored by competition shooters and porting to keep barrel climb to a minimum. The ComforTech™ stock cushions the blow when ammo isn't measured in boxes, but by cases in an afternoon. The ComforTech™ system also helps reduce barrel climb and puts the shooter back on target 69% faster, so that the new Cordoba just may be the fastest field gun ever built. A Crio® barrel and extended Crio® choke tubes put more pellets on target and the whole package is finished in matte black GripTight™ coating or Advantage® Max-4 HD™, so a reflected flash won't give you away.

SHELLVIEW™

WARNING!
Always physically and visually check the magazine tube and chamber to verify that the firearm is not loaded!

ShellView™, available with the 20-gauge Cordoba, allows the shooter to visually check the number of shells in the magazine tube at a glance.

Extended Crio® Chokes reduce pellet deformation for better clay busting performance. The ported barrel combined with the ComforTech™ system nearly eliminates muzzle climb allowing for fast second target acquisition. A high-visibility red bar sight and 10- to 8-mm tapered stepped rib, provides fast and consistent sight alignment.

Extended Crio® Choke tubes are standard. All models are available in 28" and 30" barrels.

FEATURES

STANDARD FEATURES

- CHOKE TUBES:** Extended Crio® C, IC, M, IM, F and wrench.
- FINISHES:** Advantage® Max-4 HD™, GripTight™ over Black synthetic.
- BARRELS:** Crio® treated barrel.
- GEL PADS:** ComforTech™ Gel recoil and comb pads.
- SHIM KIT:** For adjustment of drop and cast.

OPTIONAL FEATURES

- CHOKE TUBES:** Extended chokes for pass shooting, over the decoys waterfowl shooting and extra-full turkey (12-gauge only).
- GEL RECOIL PADS:** Three options to customize length-of-pull to 13½", 14" or 14¾".
- RAISED COMB PADS:** Three options to customize sight plane for target shooting.

NEW SUPERSPORT, COMFORTECH™ — 20-GA, 3" MSRP \$1,800
Carbon Fiber finish — with ShellView™

Ported Crio® Barrel

SUPERSPORT & SPORT II

The Benelli SuperSport and Sport II are the ultimate “speed guns” for sporting clays. The SuperSport’s ComforTech™ recoil-dampening system allows the shooter to recover for the critical second shot up to 69% faster than with other comparable shotguns — that’s fast! Couple the quick recovery speed with a ported barrel that keeps muzzle climb to a minimum and it’s doubly fast. And the ComforTech™ system’s special gel recoil pad and comb insert reduce felt recoil by up to 48% compared to the competition.

For traditionalists, the Sport II’s stock features beautifully figured A-Grade walnut with a satin luster finish, a right-hand contour gel recoil pad, and cut-checkering on both pistol grip and fore-end. When one clay often separates the winners from the losers, the SuperSport and Sport II’s superior reliability, faster recovery time, lower recoil and denser shot patterns is almost like having an unfair advantage.

SPORT II

NEW SPORT II — 20-GA, 3" MSRP \$1,580
A-Grade satin walnut

SPORT II, — 12-GA, 3" MSRP \$1,580
A-Grade satin walnut

SUPERSPORT

SUPERSPORT, COMFORTECH™ — 12-GA, 3" MSRP \$1,800
Carbon Fiber finish
(Shown with optional raised comb pad insert)

SHELLVIEW™

WARNING!
Always physically and visually check the magazine tube and chamber to verify that the firearm is not loaded!

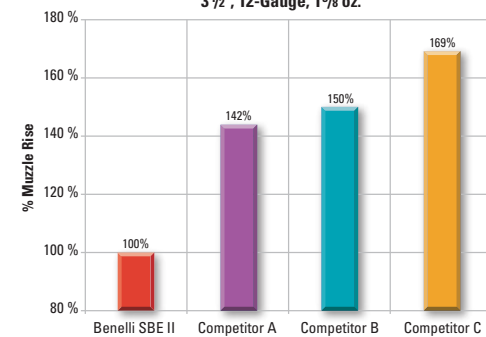

Magazine Tube Benelli's ShellView™ in Fore-end Rounds still in magazine Empty

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

ShellView™ available with the 20-gauge Cordoba, allows the shooter to visually check the number of shells in the magazine tube at a glance.

They'll wonder how you do it. You'll know the reason is that your recovery time is as much as 69% faster than competitive shotguns. You'll bag birds while they're still trying to get back on target.

Shot Recovery Time Comparison
3 1/2", 12-Gauge, 1 3/8 oz.

Extended Crio® Choke tubes are standard. All models are available in 28" and 30" barrels.

FEATURES

SUPERSPORT STANDARD FEATURES

- CHOKE TUBES:** Extended Crio® C, IC, M, IM, F and wrench.
- FINISH:** Carbon Fiber finish.
- BARRELS:** Crio® treated ported barrel.
- GEL PADS:** ComforTech™ Gel recoil and comb pads.
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

SPORT II STANDARD FEATURES

- CHOKE TUBES:** Extended Crio® C, IC, M, IM, F and wrench.
- FINISH:** A-Grade satin walnut.
- BARRELS:** Crio® treated ported barrel.
- GEL PADS:** Gel recoil pad.
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

The trigger assembly is easily removed as a unit by driving out just one pin.

LEGACY — 20-GA, 3" MSRP \$1,565
AA-Grade satin walnut

LEGACY

If you appreciate style and performance along with the finer things that life has to offer, it's for you that Benelli created the Legacy. Blending distinctive style and performance, the Legacy is built around the ultra-reliable Inertia Driven® system, with all the refinements and attention to detail that discriminating shooters expect. The sculptured lower receiver, with classic game scene etchings, is contrasted by a highly polished and blued upper receiver to give the Legacy uncompromising eye-catching originality. Complimenting the sculptured metal, the Legacy is stocked with hand-select AA-Grade, satin walnut. A shim kit allows you to custom fit your own special Legacy stock dimensions because style is important, but function is mandatory. The Legacy is an elegant, smooth-swinging gun that combines the best in materials and workmanship with the most modern engineering.

Benelli includes a set of shims to make customizing the gun's drop and cast a snap.

The Legacy's handsome AA-Grade walnut stock is deeply checked to give you a sure grip out in the field.

The beautifully engraved receivers, with the deep patina, make the Legacy the hunters choice when looking for that old world craftsmanship.

The durable protective carrying case protects your Benelli shotguns with style and safety during trips to the range or field.

- SIDE PLATE:** Acid etched game scenes with rich patina.
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

OPTIONAL FEATURES

- CHOKE TUBES:** Extended chrome C, IC, M, IM, F.
- STOCK:** AAA-Grade stock and fore-end.
- BARRELS:** Variety of lengths of high-luster blued barrels.

NEW **ULTRA LIGHT** — 12-GA, 3" MSRP \$1,385
Satin walnut / WeatherCoat™

ULTRA LIGHT

Weighing only 6 lbs., the Ultra Light is the lightest 12-gauge semi-automatic shotgun ever produced. The Ultra Light sports a featherweight alloy receiver, shortened magazine tube and a unique raised target rib made from the same super light, super strong carbon fiber employed in Formula 1 racecars. However, this Benelli is no lightweight when it comes to standing up to punishment.

No matter if you're in those long pheasant fields in South Dakota or after scaled quail running through the cactus in West Texas, if your average hunting day is measured in miles, check out the new 6 lb. Ultra Light at your Benelli dealer. For more information go to BenelliUSA.com.

The Ultra Light's stock and fore-end are sealed with a five-step process called WeatherCoat™. This coating makes them virtually impervious to any kind of weather and, as a bonus, this special stock finishing process also enhances the fancy figure of the wood.

ULTRA LIGHT FORE-END COMPARISON

MONTEFELTRO FORE-END

ULTRA LIGHT FORE-END

The Ultra Light's magazine tube and fore-end are considerably shorter than the Montefeltro's. This new design makes the Ultra Light incredibly light on those long hunts.

The Ultra Light magazine cap is stylishly designed and grooved for a positive grip for removing or installing.

The light-weight carbon fiber rib has a high-visibility red bar sight with a mid-bead and stepped rib which provides fast and consistent sight alignment.

The carbon fiber rib is complemented by a matching carbon fiber grip cap.

AA-Grade satin walnut

NEW **MONTEFELTRO SILVER** — 20-GA, 3" MSRP \$1,535
AA-Grade satin walnut

Light, slender and quick pointing never described a semi-auto, better than the Benelli Montefeltro. The Inertia Driven® system allows the Montefeltro's fore-end to be slim and graceful while the lightweight anodized aluminum receiver keeps weight to a minimum.

MONTEFELTRO SILVER — 12-and 20-ga.
Upland quail & pointer

New this year is the Montefeltro Silver in 12-and 20-gauge. Both guns feature a distinctive single-piece, nickel-plated alloy receiver, complete with scroll engraving, gold embellishments and a beautifully figured, AA-Grade, satin finished, walnut stock.

FEATURES

ULTRA LIGHT STANDARD FEATURES

- CHOKE TUBES:** IC, M, F Crio® choke tubes and wrench.
- FINISH:** Satin walnut / WeatherCoat™.
- RECOIL PAD:** Gel recoil pad for shock absorption.
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

MONTEFELTRO STANDARD FEATURES

- CHOKE TUBES:** C, IC, M, IM, F and wrench.

- RECOIL PAD:** Vented recoil pad for shock absorption. (12-gauge only)
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

The Benelli Montefeltro's trigger guard provides extra room for the shooter's hand, along with a stylish gold plated trigger.

Grooving at the top of the receiver extends the sight plane for fast and consistent target acquisition.

NEW

M2 FIELD, COMFORTECH™ — 12-GA, 3" MSRP \$1,365
Realtree® APG HD™

LEFT-HAND MODELS

It seems that southpaws have always been ignored by gun manufacturers. Over the years their choices have been few, and in many cases, limited to cosmetic changes to right-hand guns. Benelli has changed that minority status and produced a selection of semi-autos especially for the left-handed shooter. It's only fitting considering that Benelli offers the largest selection of semi-automatic shotguns in the world.

The Benelli flagship semi-auto; the Super Black Eagle II, is made in a left-hand version with a specially designed ComforTech™ stock that features a gel pad that is ergonomically shaped to fit the left shoulder pocket. The Benelli workhorse M2 Field also comes with left-handed ComforTech™ and, like the SBE II, in two patterns of camo or black synthetic. The classic Montefeltro left-hand comes stocked with satin finished walnut.

With three different left-hand models, a variety of barrel lengths, stock configurations and camo patterns, there's a southpaw gun for every occasion.

No longer does the left-handed shooter have to put up with hulls ejecting across his or her face. These are true left-hand guns with ejection ports on the left side of the receiver as well as a safety button that doesn't require reaching around the trigger guard to activate.

This special synthetic raised gel-comb insert not only cushions the shooter's cheek during recoil, it also allows the cheek to slide along the surface for added comfort.

COMFORTECH™ GEL RECOIL PADS

The Benelli engineers have thought of everything. There's even a gel recoil pad on the SBE II and M2 specifically designed to fit the left shoulder. The ergonomic shape spreads the impact over a larger area for less felt recoil.

Optional Medium Pad
14" L.O.P.

Standard Pad
14½" L.O.P.

Optional Short Pad
13½" L.O.P.

A dimpled grip checkering pattern called AirTouch™ gives the shooter a firm grasp on the pistol grip and fore-end, hot or cold, wet or dry.

Easily change the pull length of your SBE II or M2. Insert an optional gel recoil pad to reduce the L.O.P. to 13½" or 14". Both pads have excellent recoil reducing properties. (specify left-hand when ordering).

INERTIA DRIVEN

ComforTech

SUPERNOVA COMFORTECH™ — 12-GA, 3½" MSRP \$455
Realtree® APG HD™

SUPERNOVA

The Benelli SuperNova is a completely new modular design concept in pump action shotguns.

With the optional SteadyGrip™ stock, the SuperNova can be transformed into a high-performance turkey gun or mount the optional cantilevered, fully-rifled slug barrel for tack driving accuracy on deer. There's even

a barrel with rifle sights for home defense, and a SuperNova Tactical fitted with a ghost-ring rear sight and pistol grip.

At the heart of this new pump gun is a lightweight steel skeleton framework over-molded with a high-tech polymer, making the new SuperNova super light, super strong and almost completely impervious to any weather condition.

But the SuperNova isn't just tough on the outside, with its dual-action bars and two-lug rotary bolt head that locks up steel-to-steel inside the barrel, the SuperNova is rock solid to the core. Because the new SuperNova is built tough it makes no compromises. Chambered for 2¾" and 3" shells and 3½" magnum turkey loads, this pump gun can do it all.

The SuperNova is available with a choice of three modular buttstocks and can be quickly reconfigured with a simple ratchet wrench. All three stocks are made of tough synthetic and have a textured matte finish to provide years of reliable service.

NOVA PUMPS ONE-PIECE SKELETON FRAME

Benelli's Nova is truly a 21st Century pump shotgun. Corrosion proof polymer is over-molded on a skeleton framework to form the one-piece receiver and buttstock, in a revolutionary shotgun manufacturing process. The lightweight polymer stock also provides plenty of room for mounting an optional 14 oz. recoil reducer.

STANDARD FEATURES

CHOKE TUBES: IC, M, F and wrench.
FINISHES: Realtree® APG HD™, Advantage® Max-4 HD™, Advantage® Timber HD™ or Black synthetic.

FEATURES

OPTIONAL FEATURES

CHOKE TUBES: Extended chokes for pass shooting, over the decoys waterfowl shooting and extra-full turkey (12 gauge only).
RECOIL REDUCER & BRACKET: 14 oz. recoil reducer and mounting bracket (sold separately).
BARRELS: Variety of lengths and finishes in both field and slug barrels.

Just when everyone thought that the pump action shotgun couldn't be improved, Benelli unveiled the Nova Pump. Completely original and innovative, the Nova Pump incorporates its polymer stock and lightweight receiver into a single unit for unsurpassed strength and weather resistance. Italian styling and high-tech ergonomics, such as distinctive grooves on the pistol grip and fore-end in place of conventional checkering, compliment the Nova's innovative engineering.

With dual-action bars and rotary head locking lugs, the Nova will handle anything from target loads to 3½" magnums. To help dampen the recoil of today's super-heavy magnum loads, the Nova 12-gauge is specially designed to accept a Benelli recoil reducer.

Available in black, Advantage® Max-4 HD™, Timber HD™ and new Realtree® APG HD™ finishes, and as a youth model or slug gun combo set, the Benelli Nova is the most versatile pump-action shotgun ever made — and just when everyone thought the pump gun couldn't be improved.

Optional Medium Pad 14" L.O.P.

Standard Pad 14¾" L.O.P.

FEATURES

STANDARD FEATURES

BARRELS: Fully rifled slug barrel.
FINISHES: Realtree® APG HD™, Advantage® Timber HD™, Black synthetic or Satin walnut.
DRILLED & TAPPED: All rifled slug gun receivers are drilled and tapped for scope mounting.

OPTIONAL FEATURES

GEL RECOIL PADS: Three options to customize length-of-pull to 13½", 14" or 14¾".
RAISED COMB PADS: Extra-high and raised comb inserts for scoped hunting.
BARRELS: Variety of lengths and finishes in both field and slug.

SLUG GUNS

"Slug gun only" deer hunting areas are increasing across the country. Following the trend, Benelli engineers designed slug guns to give the accuracy and performance hunters have come to expect.

The heart of the new Benelli slug gun is a specially designed, heavy-walled 1:28" twist rifled barrel that gives accuracy undreamed of in conventional smooth bore slug guns. The Super Black Eagle II, M2 12-gauge, new M2 20-gauge and Nova Pump and new SuperNova slug guns come standard with barrel mounted, fully adjustable rear sights, fixed blade front sights and specially designed receivers drilled and tapped for optic sights.

Black synthetic, Advantage® Timber HD™, Realtree® APG HD™ or walnut stocks are available for the SBE II. Also available for the SBE II, M2 Field and SuperNova slug models is the ComforTech™ stock that reduces felt recoil by as much as 48%.

SLUG GUNS — 12 GAUGE

FEATURES

STANDARD FEATURES

CHOKE TUBES: C, IC, M, IM, F for SBE II and M2. IC, M, F for SuperNova and Nova.
FINISHES: Realtree® APG HD™, Advantage® Timber HD™ or Black synthetic.
DRILLED & TAPPED: SBE II and SteadyGrip™ receivers are drilled and tapped for scope mounting.

OPTIONAL FEATURES

GEL RECOIL PADS: Three options to customize length-of-pull to 13½", 14" or 14¾".
RAISED COMB PADS: Three options to customize sight plane for scoped hunting (not available for SteadyGrip™ models).
BARRELS: Variety of lengths and finishes in both field and slug barrels.

No matter what your style of turkey hunting, there's a Benelli shotgun for the job. If you demand the ultimate ballistics of the 3½" 12-gauge, choose the Super Black Eagle II. The new ComforTech™ system stock will take the sting out of those 2-ounce loads. The same ComforTech™ recoil-reducing magic can be had in the 3" magnum M2 Field.

The turkey is the only game bird generally hunted from a static sitting position. To get the rifle-like accuracy needed, choose the guns voted "Shotgun of the Year." The M2 Field, Super Black Eagle II or the new SuperNova with the SteadyGrip™ allows a comfortable, rock-solid grip. A comfortable sitting position makes it easier to wait patiently for that savvy old Tom.

Prefer a pump? The new SuperNova and Nova 12-gauge shoot 3½" ammunition and are the smoothest pumping slide-actions on the market today. Like the lighter weight and recoil of a 20-gauge? Choose the M2 Field or Nova Pump.

BENELLI'S MODULAR STOCK SYSTEM

The M2 and SuperNova are available with a choice of modular synthetic buttstocks and can be quickly reconfigured with a simple ratchet wrench. All stocks are made of tough synthetic and have a textured matte black finish to provide years of reliable service.

NEW SUPERNOVA TACTICAL — 12-GA, 3½" MSRP \$545
Desert Camo

DEFENSE

Benelli's SuperNova Tactical is a modular concept pump action shotgun, that can be quickly reconfigured with any of three different special-purpose stocks to be ready for any home defense or tactical situation.

The ComforTech™ stock absorbs nearly 48% of felt recoil to dampen the jolt of heavy buck shot loads. In addition to taming recoil, the ComforTech™ system minimizes muzzle rise, putting you back on target twice as fast as other comparable shotguns.

The tactical pistol grip stock turns the SuperNova into a rock solid shooting platform for optical sights and slugs at long yardage. It also has the added advantage of being easy to manipulate one-handed.

For tight quarters when clearing buildings or in a patrol vehicle, nothing beats the compact versatility of the SuperNova with the collapsible tactical stock (for law enforcement only). The Benelli SuperNova is a high-tech tactical shotgun designed for professionals, but perfect for your home.

The button on the underside of the fore-end of the SuperNova activates a shell stop that allows the chambered shell to be removed without releasing rounds from the magazine.

BENELLI'S MODULAR STOCK SYSTEM

Benelli's SuperNova Tactical can be quickly reconfigured with a choice of three different modular buttstocks:

1. The stocks slide easily into position on the post that is shown in the pull-away view.
2. The raised alignment studs on the buttstock, align perfectly with the indent shown on the back end of the receiver.
3. Simply tighten bolt through rear of stock and replace buttpad.

Optional Short Pad 13½" L.O.P.

Optional Medium Pad 14" L.O.P.

Optional Long Pad 14¾" L.O.P.

FEATURES

STANDARD FEATURES

- CHOKE TUBES:** Fixed Cylinder.

NOVA PUMP H₂O TACTICAL — 12-GA, 3½" MSRP \$535
Black synthetic, matte nickel

The Nova Pump Tactical comes with either open rifle sights or a click-adjustable military style ghost-ring for this all-business, no-nonsense tool. The Nova H₂O Pump Tactical utilizes a polymer stock and corrosion-resistant stainless steel with chrome and nickel plated components to ensure that it keeps working in even the harshest conditions.

The SuperNova comes with newly designed, military-style ghost-ring sights. The rear sight is click adjustable for both windage and elevation. Optional three-dot tritium inserts can be easily installed (see page 39).

REAR SIGHT

FRONT SIGHT

The top of the SuperNova Tactical's receiver is drilled and tapped to accommodate easy attachment of military-style ghost ring sights or a scope.

BENELLI'S NOVA PUMP H₂O COATING

The barrel, magazine tube, magazine cap, trigger group and all other inner metal parts are nickel-plated on the Nova H₂O to survive the wettest, saltiest environments.

With a chrome-plated rotary bolt head and a matte nickel-finished bolt body, the Nova Pump H₂O is ready to take on the harshest weather and keep on firing.

R1 RIFLE, COMFORTECH™ — .300 WIN MAG MSRP \$1,435
Black synthetic — with GripTight™ coating

R1 RIFLE

BENELLI'S GRIP TIGHT™ COATING

The Benelli R1 with ComforTech™ features a high-tech texturing on both the stock and fore-end called GripTight™. This synthetic over-coating feels almost tacky to the touch, so consequently, gives a sure grip wet or dry, with bare hands or even gloves. GripTight™ is totally weather resistant and completely bonded to the surface of the synthetic material of the stock and fore-end.

R1 RIFLE COMFORTECH®

NEW

R1 RIFLE, COMFORTECH™ — .30-06 SPRINGFIELD MSRP \$1,565
Realtree® APG HD™ — shown with optional extra-high comb.
(Optional interchangeable barrels are available in a variety of lengths and calibers)

OPTIONAL INTERCHANGEABLE BARRELS

24" .300 WIN. MAG., .300 WSM, .270 WSM

22" .30-06 SPRINGFIELD, .308 WIN

20" .30-06 SPRINGFIELD, .300 WIN. MAG.,

This optional special synthetic raised gel comb insert not only cushions the shooter's cheek during recoil, it also allows the cheek to slide along the surface for added comfort.

Just imagine a .300 Winchester Magnum that feels like you're shooting a light .270 and you'll understand what this rifle from Benelli is all about. The R1, with its ComforTech™ recoil dampening stock, cuts felt recoil. To put it more graphically, other high-powered rifles kick about twice as hard.

Three different thicknesses of quick-change pads for adjusting length-of-pull and three different comb inserts to adjust for drop are available. Also included is a totally unique accessory — a shim kit to make precise stock adjustments for drop and cast providing a truly custom fit.

FEATURES

STANDARD FEATURES

- BARRELS:** Crio™ treated barrels.
- SHIM KIT:** For adjustment of drop and cast.
- DRILLED & TAPPED:** All R1 receivers are drilled and tapped for scope mounting and come equipped with a Picatinny rail.

OPTIONAL FEATURES

- GEL RECOIL PADS:** Three options to customize length-of-pull to 13½", 14" or 14¾" (ComforTech™ only).
- RAISED COMB PADS:** High and extra-high raised comb pads for scoped hunting (ComforTech™ only).
- BARRELS:** Interchangeable barrels with matching bolt heads are available in a variety of calibers.

Optional open sights feature a fully adjustable rear blade and front sight with a special red filament insert.

R1 RIFLE

R1 RIFLE — .300 WIN MAG MSRP \$1,205
AA-Grade satin walnut
(shown with optional R1 Rifle sight package)

Optional interchangeable barrels are available in different lengths and calibers:
.270 WSM (available in 24")
.300 WIN MAG (available in 20" and 24")
.30-06 SPRINGFIELD (available in 20" and 22")
.300 WSM (available in 24")
.308 WIN (available in 22")

Usually only found on custom-made rifles, the R1's barrel is cryogenically frozen to -300° F which changes the steel at the molecular level. The result, better barrel harmonics providing superior accuracy.

Quick detachable magazine holds three to four rounds, depending on caliber.

The R1 is perfect for shooters of all sizes. Optional recoil pads are available for the desired length-of-pull (13½", 14", 14¾").

AUTO-REGULATING GAS-OPERATED (ARGO) SYSTEM

The reliability of the R1's auto-regulating gas-operated (ARGO) system has been proven in the M1014 military shotgun and has been adapted for centerfire rifle cartridges with a three-lugged rotary bolt. The rifle's gas cylinder is positioned just in front of the chamber allowing for short operating rods and reduced recoiling mass.

Chamber pressure is contained by the massive three-lug rotary locking head, which locks into the steel barrel extension.

GAS PORT

The gas port is located just forward of the chamber where the gases are hotter and cleaner resulting in less fouling and more reliable cycling.

SIMPLE DESIGN GAS PISTONS

Two short stroke, self-cleaning gas pistons push directly against the R1's bolt body, eliminating the need for connecting linkage or heavy action bars.

PISTONS

Since the pistons push directly against the bolt, they are required to move only ½-inch for complete cycling which results in fast operation with minimum vibration.

TORQUE LOCKING SYSTEM

System ensures repeatable accuracy when changing barrels, because tension remains constant shot-after-shot.

Add versatility to your Benelli shotgun with an extra barrel. Complement your smooth-bore gun with an extra slug barrel or have the opportunity to switch barrel lengths from 24" to 26" to 28", whichever fits your particular hunting needs. Extra barrels are available for all models. Rifled slug barrels are available for Super Black Eagle, Super Black Eagle II, M1 Field, M2 Field, SuperNova and Nova models only. (For SBE, SBEII, M1 and M2 models, slug barrels require a modified fore-end sold separately).

Extra-high Comb

GEL COMB INSERTS

The ComforTech™ stock comb insert is made from a special synthetic gel originally developed for the medical industry. This special insert not only cushions the shooter's cheek during recoil, it also has a slippery surface that allows the cheek to slide along the surface for added comfort. Available in standard thickness, raised comb for target shooting or extra-high comb for scoped guns.

MERCURY RECOIL REDUCER

Benelli offers a mercury recoil reducer for the 12-ga. Super Black Eagle and M1 Field models with synthetic stocks. It weighs only 11 ozs. and is easily installed (no bracket is necessary).

RECOIL REDUCER BRACKET

The Nova Pump's stock has a recess for easy installation of a recoil reducer bracket which houses a 14-oz. mercury recoil reducer. When shooting the mighty 3½" magnums, this innovative system is a welcome addition.

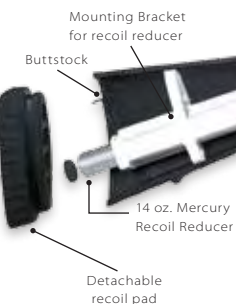

RECOIL REDUCERS

Super Black Eagle/M1 Mercury Recoil Reducer

Nova Pump Mercury Recoil Reducer

Nova Pump Recoil Reducer Bracket

Nova Pumps one-piece skeleton frame

Benelli's Nova is truly a 21st Century pump shotgun. Corrosion proof polymer is over-molded on a skeleton framework to form the one-piece receiver and buttstock, in a revolutionary shotgun manufacturing process. The lightweight polymer stock also provides plenty of room for mounting an optional 14-oz. recoil reducer.

SHIM KITS

STANDARD SHIM KIT

Stock drop is user adjustable; changing shims provides a customized sighting plane to fit the individual shooter's unique physical build and shooting style (specify model).

COMFORTECH™ SHIM KIT

You can customize the models with the ComforTech™ buttstock to your personal requirements using a shim kit that adjusts both drop and cast.

M1 SUPER 90 — 12-GA.
Synthetic

Tom Knapp finally retired his old Benelli M1 Super 90 last year when he donated it to the Buffalo Bill Historic Center in Cody, Wyoming, where it will be put on permanent display next to the guns of other great exhibition shooters like Herb Parsons and Annie Oakley. Tom's old Benelli wasn't worn out, in fact it had never let Tom down. After Tom had presented his faithful Super 90 to the museum, he sat down to figure out just how many rounds he had fired through that gun. With over 100 live shows per year, the total number of rounds put through the Benelli was over half a million.

Well, it's a good thing Tom decided to retire that gun, because at that pace he might have worn it out ... in another hundred years or so.

TOM KNAPP

As host for Benelli's American Bird Hunter TV show, Tom Knapp travels to some of the world's finest bird shooting destinations to bring viewers the best in hunting, shooting and outdoor entertainment. Catch Tom's show on the Outdoor Channel."

Tom Knapp is recognized as the greatest exhibition shooter of modern times. With TV appearances and more than 140 live shows a year in the United States and Europe, Tom has thrilled countless spectators with his seemingly impossible feats with shotguns. Of course the shotguns that Tom shoots are Benellis.

The holder of two World Records for hand thrown clay targets — 9 clays with a Benelli M1 Super 90 in 1993 and 8 clays with a Benelli Nova Pump in 2000, Tom set out to do it again. On October 20th, 2004 in Murfreesboro, Tennessee, he did the unbelievable, shooting 10 clay targets out of the air in 2.2 seconds with a Benelli M2 Field with ComforTech™. Interviewed on the Shooting USA TV show that witnessed the World Record breaking event, Tom commented, "hard work and commitment are two key elements, but without the right equipment I could never do it. That's why I shoot Benellis."

We congratulate Tom Knapp on his third World Record and thank him for being one of the finest ambassadors that American shooting sports has ever known. We're proud of Tom and we're proud that Tom shoots Benellis. Three World Records, three Benelli shotguns and Tom Knapp high-over-all ... now that's a winning hand you can't beat.

WORLD RECORD NO. 1

Tom joined Benelli in 1993 when he set the world record with his Benelli M1 Super 90 by throwing nine standard clay targets and breaking them with individual shots in 2.3 seconds.

WORLD RECORD NO. 2

On July 19, 2000 Tom Knapp, with his Benelli Nova pump in one hand, threw eight clay targets in the air with his other hand and broke everyone of them with individual shots in an amazing 2.1 seconds.

World Record No. 3

In Murfreesboro, Tennessee, on October 20th, 2004 Tom Knapp set out to make history again. With his 12-ga. Benelli M2 fitted with a ComforTech™ stock and extended magazine tube, Tom launched ten clay targets into the air with one hand, shooting all ten with individual shots in an unbelievable 2.2 seconds.

TIM BRADLEY

Tim Bradley joins Team Benelli as our Newest Exhibition Shooter.

Tim Bradley learned to shoot at an early age. Growing up on his family's farm in northeast Arkansas, he shot almost everyday, devoting every spare minute to hunting, trapping and shooting—often burning up five or six cases of .22 ammunition each year. During his high school years Bradley became interested in boxing and the martial arts, earning his black belt in karate by the age of 17.

Utilizing the discipline he learned from the martial arts and his ability for mastering extreme challenges, Bradley tackled the unique and difficult requirements of becoming a world-class exhibition shooter. He honed his gun handling skills through years of practice and by firing thousands upon thousands of rounds of ammo. Bradley's talents were recognized by none other than Tom Knapp, Team Benelli USA's World Record holding exhibition shooter. Determination and dedication to perfect specific shooting skills finally paid off for Bradley, who was invited to join Team Benelli's busy shooting exhibition schedule, teaming up with Tom Knapp in 2006 to thrill crowds of all ages all across the country.
