1868 HERITAGE OF FRANCHI

A leader in modern manufacturing techniques with a history that dates back to 1868, Franchi has perfected the art of building quality double-barrel and semi-automatic shotguns. The skill and craftsmanship that hallmarks Franchi guns dates back to a time when gunmaker's guilds isolated themselves in order to protect their secrets for converting ore into metal and forging iron into firearm barrels and actions. From its earliest patented designs and operating systems, Franchi embraced the philosophy of providing new products for new needs—a concept that's driven the company from its beginning.

Historically, Franchi assumed a major role in perfecting innovative product lines through the use of new materials, technology and manufacturing methods.

More than 75 years ago Franchi began manufacturing firearms in the historic city of Brescia, the heart of industrial Italy. By combining

cutting-edge modern manufacturing methods and technology

with Old-World gun craftsmanship, Franchi has created unique multi-barreled sets of over & under shotguns and an amazingly simple, but reliable gas-operated semi-automatic. Current modernization trends include the incorporation of the Inertia Driven® system to drive the latest generation of Franchi semi-automatic shotguns.

The results are quality firearms that meet today's demanding standards

without compromising the original ideas and concepts that make Franchi firearms unique.

More than a hundred years of craftsmanship and unique skills with metal have endured, which is very evident in the Franchi products that are being made today. Franchi firearms are built on a foundation of excellent, enduring quality and a well-established tradition of gun craftsmanship. Today's Franchi guns incorporate innovative features protected by new patents and embody improvements on original designs without sacrificing style or performance.

INERTIA SYSTEM

"Inertia Driven®" is the heart of the Franchi family of semi-automatic firearms

and relies upon one of the basic laws of physics: The Law of Inertia, which states that an object at rest tends to stay at rest. The "object," in the Inertia Driven® system, is the free-floating bolt. All the other gun parts are fixed in place. Between the free-floating bolt and the rotary locking head is a short, very stiff inertia spring. When the gun is fired all of the fixed-parts of the gun are propelled rearward by the gun's recoil. The bolt briefly holds its position as the fixed parts move to the rear, causing the inertia spring to compress. As the shot charge leaves the barrel and the rearward force of the gun diminishes, the compressed inertia spring throws the bolt rearward with sufficient force to unlock the rotating bolt head, eject the spent shell and re-cock the hammer. The recoil spring then returns the bolt, which travels forward picking up and chambering another shell and locking the rotating head back into place. The bolt weight and inertia spring power are sufficient to cycle 2¾" light target loads to heavy 3" magnums.

INERTIA DRIVEN

STEP 1
Chambering

As the bolt assembly moves into battery, the locking head pin moves along a curved track in the bolt body to rotate the steel bolt head into engagement with the steel barrel extension. The cartridge drop lever is down, indicating the gun is cocked.

STEP 2
Firing

When the gun fires every part of the shotgun except the bolt-body moves rearward. The curved track in the bolt body, which is moving forward relative to the rest of the gun, presses against the locking head pin, turning the bolt head even tighter into the barrel extension. A shell is allowed to move from the magazine.

STEP 3
Recoil

Near the end of the recoil cycle, chamber pressure drops to a safe level and the gun's rearward motion slows. The heavy inertia spring then thrusts the bolt assembly rearward, unlocking the rotating bolt head, extracting the spent shell from the chamber and pulling it against the ejector.

STEP 4
Ejection

As the empty shell exits the receiver, the energy of the moving bolt assembly recocks the hammer and compresses the recoil spring on the magazine tube. The recoil spring then thrusts the bolt assembly forward, lifting the oncoming shell into position and chambering a fresh cartridge. The gun is ready to fire again... in a fraction of a second!

I-12 LIMITED — 12-GA, 3" MSRP \$1399
AA-Grade satin walnut

I-12

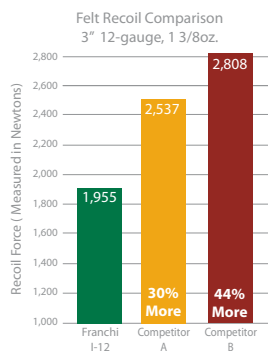

The old duck club members suspiciously checked out your new Franchi I-12 when you climbed down into the tank blind. They all shot gas operated semi-autos; one old guy even named his "Old Faithful." You smiled to yourself knowing that your I-12 was Inertia Driven® and on a day like this, when it was spitting snow and rain, you didn't have to worry about burnt powder sludge gumming up your gun's action.

The first big bunch of "red legs" came over high, eyed the spread and came back around. One of the old guys worked them just right; giving them soft feeding chuckles, luring the ducks lower. They set their wings and committed over the flooded corn. One of the old guys threw down the front of the blind and growled "take 'em." As the I-12 touched your shoulder, you sent a load of 3-inch No. 2s at a big greenhead, he shuddered and you hit him again. You swung on another drake that was climbing out and dumped him too. Watching the last mallard fall, you realized you were the only one still shooting.

Some of the old gas guns only fired twice before jamming — "Old Faithful" must mean that two out of three ain't bad.

The I-12's Twin Shock Absorber™ gel-insert was put through a series of tests to measure felt recoil. The Franchi I-12 with its TSA gel-insert recoil pad has up to 44% less recoil than the competition.

The I-12 Limited's satin nickel receiver is embellished with white gold inlays and finely-engraved waterfowl and upland scenes on each side. The I-12 handles 12-gauge loads ranging from 1 1/8-ounce target loads to the heaviest 3" turkey loads.

Available accessories include three extended field chokes; an extra-full turkey choke (#50994), an improved modified pass-shooting choke (#50992) and a modified over decoys shooting choke (#50993).

I-12 CONFIGURATION OPTIONS

I-12 — 12-GA, 3" MSRP \$839
Advantage* Timber HD™

I-12 — 12-GA, 3" MSRP \$759
Black synthetic

I-12 — 12-GA, 3" MSRP \$839
Advantage* Max-4 HD™

I-12 — 12-GA, 3" MSRP \$839
Satin walnut

The I-12's recoil pad is unique in both form and function. A two-part design with a special gel insert, the I-12's recoil pad holds its shape during firing and then deeply compresses during recoil, soaking up the kick and spreading recoil energy over a wider area of the shooter's shoulder. 3 sizes available

FEATURES

STANDARD FEATURES

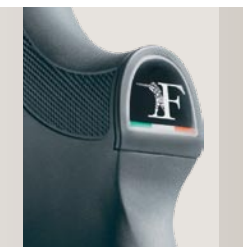

- CHOKE TUBES:** C, IC, M, IM, F and wrench
- FINISHES:** Advantage® Max-4 HD™, Advantage® Timber HD™, Black Synthetic or Satin walnut.
- TSA RECOIL PAD:** Twin Shock Absorber™ gel-insert recoil pad.
- SHIM KIT:** For adjustment of drop and cast.
- SOFT CASE:** Custom fitted, zippered, soft case with Franchi® logo

OPTIONAL ACCESSORIES

- TSA RECOIL PADS:** Three options to customize length-of-pull to 14 3/8", 14 3/4" or 15".
- EXTENDED CHOKE TUBES:** Available in extra-full turkey (XF), long range waterfowl pass shooting (IM), and over decoys shooting (M).
- HARD CASE:** Custom fitted hard case to protect in transport.

Designed for the 21st Century, the Franchi I-12 is distinctive in not only engineering, but also in ergonomic styling. A distinctive Franchi emblem on the grip cap announces that the I-12 is not only modern, but a ground-up original from the design team at Franchi.

The I-12 magazine cap complements the slender, low profile design of the new semi-auto. The I-12's magazine cap is ridged to aid your grip, with or without gloves. The magazine cap comes with a sling swivel stud installed as a standard feature. (Except wood models).

712 COMPETITION — 12-GA, 3" MSRP \$999
Satin walnut / WeatherCoat™

712 & 720 COMPETITION

It's the toughest station on the course: "Darting Doves" – a true pair, through the trees, left to right. You change extended choke tubes as you watch the targets make fools out of your friends.

Success at sporting clays is speed and timing; you need to take out the first target before the big tree; it's a snap shot, but there's no other way. The Competition balances naturally as you focus your thoughts, the time is now; you call "pull."

The pair cuts knife blade thin through the trees, but everything's on autopilot. The Competition comes to your shoulder smoothly as you swing. The tapered rib passes in front of the lead target, you touch the trigger and there's a cloud of dust just before the tree. The recoil is soft, the porting keeps the barrel down and you nail the second clay on the other side with room to spare. The second pair falls the same; the third pair you grind extra-fine.

As you move to the next station, your friends sneak glances at the satin nickel receiver and figured walnut of your Franchi Competition. It's good to have style, and it's great to be at the top of your game.

Both the 712 and 720 Competitions operate with a rotary bolt design, which locks up

like a high-powered rifle. Weighing approximately seven and six pounds respectively, the 712 and 720 Competitions are extremely light and quick handling. The Competition's satin walnut stock is finished with a five-step process called WeatherCoat™. It not only makes the stock impervious to the harshest weather, but also dramatically enhances the figure and beauty of the walnut.

The Competition's versatility makes it an ideal gun for hunting birds and shooting clay targets. Its sleek lines and good looks make it an attractive piece for skeet or trap, and at the same time it's tough enough to weather any field conditions faced while hunting.

COMPETITION CONFIGURATIONS

712 COMPETITION — 12-GA, 3" MSRP \$999
Satin walnut / WeatherCoat™

720 COMPETITION — 20-GA, 3" MSRP \$999
Satin walnut / WeatherCoat™

FEATURES

STANDARD FEATURES

PORTED BARREL: Eliminates muzzle climb for faster second target acquisition.

EXTENDED CHOKE TUBES: IC, M, F and wrench (12-gauge only)

FINISH: Satin walnut/WeatherCoat™.

SHIM KIT: For adjustment of drop and cast.

HARD CASE: Custom fitted hard case to protect in transport.

OPTIONAL ACCESSORIES

EXTENDED CHOKE TUBES: C, IC, M, IM, F (12-gauge)
Skeet 1, Skeet 2, M, XF (20-gauge).

For a distinctive look even while setting in the club gun rack, the Competition sports the Franchi emblem and Franchi's WeatherCoat™ identification on the pistol grip cap.

The Competition features a ported barrel to keep muzzle climb at a minimum, to aid second clay acquisition. In between stations the hard chrome extended choke tubes can be unscrewed by hand for a quick change out.

48 AL

In the course of the morning's hunt the Franchi 48 AL 28-gauge shot like a champ. The gun carried comfortably and fired flawlessly every time.

Hiking after mountain quail is not for the weak-kneed. You need a gun that's comfortable to carry and you must be ready for the sudden flush of quail, which explode from underfoot and zip out of range like a flock of sidewinder missiles. Under challenging conditions your gun must be light, easy to swing and quick to shoot.

After your buddy complains of "short-shuckitis" with his old worn pump gun, you offer a few shots with the slim 28-gauge. After all, you own a Franchi 48 AL—the lightest semi-automatic shotgun in the world.

He enjoys the ease and certainty of three shots without working an action. "It's light, got great balance and I love it," he comments after dropping a low-flyer.

"Give it back," you say. With just three shots the Franchi 48 AL said it all.

48 AL CONFIGURATION OPTIONS

48 AL FIELD — 20-GA, 2¾" MSRP \$779
Satin walnut, matte blue

48 AL DELUXE — 28-GA, 2¾" MSRP \$979
A-Grade walnut, polished-blue

48 AL FIELD SHORT STOCK — 20-GA, 2¾" MSRP \$779
Satin walnut, matte blue

12½" LENGTH OF PULL

A recoiling barrel is the sure sign of a long-recoil autoloader design. On firing, bolt and barrel travel rearward together. As pressure inside the barrel drops, they unlock and the barrel returns forward under spring pressure. The bolt follows, picking up a fresh shell on its way. When it returns to battery, another shot can be fired immediately.

The standard set of three screw-in tubes, improved cylinder, modified and full, will handle most hunting situations. Optional cylinder or improved modified tubes are also available.

FEATURES

STANDARD FEATURES

CHOKE TUBES: IC, M, F and wrench

FINISHES: Satin walnut (Field Model) and A-Grade satin walnut (Deluxe Model).

OPTIONAL ACCESSORIES

CHOKE TUBES: C, IC, M, IM, F

EXTENDED CHOKE TUBES: Skeet 1, Skeet 2, M, XF (20-gauge only).

BARRELS: Available in a variety of lengths in both matte and polished-blue.

HARD CASE: Custom fitted hard case to protect in transport.

720

Where the old fencerow meets the alder thicket at the edge of the cut milo field, your dog locks-up on point. Tail high, front leg raised, he's frozen stiff while you and your buddy move past him when the birds explode from under foot. A pair of ruffed grouse rocket skyward through the branches. Time slows; it's all instinct and timing now. You click off the safety of your Franchi 720 and lock onto the closest bird. When the butt touches your shoulder, a puff of feathers follow. Finally, your hunting buddy shoots and shaves the bark off a nearby tree as the second bird zips through bare branches; he was slow, way too slow. Just couldn't swing that old eight-pound gun fast enough.

As you hold the feather-light 720 with one hand and accept a bird from your pointer, you see your buddy eyeing the graceful lines of your little 20-gauge. No doubt he would do better with a Franchi 720, but you won't encourage him... who needs the competition?

A rotating bolt head is at the heart of all of the ultra-reliable Franchi autoloaders. The rotating bolt head locks bank vault tight into the barrel extension. The stress of firing is confined to the barrel and bolt, allowing a lighter receiver.

720 CONFIGURATION OPTIONS

720 — 20-GA, 3" MSRP \$889
Satin walnut / WeatherCoat™

720 — 20-GA, 3" MSRP \$789

NEW RENAISSANCE SPORTING — 12-GA, 3" MSRP \$2039
A-Grade oil finished walnut

RENAISSANCE SPORTING

Trapper ready? Pull! A crossing simultaneous pair launches from the thrower. You shoulder your Franchi Renaissance Sporting and it comes up like it was custom-made to fit. With a proper sustained lead the first target disappears in a puff of dust. With little time remaining you swing through the second clay blasting it into a million little pieces just before it can disappear behind a barkless pine tree—a tree that bears the brunt of guns that weren't fast enough.

A new affordable over & under shotgun called the Renaissance Sporting joins the Franchi family. Inspired by the specific requirements of clay target shooters, the Renaissance Sporting comes in 12-gauge and features 30-inch ported barrels with extended knurled choke tubes for easy fitting and removal. The Sporting's forcing cones have been lengthened to ensure uniform shot patterns and to reduce back pressure and subsequent felt recoil.

Weighing in at eight pounds, the Sporting utilizes an extra-strong, stainless steel box-lock action for handling a steady diet of high-brass target loads. The receiver is enhanced with scroll engraving and gold embellishments. The stock, cut from highly figured select walnut and featuring cut checkering, sports a traditional oil finish to compliment the wood's beautiful grain pattern. The stock is further enhanced with an adjustable comb and Franchi's patented recoil-reducing Twin Shock Absorber™ system that diminishes felt-recoil up to 44%, making the Renaissance a pleasure to shoot.

The Renaissance Sporting has all the desirable features of more expensive models. Style and performance are blended in a way that's functional and attractive, making this an appealing over & under for clay target shooters at every level. Combining tradition with technology, Franchi's Renaissance lineup represents a new beginning for an innovative line of reliable, Italian-made over & under shotguns.

The Sporting's 30" barrels are ported to control muzzle climb and fitted with extended, knurled chokes to facilitate easy removal and installation without tools.

RENAISSANCE SPORTING

NEW RENAISSANCE SPORTING — 12-GA, 3" MSRP \$2039
A-Grade oil-finished walnut

The Renaissance Sporting comes with a comb that can be adjusted both horizontally and vertically. An adjustment tool is included with each gun to facilitate correct placement for optimal fit.

Located behind the Sporting's top lever is the multi-function safety, which serves as both barrel-selector and safety.

The underside of the Sporting's all-steel, coin-finished receiver is lavishly engraved with fine scroll work, which is also graced the gold-embellished trigger guard.

FEATURES

STANDARD FEATURES

- EXTENDED CHOKE TUBES:** C, IC, M and wrench
- FINISHES:** A-Grade oil-finished walnut.
- ADJUSTABLE COMB:** Customize stock to shooter's dimensions (adjustment tool included)
- TSA RECOIL PAD:** Twin Shock Absorber™ gel-insert recoil pad.
- HARD CASE:** Custom fitted hard case to protect in transport.

OPTIONAL ACCESSORIES

- TSA RECOIL PADS:** Three options to customize length-of-pull to 14 3/8", 14 3/4" or 15".
- CHOKE TUBES:** C, IC, M, IM, F (Available in flush or extended versions).

The Renaissance Sporting's all-steel receiver is embellished with fine scroll-engraving and graced with a gold-inlaid clay target on each side.

RENAISSANCE

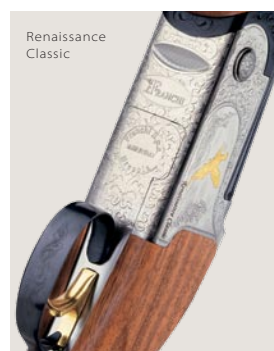

The new Renaissance series from Franchi is a blend of traditional design and high-tech innovation that re-defines the over & under shotgun. With the Field, Classic and Elite models available, the Renaissance series offers an over & under shotgun to fit the taste and budget of every sportsman. The receiver of each model is precision machined out of a solid billet of lightweight alloy, which is then steel reinforced at critical areas such as the face of the breech. Extra material is removed wherever possible and the end product is an over & under 12-gauge shotgun that weighs an incredibly light 6 pounds. Until now, a 12-gauge over & under of only 6 pounds was unheard of because there were no alloys strong enough to make such a gun. Even if the necessary alloys did exist, the recoil from such a light gun would be too punishing. However, Franchi engineers developed an innovative "Twin Shock-Absorber™" recoil pad with a special gel insert that soaks up over 40% of the felt recoil. All three Renaissance models have walnut stocks with classic Prince of Wales pistol grips, cut checkering and traditional oil finishes. They are available in 12-, 20- and 28-gauge, with the choice of a 28" or 26" barrel on the 12- and 20- gauge models, and 26" on the 28-gauge.

The Renaissance Field's receiver comes with an engraved game scene and blued trigger guard and silver-plated trigger.

The Renaissance Classic's receiver displays engraved game scenes with gold inlays on the left and right sides, a blued trigger guard and gold-plated trigger.

The Renaissance Elite's receiver embodies all the skills of the Italian gunmaker's craft with fine engraving, gold embellishments and a stainless trigger guard and gold-plated trigger.

RENAISSANCE ELITE — 12-GA, 3" **MSRP \$2110**
AA-Grade oil-finished walnut, gold embellished engraving, filigreed top lever

RENAISSANCE CONFIGURATION OPTIONS

RENAISSANCE FIELD — 20-GA, 3" **MSRP \$1320**
Oil-finished walnut, upland game scene engraving

FEATURES

STANDARD FEATURES

CHOKE TUBES: IC, M, F and wrench (Elite includes C, IC, M, F)
FINISHES: Standard, A-Grade and AA-Grade oil-finished walnut.
TSA RECOIL PAD: Twin Shock Absorber™ gel-insert recoil pad.
HARD CASE: Custom fitted hard case to protect in transport.

OPTIONAL ACCESSORIES

TSA RECOIL PADS: Three options to customize length-of-pull to 14 $\frac{3}{8}$ ", 14 $\frac{3}{4}$ " or 15".
CHOKE TUBES: C, IC, M, IM, F (Available in flush or extended versions).

Franchi's Twin Shock Absorber™ (TSA) recoil pad features a special gel insert that can reduce felt recoil by as much as 43%. New for 2007 will be the availability of the TSA recoil pad for the 20- and 28-gauge Renaissance guns.

PARTS AND ACCESSORIES

From choke tubes and gun cases to shirts, hats and many other labeled items, Franchi shooters can enjoy a selection of parts, accessories and gear that can be used, worn or displayed proudly. Whether it's a patch for your jacket, a cup for your coffee, or a deluxe hard case for your Renaissance, if it says Franchi, you know it stands for quality.

PACKAGING

Besides the choke tubes that come with the guns, Franchi offers a full range of extra choke tubes for all its 12-, 20- and 28-gauge shotguns. Look for them at your local authorized Franchi dealer.

RECOIL PADS

Franchi's TSA (Twin Shock Absorber™) recoil pads feature a special gel insert that can reduce felt recoil by as much as 43%. To adjust from 14¾" to 14¾" to 15" length-of-pull, the quick change TSA pads come in three thicknesses.

CHOKE WRENCH

Available in 12-, 20- and 28-gauge, the Franchi choke wrench is as handy in the field as it is at the work bench.

RECOIL REDUCER

Franchi offers a mercury-filled recoil reducer for the synthetic stocked I-12, 912, 712 and 612 models. Weighing in at just 13 ounces, the Franchi recoil reducer is installed by simply screwing it onto the existing receiver extension. (No bracket is necessary)

• F •• IM ••• M •••• IC ••••• C

• F •• IM ••• M •••• IC ••••• C

STANDARD CHOKE TUBES

Standard, flush-mount choke tubes are available for 12-, 20- and 28-gauge in cylinder, improved cylinder, modified, improved modified and full.

EXTENDED CHOKE TUBES

Perfect for competition, Franchi's knurled extended black oxide finish choke tubes are machined from durable, stainless steel and are available in cylinder, improved cylinder, modified, improved modified and full. (Specify 12- or 20-gauge)

EXTENDED CHOKE TUBES

Two extended field chokes are available. An improved modified pass shooting choke (#50992) and a modified choke for shooting over decoys (#50993).

TURKEY EXTENDED CHOKE TUBE

Get the drop on that big gobbler with an extended choke tube made especially for today's new turkey loads. The .665 constriction tube (#50994) is designed to throw ultra-dense patterns that will reach out for those wary toms that hang up at the edge of shooting distance.

CASES

SINGLE BARREL TAKE-DOWN CASE

Heavy canvas duck and leather trim mean this takedown case will last through years of hunting. A long strap lets you sling it over the shoulder.

(90067) \$110

TAKE-DOWN HARD CASE

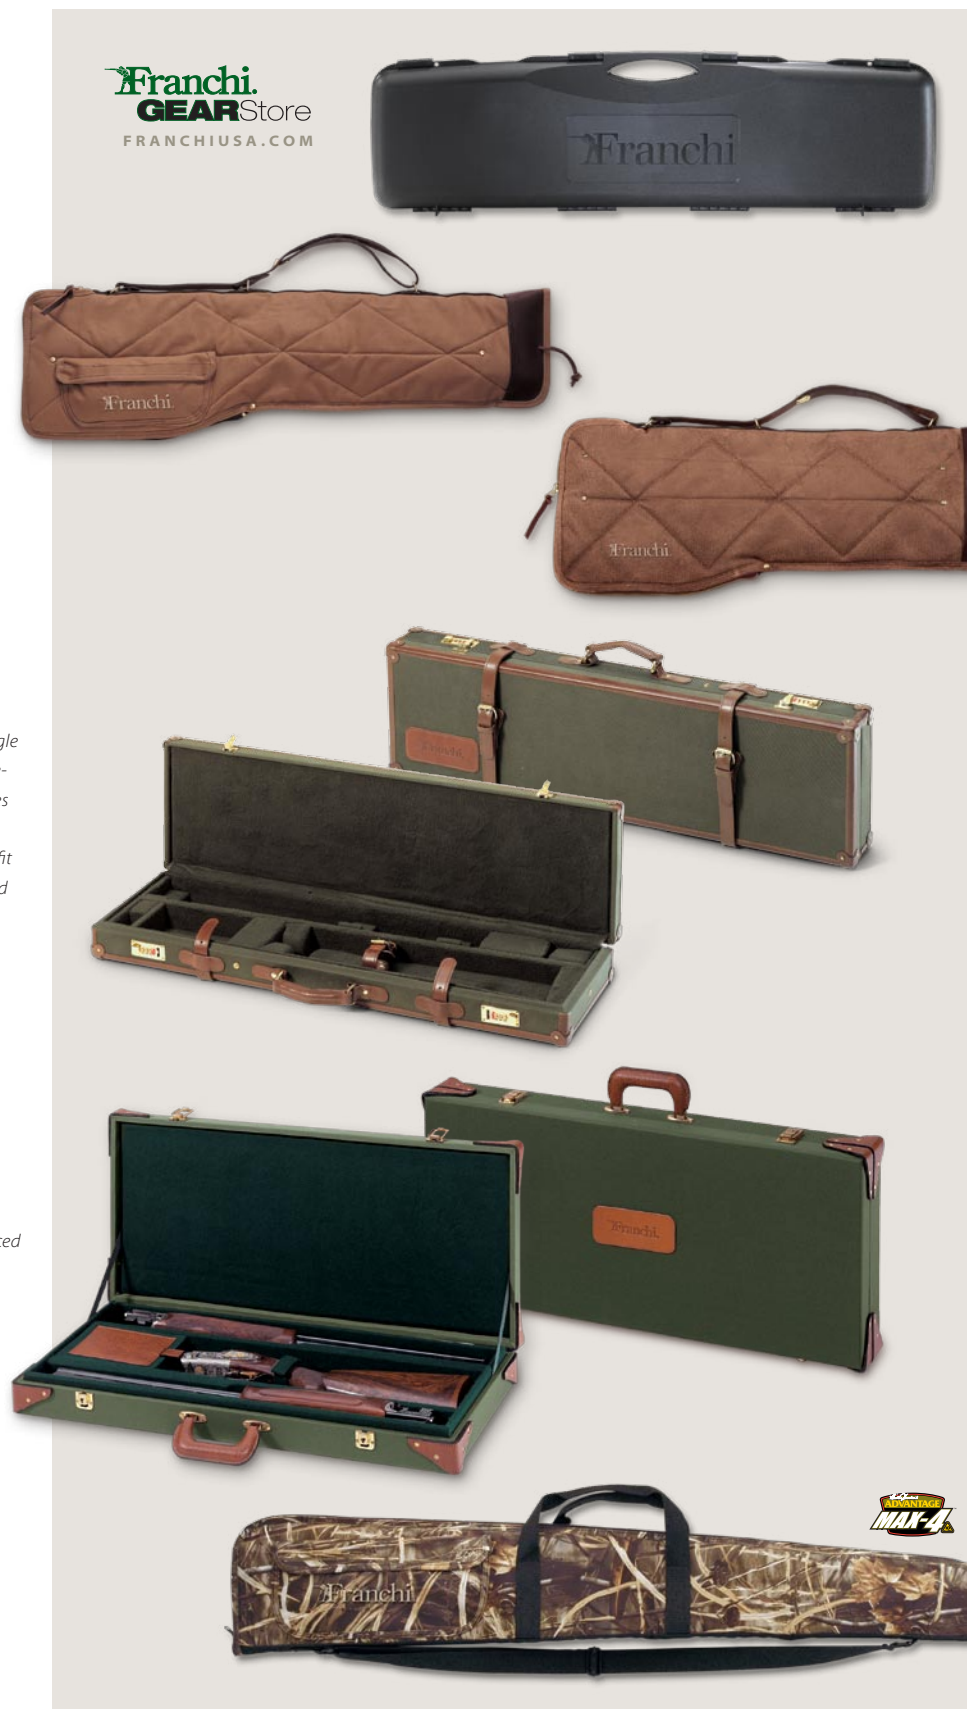

This English-style take-down hard case fits a single set of barrels for a double-barrel shotgun and comes with keyed locks and re-enforced corners. Will fit Franchi over & unders and most side-by-sides.

(90068) \$189

DELUXE TWO BARREL HARD CASE

This two barrel English fit hard case, comes with keyed locks and re-enforced corners. Will fit Franchi over & unders and most side-by-sides.

(90085) \$350

FRANCHI HARD CASE

The Franchi hard case is available for all over-unders (#90057) and autoloaders (#90100). It has storage space for choke tubes, wrench and cleaning kit

(90057) \$40

DOUBLE BARREL TAKE-DOWN CASE

A Boyt-made quilted take-down case is ideal for keeping your over-under protected to and from the hunting field. This one carries a two-barrel set.

(90089) \$125

FLOATING GUN CASE

The floater case will keep your shotgun above water if it falls out of the boat. It comes in Advantage® Max-4™ camouflage, perfect for waterfowl hunting.

(90057) \$40

FRANCHI GEAR

SPORT SHIRT

This classically-styled sport shirt is made of 100% combed cotton. It sports a three-button front, a rib knit collar and cuffs, a durable double-needle construction on all seams and the Franchi logo on the left front. Available in sizes: M, L, XL and XXL.

T-SHIRT

Constructed of tough, pre-shrunk cotton, these T-shirts have the Franchi logo and shooter on the back with the words "Here birdie, birdie..." on the front. Available in sizes: M, L, XL, and XXL.

INERTIA DRIVEN® SHORT SLEEVE T-SHIRT

With the Inertia Driven® logo on the back and Franchi logo on the front, this is a T-shirt that makes a statement. Woven from 6.1 oz. pre-shrunk 100% cotton fiber, the Franchi T-shirt features a quarter-turned seamless collar, it's tapered shoulder-to-shoulder and is fully double stitched. Available in sizes: L, XL, and XXL.

FRANCHI GEAR

FRANCHI HATS

Shooting hats, embroidered with the Franchi logo, are available in several styles and colors. One size fits all.

COFFEE MUG

Show them you came to win with the Franchi coffee mug. The ceramic Franchi coffee mug is available in green with white Franchi logo.

SEW-ON PATCH

No sporting jacket is complete without the Franchi logo proudly displayed! This Franchi sew-on logo patch is available in green with a white embroidered Franchi logo.

INSULATED TRAVEL TUMBLER

When headed to the range or the hunting field you can sip your favorite drink, hot or cold, with this Franchi travel tumbler. This Rolling Ridges stainless steel tumbler has a 16 oz. capacity and features foam insulation and plastic inner liner.

LAPEL PIN

Show your colors with the Franchi lapel pin. Available in green with embossed gold Franchi shield logo.
