

HECKLER & KOCH

NO COMPROMISE

2007

HECKLER & KOCH

Heckler & Koch handguns are produced with the knowledge and expertise gained from over 50 years of experience designing quality firearms for demanding military and law enforcement applications around the world. Each gun produced draws from a rich heritage of cutting-edge design technology, coupled with the latest advancements in metallurgy and polymer applications. Built by the same dedicated craftsmen who assemble Heckler & Koch military arms, these pistols have earned a well-deserved reputation of being the finest handguns in the world.

Since the company's inception, HK has always been the pioneer in bringing new technology to the forefront and challenging the standards once thought of as unattainable. Our use of polymers appeared fifteen years ahead of other market offerings and the introduction of the exclusive polygonal profile barrel, standard in all models, has yet to be equalized by other manufacturers. This unique feature helps insure that HK barrels usually attain a life expectancy of thousands of rounds beyond lands-and-grooves barrel construction so often used in conventional pistols. But most importantly, it guarantees that HK products provide a level of accuracy that simply cannot be duplicated by competitive offerings, at any price. We build "accuracy" into our guns by virtue of superior design and unmatched manufacturing technology. That's why legions of dedicated users, from military and law enforcement professionals, to target shooters, can attest to the accuracy and reliability of HK handguns.

THE HK EXPERIENCE

P2000

P2000
9mm

P2000 Features

- Ambidextrous slide release lever
- Ambidextrous magazine release
- Oversized, recurved trigger guard for use with gloves
- Polygonal barrel bore profile for exceptional accuracy, longer barrel life and easier cleaning
- Corrosion-proof, fiber-reinforced polymer frame
- Patented Lock-Out™ safety device
- Industry standard mounting grooves for accessories
- Modular grip with interchangeable back straps for custom fit
- Corrosion-resistant, "Hostile Environment" Nitro-Carburized finish
- Extractor doubles as a loaded chamber indicator

UNSURPASSED

HK ACCESSORIES

50th Anniversary Book Of Heckler & Koch

The official history book of the Oberndorf Company of Heckler & Koch. Historical insights, descriptions of weapons and the technology that has made HK guns the top brand in the industry for over 50 years.

Universal Tactical Light (UTL)

The Universal Tactical Light fits on all models of the USP. The UTL allows you to illuminate your target, giving you better accuracy even during the night.

The Heckler & Koch LEM

The LEM (Law Enforcement Modification) trigger system variant is now available for all models of the USP. It combines the safety and reliability of a traditional double-action with the smoothness and accuracy of a single-action pistol. The innovative two-piece hammer provides a positive 7.5 to 8.5 pound pull. The short trigger reset ensures that follow-up shots are rapid and on target.

SA80 MAGAZINE

SA80 Magazine Features:

- Length - 7.48 inches (190 mm)
- Width - .94 inches (20 mm)
- Height - 2.56 inches (165 mm)
- Weight (empty) - .54 lb (.25 kg)
- Capacity - 30-Round
- HK Part Number - 233614
(Maritime/Corrosion-Resistant)

30-Round Steel Magazine for use in AR15/M16/M4/SA80 rifles. The HK 30-Round Steel Magazine makes "good guns perform better" and "great guns perform unbelievable."

Considered by users in elite U.S. military and law enforcement units as the best and most reliable M16-style magazine in the world, the new Heckler & Koch High-Reliability 30-Round Steel Magazine is designed for use in any U.S. M16/M4/AR15-style rifle, and any weapon that utilizes this NATO-standard magazine. The HK High-Reliability 30-Round Steel Magazine features a well-executed design, select materials, special anti-friction surface finish, advanced spring material, attention to production tolerances and steel magazine housing and follower. This magazine features a proprietary HK Maritime/Corrosion-Resistant coating.

Heckler & Koch

Heckler and Koch is the sole importer of HK brand products in the United States and is the exclusive distributor for technologically advanced firearms for state and local law enforcement and the sporting markets.

For the location of your nearest HK authorized dealer, or more information on HK's full line of products and services for the sportsman, state and local law enforcement professionals, (qualified law enforcement inquiries only) contact HK Inc. at: Telephone (205) 655-8299 • Fax (205) 655-7078. Or visit our website at www.hk-usa.com.

Warranty

Heckler & Koch firearms sold to individuals carry a Limited Lifetime Warranty. See the HK Owners Manual for details.

Heckler & Koch firearms sold to law enforcement organizations carry a 3-year limited warranty. See the HK Owners Manual for details.

Firearm safety is your responsibility. Read and follow all safety information contained in the Owners Manual. Store all firearms in a secure location. Keep firearms away from children.

7.62x51mm HK417 "Assaulter" Carbine with 12" barrel

Like the HK416, developed by HK with internal funding working directly with select US SOF personnel, the new 7.62x51mm NATO caliber HK417 Weapons System is currently under final development by Heckler & Koch as a Commercial Off-the-Shelf (COTS) alternative to existing, competing 7.62mm semi-automatic and select-fire rifles, carbines and sniper rifle systems. The .30 caliber "big brother" to combat proven 5.56mm HK416 family of rifles and carbines, the HK417 shares the operating control location and functions, disassembly and maintenance procedures and ergonomics of the HK416 and other AR-15-based weapons, to include the US M16 and M4 rifles/carbines. This fact insures immediate operator acceptance and transfer from one weapon to another and retains the already learned muscle memory critical to proficient target engagements under stressed fire.

The HK417 utilizes the unique operating rod gas system pioneered by HK in the HK416 and G36 weapons systems. This system uses a solid "pusher rod" operating rod in place of the more common hollow gas tube normally employed in AR15-style rifles. This system improves reliability and reduces operator cleaning and maintenance as literally no carbon fouling or propellant gases are directed back into the weapon beyond the gas cylinder located above the barrel. Thus the cleaning intervals and heat transfer to bolt components are drastically reduced, while the service life of all parts as well as the barrel, is increased dramatically. The design goal of the HK417 is to guarantee no parts failures or stoppages in less than 10,000-15,000 rounds with

little or no accuracy degradation. The HK417 gas system also makes the weapon less sensitive to ammunition and barrel length changes, or when sound suppressors are employed.

The HK417 will be available with 12, 16 and 20-inch barrels. To change length, the barrel is the only component needing to be changed and can be accomplished in under two minutes with simple tools. HK417 barrels are cold hammer forged with HK's famous proprietary process, are chrome-lined and utilize a conventional lands and grooves bore profile with 1/11 inch twist. All HK417 barrels are threaded for flash hiders, muzzle compensators and for sound suppressor attachment. A special M4-style multi-position retractable buttstock provides a comfortable sloping cheek piece, multiple battery storage compartments, and enhanced non-slip rubber recoil pad. Ambidextrous operating controls are standard on the HK417, to include the charging handle and an ambidextrous safety lever is also planned. Semiautomatic and fully-automatic modes of fire are available as a standard feature. A semiautomatic only option is also planned. All manner of existing accessories, to include sights, laser aimers, pistol grips, slings, etc. can be fitted to the common attachment points and/or MIL STD 1913 rail system found on the HK417.

A new 20-round translucent polymer box magazine being developed specifically for the new HK417 will actuate the M16-style bolt catch to lock the bolt rearward on the last round fired. HK417 magazines will drop free and can be inserted into the beveled magazine well with a conventional

upward motion and not the rocking motion common on some 7.62mm rifles.

During recent HK-conducted desert testing, a single HK417 prototype (2nd design stage) fired more than 15,000 documented rounds of assorted ammunition, to include M118LR, M80 ball, M993 AP and assorted commercial ammunition with bullet weights ranges from 125 to over 175 grains without a single parts failure or stoppage! Accuracy firing with a prototype 12-inch barreled HK417 "assaulter" carbine and 10X optical sight was conducted with user representatives using US M118LR ammunition. Firing multiple 3-shot groups at 100 - 500 yards lines, the average group size for all four shooters was 1.3 MOA from an HK417 carbine with 12-inch barrel!

The HK designed and patented, user removable, 4-quadrant free floating rail system for the HK417 mirrors that of the HK416 carbine and accepts the same quick-detachable 40x46mm HK AG-HK416 grenade launcher also used on the 5.56mm HK416. This COTS launcher, recently selected by the US Army as the "XM320 Grenade Launcher Module" to replace the US M203, can be installed and removed by the user in seconds with no tools or change in launcher or rifle zero. The AG-HK416 can be used off of the host weapon with an add-on retractable buttstock or as a grenade "pistol" without buttstock using a detachable folding vertical foregrip.

Modular user installed mounting adapters allow the same grenade launcher to be used on existing and newly emerging weapon systems, like the US M16 or M4. The HK free-floating rail system is removed without special tools by the operator and insures 100% return to zero for all mounted accessories.

HK417 with 12" barrel and HK AG-HK416 Grenade Launcher mounted.

The HK416/417/GLM COTS family of weapons is now complete with the introduction of "HK417".

Note: The HK417 is only planned for military and federal law enforcement agency purchase at this time. No individual sales inquiries please.

SPECIFICATIONS

HK417 12 "Assaulter" Model

NOTE: SPECIFICATIONS AND FEATURES SUBJECT TO CHANGE

P30™

FLEXIBILITY • FUNCTIONALITY • SAFETY

The new P30™ is one of the most modern police pistols of our time. During its development, the most important requirements were flexibility, functionality and safety.

Ergonomics of the grip have been markedly improved by interchangeable backstrap inserts and lateral plates. In combination with the ambidextrous operating controls, this pistol can be individually adapted to almost any user.

No compromises have been made regarding safety. The P30 has a self-decocking, double action hammer with a firing pin block safety that eliminates the need for a manual safety.

Its advanced loaded chamber indicator, which is easily seen and felt, positively indicates a loaded chamber.

Another feature is the open square-notch rear sight with luminous contrast points (non-tritium), allowing an exact target acquisition even under poor lighting conditions.

The most important features at a glance:

- Interchangeable backstrap inserts and lateral plates
- Open square-notch rear sight with luminous contrast points
- Loaded chamber indicator that is easily seen and felt
- Ambidextrous operating controls
- Integrated Picatinny rail
- Slide mounted decocking device

HK45™ & HK45C™

REVOLUTIONARY • DISTINGUISHED

The HK45™ and HK45C™ were developed to meet the needs of the most distinguished, elite U.S. military operators.

The HK45 and HK45C are available in any one of the 10, HK specific variants, including the double-action and single-action Law Enforcement Modification known as the LEM. Left, right and ambidextrous control levers provide safety and/or de-cocking functions and can be fitted to the pistol by simply changing parts.

A unique, internal mechanical recoil reduction system reduces the recoil forces imparted to the weapon and shooter by as much as 30%, improving shooter control during rapid firing.

The HK45 and HK45C combine the accuracy, modularity, reliability and extended service life that you have come to expect from a company that prides itself for their "No Compromise" slogan. Both models can be fitted with threaded barrels for use with sound suppressors.

The most important features at a glance:

- Ergonomical (HK45 full size) and slimline (HK45C) grip profiles with replaceable grip panels to adjust the feel and grip circumference of the weapon to suit individual operator hand-shooting preferences
- A compact 8-round magazine is also available for use with the HK45C
- Integrated Picatinny rail molded into the polymer frame dust cover
- Enlarged ambidextrous magazine levers
- Improved ergonomic control levers (safety and/or decocking)
- Low-profile, drift adjustable, 3-dot sight
- Contoured and radiused slide with forward grasping grooves
- Ambidextrous slide release
- Black polymer frame

COMBAT COMPETITION

MATCHLESS • UNSURPASSED

Built on the standard USP full-size frame, the Combat Competition includes everything a competitive shooter needs. The highly visible Novak fiber-optic sights have become a staple in the competitive shooting arena. This pistol uses a hybrid trigger derived from both the LEM and the Match trigger, which merges the best of both worlds.

The enhanced decal grips provide that extra grip all sport shooters are looking for. The add-on flared-out magazine well called the jet funnel will decrease your reload times while providing you with positive magazine seating. HK has also increased magazine capacity by 3 rounds in both the 9mm and the .40 S&W. With HK... There is NO COMPROMISE!

The most important features at a glance:

- Corrosion-proof, fiber-reinforced frame
- Converts to any of 10 firing modes
- Incorporated HK's patented recoil system
- Oversized trigger guard
- One-piece machined slide
- Corrosion-resistant, "Hostile Environment" Nitro-Carburized finish
- Polygonal bore profile for exceptional accuracy and longer barrel life
- Ambidextrous magazine release
- Extended slide release lever
- Patented Lock-Out™ safety device
- Novak fiber-optic sights
- LEM coupled with Match Trigger
- 16-round (.40 S&W) and 18-round magazines (9mm)
- Decal grips
- Jet Funnel

SL8 - 6 Rifle

For a limited time only, HK will import the SL8-6 Rifle for civilian sale.

A truly revolutionary new rifle—the HK SL8-6 is constructed almost entirely of a reinforced carbon-fiber polymer. Based on the current combat-tested German Army G36 rifle, the SL8-6 uses a proven short stroke, piston-actuated gas operating system, well known for simplicity and reliability.

Designed and engineered to deliver exceptional shooting performance, the SL8-6 is already a favorite among European rifle shooters, due in large part to the many modular sighting systems available. These modular systems include extended and short Picatinny rail mounts with open sights, a 1.5 power scope with an integral carry handle, and a dual optical system that combines a 3 power scope with an electronic red dot sight. The ergonomic and clean lines of the HK SL8-6 are functional and modern, giving the SL8-6 the look and feel of a 21st century firearm.

Features

- Ergonomic black thumbhole stock, with slimline G36 type forend
- Free floating cold-hammer forged heavy barrel for optimal accuracy
- Bolt cocking handle swivels to both sides of the rifle for true ambidextrous use
- Short aluminum mounting rail
- Ambidextrous safety/selector lever
- Easy disassembly for simple cleaning and maintenance
- Adjustable cheekpiece and buttstock
- Polymer 10-round magazine
- Simple, reliable short stroke, piston-actuated gas operating system
- Molded-in hard points for mounting accessories
- Lifetime warranty

USC Carbine

The final batch of original gray stocked USC Carbines is now available for civilian purchase.

Derived from the HK UMP, the USC is a civilian utility carbine that uses the classic hard-hitting .45 ACP cartridge. Matched with the simple and ultra-reliable blowback operating system, the HK USC is a radical departure from traditional firearms designs.

Extensive use of the same durable, reinforced polymers used on HK's line of military and police arms ensures light weight and durability. And the highest grade of weapons steel is used where it matters—in the cold hammer forged target barrel and the solidly-constructed bolt mechanism.

User ergonomics are not sacrificed. The skeletonized buttstock is topped with a comfortable rubber cheek rest and recoil pad. The web of the pistol grip is open for a comfortable shooting handhold. Hard points located on the top and front of the receiver make attachment of optional Picatinny rails easy, allowing almost any kind of sighting system or accessory to be mounted.

Features

- Tough, light weight, corrosion proof polymer construction
- Molded-in hard points for mounting accessories
- Accessory Picatinny rails for easy mounting of optical sights, lights, and aiming devices
- Rear sight is adjustable for windage and elevation
- Easy disassembly for simple cleaning and maintenance
- Ambidextrous safety/selector lever
- Open, skeletonized buttstock for better grip
- Oversized trigger guard for easy operation while wearing gloves
- Sixteen inch cold-hammer forged target barrel
- Rubber cheek rest and buttstock recoil pad
- Polymer 10-round magazine
- Lifetime warranty
