FRANCHI PASS ALONG THE TRADITION

A LEADER IN MODERN MANUFACTURING TECHNIQUES with a history that dates back to 1868, Franchi has perfected the art of building quality double-barrel and semi-automatic shotguns. The skill and craftsmanship that hallmarks Franchi guns dates back to a time when gunmaker's guilds isolated themselves in order to protect their secrets for converting ore into metal and forging iron into firearm barrels and actions. From its earliest patented designs and operating systems, Franchi embraced the philosophy of providing new products for new needs—a concept that's driven the company from its beginning. ✨ More than 75 years ago Franchi began manufacturing firearms in the historic city of Brescia, the heart of industrial Italy. By combining cutting-edge modern manufacturing methods and technology with Old-World gun craftsmanship, Franchi has created unique multi-barreled sets of over & under shotguns and an amazingly simple, but reliable gas operated semi-automatic. Current modernization trends include the incorporation of the Inertia Driven® system to drive the latest generation of Franchi semi-automatic shotguns. The results are quality firearms that meet today's demanding standards without compromising the original ideas and concepts that make Franchi firearms unique.

"Franchi's Highlander possesses all the virtues of the great upland guns at an affordable price."

NEWTON'S FIRST LAW - THE LAW OF INERTIA

"An object at rest will remain at rest and an object in motion continues in motion with the same speed and in the same direction unless acted upon by an unbalanced force."

- SIR ISAAC NEWTON

"Inertia Driven" is the heart of the Franchi family of semi-automatic firearms and relies upon one of the basic laws of physics: The Law of Inertia, which states that an object at rest will remain at rest. The "object," in the Inertia Driven® system, is the free-floating bolt. All the other gun parts are fixed in place. Between the free-floating bolt and the rotary locking head is a short, very stiff inertia spring. When the gun is fired all of the fixed-parts of the gun are propelled rearward by the gun's recoil. The bolt briefly holds its position as the fixed parts move to the rear, causing the inertia spring to compress. As the shot charge leaves the barrel and the rearward force of the gun diminishes, the compressed inertia spring throws the bolt rearward with sufficient force to unlock the rotating bolt head, eject the spent shell and re-cock the hammer. The recoil spring then returns the bolt, which travels forward picking up and chambering another shell and locking the rotating head back into place. The bolt weight and inertia spring power are sufficient to cycle 2¾" target loads to heavy 3" magnums.

INERTIA SYSTEM

STEP 1 Chambering

As the bolt assembly moves into battery, the locking head pin moves along a curved track in the bolt body to rotate the steel bolt head into engagement with the steel barrel extension. The cartridge drop lever is down, indicating the gun is cocked.

STEP 2 Firing

When the gun fires every part of the shotgun except the bolt body moves rearward. The curved track in the bolt body, which is moving forward relative to the rest of the gun, presses against the locking head pin, turning the bolt head even tighter into the barrel extension. A shell is allowed to exit from the magazine.

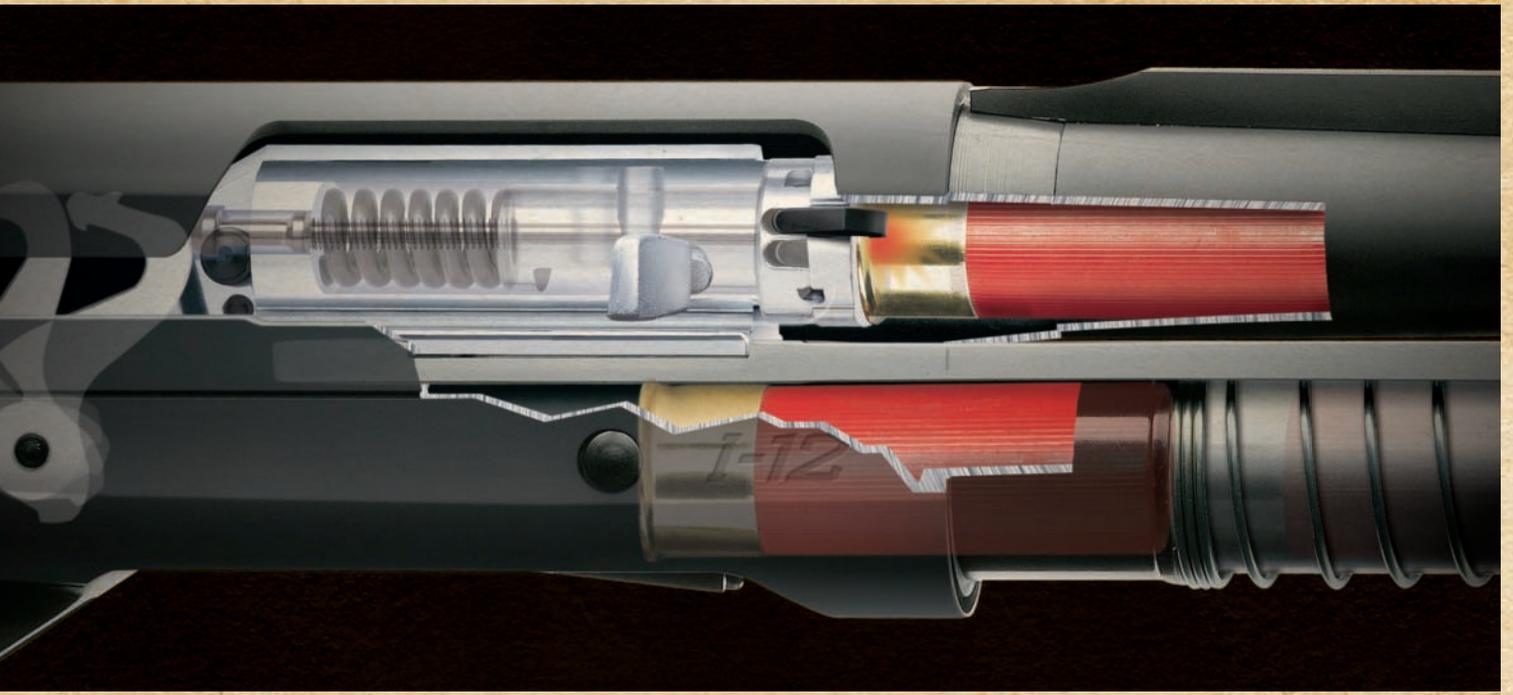

STEP 3 Recoil

Near the end of the recoil cycle, chamber pressure drops to a safe level and the gun's rearward motion slows. The heavy inertia spring then thrusts the bolt assembly rearward, unlocking the rotating bolt head, extracting the spent shell from the chamber and pulling it against the ejector.

STEP 4 Ejection

As the empty shell exits the receiver, the energy of the moving bolt assembly recocks the hammer and compresses the recoil spring on the magazine tube. The recoil spring then thrusts the bolt assembly forward, lifting the oncoming shell into position and chambering a fresh cartridge. The gun is ready to fire again... in a fraction of a second!

THINK SAFETY. ALWAYS KEEP THE GUN POINTED IN A SAFE DIRECTION.

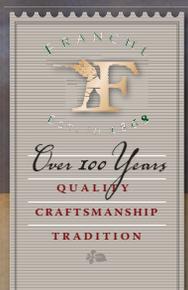

FRANCHI WATERFOWL GUNS

"I shot the 1-12 enough to become convinced that the gel-insert in its recoil pad is not there just for looks. I found it quite tolerable to shoot with heavy 3" loads."

LAYNE SIMPSON
Gun Dog

THE I-12 REPRESENTS a new line of Franchi auto-loaders by incorporating a free-floating bolt with the Inertia Driven® system. The I-12 is well-balanced and features a narrow profile fore-end and butt stock. This is a gun that will handle anything from 1⅛-ounce target loads to the heaviest 3" magnums.

The Franchi I-12 is Inertia Driven®, which means it does not rely on gas valves or pistons positioned under the fore-end to work the action. The heart of the inertia system is simplicity itself—a free-floating bolt compresses an inertia spring as the gun recoils, which creates the energy that cycles the action. Without bulky gas cylinders and the associated hardware, the Inertia Driven® I-12 has a slender, low profile fore-end that fits a shooter's hand comfortably and allows for comfortable handling. ✨ The I-12's specially-designed recoil pad incorporates a two-part system called the Twin Shock Absorber™ (TSA). The TSA recoil pad initially holds its shape during firing and then deeply compresses with the recoil, soaking up the kick and spreading recoil energy over a wider area of the shooter's shoulder. The Franchi I-12 with the TSA gel-insert recoil pad has up to 44% less recoil than the competition. ✨ Franchi's I-12 series, made up of several models of I-12s, fits nearly any kind of hunting. For waterfowl, the I-12 in Max-4 HD™ is an ideal choice, while APG HD™ is designed for general all-purpose hunting for deer and turkey, and a black synthetic stock is the answer for an all-around gun without specific requirements.

FRANCHI I-12

I-12 — 12-GA, 3"
Realtree® APG HD™
MSRP \$889

 NEW FOR 2008

The I-12's recoil pad is unique in both form and function. A two-part design with a special gel insert, the I-12's recoil pad holds its shape during firing and then deeply compresses during recoil, soaking up the kick and spreading recoil energy over a wider area of the shooter's shoulder. A distinctive Franchi emblem on the grip cap announces that the I-12 is not only modern, but a ground-up original from the design team at Franchi.

STANDARD FEATURES

CHOKE TUBES: C, IC, M, IM, F and wrench.

FINISHES: Advantage® Max-4 HD™, RealTree® APG HD™, Black synthetic or Satin walnut.

TSA RECOIL PAD: Twin Shock Absorber™ gel-insert recoil pad.

SHIM KIT: For adjustment of drop and cast.

OPTIONAL ACCESSORIES

TSA RECOIL PADS: Three options to customize length-of-pull to 14⅜", 14¾" or 15". Gel insert sold separately.

EXTENDED CHOKE TUBES: Available in extra-full turkey (XF), long range waterfowl pass shooting (IM), and over decoys shooting (M).

HARD CASE: Custom fitted hard case to protect in transport.

3 sizes available

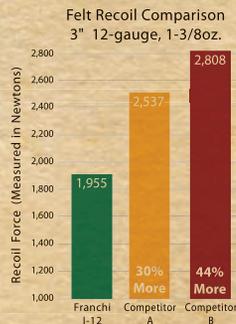

I-12 — 12-GA, 3" MSRP \$799

I-12 — 12-GA, 3" MSRP \$889
Advantage® Max-4 HD™

The I-12's Twin Shock Absorber™ gel-insert was put through a series of tests to measure felt recoil. The Franchi I-12 with its TSA gel-insert recoil pad has up to 44% less recoil than the competition.

Available accessories include three extended field chokes; an extra-full turkey choke (#50994), an improved modified pass-shooting choke (#50992) and a modified over decoys shooting choke (#50993).

FRANCHI 720

720 — 20-GA, 3" MSRP \$949
Advantage® Max-4 HD™

Franchi's 720 gas-operated autoloader is reliable and strong owing to a rotating bolt head that's at the heart of the operating system. The rotating bolt head locks bank-vault tight into the barrel extension, which is what takes the full stress of firing. The fact that lock-up is achieved by the rotary bolt locking into the barrel, allows the 720's receiver to be manufactured from super-light alloys, and because of this, the 720's weight starts at just 5.8 lbs.

The Franchi 720 is an outstanding all-around 20-gauge gun, that's capable of taking on specialized roles. Configured for different occasions, the Franchi 720 is available as a classic upland bird gun stocked in WeatherCoat™ walnut, or as a waterfowl or turkey gun in Advantage Max-4 HD™.

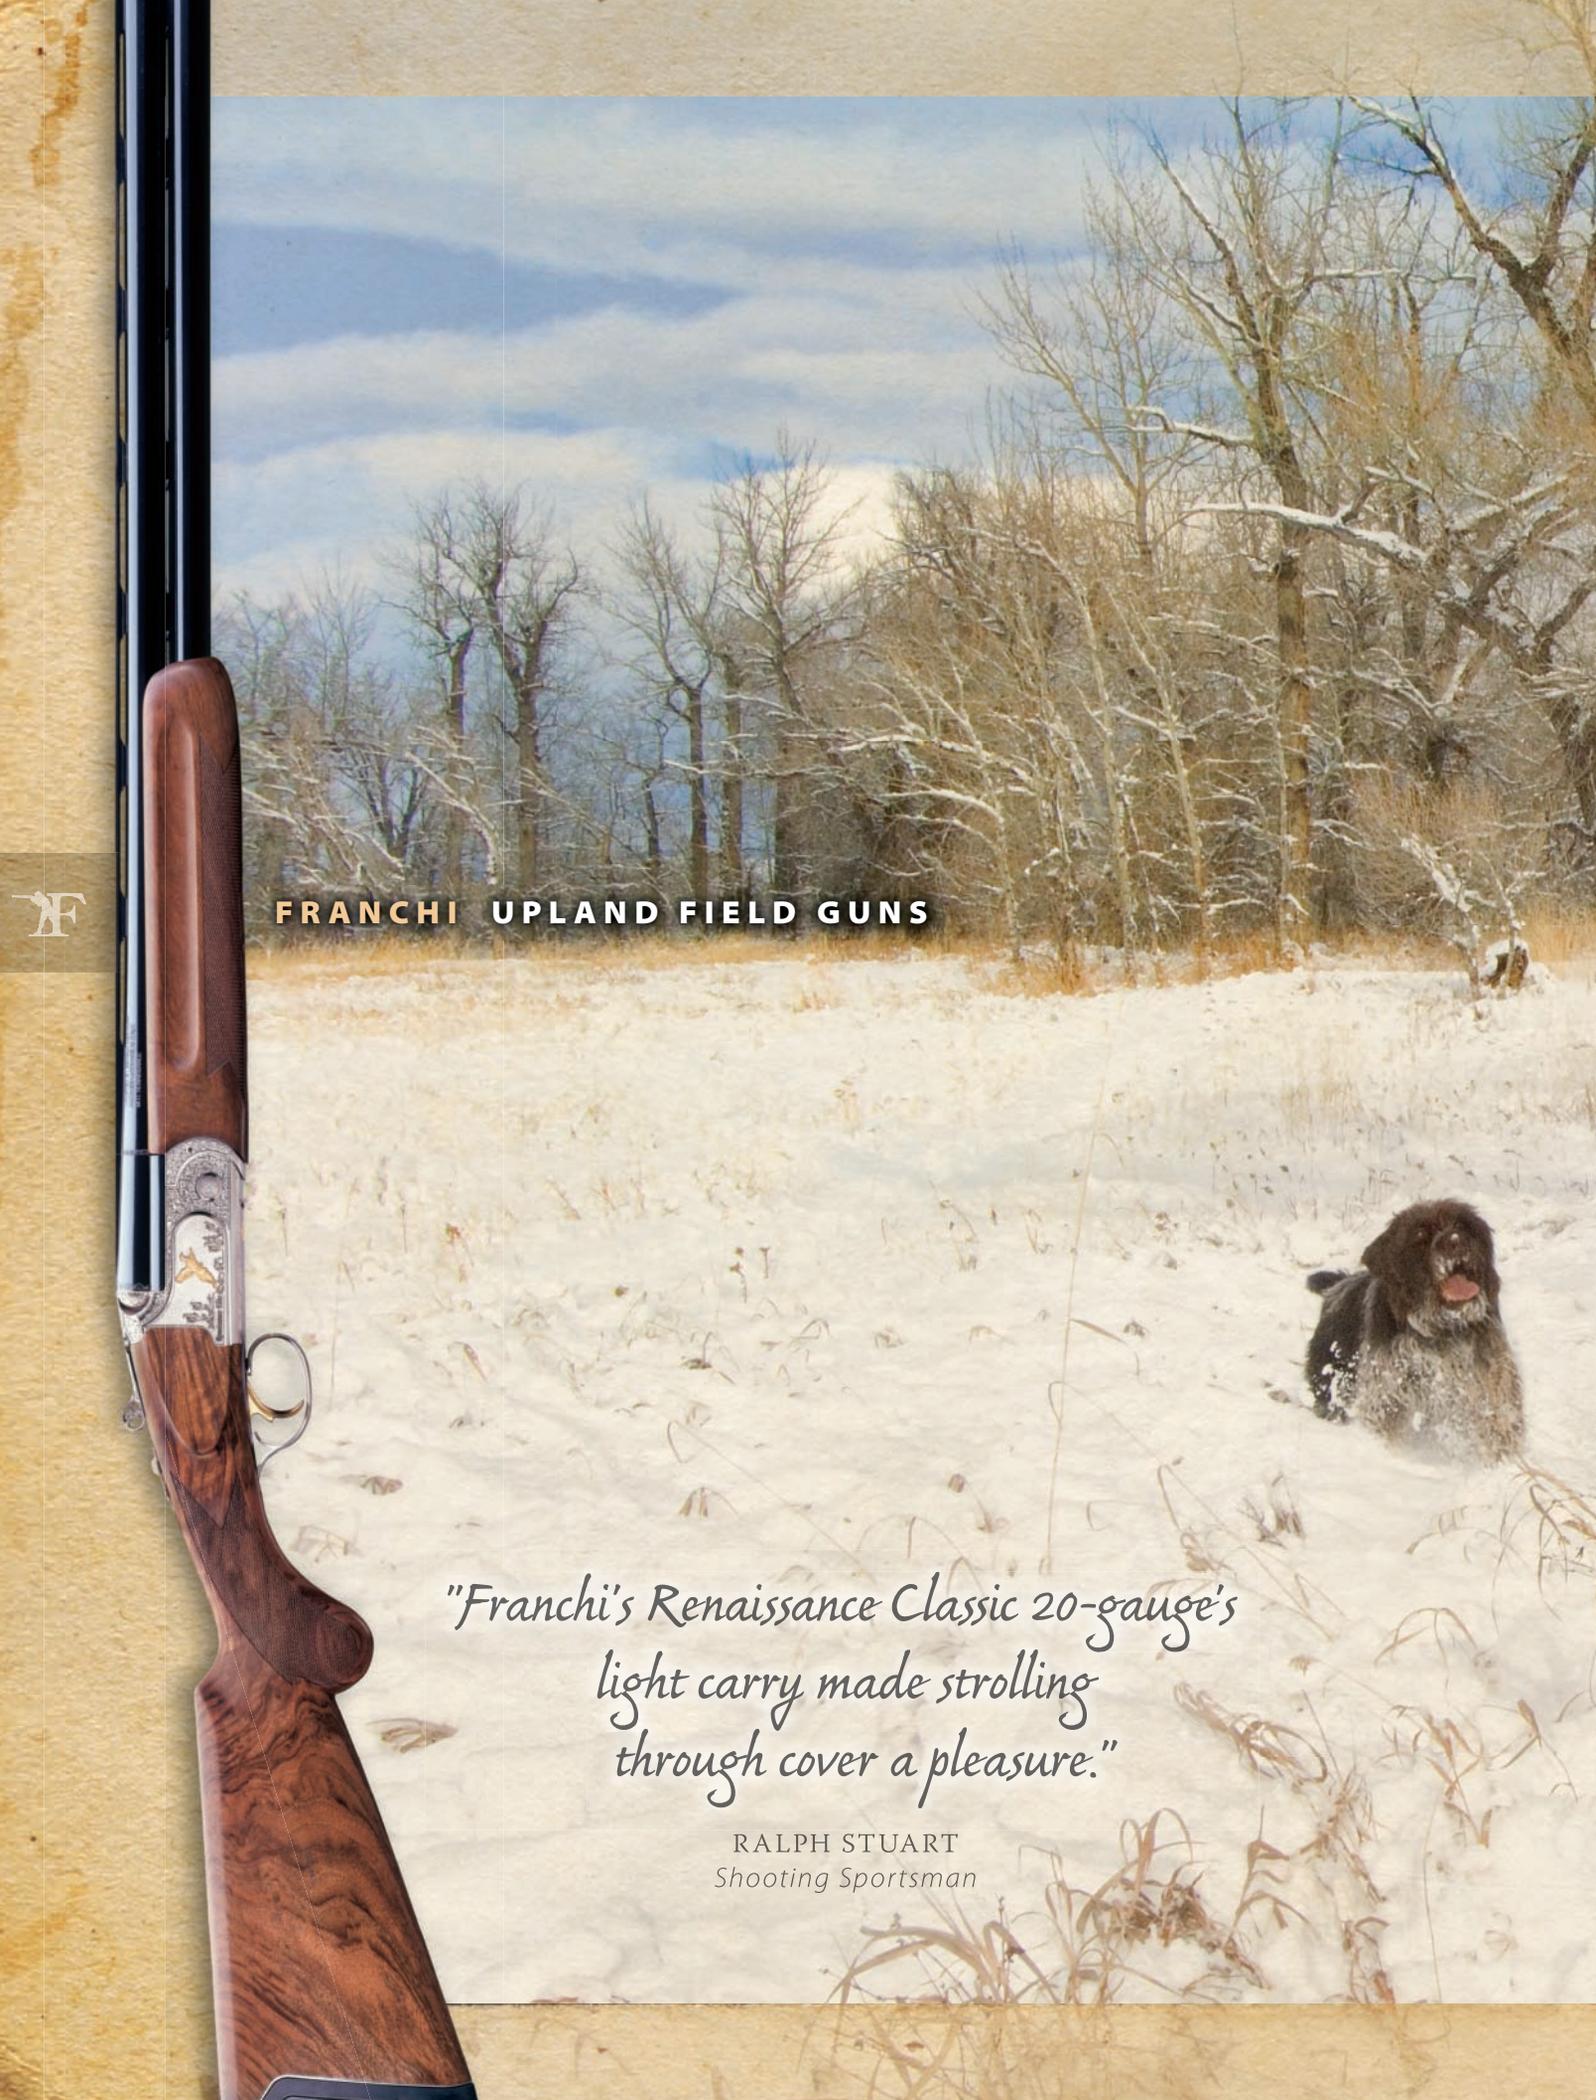

WeatherCoat™ is a five step process which not only makes the stock impervious to weather conditions, but enhances the figuring and beauty of the walnut.

STANDARD FEATURES

- CHOKE TUBES:** C, IC, M and wrench.
- FINISHES:** Advantage Max-4 HD™ and walnut with WeatherCoat™.
- ADJUSTABLE COMB:** Customize stock to shooter's dimensions (adjustment tool included).
- TSA RECOIL PAD:** Twin Shock Absorber™ gel-insert recoil pad.
- HARD CASE:** Custom fitted hard case to protect in transport.

OPTIONAL ACCESSORIES

- TSA RECOIL PADS:** Three options to customize length-of-pull to 14³/₈", 14¹/₄" or 15".
- CHOKE TUBES:** C, IC, M, IM, F (Available in flush or extended versions).

QUALITY
CRAFTSMANSHIP
TRADITION

THE NEW I-12 UPLAND HUNTER is the first of its kind, as an Inertia Driven® shotgun, to embody the feel of a 20-gauge, but provide the punch of a 12-gauge. This has been accomplished by slimming down the dimensions of the laser-checked stock and removing excess metal from the barrel and receiver. The I-12 Upland Hunter initiates a new beginning for an innovative line of light, fast and ultra-reliable semi-auto shotguns.

A new affordable lightweight semi-auto shotgun called the I-12 Upland Hunter joins the Franchi family. Combining tradition with technology and maintaining the best features from Franchi's previous semi-auto models, the I-12 Upland Hunter initiates a new beginning for an innovative line of light, fast and reliable semi-auto shotguns designed specifically for upland bird hunters. ✨ Weighing in at 6.35 lbs., the I-12 Upland Hunter utilizes a lightweight aluminum alloy receiver that's strengthened with steel inserts that allow for a solid steel-to-steel lock-up. The I-12 Upland Hunter's 26" barrel sports a ventilated rib and utilizes a choice of five choke tubes. ✨ The A-Grade walnut stock is oil finished to compliment and enhance the wood's beautiful grain pattern. The patented Twin Shock-Absorber™ recoil-reducing system diminishes felt-recoil up to 44 percent, making the I-12 Upland Hunter an absolute pleasure to shoot. The I-12 Upland Hunter carries like a 20-gauge, but shoots like a 12-gauge, which will appeal to upland hunters at every level.

FRANCHI I-12 UPLAND HUNTER

Only 6.35 lbs!

I-12 UPLAND HUNTER — 12-GA, 3"
Satin walnut
MSRP \$1129

NEW FOR 2008

- A. The I-12 Upland Hunter's receiver has been redesigned to eliminate unnecessary weight, while maintaining strength and integrity.
- B. A fiber optic front sight allows for quick target acquisition and good sighting visibility in low light conditions.
- C. The I-12 Upland Hunter's fore-end has been slimmed down to the dimensions of many 20-gauge models to facilitate quicker and more comfortable handling.
- D. The slim pistol grip on the I-12 Upland Hunter is laser-cut checked for an attractive gripping surface.

STANDARD FEATURES

CHOKE TUBES: C, IC, M, IM, F and wrench.

FINISHES: Traditional oil-finished walnut.

SHIM KIT: For adjustment of drop.

TSA RECOIL PAD: For increased recoil reduction.

OPTIONAL ACCESSORIES

TSA RECOIL PADS: Three options to customize length-of-pull to 14 $\frac{3}{8}$ ", 14 $\frac{3}{4}$ " or 15". Gel insert sold separately.

EXTENDED CHOKE TUBES: Available in extra-full turkey (XF), long range waterfowl pass shooting (IM), and over decoys shooting (M).

HARD CASE: Custom fitted hard case to protect in transport.

THINK SAFETY. ALWAYS KEEP YOUR FINGER OFF THE TRIGGER UNTIL READY TO SHOOT.

THE FRANCHI I-12 LIMITED represents the pinnacle of the gunmakers art in the Franchi autoloader lineup. Reliable and distinctive, the Franchi I-12 Limited incorporates all of the good looks, lightweight and fast-handling features that Franchi is known for, along with the absolute reliability of an Inertia Driven® operating system. The Franchi I-12 Limited is as much art as it is function.

The I-12 Limited's satin-nickel receiver is strikingly accented with white gold game birds, and complimented by a stock cut from wonderfully figured AA-grade walnut that's been hand-rubbed to a traditional oil finish. Cut-checkering graces the pistol grip and fore-end for an attractive and positive gripping surface. The I-12 Limited is not only slender, but it's also perfectly balanced, and like all Franchis, the I-12 Limited is lightweight, tipping the scales within a few ounces of 7½ lbs.

✦ Franchi's I-12 Limited is joined by the standard I-12, both of which share a slender profile for comfortable and quick handling and the Twin Shock Absorber™ recoil system. To help tame recoil Franchi developed a two-part recoil pad with a special gel-insert. The TSA recoil pad holds its shape during firing, before the gel insert allows the pad to deeply compress during recoil, soaking up recoil energy and spreading the kick over the widest area possible. Felt recoil is reduced by as much as 44% with the TSA. Whether it's the Limited version or the standard I-12, you will hold a lightweight gun that's reliable and comfortable to shoot.

FRANCHI I-12

I-12 LIMITED — 12-GA, 3"
AA-Grade satin walnut
MSRP \$1599

INERTIA DRIVEN

The I-12 Limited's nickel alloy receiver is embellished with white gold inlays and finely-engraved waterfowl and upland scenes on each side. The I-12 handles 12-gauge loads ranging from 1½-ounce target loads to the heaviest 3" turkey loads.

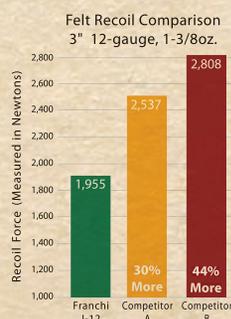

STANDARD FEATURES

- CHOKE TUBES:** C, IC, M, IM, F and wrench.
- FINISHES:** AA-Grade oil-finished satin walnut.
- TSA RECOIL PAD:** Twin Shock Absorber™ gel-insert recoil pad.
- SHIM KIT:** For adjustment of drop.

12½" LENGTH OF PULL

The Franchi's gas-operated 720 makes an ideal upland gun. Configured for upland gunning, the 720 is stocked in WeatherCoat™ walnut and able to be adjusted for a custom fit with a shim kit that comes with each gun. Also available in a satin walnut stock is a 720 short stock, ideal for ladies and young shooters.

STANDARD FEATURES

- CHOKE TUBES:** IC, M, F and wrench.
- FINISHES:** Advantage® Max-4 HD™ or walnut with WeatherCoat™.
- SHIM KIT:** For adjustment of drop and cast.
- HARD CASE:** Custom fitted hard case to protect in transport.

OPTIONAL ACCESSORIES

- CHOKE TUBES:** C, IC, M, IM, F.
- EXTENDED CHOKE TUBES:** Skeet 1, Skeet 2, M, XF.
- BARRELS:** Available in a variety of lengths and three finishes.

ABOUT A CENTURY AGO, legendary gunmaker, John Browning presented to the hunters of the world the long recoil autoloader. Even today, it remains the choice of many discerning wingshooters for its lightning-fast handling qualities and superior "feel." Sporting a featherweight, but durable aluminum receiver, the Franchi 48 AL is the ultimate refinement of the breed of long recoil auto-loaders.

You'll be amazed at how fast you can get five shots off from the 28-gauge version—a gun that weighs just 5.4 lbs. The 20-gauge version weighs only a couple of ounces more than the 28-gauge. ✨ The 48 AL comes in two grades. The Field grade wears a satin-finished walnut stock and matte metal surfaces to reduce game spooking reflections. The Deluxe grade has figured select walnut polished metal surfaces and a gold trigger. Additionally, the 48 AL comes in a Field Short Stock model with a 12½" length-of-pull for young shooters or ladies. ✨ All 48 AL models have chrome-lined barrels proofed for steel shot, fitted with screw-in choke tubes in improved cylinder, modified, and full chokes. Cylinder and improved modified tubes are available options. With a maximum in elegance and tradition, and a minimum in weight, the Franchi 48 AL makes that the perfect autoloader bird gun come alive. Nothing else compares with these trim smallbores for easy carrying on the longest day afield.

FRANCHI 48 AL

48 AL DELUXE — 28-GA, 2¾"
A-Grade walnut, polished-blue
MSRP \$1129

A recoiling barrel is the sure sign of a long-recoil autoloader design. On firing, bolt and barrel travel rearward together. As pressure inside the barrel drops, they unlock and the barrel returns forward under spring pressure. The bolt follows, picking up a fresh shell on its way. When it returns to battery, another shot can be fired immediately.

STANDARD FEATURES

CHOKE TUBES: IC, M, F and wrench.

FINISHES: Satin walnut (Field Model) and A-Grade satin walnut (Deluxe Model).

OPTIONAL ACCESSORIES

CHOKE TUBES: C, IC, M, IM, F.

EXTENDED CHOKE TUBES: Skeet 1, Skeet 2, M, XF (20-gauge only).

BARRELS: Available in a variety of lengths in both matte and polished-blue.

HARD CASE: Custom fitted hard case to protect in transport.

The standard set of three screw-in tubes, improved cylinder, modified and full, will handle most hunting situations. Optional cylinder or improved modified tubes are also available.

1 1/2" LENGTH OF PULL

THINK SAFETY. ALWAYS BE SURE OF YOUR TARGET... AND BEYOND.

RENAISSANCE MEANS REBIRTH, re-creation, or a new beginning, and as such it defines an innovative line of over & under shotguns from Franchi. The family of Renaissance shotguns combines cutting edge technology with super light metal alloys, and gel synthetics for effective recoil management in a light, handy over & under shotgun.

Like the art of the Renaissance era, Franchi combined it all into a work of art that will take your breath away. The receiver of each Renaissance model is precision machined out of a solid billet of lightweight alloy, which is then steel reinforced at critical areas, like the face of the breech. Extra material is removed wherever possible and the end product is an over & under 12-gauge shotgun that weighs an incredibly light 6 pounds. ✨ Until now, a 12-gauge over & under of only 6 pounds was unheard of because there were no alloys strong enough to hold up to a diet of steady shooting. And even if the necessary alloys did exist, the recoil from such a light gun would be too punishing. However, Franchi engineers developed an innovative Twin Shock-Absorber™ recoil pad with a special gel insert that soaks up to 44% of the felt recoil. ✨ Three Renaissance models, the Elite, Classic and Field, have walnut stocks with classic Prince-of-Wales pistol grips, cut-checkering and traditional oil-finishes. They are available in 12-, 20- and 28-gauge, with the choice of a 28" or 26" barrel on the 12- and 20-gauge models, and 26" on the 28-gauge. The Franchi Renaissance redefines the over & under shotgun with high-tech innovation blended with traditional design.

THE NAME FRANCHI is not new to a side-by-side shotgun — Franchi produced a top-quality side-lock gun more than 100 years ago. Franchi has once again captured the spirit of fine Italian gun making with its introduction of the Highlander.

Representing the beginning of a line of light, fast and reliable side-by-side shotguns, the Highlander combines tradition with technology to create the best features. Available in both 12- and 20-gauge, the Highlander features a single trigger, automatic safety and ejectors, with interchangeable screw-in choke tubes. Weighing less than any comparable side-by-side shotgun, the Highlander utilizes a lightweight nickel steel receiver that's graced with scroll engraving and upland game scenes to provide a beautiful, yet traditional style of side-by-side shotgun. ✨ The stock is cut from highly-figured A-Grade walnut and is styled with a true Prince-of-Wales pistol grip. The stock also features cut-checkering and a traditional oil-finish to compliment the wood's beautiful figure. ✨ The Highlander blends style and performance by incorporating all the desirable features of more expensive models in a way that will appeal to shooters at every level.

THINK SAFETY. ALWAYS TREAT EVERY FIREARM AS IF IT WERE LOADED.

BACK IN THE EARLY 1900S Franchi produced a top-quality side-by-side shotgun called the Imperial Monte Carlo. For 2008, Franchi once again introduces the best in fine Italian gunmaking with the unveiling of the Destino with a different and unique model introduced each year.

Destined to be a treasured collectible, Franchi will produce 250 Destinos annually. This year the Destino silver-sided receiver features gold embellished game scenes that grace both sides of the Destino's. The bottom tang of the Destino's European-style straight grip is engraved with gold to read "1 of 250" in testament to the Destino's limited production and availability. ✨ The Destino's beautiful and graceful stock is cut from AAA-Select Grade walnut and is oil-finished by hand to enhance the natural figure and beauty of the wood. A traditional, checkered wood butt plate and a fitted rubber butt pad come with each gun. ✨ The receiver is CNC machined from billet steel for maximum strength and integrity, which also provides extremely close tolerances and longer life for the action. The Destino features a single, selectable trigger, automatic safety and extractors. Combining tradition with technology and maintaining all the best features, the Destino represents a new beginning for an innovative line of traditional side-by-side shotguns made by Franchi.

*"The Franchi I-12 comes with the high-tech
Inertia-Driven[®] System, but without
the high-dollar price tag."*

NICK SISLEY
Shooting Illustrated

BALANCED AND FLUID SWINGING, the new I-12 Sporting is the first of its kind, as an Inertia Driven® shotgun, to feature an elongated forcing cone, providing superior patterns and softer shooting. The I-12 Sporting has all the desirable features of more expensive models, where style and performance are blended in a way that's functional and attractive.

A new affordable lightweight semi-auto shotgun called the I-12 Sporting joins the Franchi family. Combining tradition with technology and maintaining the best features from Franchi's previous semi-auto models, the I-12 Sporting represents a new beginning for an innovative line of light, fast and reliable semi-auto shotguns designed specifically for clay shooters. ✨ Weighing only 6½ lbs, the I-12 Sporting utilizes a lightweight aluminum alloy receiver that's strengthened with steel inserts, allowing for a solid steel-to-steel lock-up. The I-12 Sporting's lightweight feature means you can swing fast to pick up second birds quicker with plenty of time to make the shot. The I-12's 30" barrel with 10mm tapered target rib is ported to control muzzle climb and utilizes extended choke tubes that are compatible with Benelli's Crio™ chokes for easy fitting and removal. ✨ The I-12's WeatherCoat™ walnut stock is virtually impervious to any kind of weather and sports a finish that compliments the wood's beautiful grain pattern. A patented Twin Shock Absorber™ (TSA) recoil-reducing system diminishes felt-recoil up 44%, making the I-12 Sporting an absolute pleasure to shoot.

HARD CASE: Custom fitted hard case to protect in transport.

THINK SAFETY. STORE FIREARMS UNLOADED AND SEPARATE FROM AMMUNITION.

BALANCE AND SWING blend in a way that makes this an appealing over & under for clay target shooters at every level. Designed specifically for clay target shooters, the Renaissance Sporting combines tradition with technology, which represents a new beginning for an innovative line of reliable, Italian made over & under shotguns.

Trapper ready? Pull! A crossing simultaneous pair are released. You shoulder your Franchi Renaissance Sporting and it comes up like it was custom-made to fit. With a proper sustained lead each target disappears in a puff of dust. ✨ The Renaissance Sporting joins the Franchi family, inspired by the specific requirements of clay target shooters. The Renaissance Sporting comes in 12-gauge and features 30" ported barrels with extended knurled choke tubes for easy fitting and removal. The Sporting's forcing cones have been lengthened to ensure uniform shot patterns and to reduce back pressure and subsequent felt recoil. ✨ Weighing in at eight pounds, the Sporting utilizes an extra-strong, stainless steel box-lock action for handling a steady diet of high-brass target loads. The receiver is enhanced with scroll engraving and gold embellishments. The stock, cut from highly figured select walnut and featuring cut checkering, sports a traditional oil finish to compliment the wood's beautiful grain pattern. The stock is further enhanced with an adjustable comb and Franchi's patented recoil-reducing Twin Shock Absorber™ system.

FRANCHI RENAISSANCE SPORTING

RENAISSANCE SPORTING — 12-GA, 3"
A-Grade oil-finished walnut
MSRP \$2139

The Sporting's 30" barrels are ported to control muzzle climb and fitted with extended, knurled chokes to facilitate easy removal and installation without tools.

- A. Located behind the Sporting's top lever is the multi-function safety, which serves as both barrel-selector and safety.
- B. The Renaissance Sporting comes with a comb that can be adjusted both horizontally and vertically. An adjustment tool is included with each gun to facilitate correct placement for optimal fit.
- C. The underside of the Sporting's all-steel, coin-finished receiver is lavishly engraved with fine scroll work, which also graces the gold-embellished trigger guard.

STANDARD FEATURES

EXTENDED CHOKE TUBES: C, IC, M and wrench.

FINISHES: A-Grade oil-finished walnut.

ADJUSTABLE COMB: Customize stock to shooter's dimensions (adjustment tool included).

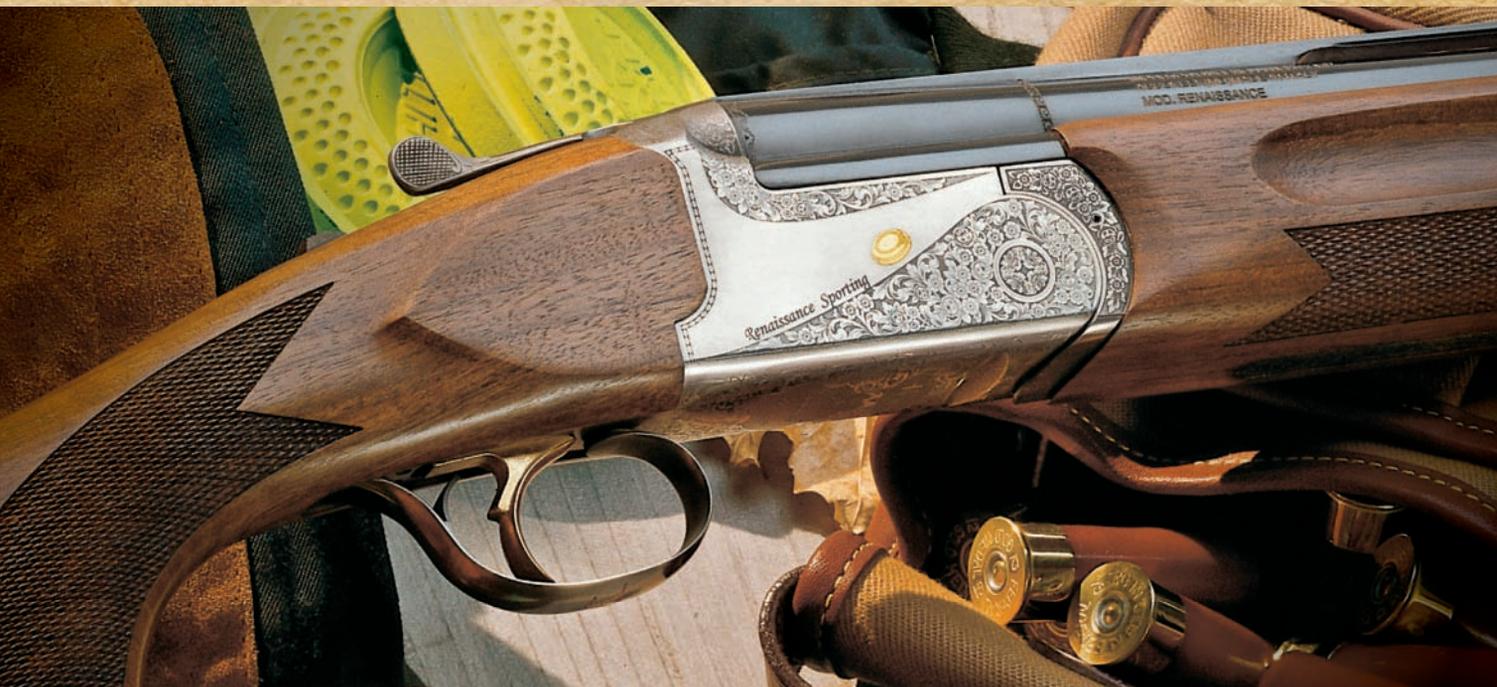

TSA RECOIL PAD: Twin Shock Absorber™ gel-insert recoil pad.

HARD CASE: Custom fitted hard case to protect in transport.

OPTIONAL ACCESSORIES

TSA RECOIL PADS: Three options to customize length-of-pull to 14 $\frac{3}{8}$ ", 14 $\frac{3}{4}$ " or 15". Gel insert sold separately.

CHOKE TUBES: C, IC, M, IM, F (Available in flush or extended versions).

FRANCHI 720 COMPETITION

Franchi's 720 Competition operates with a rotary-bolt design, which locks up like a high-powered rifle. Weighing just 6 lbs., the 720 Competition is extremely light and fast handling, and features a ported barrel to keep muzzle climb at a minimum for quick second bird acquisition. The hard-chrome extended choke tubes can be unscrewed by hand for a quick change-out while walking between stations. The 720 Competition stock is finished with a five-step process called WeatherCoat™, which not only makes the stock impervious to weather conditions, but enhances the figuring and beauty of the walnut.

720 COMPETITION — 20-GA, 3" MSRP \$1069
Satin walnut, WeatherCoat™

STANDARD FEATURES

- EXTENDED CHOKE TUBES:** C, IC, M.
- FINISHES:** Walnut with WeatherCoat™.
- TSA RECOIL PAD:** Twin Shock Absorber™ gel-insert recoil pad.

OPTIONAL ACCESSORIES

- TSA RECOIL PADS:** Three options to customize length-of-pull to 14 $\frac{3}{8}$ ", 14 $\frac{3}{4}$ " or 15". Gel insert sold separately.
- CHOKE TUBES:** C, IC, M, IM, F (Available in flush or extended versions).
- HARD CASE:** Custom fitted hard case to protect in transport.

For a distinctive look even while sitting in the club gun rack, the Competition sports the Franchi emblem and Franchi's WeatherCoat™ identification on the pistol grip cap.

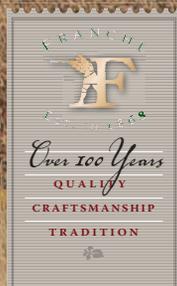

FRANCHI ACCESSORIES

"The I-12 will handle anything you feed it, from 1¾-ounce, 3" turkey loads to 1⅛-ounce field loads. As such, I think this Franchi is a lot of gun for the money."

LEE HOOTS,
Editor, Petersen's Hunting

FRANCHI PARTS AND ACCESSORIES

From choke tubes and gun cases to shirts, hats and many other labeled items, Franchi shooters can enjoy a selection of parts, accessories and gear that can be used, worn or displayed proudly. Whether it's a patch for your jacket, a cup for your coffee, or a deluxe hard case for your Renaissance, if it says Franchi, you know it stands for quality.

PACKAGING

Besides the choke tubes that come with the guns, Franchi offers a full range of extra choke tubes for all its 12-, 20- and 28-gauge shotguns. Look for them at your local authorized Franchi dealer.

RECOIL PADS

Franchi's TSA (Twin Shock Absorber™) recoil pads feature a special gel insert that can reduce felt recoil by as much as 44%. To adjust from 14 3/8" to 14 3/4" to 15" length-of-pull, the quick change TSA pads come in three thicknesses.

RECOIL REDUCER

Franchi offers a mercury-filled recoil reducer for the synthetic stocked I-12, 912, 712 and 612 models. Weighing in at just 13 ounces, the Franchi recoil reducer is installed by simply screwing it onto the existing receiver extension. (No bracket is necessary)

GUN SOCK

While other gun cases often lock-in moisture, Franchi's breathable sock lets moisture out. The sock material is impregnated with VCI, which keeps your gun protected from rust at all times.

STANDARD CHOKE TUBES

Standard, flush-mount choke tubes are available for 12-, 20- and 28-gauge in cylinder, improved cylinder, modified, improved modified and full.

EXTENDED CHOKE TUBES

Perfect for competition, Franchi's knurled extended black oxide finish choke tubes are machined from durable, stainless steel and are available in cylinder, improved cylinder, modified, improved modified and full. (Specify 12- or 20-gauge)

EXTENDED CHOKE TUBES

Two extended field chokes are available. An improved modified pass shooting choke (#50992) and a modified choke for shooting over decoys (#50993).

TURKEY EXTENDED CHOKE TUBE

Get the drop on that big gobbler with an extended choke tube made especially for today's new turkey loads. The .665 constriction tube (#50994) is designed to throw ultra-dense patterns that will reach out for those wary toms that hang up at the edge of shooting distance.

CHOKE WRENCH

Available in 12-, 20- and 28-gauge, the Franchi choke wrench is as handy in the field as it is at the work bench.
