Topper® Shotguns

For farmers, hunters and folks who live off the beaten path, the single shot, break-open shotgun is basic equipment. This versatile and inexpensive gun protects the henhouse, keeps meat on the table and provides that much-needed measure of security. For the beginners, it is a good introduction to responsible firearms ownership... and the single shot action encourages careful shooting and ammo conservation.

Topper Deluxe Classic
12 and 20 Gauge

Topper Deluxe
12 Gauge

Topper®. At Harrington & Richardson, the Topper name has been associated with a long-lived line of rugged, reliable and affordable single shot shotguns, well-known to generations of shooters. We make it in 12, and 20 gauge, and .410 bore with a variety of chokes. It features automatic shell ejection for fast reloading, a brass bead front sight for fast target acquisition, a rugged nickel-plated frame, and a distinctive black-finished hardwood stock and forend.

Topper® Deluxe. The Topper Deluxe is available in 12 gauge with a 3 1/2" chamber and a screw-in choke that can handle both lead and steel shot. Like the Topper, the Topper Deluxe features the trademark black and nickel finish, with black-finished hardwood stocks and forends. It includes a recoil pad for greater shooting comfort.

Topper® Deluxe Classic in 12 and 20 gauge. An upgraded version of the Topper is available in 20 gauge, as well as 12 gauge with a ventilated rib and choke tube system (modified tube provided). The Topper Deluxe Classic features a 28" vent rib barrel with a bead front sight, and a nickel-plated receiver. The stock is genuine American walnut with checkering and a recoil pad. The most handsome Topper ever!

Topper® Junior. The Topper Junior is an ideal firearm for training the next generation of America's hunters. Its 22" barrel is scaled ideally for smaller-framed shooters, and it incorporates a recoil pad to make a beginner's first shooting experiences more comfortable and rewarding.

Topper® Junior Classic. For that very special birthday or event, the Topper Junior Classic is a gift that any youngster will always remember. Like the Topper Junior, the Topper Junior Classic has a 22" barrel and is proportioned properly for a youthful shooter. This special model features a blued frame, and a checkered American black walnut stock and forend.

On every H&R shotgun, our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up tight as a bank vault door. Our Transfer Bar System prevents accidental firing, and each gun comes complete with its own special locking device for added safety in storage or in transport.

The Harrington & Richardson family of shotguns offers you all the performance and reliability you need at a very reasonable price...and the well-earned pride that comes from one-shot success.

Pardner® Shotguns

Pardner®. We are proud of our history of making single shot shotguns that earn their keep without breaking the bank. We offer the Pardner® shotguns in 12, 20 and 28 gauges, and .410 bore, and with a variety of chokes and stocks.

Our rugged single shot action has proven its worth in the field. It opens smoothly when you press the lever, and locks up solidly when closed. Our Transfer Bar System prevents accidental firing, and each gun comes complete with its own special locking device. We also offer Pardner models with synthetic stocks and steel shot compatible screw-in modified choke tubes.

What you take into the woods can have a big impact on what you take out of the woods. For the ultimate satisfaction that comes from one-shot expertise, see your Harrington & Richardson dealer and select that special gun that suits you and your budget best.

Pardner® Turkey. Our Pardner line offers you a wide range of turkey guns from which to choose. In addition to our 10-gauge model, we offer 12-gauge models in camo or black, with fixed full choke or screw-in turkey choke, and a 20-gauge, 22" barreled youth model with camo-finished hardwood.

Pardner® Waterfowl. Our Pardner waterfowl shotguns are ideal for the hunter who needs a lot of shotgun for a little price. This 10 gauge shotgun comes with a walnut finish hardwood stock, recoil pad, screw in choke and a 30" barrel.

Ultra Slug Hunter/ Ultra-Light Slug Hunter/Tracker II *Slug Guns*

In some areas, deer hunting is a “shotgun-only” proposition. Years ago, that might have been a handicap. Today, with a new breed of slug guns, the shotgun hunter can have a far-reaching advantage. Thanks to new projectile technology these new breed of slug guns can reach way out with impressive accuracy and striking power. As with all our single shot guns, these slug guns feature our Transfer Bar System which only allows firing when the hammer is fully cocked and trigger pulled and held completely to the rear. Starting this year, all slug guns will also come standard with our Ultragon™ rifling system (see inset, page 7). Along with the smooth break-open action these guns prove their worth in the field.

Ultra Slug Hunter. At H&R 1871, we offer a range of tack-driving single shot slug guns that can cost less than an accessory slug barrel for your repeater. At the top of the list is our heavy 24" barrel, fully-rifled H&R Ultra Slug Hunter, in 12 or 20 gauge. The Ultra Slug Hunter comes complete with a Monte Carlo stock, recoil pad, factory-installed scope base, sling swivels and a nylon sling. A walnut-finished American hardwood stock is standard, and the Deluxe model comes with a checkered laminated stock and forend. A Compact model is available with a rifled 20-gauge 22" barrel.

NEW Ultra Slug Hunter with Thumbhole Stock. Sometimes making a great product better makes sense. That's why we have expanded our very popular Ultra slug shotguns to thumbhole stocks. Ohhh... the comfort when you settle into the custom designed stock and squeeze that trigger. It makes the joy of the dinner feast that much better.

NEW Ultra-Light Slug Hunter. Sometimes weight is not what we need in a slug gun. When maneuverability and portability are what you are looking for, look no further. Available in 12 Ga. and 20 Ga., H&R's Ultra-Light Slug Hunter weighs in at a light 5 1/2 lbs, has a 24" Ultragon™ rifled barrel for enhanced accuracy, a Monte Carlo stock and a Weaver style scope base. With this many features, being called a lightweight is an honor

Tracker II Slug Gun. The Tracker II Slug Gun is available in both 12 and 20 gauge, with a 24" fully-rifled barrel designed for long-range accuracy with sabot-style slugs. The Tracker II features a walnut-finished hardwood stock, adjustable rifle-type sights, a recoil pad and sling swivel studs.

Ultragon™ Rifling Modern barrel making technology has enabled H&R to introduce the ultimate in rifled shotgun slug barrels: **Ultragon™** rifling. This new rifling has six oval lands and grooves without sharp corners like traditional rifling (see image at right). Similar to parabolic rifling, this imparts bullet spin without leaving sharp impressions on the sabot jacket or Foster type lead slug. Providing a perfect seal, with virtually no loss of pressure, this not only produces better accuracy and velocity, but also longer barrel life and easier cleaning. **Ultragon™** rifled slug barrels will be available on our slug gun models—and is only available from H&R 1871.

Topper® Trap Gun *Shotgun*

NEW Topper® Trap Gun. This gun is sure to please youths and new shooters alike who want to participate in the sport of trap with a true 'trap gun'. This shotgun features a double white bead sighting system, 30" ventilated rib barrel with an extended stainless steel IM trap choke. The cast frame is coated with electroless nickel, giving the gun an attractive, eye-catching custom gun look. Its custom designed trap buttstock perfectly

aligns the shooter's eye with the bead sights and is fitted with checkered, select grade walnut from the American Walnut Co. It also features a Pachmayr® trap recoil pad for performance and comfort. Like all shotguns in the Topper family, the Trap Gun patterns well, has a transfer bar safety and a smooth single shot action that opens with the push of a lever.

A perfect fit for those learning the sport.

NEW Topper Trap Gun

Survivor® & Tamer® Shotguns/Rifles

Survivor®. Ready for service when the going gets rough, the Survivor series provides the go-anywhere, do-everything versatility and rugged dependability that you want. Take your pick of shotgun, heavy barrel rifle or .410/45 Colt configurations to meet any challenge. A special stock compartment stores survival items. Survivor models in the unique .410/45 Colt are available in either a blued finish or a high-durability electroless nickel finish for harsh environments. The heavy bull-barrel versions in 223 Rem. and 308 Win. are offered in low-profile matte blue. Our Transfer Bar System provides an added measure of safety. Standard shotguns incorporate a Modified Choke, while the .410/45 Colt model has a fully rifled barrel and screw-in choke for shotshell use.

Tamer®. For those intrepid spirits who venture into uncharted regions and unpredictable climates, our weather-defying Tamers are welcome companions. Here is a versatile, easy-to-handle shotgun with a high-density polymer stock and forend and matte-finish nickel receiver and barrel that can shrug off the worst that Mother Nature can hand out. The unique thumbhole/pistol grip assures you of a firm hold. The specially designed stock also enables you to store four rounds of .410 ammo (Tamer) and 3 rounds of 20 gauge ammo (Tamer 20). The Tamers include all the H&R high performance features, including automatic shell ejection, our Transfer Bar System to prevent accidental firing, and a unique locking system for safe storage.

308 Win. and 223 Rem. bull barrels are equipped with Weaver-type scope mount and hammer extension.

Handi-Rifle™ Rifles

If meat on the table were the sole object of the hunt, then a trip to the supermarket would suffice. We all know that there's much more involved. At its best, the hunt has always been the acid test of the hunter's skills.

For generations, the single shot rifle has been the choice of the accomplished and self-assured hunter. And for years, we have honored that choice. Our centerfire rifles are designed and built to make that one shot count. For the varmint or big game hunter, we offer many very attractive options in a wide range of rifle calibers up to 500 S&W.

Handi-Rifle™

Handi-Rifle™
Bull Barrel Varmint
204 Ruger, 223 Rem. or 243 Win.
223 Rem. with factory-mounted 3-9x32 scope

Transfer Bar System

All H&R single shot firearms incorporate a special safety feature – the Transfer Bar System – that prevents the gun from being fired unless the hammer is fully cocked and the trigger pulled and held completely to the rear.

With the Transfer Bar System, the hammer never strikes the firing pin directly. Instead, cocking the hammer raises the transfer bar, which is held in the “up” position only if the trigger is pulled and held fully to the rear. Only then can the energy of the hammer be transferred to the firing pin.

The Transfer Bar System prevents the type of accidental firing that might result from a

blow to the hammer or from a dropped hammer during the cocking process.

We are committed to safety as well as to quality. The shooting sports have an enviable safety record among all leisure activities, and we applaud your efforts to

maintain and improve that record. We urge all shooters to follow standard firearm safety practices and to participate in safety training.

Synthetic/Stainless/ Superlight Handi-Rifle™ Rifles

Synthetic Handi-Rifle™. For those who hunt regardless of the weather, today's cutting-edge high-density polymer stocks are a necessity. Synthetic stocks and forends make these Handi-Rifles™ the toughest, most weather-resistant ones ever built. Like all our rifles and shotguns, these high-durability, synthetic stock versions incorporate our Transfer Bar System. For added versatility, rifles can be factory-fitted with your choice of accessory rifle and shotgun barrels.

NEW Handi-Rifle™/Slug Gun Combos. Our new Handi Rifles in 44 Mag and 357 Mag. are also available in versatile combo rifled slug gun packages. Choose from the 44 Mag./12 Gauge slug gun combo, or the 357 Mag/20 Gauge slug gun combo.

PLEASE NOTE: The Handi-Rifle frame of the 44 Mag and 357 Mag. cannot be fit with any other centerfire rifle barrel. They are capable of being fit with accessory shotgun barrels, but their rifle barrel capability is limited to the specific 44 Mag. or 357 Mag. barrel that is shipped with the gun. This affects the following models: SB1-S44; SB1-S35; SC1-414; SC1-324. (All other Handi Rifles are fully eligible for our Accessory Barrel Program.)

For information on accessory barrels, call our Service Department at (978) 630-8220.

NEW Handi-Mag™ Rifles. In answering many requests for a true magnum rifle, here is a high value, lightweight, compact series of magnum rifles that are aesthetically and financially pleasing. These magnum rifles will be chambered in the popular 7mm Rem. Mag. and .300 Win. Mag. cartridges. They will have a stainless 26" barrel, blued receiver and a newly designed Monte-Carlo synthetic stock. Value and performance will make this rifle an instant classic.

Stainless Handi-Rifles™. Spend more time outdoors! Three synthetic Handi-Rifles™ are available for worry-free all-weather hunting. Both models feature matte-finish stainless steel 22" barrels, with scope mount rail and hammer extension. Receivers are matte nickel finished, and stocks and forends are black matte high-density polymer.

Superlight Handi-Rifle™ When the going gets tough and the game is deep in the forest or high on the mountain, every extra ounce you carry feels like a pound. That's the time when the Superlight Handi-Rifle is worth its weight (or lack of it) in gold. These super utility rifles weigh only 5½ pounds – even less in the Compact model configurations. Stock and forend are made of high-density black polymer, and fitted with recoil pads and swivel studs. Fully adjustable rifle sights outfit the Compact models, which are also drilled and tapped for a scope base. The 243 Win. includes a Monte Carlo style stock and factory mounted scope base, plus an offset hammer extension to ease cocking when a scope is mounted.

Ultra Varmint/ Ultra Hunter *Rifles*

For the dedicated hunter, the memories and pride of accomplishment are what endure. And the truly skilled hunter is the one who can confidently achieve his or her goal with one well-placed shot.

The single shot rifle has been the long-time companion of the confident hunter. Harrington & Richardson honors that choice with our centerfire Ultra rifles, designed for the heirs to the noble tradition of single shot hunting. Its action proves its worth in the field, opening smoothly with the press of a lever, and closing tightly and securely. Our Transfer Bar System aids in preventing accidental discharge, and for added safety in storage or in transport, each one of our guns comes complete with a locking device.

Ultra Varmint Fluted. This exciting model combines a high-tech synthetic stock with a fluted bull-barrel to create the ultimate varmint rifle. It features a skeletonized butt stock with a vertical adjustment knob for shooting from the bench and a ventilated recoil pad. The grooved forend has an adjustable insert for mounting a bipod. And it is chambered for the hottest varmint cartridges: 204 Ruger, 22-250 Rem., 223 Rem., and 243 Win.

NEW Ultra-Varmint Thumbhole. H&R has added varmint rifles with a classy cinnamon brown laminate thumbhole stock in 223 Rem., 22-250 Rem., and 243 Win. They have a 24" heavy barrel and operate on our classic single shot break action frame.

NEW Ultra-Hunter Thumbhole. With the introduction of the Hornady LEVEREVOLUTION™ ammunition, the 45-70 Gov't cartridge has been revitalized. As a result, H&R has expanded the 45-70 lineup with a "first-ever" ALL stainless barrel and receiver, super deluxe 45-70 with a brown laminate thumbhole stock. This rifle comes equipped with a ballistic enhancing 24" stainless steel heavy barrel to help with those "longer than average shots."

Sportster™ Rifles

Sportster™ 17 HMR. Here's strong medicine for varmints! The Sportster™ 17 HMR is chambered for the hottest rimfire cartridge on earth. Hornady's 17 Magnum Rimfire is the same length as a 22 Win. Mag. cartridge, but generates an amazing 2,500 fps muzzle velocity, at least 25% faster than the 22 Mag. It fires a high-performance 17-grain V-MAX boat-tail jacketed bullet. The Sportster™ 17 HMR features our field-proven break-open, side-lever single shot action and a heavy 22" varmint barrel, complete with scope mount. The stock and forend are high density black polymer, with recoil pad and sling swivel studs.

Sportster™/Sportster™ Compact. Of all the calibers for which rifles are chambered, the 22 rimfire is America's favorite. Whether you're ventilating paper targets, popping tin cans, or hunting squirrels for a traditional Brunswick stew, the "double deuce" is the caliber of choice. Accurate and economical, it has been America's "fun caliber" since the 1880's.

We pride ourselves in making 22s that can provide generations of shooting enjoyment. Our Sportster™ rimfire rifle, in both 22 Long Rifle and 22 Win. Mag., features a precision-crowned 20" barrel. This single shot break-open rifle is finished in low-profile matte blue and features a weather-proof black matte high-density polymer stock and forend with swivel studs. It also features an adjustable open rear, and ramp front sight.

Buffalo Classic® & Carbine Models *Rifles*

Tradition, history and American craftsmanship combine to create today's Harrington and Richardson rifles, continuing a legacy that began in 1871. The Harrington and Richardson 45/70 Government Buffalo Classic and the 45 Colt Carbine are true American classics to their very core. Modeled after the Frank Wesson tip-up rifles that were first made in Worcester, Massachusetts in the 1850's, these modern classics fill the need of those who simply enjoy shooting these great old cartridges. They reflect true 19th century styling, including antique color case hardening on the frame and a crescent butt plate, plus cut checkering on their American black walnut stocks and forends.

The Harrington & Richardson Buffalo Classic in 45/70 Government features a mid-weight 32" barrel to extract all the velocity possible out of the venerable 45/70 cartridge. The 32" barrel also provides the necessary sighting radius for long-range matches. It's equipped with a Williams receiver sight, and a traditional globe style target front sight with eight aperture inserts. The Harrington & Richardson CR Carbine in 45 Long Colt caliber appeals to nostalgia and cowboy fans. This fast-handling, 20-inch barrel carbine features a case-colored receiver, checkered walnut stock, and a case-colored crescent steel buttplate. It's equipped with carbine-style open sights.

Pardner Pump® *NEF Shotguns*

The NEF Pardner Pump® has already made a name for itself as the best value you'll ever find in a 12 gauge pump shotgun, and now, we are aiming to bring you the best in value for 20 gauge pump actions with components scaled down to the proper proportions. With steel receiver, double action bars, cross-bolt safety, screw-in modified choke that is steel shot compatible and easy take down, we challenge you to compare the Pardner Pump feature-for-feature with any of its higher-priced competitors. All Pardner Pumps are drilled and tapped for a scope base.

Pardner Pump Walnut
12 Gauge, 20 Gauge,
20 Gauge Compact

Pardner Pump® Walnut. Our standard model that started it all. American walnut stock, ventilated recoil pad, chrome-plated bolt and classic grooved forend. Available in 12 and 20 gauge.

Pardner Pump® Synthetic. A rugged synthetic stock makes this model ideal for tough hunting conditions. It has molded-in checkering and a ventilated recoil pad, and the quality features of the standard walnut Pardner Pump. Available in 12 and 20 gauge.

NEW Pardner Pump® Field. We have heard your demand for fully dipped shotguns, and are glad to introduce our new field Pardner Pump shotguns that are fully camo dipped in the popular Realtree APG HD® pattern. These shotguns are competitively priced, come with steel receivers, twin action bars, and ventilated rib barrels.

Pardner Pump® Compact. Available with a rugged black synthetic stock, a classic American walnut, or a camo Field model, these 20 gauge pumps have 21" barrels, reduced length of pull, and weigh slightly less than their adult counterparts.

The Pardner® Pump is backed by the same H&R 1871® warranty protection as all our H&R and NEF branded firearms.

Pardner Pump® *NEF Shotguns*

Pardner Pump® Slug Gun. Due to popular demand, a Pardner Pump Slug Gun, in 12 or 20 gauge, is included in the pump line. Featuring 22" and 21" fully rifled barrels respectively, these guns feature a ramp front sight and a fully adjustable rear sight and swivel studs. Like all Pardner Pumps, they are drilled and tapped for a scope base.

NEW Pardner Pump® Turkey. Nobody talks turkey like NEF. We are hunters and we know what turkey hunters need in a shotgun: durability, quality features, value and dependability. The NEF Turkey Pumps are available with stocks dipped in Realtree Hardwoods® (NP1-T22) or fully dipped in Realtree APG HD® (NP1-C22). They come standard with TruGlo high visibility rifle sights mounted to a ventilated rib, and an extended Extra-Full choke tube, for those long shots. Also features a steel receiver drilled and tapped for mounts.

Pardner Pump® Combo. Now you can have the versatility of both a 28" smoothbore hunting barrel and a 22" rifled slug barrel at a very reasonable price. The smoothbore barrel has a ventilated rib, steel shot compatible modified screw-in choke tube, and a bead front sight. The receiver is drilled and tapped for a scope base and the bolt is chrome-plated.

Pardner Pump® Protector™. A home defense model, the Protector features a black synthetic stock with an 18½" barrel, swivel studs, grooved forend and a ventilated recoil pad. The receiver is drilled and tapped for a scope base. For 2008, this ever popular Pardner Pump Protector will also be offered with a carbon fiber pattern dipped synthetic stock. This look gives the Protector shotgun a racy high-tech look.

Excell Auto™ NEF Shotguns

This line of autoloading 12-gauge shotguns represents the super-value of an imported shotgun built to the specifications and quality standards of H&R 1871. And they have the full backing of an H&R warranty.

All models feature up to 3" Magnum capability and 5-shot magazines. They also feature four screw-in choke tubes, and vent rib barrels (except the slug barrel).

Excell Auto Synthetic

Excell Auto™ Synthetic. Features a black synthetic pistol grip stock with molded-in checkering and a ventilated recoil pad. Its 28" vent rib barrel has 4 screw-in steel shot compatible choke tubes (IC, M, IM, F).

Excell Auto™ Walnut. This model features a checkered walnut stock with fluted comb and ventilated recoil pad. The 28" vent rib barrel has four screw-in steel shot compatible choke tubes (IC, M, IM, F). Walnut model comes with stock adjustment shim kit. When fitted between the buttstock and the receiver, shims adjust the cast-on or cast-off and raise or lower the drop at comb and heel.

Excell Auto™ Waterfowl. A complete camo dip finish makes this model an ideal duck and goose gun. It features a 28" vent rib barrel with four steel shot compatible screw-in choke tubes (IC, M, IM, F).

Excell Auto™ Turkey. This turkey specialist features a complete camo-finish. It has a 22" vent rib barrel, and four steel shot compatible choke tubes (IC, M, F, and Extra Full Turkey), and fiber optic front and rear sights.

Excell Auto™ Combo. A super value in a shotgun/slug gun combo package. It features a black synthetic stock with molded-in checkering and a ventilated recoil pad. The 28" smoothbore barrel has a vent rib and four steel shot compatible choke tubes (IC, M, IM, F). The 24" slug barrel is fully rifled and has front and rear fiber-optic sights.

H&R 1871, LLC New England Firearms® *2008 Sporting Firearms*

The Other Branch of the Marlin Family

In November of 2000, The Marlin Firearms Co. purchased the assets of H&R 1871, Inc.

Founded in 1871 (one year after Marlin), the original company started in a plant in Worcester, Massachusetts.

The company subsequently moved to Gardner, Massachusetts, and today employs over 200 people. Marketing its products under the brand names of Harrington & Richardson® and New England Firearms®, H&R 1871® is the largest manufacturer of single shot shotguns and rifles in the world.

the **Hunting & Shooting Sports
Heritage Fund.**

Congressional Sportsmen's Foundation

The Congressional Sportsmen's Foundation serves as American sportsmen's link to Congress, in order to ensure that current and future generations will have the right and opportunity to hunt, fish, and trap.

Governed by a Board of Directors comprised of industry and conservation leaders, the Congressional Sportsmen's Foundation educates Members of Congress, staff, and federal officials to better understand and represent their hunting, angling, and trapping constituents. In this way, the CSF promotes legislation and policies favorable to conservation and responsible management of our nation's fish and wildlife resources.

To learn more about CSF activities and how to become a member, write: The Congressional Sportsmen's Foundation, 110 North Carolina Avenue, SE, Washington, DC 20003, Phone: (202) 543-6850, Fax: (202) 543-6853 or online: www.sportsmenslink.org.

NEF Dog Training/ Starter Revolvers

Available in both 22 and 32 caliber blank, these American-made revolvers are rugged and reliable. Metal finish is matte blue, and a bright orange cap on the barrel is a reminder that the revolver is not a firearm. The grips are walnut-finished hardwood, and a blued lanyard ring is included for security.

The Bureau of Alcohol, Tobacco and Firearms has designated these revolvers "non-firearms," so they are not subject to any Federal firearms restrictions.

Both double-action revolvers feature our Transfer Bar System, virtually eliminating the possibility of an unintentional discharge.
