ABOUT US

LaserLyte is the shooting and hunting division of P&L Industries, Incorporated. Larry Moore, owner and president, has been involved with the shooting and hunting industry for more than thirty years.

Moore started out with a book publishing company specializing in survival tactics and weapons. Moore later created and published several magazines including *S.W.A.T.* (Special Weapons and Tactics), *Turbo* and *Arizona Hunter and Angler.*

In 1987, Moore founded a gun accessories business that grew to be Tac Star Industries, Incorporated. With Tac Star, Moore sold gun accessories and designed new products including the first "laser bore sighter" on the market. In 1996, Moore merged with Lyte Optronics to form LaserLyte.

After selling the gun accessories division in 1997, Moore purchased LaserLyte back in 2001. From then on, he has worked diligently to refine his previous work and develop new and innovative shooting products.

In 2002 Larry's son, Aaron Moore, joined his father in business full time as Vice President and Director of Operations after several years of living overseas and completing college degrees in business, engineering and international relations. Aaron's arrival allowed Larry to shift 100% of his focus to designing cutting-edge laser products for the shooting industry. "It is a great alignment of assets for my father and I, we put our ideas together, he designs them and then I present them to market," says Aaron.

Both Larry and Aaron have a great passion for the outdoors that is infused into their family life. "My Dad and I hunt as much as possible," says Aaron, "It's a great chance to spend some time together as well as come up with new ideas for LaserLyte to help hunters and shooters in their sport."

OUR MISSION

Our mission is to heighten the experience and enjoyment of shooting sports by providing high quality, competitively priced lasers to save the user time and money. We're committed to helping every shooting enthusiast improve their accuracy and shooting skills.

Thanks for your support!

2008NEW PRODUCTS

LBSKRYPTONYTE

A bright, daylight-visible green laser makes this LBS system your secret weapon for accurate hunting and shooting.

Page 4

NEW FSL LASER SIGHTING SYSTEM
Already the smallest and most accurate, the new FSL is now the most secure laser system on the market.

Page 8-9

NEW L-RAIL ADAPTER & SUBCOMPACT L-RAIL ADAPTER
Carry a flashlight and a laser simultaneously on this ambidextrous combo-mount.

Page 13

NEW UNIVERSAL GUN / SCOPE LEVELER
A new mounting base ensures your scope is level before you ever line up your crosshairs.

Page 7

NEW SIGMA RAIL-MOUNT ADAPTER
Attaches your Picatinny accessories—including flashlights and LaserLyte Lasers—to S&W Sigma Pistols.

Page 12

NEW KRYPTONYTE LASER BORE SIGHTING SYSTEM

LBS-HULK-140

Meet the brightest and most visible laser we've ever created. The New Kryptonyte Laser Bore Sighting System uses a green laser that is 100 times more visible to the human eye than traditional red lasers. This daylight-visible 532-nanometer green laser creates a dot that can be seen up to 100 yards with the naked eye, meaning you can sight-in anywhere from 10 yards to 100 yards away.

The new Kryptonyte LBS System fits any handgun*, rifle or carbine from .22 to .50 caliber and .51 to .75 caliber as well as 12 to 20 gauge shotguns. The Auto Power Control digital circuitry ensures a bright and steady dot for the full 1-1/2-hr. life of the CR2 lithium battery.

*Four-inch minimum barrel required

.50 CAL. Rifle with Kryptonyte LBS & Universal Gun/Scope Leveler

12 GA. Shotgun with Kryptonyte LBS & Shotgun Adapter

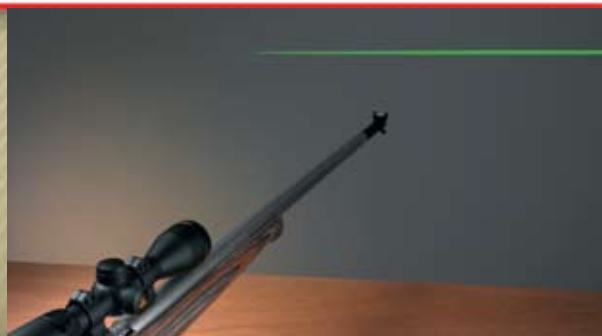
.50 CAL. Rifle with Kryptonyte LBS

NEW PRODUCT

KRYPTONYTE SYSTEM INCLUDES:

- Green 532nm Laser Bore Sighter
- NEW Universal Gun/Scope Leveler
- NEW 12-20 Gauge Shotgun / .51-.75 Caliber Adapter
- .22 - .50 Caliber Adapters
- Deluxe Kit Carrying Case with Instructions
- One Lithium Battery

The Line Generating Lens converts the bore sighter's precise Laser beam into an exact projected horizontal line for aligning the reticle crosshairs.



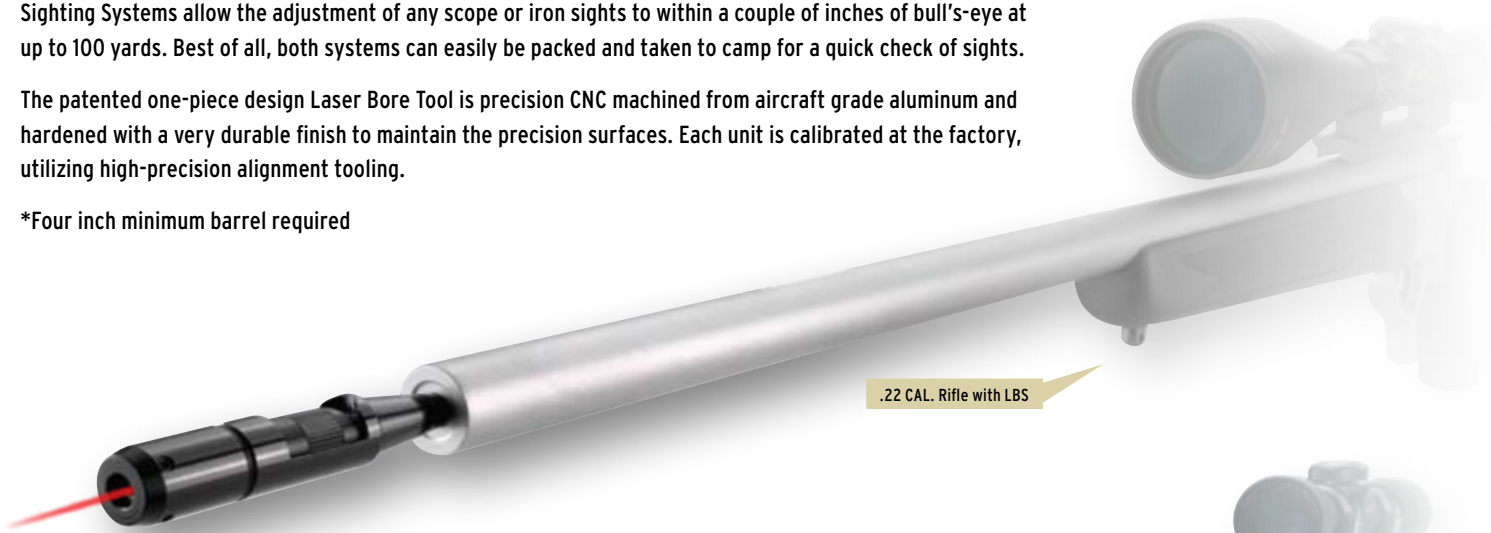
STANDARD & DELUXE LASER BORE SIGHTING SYSTEM

Standard Kit: LBS-0006-140
Deluxe Kit: LBS-DLUX-140

Quickly sight in any rifle or pistol from .22 to .50 Caliber* with these best-selling universal kits. For professional hunters and shooters, the Deluxe LBS System comes complete with the new Universal Gun/Scope Leveler and the new 12-20 Gauge Shotgun/.51-.75 Caliber Adapter. Simple and very easy to use, both Laser Bore Sighting Systems allow the adjustment of any scope or iron sights to within a couple of inches of bull's-eye at up to 100 yards. Best of all, both systems can easily be packed and taken to camp for a quick check of sights.

The patented one-piece design Laser Bore Tool is precision CNC machined from aircraft grade aluminum and hardened with a very durable finish to maintain the precision surfaces. Each unit is calibrated at the factory, utilizing high-precision alignment tooling.

*Four inch minimum barrel required



.22 CAL. Rifle with LBS

.22 CAL. Rifle with Gun/Scope Leveler & LBS Attached

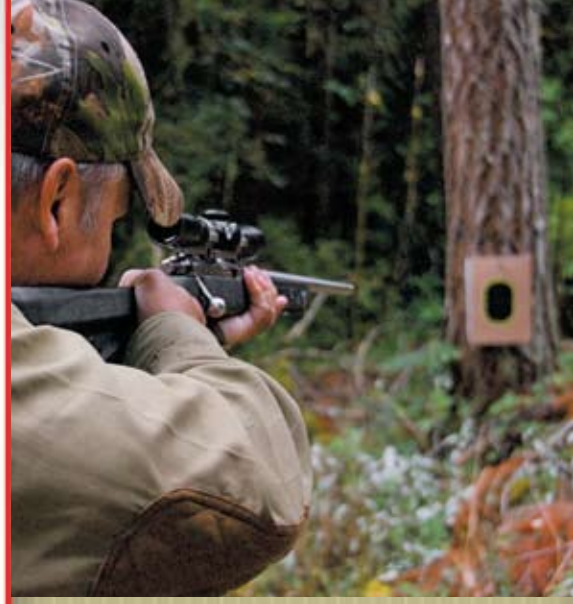
12 GA.Shotgun with Shotgun Adapter Attached

DELUXE SYSTEM INCLUDES:

- 650nm Laser Bore Sighter
- NEW Gun/Scope Leveler
- NEW 12-20 Gauge Shotgun/ .51-.75 Caliber Adapter
- Four adapters (covering any Caliber from .22 cal. to .50 cal.)
- Carrying Pouch with Batteries and Instructions
- Daylight Laser Target

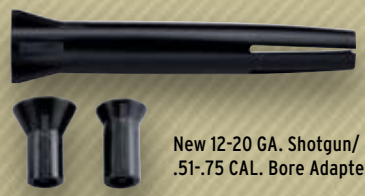
STANDARD SYSTEM INCLUDES:

- 650nm Laser Bore Sighter
- Four adapters (covering any Caliber from .22 cal. to .50 cal.)
- Carrying Pouch with Batteries and Instructions
- Daylight Laser Target



All Laser Bore Sighting Systems come complete with four adapters (covering any caliber from .22 cal. to .50 cal.), a carrying pouch, batteries and instructions.

Laser Bore Sighter



New 12-20 GA. Shotgun/ .51-.75 CAL. Bore Adapter

New Universal Gun/Scope Leveler

HI-PRECISION LASER BORE SIGHTING SYSTEM

PLB-0001-140

The Super Hi-Precision Laser bore sighting tool features a 635nm Laser module that projects a beam that diverges to approximately 2.5 inches at 100 yards. When the Laser dot is projected on a target, it is used as the point-of-aim for adjusting the riflescope reticle or iron sights. This system is designed to be simple, fast and effective, and allows bore-sighting accuracy of any firearm, from .22 to .50 Caliber*.

LaserLyte engineers have developed a unique calibration system that offers perfect alignment of the Laser to the central axis of the bore for near-perfect bore sighting accuracy—even before firing the first shot. The result is not only faster, easier sight-in sessions—but also reduced ammunition consumption during the process. Bore sighting can be done indoors or outdoors—even in broad daylight—at distances from 25 feet to 30 yards.

*Four-inch minimum barrel required

SYSTEM INCLUDES:

- 635nm Laser Bore Sighter
- Stainless Steel Arbor
- Brass Tapered Rotating Bushing
- Delrin® Caliber Adapters with Brass Bushing
- NEW Universal Gun/Scope Leveler
- NEW 12-20 Shotgun Gauge / .51-.75 Caliber Bore Adapter
- Daylight Laser Target
- Set of Adapter Screws
- (3) A-76 Batteries
- Plastic Molded Carrying Case with Complete Instructions

Rifle with Hi-Precision LBS

.17-.22 CALIBER LASER BORE SIGHTER

LBS-1722-140

Here's a LaserLyte Laser Bore Sighting Kit designed to work with the very popular .17 caliber & .204 caliber firearms as well as air rifles. Each kit includes two adapters to work with any caliber from .17 to .22, including .204, etc*.

*Four-inch minimum barrel required.

.17-.22 Caliber Laser Bore Sighter with Adapters.

Rifle with .17-.22 CAL. LBS

NEW 12-20 GAUGE SHOTGUN / .51-.75 CALIBER BORE ADAPTER

BAK-1220-300

The Shotgun Adapter system allows quick and easy sight-in of 12-20 gauge shotguns, slug guns or turkey guns. Now with improved features this adapter allows the sighting-in of rifles from .51 to .75 caliber. The adapter works with all laser bore sighters (except for the .17-.22 caliber bore sight). The adapter is made from Dupont Delrin® for maximum durability and accuracy.

12-20 Gauge Shotgun / .51-.75 Caliber Bore Adapter.

12 GA. Shotgun with Bore Adapter & LBS

NEW UNIVERSAL GUN/SCOPE LEVELER

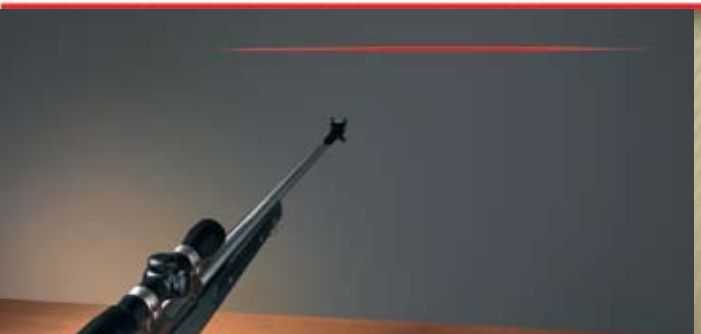
SLA-0001-140

Finally you can ensure a level performance every time you use your gun because now you can level it before you ever level your cross hairs. LaserLyte improved upon an already great idea. By adding a dove tail adapting rail to the bottom of our laser scope leveler we created a gun leveling system. You just slide the leveler onto any Weaver or Picatinny base rail system, put the bubble in the middle of the line—and now you are level. Secure your firearm and then take the level off. Proceed to mount your scope and level it. Bore sight in and you're done.

New Universal Gun/Scope Leveler mounted on Picatinny Rail

New Universal Gun/Scope Leveler

.22 CAL. Rifle with LBS & Gun/Scope Leveler



Universal Gun/Scope Leveler:
The Line Generating Lens converts the bore sighter's precise Laser beam into an exact projected horizontal line for aligning the reticle crosshairs.

NEW FSL LASER SIGHTING SYSTEM

FSL-0650-140

The FSL Sighting System is so popular because it's the only laser system you'll ever need. The FSL's ultra-compact size and high-definition laser beam will fit on virtually any firearm—from pistols to rifles to carbines to shotguns and more—any weapon with a Picatinny/Weaver type mounting rail or LaserLyte adapter rail. The FSL also features a pulsing low battery indicator that will still allow for target acquisition and extends your battery life by approximately 2.5 hours.

The new LaserLyte FSL features a 3-position locking bar that will match up with the cross cut slots on Picatinny type rails. This will ensure secure mounting onto any rail system. LaserLyte has also increased the thread engagement on the mounting clamp to allow the tightest fit possible. The two improvements make the FSL the smallest and most secure laser on the market. It will withstand any recoil or virtually any abuse you can put it through.

SA-XD Pistol with FSL

NEW PRODUCT

The versatility of the FSL Laser Sight allows it to be mounted on virtually any firearm with a rail mount or Picatinny rail, from sub-compact pistols to shotguns, AKs and M4s.

M4 Rifle with FSL

The versatility of the FSL allows easy activation while holding a flashlight.

FSL TACTICAL ACTIVATION

To activate the FSL while keeping your hands in a ready position and your finger off the trigger, reach up with your off hand and depress the activation switch with the knuckle of your index finger.

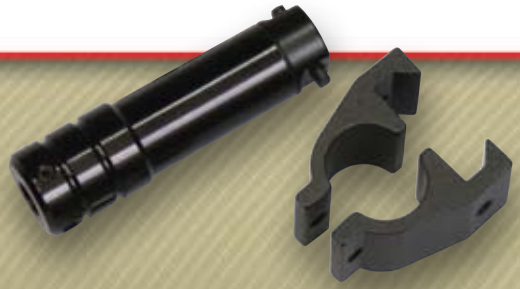
NEW
HI-POINT LASER & ADAPTER

HPT-0650-140

The ultra-popular Hi-Point now has its own laser and adapter. LaserLyte has combined its proven round-body laser technology with its Hi-Point laser mount to make the latest addition to its laser systems. The Hi-Point Laser system features an easy-to-reach ambidextrous switch and is quickly attached to the rail via two mounting screws. The t6 aluminum construction of the laser and mount will give you the most strength without compromising any weight.

NEW PRODUCT

Hi-Point Pistol with
Hi-Point Laser



The Hi-Point Laser system comes complete with the laser, mount and all other hardware needed for setup.

Glock 38 Pistol with QD Laser

QUICK DETACH LASER SYSTEM

LaserLyte's Quick Detachable Laser System attaches quickly and securely to Glock, Beretta, Springfield Armory, Taurus, HK, Ruger and Smith & Wesson SW99 pistols with rails.

Precision CNC machined from Dupont Delrin® (a high wear resistant polymer), the QD mount allows for great repeatability and will not mar the finish of any firearm.

This mount includes our universal Laser module with an ambidextrous end cap slide switch. When installed, the position of the switch is directly in front of the trigger guard allowing for easy one-handed operation. The mount with Laser weighs only 1.9 ounces.

SA-XD Pistol with Rail-Mount Laser

UNIVERSAL RAIL-MOUNT LASER SYSTEM

The LaserLyte Universal Rail-Mount System is a versatile and popular choice for tactical and self-defense purposes. The LRS gives you the flexibility to mount it to virtually any pistol, rifle, carbine or shotgun with a Picatinny/Weaver type rail or mounting base. This model is offered in several configurations, including a wireless ambidextrous slide switch, a 6-inch straight cord with pressure switch, and an extendable curly cord with pressure switch. This Laser sight utilizes a unique claw-type system that securely attaches the Laser sight to the pistol's mounting rails.

Simply depress the buttons on each side of the mount to attach to or release from the rail.

QUICK DETACH LASER SYSTEM

QDL-65GB-730: Standard Laser Fits Glock (with rails), Ruger P95 & 345, Beretta 92, Springfield Armory XD (excluding sub-compact) & HK P2000

QDL-65SW-730: Standard Laser Fits Smith & Wesson SW99, Taurus PT 24/7

UNIVERSAL RAIL-MOUNT LASER SYSTEM

LRS-0650-SSW: Laser Rail-Mount System with Slide Switch

LRS-0650-CCW: Laser Rail-Mount System with Curly Cord Switch

LRS-0650-SCS: Laser Rail-Mount System with Straight Cord Switch

Simply slide the mount on pistol rail and tighten mounting screws with included hex wrench.

NEW
SIGMA RAIL-MOUNT ADAPTERS

ADP-SIGM-140

LaserLyte reintroduces its most popular and best selling rail adapter ever. The New S&W Sigma mount now allows all Picatinny accessories to be mounted on the rail adapter. The mount clamps onto the frame using steel hardware and the glass-filled composite polymer rails will endure the toughest of duties. This works great for lights and especially for LaserLyte lasers.

NEW PRODUCT

S&W Sigma Pistol with Sigma Rail Adapter

Simply slide mount on pistol rail and tighten mounting screws.

Sigma Rail Mount Adapter with FSL attached

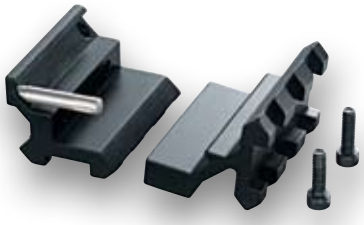
The Sigma Rail-Mount Adapter changes the grooves on the receiver into a Picatinny/Weaver type rail for easy mounting of any clamping flashlight or LaserLyte Laser System.

Sigma Rail Mount Adapter with light attached

NEW
L-RAIL PICATINNY ADAPTER

ADP-LRLG-140: Standard ADP-LRSM-140: Subcompact

LaserLyte introduces the latest Picatinny accessory for your firearm. The dual L-shaped rail system (in standard and sub-compact) allows countless accessory mounting options. If you have a laser and a flashlight there is no need to go and buy an expensive combo laser/light unit. The new L-Rail system makes the perfect combination of a laser and light in a modular package.



Simply slide mount on pistol rail and tighten mounting screws. The L-Rail Adapter can be ambidextrously mounted for right- or left-handed shooters.

SA-XD Pistol with L-Rail

Light/Laser combo

Laser/Light combo

You can mount the laser or the light on the bottom or the side of the rail. You can have just the laser mounted on the rail and it has a lower profile for holstering or concealment. Then in an instant, you can mount a quick detach light on the rail for the perfect combo unit.

SA-XD Sub-Compact Pistol with L-Rail

NEW PRODUCT

RAIL-MOUNT ADAPTERS FOR SELECT PISTOL MODELS

Now you can mount your favorite LaserLyte Laser System onto some very popular pistols: Heckler & Koch USP, Bersa Thunder, Mini-Firestorm & Hi-Point. This adapter changes the grooves on the receiver into a Picatinny/Weaver type rail, allowing you to mount any of our clamping laser systems onto the rail including the LRS and FSL.

HK USP with Rail-Mount Adapter

Simply slide the mount on pistol rail and tighten mounting screws.

ADP-HKSP-140:
For Heckler & Koch USP

ADP-HKCP-140:
Heckler & Koch USP Compact
(shown with FSL Laser)

ADP-BERS-140:
Bersa Thunder
Also fits Mini-Firestorm.
(shown with FSL Laser)

ADP-HIPT-140:
Hi-Point
Use this adapter with any round body LaserLyte laser only.
(shown with Round Body Laser)

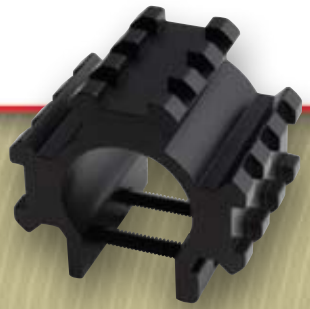
SHOTGUN TRI-RAIL MOUNTING SYSTEM

ADP-TRIR-140

Set up your tactical or home defense shotgun for maximum versatility and low light performance with this new Tri-Rail Mounting System. Lightweight and durable, this system positions three Picatinny rails at the front end of the shotgun where flashlights and/or lasers are best located. Easily mounted on the magazine tube of most popular 12-gauge pump shotguns, the Tri-Rail takes up under 1.5 inches of space ahead of the forearm. Made of tough aircraft grade aluminum with a matte black anodized finish, the Tri-Rail attaches in minutes with two machine screws.

Shotgun with FSL & Light Attached to Tri-Rail.

Mossburg 500 Shotgun with Tri-Rail Mount Installed



- Fits any 1 inch diameter shotgun tube
- Can be used with or without heat shield shotguns
- Can mount on magazine extension tubes or on stock tubes
- Only takes up 1.5 inches of space
- Aircraft grade aluminum
- Mounts lasers or flashlights, works great with FSL
- Perfect for home defense
- 1913 type rail system, Picatinny

UNIVERSAL RIFLE & SHOTGUN LASER SYSTEM

RLS-0650-140: Standard
MNT-0900-180: Mounting Kit Only
(for use with any round laser body)

The Universal Rifle and Shotgun Laser System gives you the edge in any tactical or self-defense situation. Each system includes 2 sets of clamps, which allow the mounting of the Laser to any 1/2- to 1-inch barrel or magazine tube. The Laser comes with a curly cord remote switch, extendable from 10 to 36 inches. The Laser is only two inches long and with the mount weighs less than three ounces. Each Laser is easily adjusted for zero with both a windage and elevation screw.

Each system comes complete with laser, batteries, mounting hardware and mounting brackets.

M4 Rifle with Universal Laser System

Shotgun with Universal Laser System

UNIVERSAL PISTOL LASER SIGHTING SYSTEM

Each of our Universal Pistol Lasers features a two-screw windage and elevation adjustment for easy zeroing. The Laser module produces the maximum power output for a class IIIa product and utilizes a special lens system, to produce a very small, precise and extremely bright dot.

The Universal Pistol Lasers with Remote Switch are available in both black and silver finish.

Each Laser comes complete with 24 pre-shaped polymer inserts to fit virtually all handguns. The remote pressure switch models come with a self-adhesive mounting pad for placement of the switch. CNC machined from aircraft grade aluminum, it measures less than 2-3/4 inches long with the mount and weighs only 1.2 ounces.
