

Where Dreams Become Reality

It was 9:30 a.m. and my knees were getting sore after spending the last four hours crouching inside the small shooting house, trying to keep a low profile to the deer traveling to and from the watering hole on my left side. About 180 yards away, I patiently glassed a "shooter" buck, which was locked down with a "hot" doe in their five-foot tall grass hide-a-way. The only time I could get a glimpse of him was when he drove away the smaller satellite bucks that tried desperately to steal his love interest, and then he would quickly disappear back into his hiding spot next to his bedded doe.

When I arrived at camp, our host had mentioned that he had seen some very big bucks during the previous few weeks, and he told us to keep an eye out for the "Bail Twine Buck" that appeared to have a large amount of bailing twine knotted on one side of his antlers. My cartridge of choice on this trip to Pike County, Illinois was a Magtech Solid Copper Hollow Point projectile chambered in the mighty .500 Smith & Wesson. This would be my first chance to take a large game animal with a handgun and I cherished the opportunity to share the three-day hunting camp with good friends and

associates from the shooting industry. As I watched the big buck down in the grass thicket, I thought about my great hunting expeditions all over the world and how excited I was to finally hunt with a handgun. Having hunted with a rifle, shotgun, muzzleloader, and archery equipment, it would be great to finally experience the fast growing sport of handgun hunting. During the sight-in process, I quickly realized that I had picked an awesome combination of a Smith & Wesson Performance Center revolver teamed with a devastating Magtech solid copper hollow point projectile.

About 10:30 a.m. came the moment of truth. After more than three hours, the "hot" doe decided to wake-up. The first thing on her mind was to get a drink of water in the little pond next to my stand location. Lucky me! As she approached the pond I picked-up movement back in the grassy hide-out and sure enough it was the "shooter" buck starting his approach to the watering hole. When he was at about 80 yards, a farmer's tractor approached the out-lying hunting area and both deer went on alert. It was now or never. I settled my sights on the buck's vital area and delivered the shot. The terminal performance of the Magtech solid copper hollow point bullet was perfect as the big buck traveled only a short distance. As on all my hunting expeditions, I quickly gave thanks for a safe and successful hunt.

It was an overwhelming feeling of achievement to finally take a big game animal with a handgun. To share this accomplishment with great friends and dedicated hunting companions made it that much sweeter, especially since the deer turned out to be the famous "Bail Twine Buck."

MAGTECH AMMUNITION

2008

MAGTECH AMMUNITION...TESTED AND PROVEN IN OVER 60 COUNTRIES WORLDWIDE

MAGTECH AMMUNITION IS MANUFACTURED IN ACCORDANCE WITH SAAMI AND CIP TECHNICAL SPECIFICATIONS FOR RELIABILITY, CONSISTENCY, AND SAFETY.

Magtech First Defense®

Ammunition designed to protect and serve.

Law enforcement personnel put their lives on the line every day. They need total confidence in their firearms and ammunition. Magtech First Defense gives them that confidence. This premium round features a 100% solid copper bullet, delivering deep penetration and devastating expansion. Traditional hollow points use a lead core covered by a copper jacket that can tear away when fired, losing both weight and power. Magtech First Defense maintains 100% weight retention. Every round meets its target with maximum impact and effectiveness, so you can show bad guys the true meaning of "stopping power."

"I'm an avid shooter and a great fan of your ammunition...I use it exclusively for target practice and for my home defense rounds. I've never once had a problem with a single round of it and I've shot probably close to 10,000 rounds of it over the past year."

J.B. - Department of Homeland Security

Guardian Gold®

Defend your family. Protect your budget.

Dead-on accuracy. Deep penetration. Incredible expansion. Magtech Guardian Gold® gives you the stopping power you need to protect yourself and your family. Yet it's also priced to protect your family budget. That means you don't have to hold back. You can practice more, so you're always sharp, confident and ready. Every round of Guardian Gold is made using reliable ignition primers and the finest clean-burning propellants, and is offered in a wide variety of calibers and bullet weights.

"Just fired my first two boxes of Magtech Guardian Gold .45+P 230 gr.

#GG45B. Accuracy was outstanding from Colt officers model. Fed well. Functioned well. Good Job! Thanks."

— Lt. Jimmy Hopkins, Llano Co. S.O.

Sport Shooting

Round after round of performance and value.

The store shelves are filled with colorful ammo boxes. To make sure you get both quality and value, grab the "blue box." Magtech pistol and revolver ammunition is serious ammo for serious sport shooters. It's factory fresh, value-packed and trusted by shooters around the world. Every round is assembled using only the finest components, with strict quality control every step of the way. Magtech sets the standard for reliability, accuracy and performance. Magtech is the absolute best value, right off the shelf.

"The last 4,000 rounds through my CZ 75BD have been your 9mm, 124grain, FMJ. There's not been one single failure to fire or extract, and I haven't found any brand that's more accurate! Not surprisingly, it has performed equally well in my new CZ P-01."

"Thanks for supplying such an excellent product."

Fred H. – An Avid Shooter

Hunting

You put your heart and soul into hunting, and nothing will keep you away. Every time you hunt with your handgun, put the odds in your favor with Magtech ammunition. Introduced several years ago, Magtech Handgun Hunting loads deliver the knockout power you need to be confident in every shot fired. Magtech Hunting Loads maintain virtually 100% weight retention. The solid copper bullet features a six-petal hollow point designed for tight groups, superior expansion and deeper penetration than jacketed lead-core bullets. Not even the toughest bone or densest tissue of thinner-skinned big game animals can stop it. Stick with Magtech and you'll be bringing home more game than ever.

If you live to hunt, this is your ammo.

"I have been testing the Magtech .500 S&W cartridges using a Smith & Wesson Model 500 Mag. Hunter with a 10.5" barrel length. I have shot 40 rounds and found great accuracy at 60 to 100 yards. These bullets shoot very clean and the shot casings are clean. Most definitely great quality at a great price. I am looking forward to other bullet options for this caliber from Magtech."

Chris M. – An Avid Shooter

Cowboy Action

Built to exacting "Old West" standards.

Few things in life let us take a step back in time as authentically as Cowboy Action Shooting. It captures the spirit of the cowboy and the romance of the Old West. Magtech Cowboy Action Loads are more than "Old West" authentic. They are designed to give you superior, trouble-free performance in your single-action revolvers and lever-action rifles. Our flat-nose bullets deliver reliable knockdown power that lets you drop steel targets with confidence, shot after quick shot. And because we keep them affordable, you can come out shootin' ... and keep on shootin'.

"I wanted to let you know how much I enjoy the overall quality of your ammunition. I have a variety of semi-auto pistols, some older, collectibles, as well as newer models and newer calibers. Without exception, when I start shooting Magtech ammo, any problems I've had with mis-feeds, misfires, and ejection problems disappear. In particular, in older pistols, like my Colt 45's and 38 Super's, where hang ups on feeding can be a problem, I NEVER have an issue with your ammo. It seems to me that you have a smoother transition from case to bullet that eliminates misfeeds.

Anyway, I know you always hear about problems so I wanted to share my extremely positive experiences with you."

Charlie K. – An Avid Shooter

www.magtechammunition.com

CleanRange®

What to shoot when you want to get the lead out.

More and more indoor ranges are getting the lead out. Lead-free ranges have cleaner air, cleaner environments and lower maintenance costs. When it's time for you to make the move to lead-free, switch to technologically advanced Magtech CleanRange® Loads. They feature high-tech, lead-free primers and fully encapsulated bullets, totally eliminating your exposure to lead and other heavy metals. CleanRange® Loads give you cleaner air, cleaner firearms and peace of mind, all at a price that will let you breathe easy.

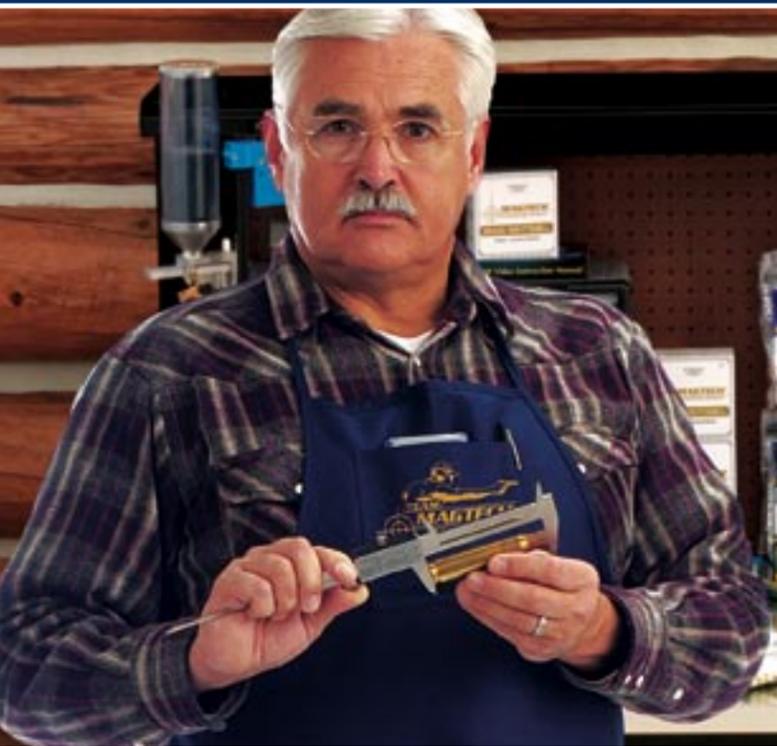

"Just a quick note to say I'm really impressed with your .45 Auto target ammo. I've put about 300 rounds through my new Kimber Pro CDP11...and one word...flawless! Keep up the great work!"
Jeff S. - An Avid Shooter

Reloading

Load up on quality reloading supplies.

At Magtech, we like to say our reloading components are factory fresh. That means they are made to the same precise standards as our technologically advanced factory loads. Skilled reloaders can tell that just by holding them in their hands. Our primers, unprimed shotshell brass cases, unprimed handgun brass cases and handgun bullets deliver quality you can depend on. And because they come from Magtech, you know they're affordable, which makes sitting down at the bench to reload your favorite rounds for shooting and hunting more enjoyable than ever.

"I have a Colt SAA, special ordered from the Colt custom shop long ago, and no combination of case, bullet, and powder would really make the thing shoot the way I thought it should . . . accuracy wise. The Colt people wanted to take a look at it . . . they did a couple of cosmetic things then test fired the gun with your (Magtech) ammo, using only an arm rest, at 15 meters. The six-shot group appears to be about 3/4", center to center. I've been reloading, casting, and swaging for 44 years . . . the (Magtech) accuracy is quite a bit better than anything I have been able to get with the wide variety of powders, bullets, and cases."

Phil L. – An Avid Shooter

HOME PAGE HIGHLIGHTS

Informative. Educational. Entertaining. Magtech's "Home Page" is the launching pad to in-depth product knowledge, quick navigation, and up-to-date news and information. If you cannot find what you're looking for on the pull-down navigation bar, use the site search by key word in the upper right corner. There is also a complete site map for your reference located in the "ABOUT" pull-down menu, which will allow quick links to any section.

DEALER LOCATOR

Magtech High Performance Ammunition is available at America's leading sporting goods retailers, so ask for Magtech ammunition by name. If you are having trouble locating the nearest retail outlet go to "HOW TO BUY-Consumer-Search by Zip Code" and follow the instructions. The results of your search will be matched with a location map for your convenience.

MEDIA CENTER

Whether you need a product photo to accompany an article, or a logo for a company listing, we understand the value of a great image. Choose from a variety of product images, logos, an electronic version of our catalog, and press releases for your reference. To save the artwork, click on the extension you would like to download, and save it to your computer.

INTERNATIONAL DISTRIBUTOR SEARCH

The real judge of any product brand is its credibility and market acceptability. Due to the high quality, reliability and overall performance, Magtech products are currently sold and specifically requested in more than 55 countries around the world. Browse the complete list of Magtech International Distributors to find the nearest Magtech partner in your world region.

VIRTUAL TOUR

Enjoy a mini-tour of our huge manufacturing complex and learn more about the advantages of Magtech's vertically integrated manufacturing process, which results in total quality control. Go to "ABOUT-Virtual Tour" and click on one of the buttons in the side bar to start the tour.

PRODUCT SEARCH

Whether you are a target shooter or a law enforcement specialist, a cowboy action enthusiast or a hunter, Magtech has an extensive line of loaded ammunition offerings in a wide assortment of calibers, bullet weights, and bullet styles. Go to "PRODUCTS-Magtech Products" and click on a tab in the sidebar to view a category, or click on the "Search by Item" tab to search for complete details on a specific caliber or item.

CONTACT US

Our hours are 8:00 AM – 5:00 PM, Central Standard Time, Monday through Friday. If you have questions about Magtech Ammunition, please check the "FAQ's" Section or contact one of the many Magtech departments via phone, fax, mail, or email.

"For details on loading Magtech's Brass Shotshells go to www.circlefly.com. Locate the menu on the left side of the screen and click on **Wad Sizing Chart** to find all the internal products used in reloading Magtech Brass Shotshells. You can also click on **Loading a BP Cartridge** to find detailed loading tips. Remember, use a Large Pistol Primer on your new Magtech Brass Shotshells.
