*A. Uberti*  
HISTORY REPEATS ITSELF

# About Uberti

No one dreams of the Old West without conjuring up images of six-shooters, lever-action rifles and the celebrated buffalo guns that could shoot a mile. These days, original guns are worth thousands of dollars and most are housed in museums or private gun collections and the thought of shooting one of these treasured collector's items would set a museum curator's nerves on edge. In fact, the thrill of shooting a gun from the Old West might have been lost if it were not for gunmaker Aldo Uberti.

In 1959, Aldo Uberti founded A. Uberti, S.r.l. in the village of Gardone Val Trompia in the Italian Alps and began making replicas of Civil War era cap and ball revolvers. Over the years, as the experience and skill of his craftsmen grew, Uberti expanded into replicas of classic lever-action rifles, cowboy six-shooters and big game rifles. Not only are the Uberti guns exacting replicas down to the finest detail, but with modern machinery and materials they're actually better than the originals.

From Civil War reenactments to the fast growing sport of Cowboy Action Shooting, the demand for replica firearms has never been stronger, and Uberti has never been in a better position to meet it. Imported by Stoeger Industries, a member of the Benelli USA family of companies, Uberti firearms are now available in America directly from the source. Uberti firearms marked "Imported by Stoeger Industries" are warranted and can be serviced by factory-trained gunsmiths using genuine Uberti parts right here in the U.S.A.

**Take to the field.** Uberti recreations of classic American firearms are accurate in every detail except one — they're better than the originals. Made with stronger materials and modern machine tools, they are far more durable and accurate than any firearm from the era of Oliver Winchester and Samuel Colt. Uberti cartridge firearms will stand up to modern smokeless powder loads and all display the superior accuracy expected by today's shooters.

Competitors in the fast growing sport of Cowboy Action Shooting have been quick to recognize that Uberti guns set the standard by which others are judged. Currently the Uberti 1873 lever-action is the sport's most popular rifle and the 1873 Cattleman revolver is the hottest selling Cowboy Action handgun. However, Uberti firearms aren't just for target shooting—they were designed to take afield. Whether you target shoot or big game hunt, Uberti puts excitement and adventure back into shooting.

*Giacomo Merlino, Managing Director of A. Uberti S.r.l., oversees the exacting recreation of the numerous historic firearms manufactured by Uberti in Gardone Val Trompia, Italy.*

- 44 ACCESSORIES
- 46 SPECIFICATIONS

## Walker

**Samuel Colt** began production of a revolving-cylinder **pistol** on the day the Alamo fell in 1836. Produced at his factory in Paterson, New Jersey, Colt's new pistol was enthusiastically received by the Rangers of the newly independent Republic of Texas and in 1844 Colt's pistol made history when sixteen Rangers held off 80 Comanche warriors with their new revolvers.

Former Texas Ranger Sam Walker had been in the Comanche fight in 1844 and became a firm believer in Colt's pistols. In 1846, war with Mexico was looming and Walker's U.S. Mounted Rifles needed a powerful handgun

for mounted combat. Colt built a revolver for them that held 60 grains of black powder and chambered six, .44-caliber balls. Sam Walker ordered 1,000 of them and rode off to Mexico and into the annals of history.

The Walker's massive fire-power needed a much stronger frame and larger overall gun design than earlier models—the Walker weighed nearly four-and-a-half pounds and was 15¾" long. The Walker's reputation assured Colt's future success.

*The Walker's large capacity cylinder allows it to hold up to 60 grains of black powder and offers easy access to the percussion caps.*

*The Walker featured a brass square-back trigger guard—an improvement over the Paterson's guardless folding trigger.*

**1847 WALKER — 9" MSRP \$429**  
Case-hardened, walnut grip

*The Walker was one of the first revolvers fitted with a loading lever. Colt later added a loading lever latch near the muzzle.*

**1848 WHITNEYVILLE DRAGOON — 7½" MSRP \$429**  
Case-hardened, walnut grip

## Dragoon and Pocket Revolvers

**With an improved loading lever,** shorter cylinder and lighter weight, the Dragoon was an improvement over the Colt Walker. Of the four Dragoon models, the first was manufactured for Colt by Eli Whitney. Small enhancements separate the four Dragoon models; the 1st model uses oval cylinder bolt slots, the 2nd model uses squared cylinder bolt slots, and the 3rd model incorporates a round trigger guard. The Whitneyville model is made like the original Walker, but uses a dragoon barrel and cylinder. Encouraged by an ongoing military contract, Colt turned his eye toward the civilian market in 1848. Civilian pocket revolvers, such as the Wells Fargo or 1849 Pocket, were .31 caliber pistols that fit easily in a coat pocket. With the introduction of these models Colt's success in the civilian market was assured.

*Modern machinery and improved materials result in a stronger and more precise metal-to-metal fit on Uberti's replica firearms.*

*The Dragoon featured many design improvements over the Paterson, and included many parts identical to those used on the Walker, like the brass square-back trigger guard, making it a unique hybrid of old and new.*

*The Dragoons were the first Colt revolvers to feature a latch for the loading lever. This prevented the loading lever from falling during firing.*

*The Walker and all Dragoon models have integrated loading cut-outs for easy and secure seating of the percussion caps.*

**1848 1ST MODEL DRAGOON — 7 1/2"**  
**MSRP \$409**  
Case-hardened, walnut grip

**1849 WELLS FARGO — 4"**  
**MSRP \$339**  
Case-hardened, walnut grip

**1848 2ND MODEL DRAGOON — 7 1/2"**  
**MSRP \$409**  
Case-hardened, walnut grip

**1849 POCKET — 4"**  
**MSRP \$339**  
Case-hardened, walnut grip

**1848 3RD MODEL DRAGOON — 7 1/2"**  
**MSRP \$409**  
Case-hardened, walnut grip

**1860 ARMY FLUTED — 8" MSRP \$349**  
Case-hardened, walnut grip

**1860 ARMY — 8" MSRP \$339**  
Case-hardened, walnut grip

## *Army, Navy and Pocket Navy,*

The 1851 Navy was a scaled up, .36-caliber version of the 1849 Pocket Model. The handy, more powerful revolver immediately found a following among soldiers and civilians alike and was eventually adopted by both the U.S. and the British military. By the start of the Civil War, Colt had refined the Navy into a sleek, streamlined weapon with an improved loading lever. The 1861 Navy is often acclaimed as Colt's most handsome pistol.

Colt worked to perfect his cap and ball revolver, designing the 1860 Army around a lightweight frame, but chambered for the more powerful .44-caliber ball. The first models featured fluted cylinders, while later models incorporated a belted cylinder for added strength and a "creeping" loading lever for easier loading. The sleek 1860 Army is considered to be the ultimate combat handgun of the percussion era.

*To seat loads in the cylinder, the loading lever is freed from the latch and pulled downward. This causes the ram-rod to move through the frame and ram the load home.*

**1851 NAVY** — 7 1/2" MSRP \$329  
Case-hardened, walnut grip

**1851 NAVY SQUAREBACK** — 7 1/2" MSRP \$329  
Case-hardened, walnut grip

**1861 NAVY CIVIL BRASS** — 7 1/2"  
MSRP \$329  
Case-hardened, walnut grip

**1862 POCKET NAVY** — 5 1/2" MSRP \$349  
Case-hardened, walnut grip

*A rear view of the 1861 Navy's hammer and cylinder shows the frame cut-out and nipples in the rear of the cylinder that allows percussion caps to be seated.*

# New Army, Target Carbine and Police

**The Remington Arms Company began** production of the large frame .44-caliber, "Remington-Beals" revolver in 1861. The rugged, solid framed Remington quickly became popular and the improved New Army model was purchased by the U.S. Army in 1863. In the years following the Civil War, Remington manufactured a carbine version in small numbers.

Responding to civilian demand for pocket pistols, Colt designed scaled down versions of its 1851 Navy and 1860 Army revolvers, both chambered in .36 caliber. The Navy retained the larger pistol's octagonal barrel while the Police model featured a fluted cylinder.

*The 1858 New Army is offered with a stainless steel frame, cylinder, barrel, hammer and backstrap.*

**1858 NEW ARMY STAINLESS STEEL — 8" MSRP \$429**  
Stainless steel, walnut grip

*The 1858 New Army is fitted with a brass trigger guard on both the stainless and blued models.*

*The 1858 New Army features an octagonal barrel with a dove-tailed front sight and loading lever latch.*

*All of Uberti's revolver cylinders are machined so that the nipple recesses and cylinder notches are cleanly cut and precise.*

**1858 TARGET CARBINE** — 18" MSRP \$549  
Blued, walnut stock

**1858 NEW ARMY** — 8" MSRP \$349  
Blued, walnut grip

**1862 POLICE** — 5½" MSRP \$349  
Case-hardened, walnut grip

## *Army Conversion, Navy Conversion and Open Top*

The **Remington 1858 New Army Conversion** was among the first of the Civil War era percussion revolvers converted to fire metallic cartridges. The original cap-and-ball cylinder was altered or replaced by a cartridge cylinder with a loading gate and new breech face. In addition, the frames were dovetailed to permit the insertion of an ejector assembly. The earliest model, introduced by Remington in 1868, chambered five .46-caliber rimfire cartridges. Later, six-shot versions were chambered for .44-caliber centerfire rounds. These conversions were the predecessors of the 1858 New Army cartridge revolver.

In 1872, Colt entered the market for metallic cartridge revolvers by introducing their factory-installed percussion-to-cartridge open top conversion of the 1851 Navy cap-and-ball revolver, followed quickly by the Richards-Mason conversion of the 1860 Army the following year. Based on a patent held by Colt employees Charles Richards and William Mason, the old cap and ball cylinders were cut down at the back to allow the installation of a conversion ring to accept metallic cartridges.

In addition to civilian orders, Colt received an Army contract in 1871 to convert 1,000 Model 1860 Army percussion revolvers to use the .44-caliber centerfire cartridge being manufactured at the Frankford Arsenal. Eventually a total of 9,000 Open Tops and 2,100 Richards-Mason conversions were produced. Ultimately, thousands of the Colt and Remington converted percussion revolvers found their way into the hands of sheriffs, outlaws, gunfighters, soldiers, cowboys, miners and ranchers throughout the Old West.

*The frames on Uberti's conversion revolvers are retro-fitted with loading gates to accommodate cartridges, exactly like the originals.*

**1860 ARMY CONVERSION** — 5½" MSRP \$549  
Case-hardened, walnut grip

**1871-1872 OPEN-TOP** — 7½" MSRP \$519  
Late model  
Case-hardened, walnut grip

**1871-1872 OPEN-TOP** — 5½" MSRP \$499  
Early Model  
Case-hardened, walnut grip

**1858 NEW ARMY CONVERSION** — 8" MSRP \$529  
Blued, walnut grip

**1851 NAVY CONVERSION** — 7½" MSRP \$519  
Case-hardened, walnut grip

*The conversion revolvers were also fitted with ejector rods, a necessity for removing fired casings from the cylinder.*

*The 1860 Army Conversion revolver frames had to be fitted with spacers in order to function properly and safely with the shortened cartridge conversion cylinders.*

The Cattleman Frisco is a New Model (NM) revolver that features a color case-hardened frame, charcoal-blued barrel and cylinder and pearl-style synthetic grips.

# Single Action Cattleman

Not long ago, an employee at Colt was looking through old invoice files and found a special order for a Colt .45 "Peacemaker" with 4" barrel, nickel finish and ivory grips. The request was penned on stationery from the Long Branch Saloon in Dodge City, Kansas and the order was from lawman Bat Masterson. Uberti has recreated some of the special-order six-shooters that would have been right at home on the dangerous streets of Dodge City.

The 1873 Cattleman Gunfighter features checkered black grips and a matte-blued frame. Two favorite special orders in the Old West were for ivory grips and a nickel finish. The 1873 Cattleman Cody recreates that classic version and the "Frisco" celebrates the popularity of mother-of-pearl grips and custom metal finishes.

Uberti's Cattleman series of single-action revolvers utilize a six-shot cylinder, which is loaded by bringing the hammer back to the first notch and swinging the loading gate downward to allow access to the cylinder chambers.

The New Model (NM) Cattleman features an improved cylinder-pin retainer, which is spring-loaded making it much easier to release and remove the cylinder-pin.

**1873 CATTLEMAN CODY NM** — 5½"  
**MSRP \$789**  
Nickel, ivory-style grip

**1873 CATTLEMAN CHISHOLM NM** — 4¾"  
**MSRP \$539**  
Matte blue, checkered walnut grip

**1873 CATTLEMAN DESPERADO NM** — 5½"  
**MSRP \$789**  
Nickel, bison horn-style grip

**1873 CATTLEMAN FRISCO NM** — 5½"  
**MSRP \$789**  
Charcoal blue, pearl-style grip

**1873 CATTLEMAN GUNFIGHTER NM** — 4¾"  
**MSRP \$479**  
Matte blue, checkered black grip

# Single Action Cattleman

**"God made men, but Sam Colt made them equal,"** was a piece of frontier wisdom based on the formidable Colt .45 — the "Peacemaker." In 1873, Colt's Single Action Army revolver became the Army's standard sidearm. Cavalry troopers were armed with the new revolvers, lawmen and outlaws alike were quick to adopt the handy new six-shooter. The Colt Single Action came in many variations and Uberti has recreated the most popular models in the 1873 Cattleman series.

While the Single Action Army was most widely produced with a color case-hardened frame, a nickel-plated version was issued to Indian scouts. A bright "charcoal blue" finish was available from the factory, but with years of use the old six-guns took on a well-handled soft gray patina. All of these classic finishes are available in the 1873 Cattleman.

*The 1873 Cattleman revolvers are available in a variety of finishes:*

- 1 Blue with brass trigger guard & backstrap
- 2 Charcoal blue
- 3 Blue with steel trigger guard & backstrap
- 4 Old West finish
- 5 Full nickel plate
- 6 Stainless steel

**1873 CATTLEMAN NICKEL NM — 7½"**  
**MSRP \$609**  
Nickel, walnut grip

**1873 CATTLEMAN BRASS NM — 5½"**  
**MSRP \$489**  
Case-hardened, walnut grip

*The New Model (NM) Cattleman features a slightly higher fixed front sight and an oblong ejector-plunger grip, while the Old Model (OM) features a shorter front sight and a round ejector-plunger grip.*

**1873 CATTLEMAN HOMBRE NM — 4¾"**  
**MSRP \$429**  
Matte blue, walnut grip

**1873 CATTLEMAN STAINLESS NM — 7½"**  
**MSRP \$649**  
Stainless steel, walnut grip

**1873 CATTLEMAN CHARCOAL BLUE OM — 4¾"**  
**MSRP \$579**  
Charcoal blue, walnut grip

**1873 CATTLEMAN STEEL NM — 4¾"**  
**MSRP \$519**  
Case-hardened, walnut grip

*Uberti offers a variety of 1873 Cattleman single-action revolvers in .45 Colt, .357 Mag. and .44-40. The buyer can specify either the "Old Model" (OM) with a screw cylinder pin retainer (above left) or the "New Model" (NM) with a spring-loaded cylinder pin retainer (below left).*

**1873 CATTLEMAN OLD WEST OM — 5½"**  
**MSRP \$629**  
Old West, walnut grip

**1873 CATTLEMAN BISLEY — 7½"**  
**MSRP \$569**  
Case-hardened, walnut grip

## *Stallion, Bisley and Cattleman Bird's Head*

**The Colt 1873 Single Action Army** revolver was arguably the best-selling pistol ever produced. Colt single actions were manufactured in numerous calibers, including .22 L.R. The Colt Single Action in .22 caliber was very popular due to the cheap price of ammunition and light recoil in a full-sized revolver. The Stallion, which is a scaled down version of the Colt Single Action Army, is available in both .22 L.R. and .38 Special.

*The Bisley was designed as a target pistol and features a longer grip-frame and a wide, lower profile, target hammer.*

The Colt Bisley was designed as a target pistol to compete at the British Commonwealth Championship Match in Bisley, England in 1894. The Bisley featured a longer grip-frame for its target grips and a wide target hammer with a lower profile. Over 40,000 Colt Bisleys were made between 1894 and 1915.

A "Bird's Head" grip was not a new design; it had been used on Colt derringers since the 1850s. In 1877, Colt introduced full-sized six-guns called the "Lightning" and "Thunderer." The Old West cowboys, however, just called them "Bird's Head Colts."

**1873 STALLION STEEL TARGET — 5½"**  
**MSRP \$499**  
Case-hardened, walnut grip

**1873 STALLION BRASS — 5½"**  
**MSRP \$429**  
Case-hardened, walnut grip

**1873 CATTLEMAN NM BIRD'S HEAD NM — 4 3/4"**  
MSRP \$539  
Case-hardened, walnut grip

*The Cattleman Bird's Head sports a distinctive grip that resembles the shape of a bird's head. The design had originally been used on Colt derringers back in the 1850s.*

**1873 CATTLEMAN BIRD'S HEAD OM — 3 1/2"**  
MSRP \$539  
Case-hardened, walnut grip

**1873 CATTLEMAN BIRD'S HEAD NM — 4"**  
MSRP \$539  
Case-hardened, walnut grip

## *Revolver Carbine and Buntline*

Legend has it that dime novelist, Ned Buntline presented special order Colt revolvers with long barrels and detachable shoulder stocks to Wyatt Earp, Bat Masterson and other noted Old West celebrities. Based on this story, the long-barreled "Peacemakers" with their special target sights came to be called "Buntline Specials." Only 31 of the distinctive Buntline Specials were ever produced and only 18 of them still exist today, however, the Uberti Buntline is available at your local dealer.

Revolving rifles and carbines were among the first effective repeating rifles. Models produced by Colt were carried in the Mexican War and the Apache wars of the Old Southwest. Despite the popularity of the new lever-action rifles in the Old West, many manufacturers continued to offer special-order "carbine" versions of their popular single action revolvers. The Revolver Carbine is available with an 18" barrel in .45 caliber.

*The 1873 Buntline Target single-action revolver sports an 18" barrel and comes with an angled front target sight and an adjustable, notched rear blade sight.*

**1873 BUNTLINE TARGET — 18" MSRP \$639**  
Case-hardened, walnut grip

*Traditional field sights.*

**1873 REVOLVER CARBINE — 18" MSRP \$729**  
Case-hardened, walnut stock

## *Outlaw, Frontier and Police*

**Keeping the solid frame and overall styling** of their 1858 percussion model, Remington jumped into the cartridge revolver market in 1875, introducing a pistol to compete directly against the Colt "Peacemaker." Ordinary citizens, outlaws and Old West lawmen alike recognized the sturdy quality of the new Remington; even Frank James carried one for much of his outlaw career. As faithful reproductions, the 1875 Outlaw and Frontier revolvers are both available in Frank's favorite caliber, .45 Colt.

Built from 1890 to 1896 in very small numbers, the Remington 1890 Police is one of the most prized cowboy revolvers among Old West collectors. Of the less than 2,000 produced, only a few Remington 1890s ever saw service as police revolvers and those primarily as sidearms for Indian police on western reservations. The 1890 Police is chambered in .357 Magnum and .45 Colt and comes complete with a lanyard ring just like the original.

*The 1875 Army Outlaw embodies the overall styling of the original Remington 1858 percussion revolver complete with bottom blade.*

*The 1890 Police is chambered in .357 Magnum and .45 Colt and like the original, it comes complete with a lanyard ring.*

*The 1890 Police, styled similar to the Colt by eliminating the bottom blade, was Remington's offering to enter the lucrative single-action revolver market.*

**1875 ARMY OUTLAW** — 7½" MSRP \$539  
Case-hardened, walnut grip

**1875 ARMY OUTLAW** — 7½" MSRP \$629  
Nickel, walnut grip

**1890 POLICE** — 5½" MSRP \$549  
Blued, walnut grip

**1875 FRONTIER** — 5½" MSRP \$539  
Case-hardened, walnut grip

## *Engraved Top Break*

Uberti's hand-engraved **Top Break models** come adorned with intricate engraving and beautiful pearl-styled grips. Also included with the engraved Top Breaks is a set of AAA-Grade walnut grips.

The highly polished, nickel-plated version sports generous scroll engraving on the barrel, cylinder and frame, while the blued version is embellished and enhanced with elaborate gold inlays that accentuate the Top Break's frame and cylinder.

The Engraved Top Breaks, previously only available through select World Class Collection™ dealers, are offered in .45 Colt. These elegant revolvers add the element of beauty to reliable function in an historically tried and proven design that was used by the likes of Jesse James, John Wesley Hardin, and Wild Bill Hickok.

**ENGRAVED TOP BREAK — 7"**  
**MSRP \$3,139**  
 Blued — with pearl-style grip

**NEW**

*The blued version of the Engraved Top Break embodies the elegant look of high-polish, deep-blue metal work. Hand engraved and with gold inlays, it provides a stunning appearance when matched with the pearl-style grips.*

**ENGRAVED TOP BREAK — 7"**  
**MSRP \$2,999**  
 Nickel — with AAA-Grade walnut grip

**NEW**

*This version of Uberti's Engraved Top Break comes in a high-polish nickel finish with high-grade walnut grips and an extra set in pearl-style synthetic grips. For the ultimate embellishment, the metal is generously hand-engraved with fine, ornate scroll work.*

**NO. 3 — NEW MODEL RUSSIAN — 6½" MSRP \$1,049**  
Blued, walnut grip

## *Top Break*

**Designed by Major George Schofield** as a cavalry pistol, the efficient break-open design could be operated one-handed, ejecting all six spent cartridges and providing easy access for reloading while on horseback. While the U.S. Cavalry was slow to see its merits, others such as Jessie James, John Wesley Harden and Wild Bill Hickok saw the Top Break's fast reloading capability as a distinct advantage in their line of work. After numerous trials, the U.S. Army finally purchased 3,000 Top Breaks with an improved top latch, but it was the Russian government that really embraced the new sidearm. With a modified grip design, lanyard ring and the addition of a distinctive trigger spur, the Czar ordered 41,000 of the new revolvers. True to the originals, Uberti Top Breaks come in three models including the Russian Model with Cyrillic barrel stampings. Chamberings include .38 Special, .45 Colt and of course the old tried and true 44/40. The New Model Russian is chambered in .45 Colt and .44 Russian.

*The Top Break features an automatic cartridge extractor, which greatly aids in discharging empty cartridges. This feature added to its appeal as a cavalry sidearm.*

*The sturdy, stirrup-style top latch on the second model revolver ensured a firm lock for the Top Break design.*

**NO. 3 — 2ND MODEL — 7" MSRP \$999**  
Blued, walnut grip

**NO. 3 — 2ND MODEL — 7" MSRP \$1,369**  
Nickel, pearl-style grip

**NO. 3 — 2ND MODEL — 5" MSRP \$999**  
Blued, walnut grip

**NO. 3 — 2ND MODEL — 3 1/2" MSRP \$999**  
Blued, walnut grip

## 1860 Henry

**B. Tyler Henry of the New Haven Arms Company** introduced a lever-action repeating rifle the year the Civil War began. Only 1,700 Henry rifles were issued to Union troops, but as the Henry's reputation grew Southerners dubbed it "that tarnation Yankee rifle that they load on Sunday and shoot all week." After the war, the Henry went West and there was more than one Henry rifle in the fight at the Little Big Horn, but unfortunately for Custer, all of the Henrys were used by Indians. The early bronze-framed Henrys were followed by more rugged iron-framed models. Uberti offers two brass-framed, one iron-framed and one steel-framed Henry. All are chambered in .44/40 and .45 Colt (iron-frame in .45 Colt only).

*Uberti's 1860 Henry sports a distinctive solid brass receiver.*

*Uberti's 1860 Henry is true to the original by featuring a lever lock located at the rear of the lever, and a convenient external cartridge follower, which aids in loading the tubular magazine.*

**1860 HENRY TRAPPER** — 18½" MSRP \$1,329  
Brass, A-Grade walnut

**1860 HENRY RIFLE** — 24¼" MSRP \$1,329  
Brass, A-Grade walnut

**1860 HENRY RIFLE STEEL** — 24¼" MSRP \$1,419  
Case-hardened, A-Grade walnut

**1860 HENRY RIFLE IRON FRAME** — 24¼" MSRP \$1,419  
Blued, A-Grade walnut

# 1866 Yellowboy

The **1866 Yellowboy** was a marked improvement over the old Henry. Winchester's plant superintendent, Nelson King, devised a convenient loading gate that passed cartridges through the side of the receiver. This not only made the new rifle more functional, but also allowed for the installation of a wooden fore-end. The handy carbine version of the 1866 Yellowboy was the first true cowboy lever-action rifle and was the first rifle widely carried in a cowboy-style saddle scabbard.

The new 1866 Yellowboy was a hit worldwide. Chief Sitting Bull had an 1866, Benito Juarez's forces used Yellowboys in Mexico and the Turkish army used the new Winchester against the Russians. Uberti has recreated three of the most popular models: the Yellowboy Carbine with a 19" barrel and carbine style brass buttplate. The Yellowboy Rifle with 24¼" barrel and Short Rifle with 20" barrel, both with a brass fore-end nose cap and a solid brass crescent buttplate.

*Uberti's 1866 Yellowboy lever-action rifle features a side loading gate—one of the major improvements over the 1860 Henry.*

*Another improvement is the addition of a satin walnut fore-end, which is embellished with a brass fore-end cap.*

**1866 "YELLOWBOY" CARBINE — 18½" MSRP \$1,079**  
Brass, A-Grade walnut, round barrel

**1866 "YELLOWBOY" SHORT RIFLE — 20" MSRP \$1,129**  
Brass, A-Grade walnut, octagonal barrel

**1866 "YELLOWBOY" RIFLE — 24¼" MSRP \$1,129**  
Brass, A-Grade walnut, octagonal barrel

## 1873 Rifle and Carbine

**Winchester's Model 1873 was the "Rifle that Won the West."** The Model 1873 was chambered in a new more powerful cartridge, the .44/40 — a .44 caliber bullet propelled by 40 grains of black powder. However, one big factor that really insured the success of the 1873 was that Colt quickly responded by offering its frontier six-shooter chambered in .44/40. A cowboy could have both a lever action rifle and his "Peacemaker" and only need one cartridge belt.

Buffalo Bill Cody carried an 1873 and a pair of Colts chambered in .44/40 in 1876 when he worked as an Army scout. Chappo, son of Apache war chief Geronimo packed an 1873, as did most Texas Rangers along with every Old West cowboy worth his salt. Uberti has recreated the 1873 in five distinctive models including the 1873 Carbine and the Special Sporting Rifle.

*Chambered for the then new .44/40 cartridge, the 1873 lever rifle featured a side-loading gate for easy loading of its tubular magazine.*

*Like the 1860 Henry, the 1873 lever rifle also included a lever lock to insure the lever remained securely in place.*

**1873 SPECIAL SPORTING RIFLE — 24¼" MSRP \$1,379**  
Case-hardened, A-Grade walnut, octagonal barrel

**1873 CARBINE — 19" MSRP \$1,199**  
Blued, A-Grade walnut, round barrel

**1873 SHORT RIFLE — 20" MSRP \$1,249**  
Case-hardened, A-Grade walnut, octagonal barrel

## 1874 Sharps

**Christian Sharps' original design**, patented in 1848, was loaded with a linen cartridge and percussion primer. The sturdy action was faster and easier to load than a conventional muzzleloader and the first military order for 900 Sharps rifles came from the U.S. Navy in 1859. That same year John Brown's raiders carried Sharps carbines at Harper's Ferry. When the Civil War began, orders flowed in for carbine versions for issue to the cavalry.

After the war Sharps rifles, adapted to fire metallic cartridges, were used by the American Rifle Team to win the first international long-range rifle match at Creedmore, New Jersey. By the late 1870s and early 1880s, the long-range models became the favorites of professional buffalo hunters. These heavy barreled Sharps could be employed at long range to

## 1874 Sharps

*Intricate engraving adorns the Uberti Sharps Extra Deluxe rifle, which includes a beautifully detailed side-view of a bison and a bison's head. The rifle's buttstock and fore-end are fashioned from the finest AAA-select walnut.*

take selected buffalo without spooking the herd. In 1874, more than 700 Comanche warriors attacked 30 buffalo hunters at Adobe Walls in the Texas panhandle. The hunters' Sharps rifles had extracted a punishing toll by the second day and the only Indians in sight were a small group on a distant bluff. Hunter Billy Dixon took aim with his Sharps and rolled one of the braves from his saddle at, what legend has it, was a mile away. Chambered in classic .45-70, the Uberti Sharps is true to the original. Six models are available ranging from the "Long-Range Model," with 34" half-octagon barrel, Creedmore sight and double set-triggers, to the Sharps Hunter with fiber optic sights. Previously offered only through select World Class Collection™ dealers, this year Uberti offers the hand-engraved, Extra-Deluxe version of the Sharps with elegant gold inlays and select AAA-Grade walnut stocks.

*The Creedmore tang sights used on Sharps rifles were of three heights, depending on the yardage. The lowest, short-range sight was good to 300 yards, mid-range to about 600 yards and the long-range, to 1,200 yards and beyond.*

*All models of Uberti's 1874 Sharps rifles, excluding the Cavalry Carbine, feature double set-triggers, allowing the front trigger to be set to a very light pull-weight—an aid to accurate shooting.*

**SHARPS EXTRA DELUXE — 32" MSRP \$4,199**  
AAA-Grade satin walnut

**NEW**

**DELUXE SHARPS — 34" MSRP \$2,749**  
Case hardened, AA-Grade walnut, octagonal barrel

Case hardened, A-Grade walnut, octagonal barrel

*The top tang on the Sharps receiver is drilled and tapped to accommodate the attachment of a Creedmore rear sight.*

*Uberti's 1874 Deluxe and "Long-Range" Sharps feature 34" barrels with a dovetailed front globe sight to be used in conjunction with a rear tang-mounted Creedmore sight.*

*The receiver on Uberti's 1874 Deluxe Sharps, single-shot .45-70 rifle is color case-hardened and embellished with a gold-engraved bison head.*

*Loading the Lightning's magazine is safe and easy as it is done with the action open.*

## *Lightning*

The **Colt Lightning rifle**, introduced in 1884, was chambered in .44-40, the most popular pistol round offered for Colt's 1873 single action revolvers. Colt followed with Lightnings in three different frame sizes to accommodate a wide range of cartridges from .22 caliber up to .50-95 Express. More than 185,000 Lightning Rifles were manufactured, but there hasn't been a new one made since 1904 — that is until now.

The Lightning Rifle by Uberti is an exact replica of the original Colt Lightning, but by using modern steel and manufacturing techniques, the Uberti Lightning will safely stand up to modern ammunition. The Lightning Rifle is available in .45 Colt or .357 Magnum, all with luster finished satin walnut stocks and a choice of blued or color case-hardened receivers. When it comes to speed it can still beat any Winchester — or, as Sam Colt used to put it, “nothing is faster than Lightning.”

*The Lightning's short, hand-conforming fore-end features cut-checkering for a positive gripping surface during speed cycling.*

**1875 LIGHTNING RIFLE** — 24 $\frac{1}{4}$ " MSRP \$1,259  
Case-hardened, A-Grade walnut, octagonal barrel

**1875 LIGHTNING CARBINE** — 20" MSRP \$1,179  
Blued, A-Grade walnut, octagonal barrel

**1875 LIGHTNING SHORT RIFLE** — 20" MSRP \$1,259  
Case-hardened, A-Grade walnut, octagonal barrel

*The Lightning's full-length tubular magazine reaches to the muzzle of the octagonal barrel. A front blade sight is dovetailed into the top of the muzzle.*

# Springfield Trapdoor

In 1873 the Army's Allin Trapdoor rifle was redesigned for the new more powerful .45-70 military cartridge and both full-stocked 32" barreled rifles and half-stocked short-barreled carbines were produced for the military. It was with their new 1873 Trapdoor Carbines that Custer and the 7th Cavalry rode off to the Little Big Horn and into the pages of history. The Trapdoor was also very popular with many famous Indian warriors. Sitting Bull was carrying a Trapdoor Carbine that was probably picked up at the Little Big Horn when he surrendered to American troops. Geronimo was also carrying his faithful Trapdoor Carbine when he turned over his arms to General Miles in 1886. Along with seeing service on both sides during the Indian Wars in the American West, the Trapdoor was used widely by American Troops during the Spanish American War, both in Cuba and the Philippines.

*This top view of the Springfield Trapdoor's receiver shows the hinged and arched breechblock pivoted forward for loading.*

*The Springfield Trapdoor Carbine is fitted with a sliding ring and bar, which allowed a cavalryman to carry it clipped to his carbine sling.*

**SPRINGFIELD TRAPDOOR CARBINE — 22" MSRP \$1,429**  
Blued receiver and barrel, case-hardened buttplate

**SPRINGFIELD TRAPDOOR ARMY RIFLE — 32 1/2" MSRP \$1,669**  
Blued receiver and barrel, case-hardened buttplate

## 1876 Centennial Rifle

The 1876 rifle features a side-loading gate for easy loading of its tubular magazine.

The 1876 rifle includes a lever lock to ensure the lever remains securely in place.

**1876 CENTENNIAL RIFLE** — 28" .45-60 MSRP \$1,569  
Case-hardened, A-Grade walnut, straight stock

**NEW**

In 1876 Winchester introduced a new lever-action rifle; they called it the “Centennial Rifle” in commemoration of the United States’ 100th anniversary. Winchester’s Model 1876 was discontinued in 1898, after 63,871 guns had been produced. For 2008, 132 years after the first 1876 Rifle was produced by Winchester, Uberti introduces an exact replica of the Winchester “Centennial Rifle.” True to the original, Uberti’s 1876 Rifle is chambered in the hard-hitting calibers: .45-60, .45-75, .50-95 and .40-60—strong enough to take down North America’s largest big-game animals. It also comes with a 28” octagonal barrel, fully-adjustable sights, color case-hardened receiver and A-Grade walnut straight stock and fore-end.

Favored by the likes of Theodore Roosevelt, the 1876 “Centennial Rifle” was the king of its day. Uberti has brought this legend back to life, only better than before. Better, stronger materials and more precise machining, enables Uberti to replicate the original model to more exacting tolerances and specifications, making it stronger and more accurate with today’s modern smokeless and blackpowder ammunition. When you pick up an Uberti, you’re holding history in your hands!

*The 28" barrel sports a Buckhorn adjustable rear sight and a blade front sight.*

# 1885 High-Wall

Designed by **John Browning**, the Winchester High-Wall single-shot rifle began life at the end of the buffalo hunting era and made a name for itself in the golden age of target shooting. In the late 1800s, long-range rifle shooting competition was an international sport that was widely followed in the United States. The biggest target event was the United States National Match held in Creedmore, New Jersey.

Although there were many brands of rifles used at these matches, special target rifles with their tall Vernier tang sights, all became known as "Creedmores." Uberti makes three models of the 1885 High-Wall, chambered in the classic buffalo cartridges — .45-70, .45-90 and .45-120, just like the originals. With an 1885 High-Wall you can relive a time when rifle shooting was more than just a past time — it was a business.

Uberti's 1885 High-Wall single-shot rifles include a breakdown cleaning rod that fits in a compartment located in the buttstock.

Uberti's accessory sights include a Creedmore style (A) and a Lyman Style (B). Both are tang mounted rear sights that come complete with tunnel front sights. The Creedmore sight fits the 1885 High Wall rifle while the Lyman sight is for the 1873. (1873 rifles will need to be drilled and tapped to accept a rear tang sight).

The .45-70 Government (left) got its name from the 45-caliber bullet with a cartridge case holding 70 grains of black powder adopted by the U.S. Military in the 1870s. The .45-90 (center) held 90 grains of black powder and the buffalo hunter's favorite, the .45-120 (right) held a whopping 120 grains of powder.

The 1885 High-Wall's loading lever (left), opens or locks the rifle's falling-block action (left center).

The front sight of the High-Wall Sporting model is dovetailed into the octagonal barrel and can be drifted for windage.

**1885 HIGH-WALL SINGLE-SHOT SPORTING RIFLE — 30" MSRP \$1,029**  
Case-hardened, A-Grade walnut, octagonal barrel

**1885 HIGH-WALL SINGLE-SHOT SPECIAL SPORTING RIFLE — 32" MSRP \$1,179**  
Satin walnut — with checkered pistol grip, octagonal barrel.

**1885 HIGH-WALL SINGLE-SHOT CARBINE — 28" MSRP \$969**  
Satin walnut — with straight stock, round barrel.

# Accessories

In 1827, Jim Bowie was attacked by four men in the famous Sandbar Fight. He was shot, stabbed and beaten over the head with a club. Bowie, armed only with a big knife given to him by his brother Rezin, killed one and severely wounded two of the attackers and the legend of the Bowie knife was born.

New this year, Uberti offers a leather rifle case that fits all Uberti rifles. Also available are nipple kits with wrenches for all blackpowder revolvers.

The Creedmore tang sights used on Sharps rifles were of three heights, depending on the yardage. The lowest, short-range sight was good to 300 yards, the mid-range to about 600 yards and long-range to 1,200 yards and beyond.

At very long range, with the rear sight elevated nearly to its limit, it was important to keep the rifle completely level to maintain accuracy. Consequently, front globe sights were often fitted with a spirit level so that the shooter could see that the bubble was centered and the gun was level before he touched the trigger.

## Dan Deuter

### Artist, Hunter and Gun Collector

Dan grew up on horseback on his family's cattle ranch in South Dakota.

His love of the Old West is portrayed in his way of life, as well as in his paintings. Each piece of artwork is researched for authenticity. If you are interested in any of the paintings in this catalog or would like to see other available works, please contact Dan at [dandeutersoldwest@montrose.net](mailto:dandeutersoldwest@montrose.net)
