## How to use this Catalog

In an effort to make this catalog as user friendly as possible, the specifications for each case have been included in this catalog with each model number. Americase offers over 140 standard models that are tailored to fit a diverse set of firearms, or combination of firearms and accessories. To ease the selection process, these products are listed in categories, which are marked by the title at the top of each page and by the colored tabs on the side of each page. This catalog features four product lines offered by Americase, which are summarized in the following five pages. It is important to know some of the differences and limitations of each product line when comparing products, and especially when contemplating the design of a custom case.

The specifications given for each case include the exterior case dimensions and the interior dimensions of each compartment. For instance, the **maximum** barrel and stock compartment measurements are given for all velvet shotgun cases to ensure that your equipment will fit inside these measurements. If it does not, a different model or a custom-built case will accommodate your needs. Standard Americase models are designed to fit the standard range of gun sizes. Actual compartment sizes will vary, but should not be less than the specified size. Remember that Americase specializes in custom cases as well, so don't be deterred if you can't find what you need.

## Frequently Asked Questions

**"Can I fly with my Americase?"** Yes, these cases are designed with the airlines in mind. You should, however, expect minor scratches and dents. Any damaged hardware can easily be replaced.

**"Is my Americase unbreakable?"** No, occasionally shippers subject them to unreasonable stresses (i.e. run over or through by a forklift, dropped from an unreasonable height, etc...).

**"Is my Americase covered by warranty?"** Yes, but do not confuse insurance claims with warranty claims. Please see back cover for warranty information.

**"Are the locks tamper proof?"** Within reason, we use the finest hardware available. If a thief wants what's in the case, they could simply take the entire case.

**"Is an Americase waterproof?"** They are not submergible, but extremely resistant to rain.

**"Will the interior of my case always remain dry?"** Unfortunately steel guns tend to produce slight condensation when changing temperatures. However, normal care of your gun should prevent damage.

**"If I have a special situation, can I get a custom case?"** Americase specializes in quality service for all of your case needs. Custom fabrication is available for practically any situation.

**"How many guns can I fly with?"** It varies per carrier. Contact your airline about any restrictions and other policies they may have regarding traveling with firearms.

## Product Lines At-A-Glance

Americase Inc. designs and manufactures commercial duty carrying cases utilizing anodized extruded aluminum, the finest hardware available, and other high quality materials. This combination of materials and Americase engineering yields products with a high strength-to-weight ratio. Americase products are designed for personal travel, air travel, or shipping by common carrier.

---

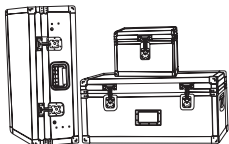

Superior craftsmanship and only the finest quality hardware and materials make Americase Premium among the most indestructible cases on the market. These handsome cases are easily adaptable and can be built to almost any length or width. A sturdy, anodized aluminum frame and extremely strong side panels yield a case that resists warping and dents. Closure of the case engages the wedge-lock gasket system, which seals out dust and resists water. The versatility, aesthetics, strength and durability of this line truly make it a Premium product.

Don't let the good looks of the Ameri-Lite products fool you. These anodized, all-aluminum cases with rounded corners are extremely lightweight and surprisingly strong. This sleek looking line of cases is well suited for an abundance of uses. Ameri-Lite cases are produced in a variety of sizes and interiors. The finest hardware, a protective continuous bumper on all sides, and quality materials combine to make Ameri-Lite a dependable line.

Aluma-Trans adds to the multitude of products manufactured by Americase with its extreme versatility in custom designs and sizes. Aluma-Trans cases are constructed of mill-finished aluminum and industrial quality hardware. The high security locks used on this line are the most secure of any commercially manufactured carrying case. This advanced construction yields a case that is virtually impenetrable. This line was designed with adaptability, strength and protection in mind. Lightweight and with recessed hardware, Aluma-Trans meets the quality standards required of all Americase products.

Ameri-Flite is designed to meet A.T.A. 300 specifications as a reusable shipping container. This heavy-duty case is engineered to withstand the punishment of shipping and other transportation. Manufactured with only superior materials and the best industrial hardware available, Ameri-Flite achieves extremely high structural integrity and content protection. The unique design and construction of this line distributes the shock of an impact evenly over the entire case rather than at the point of impact, producing a durable case with unmatched longevity. No other case on the market exceeds the value of Ameri-Flite.

### Product Lines

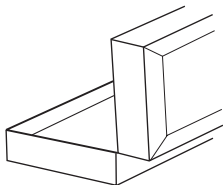

Americase Premium is one of the most indestructible cases on the market. Its frame design, wall construction, hardware, and craftsmanship make this case both attractive and long lasting. As with all Americase products, Americase Premium utilizes the finest hardware available, including full-length industrial piano-type hinges. Premium cases are easily adaptable and can be built to almost any length or width. Also, by combining different sizes of top and bottom profiles, an outside depth dimension of 3 1/2", 4 1/2", 5", 6 1/2", 8", or 9 1/2" can be obtained. The anodized aluminum extrusions are mitered, joined together with aluminum angle inserts, and then internally welded. This sturdy frame is built around Phenolic Resin Composition and Duron side panels, giving these cases superior resistance to warping and dents. The vinyl seal in the bottom valance (see cross section) locks the top and bottom together when the case is latched, sealing out dust and resisting water. Custom interiors and sizes are available.

Valance with vinyl seal assures a dust-proof, water-resistant seal.

50% over 50%

Ameri-Lite is an anodized, all-aluminum case which utilizes an extruded frame that is formed to give the case rounded corners. A continuous bumper on all sides protects the case as well as the surface on which it rests. These cases are fitted with the same heavy-duty hardware as Americase Premium cases, but without the combination lock. The sleek looks and lighter weight of Ameri-Lite make it a good choice for many applications. By combining different sizes of top and bottom profiles, an outside depth dimension of 3 1/2", 5", 6 1/2", or 9 1/2" can be obtained. Ameri-Lite is available in about twenty stock sizes with various interiors, or can be built to your specifications on quantity orders. The vinyl seal in the bottom valance (see cross section) locks the top and bottom together when the case is latched, providing an extremely durable product.

Valance with vinyl seal assures a dust-proof, water-resistant seal.

## Product Lines

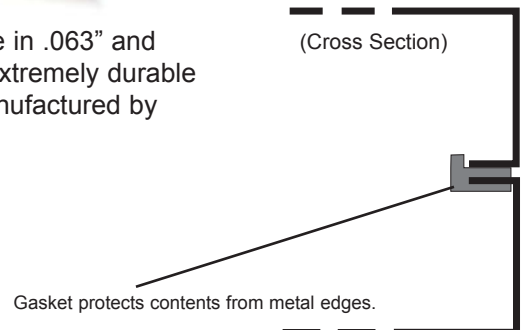

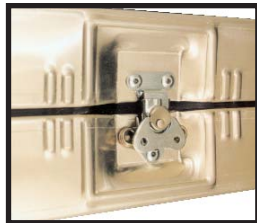

### Construction

Aluma-Trans cases are constructed of mill-finished aluminum sheets, available in .063" and .080" thickness, which are cut to size and then TIG welded. This produces an extremely durable case that is very lightweight. Aluma-Trans adds to the multitude of products manufactured by Americase with its extreme versatility in custom design and sizes.

### Recessed Hardware

Recessed hardware (shown below) streamlines the case and helps prevent the handles and latches from snagging other objects, reducing the chance of damaging the case hardware or other objects. Industrial strength twist cam-latches and spring-loaded handles are standard on all Aluma-Trans products.

### Improved Gasket

The Santoprene Gasket System was designed with protection in mind. Its extra thickness makes a more complete seal for the entire life of the case. Most importantly, it was designed to cover the sharp edges of the lip (see cutaway), preventing the contents of the case from ever touching the metal edges. The wrap-around feature will hold the seal in place, even if the adhesive fails.

### High Security Cylinder Key Lock System

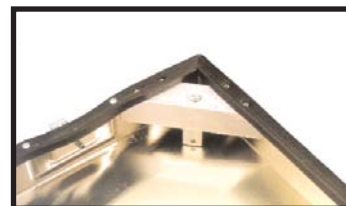

The recessed cylinder lock uses a threaded shaft to secure the case tightly closed, maintaining tight closure even if the latches are open. The threaded receiver is mounted internally in a manner that prevents tampering. This advanced construction makes the case virtually impenetrable. This type of locking system is the most secure of any commercially manufactured carrying case.

Cylinder Lock and Key

Threaded Shaft

Spring-Loaded Receiver

## Custom Interiors

Custom interiors are available for all applications, including secured or removable partitioning dividers, rack-mounting, vacuum molding, die-cut foam, permanent or removable drawers and shelving, or whatever is necessary to satisfy the use of the case.

## Insurance Worth Counting On

Ameri-Flite is engineered and manufactured to withstand and insulate your equipment from the punishment of shipping or transportation. Ameri-Flite meets the specifications for A.T.A. 300 categories 1 and 2 as well as Department of Transportation (DOT) certification UN 1072 for Hazardous Materials transportation. Ameri-Flite cases are finished with the highest quality industrial hardware available, including recessed cam-type twist latches, recessed handles, full-length piano-type hinges, and zinc-plated steel corners.

## Best Value

No other case on the market exceeds the value of an Ameri-Flite product. Each case is custom designed and built to meet rigorous production and industry standards.

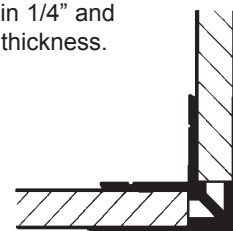

## Quality Construction

The attractive exterior of Ameri-Flite consists of Phenolic Resin Composition, Fiberglass, ABS polyethylene, or Aluminum which is laminated to American-made plywood. The highest structural integrity is achieved by the use of double tongue-and-groove valance and double-angle corner extrusions (shown right). Ameri-Flite features aluminum extrusions of 6063 alloy, tempered to T5. As a result of this unique design and construction, the shock of an impact is evenly distributed over the entire case rather than at the point of impact.

(Cross Section)  
**Double Tongue-& Groove Valance**  
Produces secure closure of the case.

Available in 1/4" and 1/2" wall thickness.

(Cross Section)  
**Double-Angle Corner Extrusion**  
Forms the edges of all sides of the case.

Foam between rifles.

## Rifle Cases

### Safari Style Rifle Cases (2, 3, or 4 Rifles)

The Americase Safari Style Rifle cases are designed for maximum protection and functionality. The bottom of each rifle compartment is contoured to fit the underneath side of the rifle (under the action and scope), supporting the heaviest part of the rifle, rather than just under the end of the barrel and stock. Additionally, the rifles are secured to the bottom of the case by compartments or blocks in the lid when the case is closed. This prevents the rifles from ever resting on their scopes -- a must-have, and a sure thing with an Americase.

#### 4008

#### Three Gun Safari

Available in .063" & .080" aluminum.  
Grey carpet interior.

Recessed heavy-duty industrial-grade hardware!

Heavy-duty built-in wheels and tow handle!

## Accessories

### Detachable Wheel Kits

Stock # 807

Weight: 2 lbs.

Size: Fits on all cases.

Please specify for Premium or Ameri-Lite Product Line.

Wheel Kits are attached to the case with velcro, making it very secure but still removable at the airport for shipping.

**NOTE:** Case Covers must be modified to be used in conjunction with a wheel kit. The proper velcro will be sewn both on the inside and the outside of the case cover, ensuring that the wheels will remain sturdy when attached. This modification must be done while the cover is at Americase.

A different handle for the wheel kit is used when a cover is also ordered. This flat steel strap covered by durable rubber is extremely easy to use and can stay permanently attached to the case.

### Cordura Case Covers

No zippers that can be damaged!

These 1000 Denier Cordura Case Covers are attached to the case with velcro, allowing you to open the case easily and without removing the cover. **(No zippers that can break or hang up!)** The full wraparound design is double reinforced at the wear-and-tear points. These innovative covers serve as great protection and a valuable disguise for your Americase.

Cover stays on case while opening!

Embroider your name and address!

Attache Handle used with wheel kit and case cover combination.

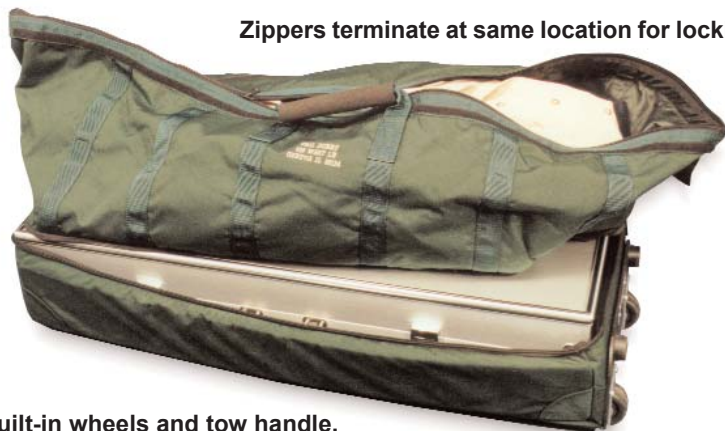

Attache Handle is concealed under end flap when not in use.

## Accessories

### The Incognito Duffel and Gun Case

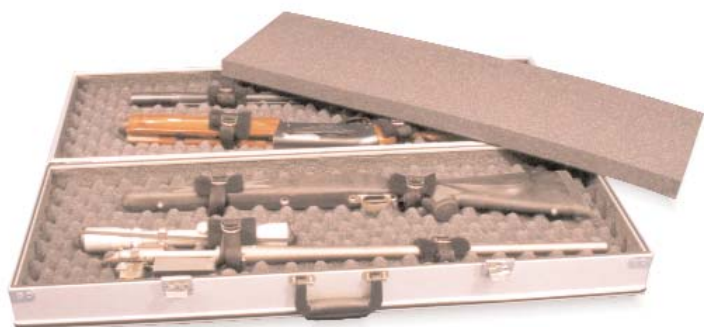

The Incognito by Americase is the travel bag of choice for hunters and shooters that must travel public airlines. The design of the Incognito deters thieves by disguising gun cases to look similar in style to a nice garment bag. The duffel bag utilizes either the shooter's existing gun case or the Ameri-Lite Companion Case specially designed for the Incognito. As a heavy duty, easy-to-handle bag, the Incognito boasts industrial strength wheels and a padded handle, providing an efficient built-in dolly. The outer shell of the Incognito is 1000 Denier Cordura, a more waterproof and less expensive product than canvas.

Zippers terminate at same location for locking.

Built-in wheels and tow handle.

Gun case in the bottom, luggage in the top.

#### Ameri-Lite Companion Case

Not Sold Separately

##### Long

Stock # ACCL  
Weight: 18 lbs.  
Size: 39" x 13 1/2" x 6 1/2"  
Two pumps, autos, and/or rifles taken down.

##### Short

Stock # ACCS  
Weight: 16 lbs.  
Size: 32 1/2" x 13 1/2" x 6 1/2"  
Two shotguns 30" barrels or take down rifles.

#### Incognito Duffel Bag

##### Long (38")

Stock # INCOGL  
Weight: 15 lbs.  
Size: 41" x 16" x 19"

Quality Carrying Cases Since 1985

## The Americase Story

In 1985, Mr. Bill Kinsala, founder and president, started a company whose very foundation would rest on creating quality carrying cases by a commitment to value, functionality and craftsmanship. Beginning in a small garage in his home town of Waxahachie, Texas, and with the initial capital from savings, he launched a company that was to grow to a 30,000 square foot office and manufacturing facility. Of course, shooting remains a cherished hobby; after all, that's why Americase exists. With the help of his son Rob, and the rest of the Americase family, Bill continues to capitalize on his engineering and entrepreneurial skills in the manufacturing of quality carrying cases that set the standard in their respective industries. Americase is the Original Equipment Manufacturer of many well-known brands, and is trusted by prestigious companies such as: BERETTA, BRILEY, BROWNING, COLT, DUCKS UNLIMITED, H & K, KDF, KOLAR ARMS, KRIEGHOFF, QUAIL UNLIMITED, REMINGTON, SIG ARMS, THE UNITED STATES GOVERNMENT, WINCHESTER, and other companies worldwide.

## The Americase Philosophy

The Americase philosophy is to supply the highest quality materials, construction and design in order to create value, functionality and craftsmanship in every Americase product. The Americase quality level is maintained at any cost. Thousands of satisfied Americase customers, having traveled millions of miles, are the ultimate test and proof of durability. The dedicated and experienced Americase employees supply the expertise to produce excellent products on a timely basis. This combination is what makes Americase, America's case company.

Americase is an Equal Opportunity Employer.

## **AMERICASE WARRANTY & SERVICE**

Americase Incorporated, hereby does grant and warrant all of its cases to be free from defects in materials and workmanship for a period of one year from the date of purchase. This warranty is granted to the original purchaser only and is non-transferable.

In the event of a defect, the case will be repaired or replaced without charge at the discretion of the manufacturer. A case being returned to the factory must be shipped freight prepaid and wrapped or boxed sufficiently as to protect the case from any further damage while in transit.

This warranty does exclude exterior finish, normal wear, and any and all damages due to abuse or damages which might occur in the event that the case is used outside of its original design.

**Please do not confuse the manufacturer's warranty with a carrier's liability. Carriers and airlines occasionally put containers in situations beyond reasonable care and handling. If damage occurs during transportation, it is the owner's responsibility to file a claim with the carrier.**

Repair parts and services are available for almost any type of damage. Your case may simply need a "tune-up" before going back into service for another ten years. You can benefit from this service at most major sporting conventions and clay target competitions, or year-round by contacting Americase.

Americase assumes no liability at any time for products or merchandise contained in a case. This warranty grants to the original purchaser certain legal rights. The consumer may also have other rights which vary from state to state.
