OUR HISTORY

LaserLyte is the shooting and hunting division of P&L Industries, Incorporated. Larry Moore, owner and president, has been involved with the shooting and hunting industry for more than thirty years.

Moore started out with a book publishing company specializing in survival tactics and weapons. Moore later created and published several magazines, including S.W.A.T. (Special Weapons and Tactics), Turbo and Arizona Hunter and Angler.

In 1987, Moore founded a gun accessories business that grew to be Tac Star Industries, Incorporated. With Tac Star, Moore sold gun accessories and designed new products including the first "laser bore sighter" on the market. In 1996, Moore merged with Lyte Optronics to form LaserLyte.

After selling the gun accessories division in 1997, Moore purchased LaserLyte back in 2001. From then on, he has worked diligently to refine his previous work and develop new and innovative shooting products.

In 2002 Larry's son, Aaron Moore, joined his father in business full time as Vice President and Director of Operations after several years of living overseas and completing college degrees in business, engineering and international relations. Aaron's arrival allowed Larry to shift 100% of his focus to designing cutting-edge laser products for the shooting industry. "It is a great alignment of assets for my father and I, we put our ideas together, he designs them and then I present them to market," says Aaron.

Both Larry and Aaron have a great passion for the outdoors that is infused into their family life. "My Dad and I hunt as much as possible," says Aaron, "It's a great chance to spend some time together as well as come up with new ideas for LaserLyte to help hunters and shooters in their sport."

OUR MISSION: TO HEIGHTEN THE EXPERIENCE OF SHOOTING.

KRYPTONYTE LASER BORE SIGHTING SYSTEM

KRYPTONYTE LASER: **LBS-HULK-140**

Meet the brightest and most visible laser we've ever created. The Kryptonite Laser Bore Sighting System uses a green laser that is 100 times more visible to the human eye than traditional red lasers. This daylight-visible 532-nanometer green laser creates a dot that can be seen up to 100 yards with the naked eye, meaning you can sight-in anywhere from 10 yards to 100 yards away.

The Kryptonite LBS System fits any handgun*, rifle or carbine from .22 to .50 caliber and .51 to .75 caliber as well as 12 to 20 gauge shotguns. The Auto Power Control digital circuitry ensures a bright and steady dot for the full 1-1/2-hr. life of the CR2 lithium battery.

*Four-inch minimum barrel required

.50 CAL. Rifle with Kryptonite LBS & Universal Gun/Scope Leveler

12 GA. Shotgun with Kryptonite LBS & Shotgun Adapter

.50 CAL. Rifle with Kryptonite LBS

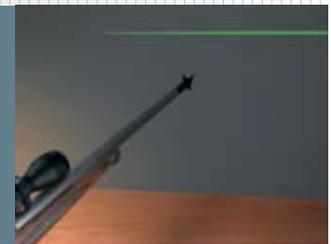

Green 532nm Laser Bore Sighter

KRYPTONYTE SYSTEM

- Green 532nm Laser Bore Sighter
- Universal Gun/Scope Leveler
- 12-20 gauge Shotgun Adapter/.51-.75 caliber Adapter
- .22-.50 caliber Adapters
- Deluxe Carrying Case with instructions
- One Lithium battery

The Line Generating Lens converts the bore sighter's precise Laser beam into an exact projected horizontal line for aligning the reticle crosshairs.

LASER BORE SIGHTING SYSTEMS

.22-.50 STANDARD KIT: [LBS-0006-140](#)

.22-.50 DELUXE KIT: [LBS-DLUX-140](#)

.17-.22 CAL. KIT: [LBS-1722-140](#)

Quickly sight in any rifle or pistol* from .22 to .50 Caliber with these best-selling universal kits. For professional hunters and shooters, the Deluxe LBS System comes complete with the Universal Gun/Scope Leveler and the 12-20 Gauge Shotgun/.51-.75 Caliber Adapter.

Simple and easy to use, both Laser Bore Sighting Systems allow the adjustment of any scope or iron sights to within a couple of inches of bull's-eye at up to 100 yards. Best of all, both systems can easily be packed and taken to camp for a quick check of sights.

The LaserLyte .17-.22 Caliber Laser Bore Sighting Kit is designed to work with the very popular .17 caliber & .204 caliber firearms as well as air rifles. Each kit includes two adapters to work with any caliber from .17 to .22, including .204.

*Four-inch minimum barrel required

Standard & Deluxe Laser Bore Sighting Systems come complete with four adapters (covering any caliber from .22 cal. to .50 cal.), a carrying pouch, batteries and instructions.

Red 650nm Laser Bore Sighter

LASER BORE SIGHT ACCESSORIES

GUN / SCOPE LEVELER: [SLA-0001-140](#)

SHOTGUN ADAPTER: [BAK-1220-300](#)

The universal Gun/Scope Leveler ensures a level performance every time you use your gun, because now you can level your gun before you ever level your cross hairs. Simply slide the leveler onto any Weaver or Picatinny base rail system, put the bubble in the middle of the line—and now your gun is level. Secure your firearm and then take the level off. Proceed to mount your scope and level it. Bore sight in and you're done.

The Shotgun Adapter system allows quick and easy sight-in or patterning of 12-20 gauge shotguns, slug guns or turkey guns. Now with improved features this adapter allows the sighting-in of rifles from .51 to .75 caliber. The adapter works with all Laser Bore Sighters (except for the .17-.22 caliber Bore Sight). The adapter is made from Dupont Delrin® for maximum durability and accuracy.

* Laser Not Included

12 GA. Shotgun with Bore Adapter & LBS

6

GUN/SCOPE LEVELER

- Ensures accurate performance
- Fits Weaver and Picatinny rail mount systems
- Attaches to Laser Bore Sighter for scope leveling
- Easy-to-use bubble

SHOTGUN ADAPTER

- Sights in 12-20 gauge shotguns, slug guns or turkey guns
- Sights in .51-.75 caliber rifles
- Made from Dupont Delrin®
- Adapter works with all Laser Bore Sighters (except .17-.22 cal bore sight)

SIX PACK- LASER BORE SIGHTER ACCESSORY KIT

SIX PACK: **LBS-SIX6-PAK**

LaserLyte is proud to announce the latest product for its best selling Laser Bore Sight. It is the "SIX PACK" Laser Bore Sighter Accessory Kit. This one kit encompasses the six best accessories for the bore sight at an unbelievable savings to the customer.

The new "SIX-PACK" will allow you to level your rifle or shotgun, level the cross hairs on your rifle/shotgun, sight-in the firearm and even check it in the field after traveling or dropping the weapon. There are even extra batteries and screws, and placeholders in the case for a LaserLyte® .22-.50 caliber Laser Bore Sighter and a LaserLyte® .17-.22 Laser Bore Sighter. The "SIX PACK" has everything you need—all at an amazing value.

SUBCOMPACT V2 LASER SYSTEM

SUBCOMPACT V2: [FSR-00V2-140](#)

The Subcompact V2 is the latest, smallest and most versatile railed laser yet. Weighing in at less than an ounce and shorter than an inch, this small unit is packed with the latest features and options.

The V2 features an integrated cross lock bar, hinge clamp system and a quick detachable release. One of the most innovative features is the removable accessory that allows the mounting of flashlights or other accessories. Take the small rail off and now you have a very low profile laser that will fit into any nylon holster. This laser is truly on the cutting edge of design, function and features.

The versatility of the V2 Laser Sight allows it to be mounted on virtually any firearm with a rail mount or a Picatinny rail, from subcompact pistols to shotguns, AK's and M4s.

Springfield Armory XD-40
with Subcompact V2

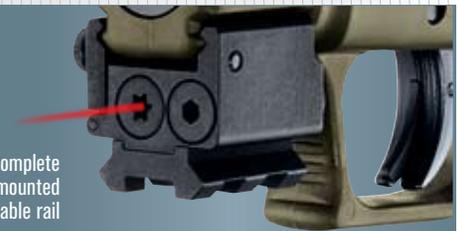

8

V2 LASER

- The true subcompact laser
- Fits all subcompact weapons, railed pistols and rail systems
- Includes bottom-mounted removable rail
- Next Generation Glass Lens System
- Adjustment for windage and elevation
- Detachable rail system with integrated cross lock bar
- Rear Activation Switch

V2 Laser comes complete
with bottom-mounted
removable rail

QD UNIVERSAL LASER SYSTEM

QD UNIVERSAL: **FSM-00QD-140**

LaserLyte introduces the quick detachable universal rail mount laser system. This innovative unit can quickly mount onto any rail system and is 50% smaller than any previous version of the laser setup.

The proven round body design can easily adapt to an optional remote switch for long gun mounting. The laser's small package, quick detachable features and ambidextrous switch make it one of the most user-friendly sighting systems available.

Simply slide the mount on pistol rail and tighten mounting screws with included hex wrench.

QD Universal Mounted on SA XD-45

QD UNIVERSAL

- Fits on any rail system
- Quick detachable design
- Ambidextrous slide switch
- Fits all subcompacts and railed weapons
- Adjustments for windage and elevation
- Shortened system fits into almost any nylon holster
- Made from T6 grade aluminum

SUBCOMPACT LASER & FLASHLYTE SYSTEMS

FLASHLYTE: **WL-1**

LASER & FLASHLYTE: **LL-1**

Now there's a weapons-mountable flashlight that leaves your other hand free and clear. The new FlashLyte system gives you 25 lumens – enough power to see a target in a room or garage. The FlashLyte fits all subcompact pistols with rails and features an ambidextrous switch for easy activation. When mounted onto a pistol it will still fit into most nylon holsters. This is the simple, easy and effective solution for your home protection needs.

For the best of both worlds, the best-selling Subcompact V2 laser system has been paired with the new FlashLyte system to give you an amazing combo pack. The FlashLyte fits on all subcompact pistols with rails and any larger gun with rails. It's intimidation and recognition all in one. A must-have for any gun owner.

Taurus MIL PRO with FlashLyte Mounted

Taurus MIL PRO with Laser & FlashLyte Mounted

FLASHLYTE

- Smallest weapon light available
- Fits all subcompact pistols with rails
- Small enough to fit in a nylon holster
- 3 super bright LEDs are powered by 4 A76 watch batteries
- Over 1 hour run time

LASER & FLASHLYTE

- Smallest laser and light package available
- Fits all subcompact pistols with rails
- 3 mounting options for maximum versatility
- Use the laser and light individually or together

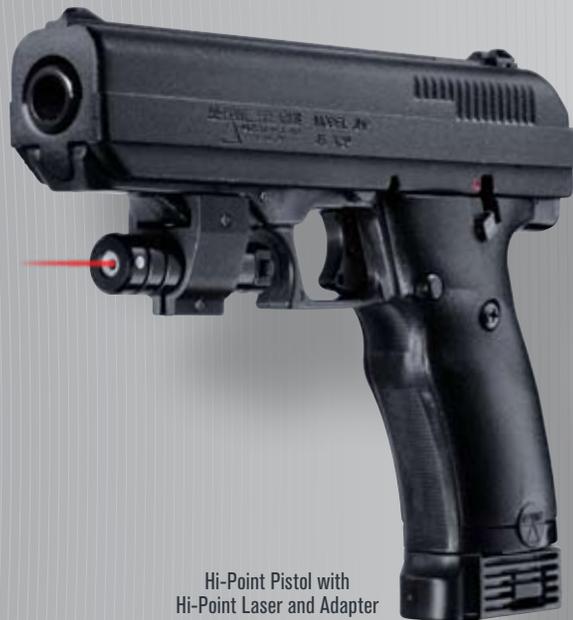

LASER SIGHTS

CLASSIC: FSM-OPLW-140

HI-POINT: HPT-0650-140

The LaserLyte "Classic" universal laser system has a proven track record and will work on nearly any gun. With the use of LaserLyte's exclusive V2 technology we were able to shrink the size of the laser by 50%. The decreased profile of the laser makes an even more stable platform for more accurate shots. The laser still attaches to nearly any trigger guard with the use of molded polymer inserts.

The ultra-popular Hi-Point now has its own laser and adapter. LaserLyte has combined its proven round-body laser technology with its Hi-Point laser mount to make the latest addition to our laser systems. Fits Hi-Point .40, .45 cal. pistols.

Hi-Point Pistol with
Hi-Point Laser and Adapter

HI-POINT

- Laser and adapter for Hi-Point semi autos
- Ambidextrous slide switch
- Attaches with two mounting screws
- Made from T6 aluminum

Taurus 1911 with Classic
Universal Laser

CLASSIC SYSTEM

- Fits virtually all handguns
- Ambidextrous slide switch
- Two-screw windage and elevation adjustments
- Shortened system fits into almost any nylon holster
- Made from aircraft grade aluminum

SEMI AUTO RAIL ADAPTERS

S&W SIGMA: [ADP-SIGM-140](#)
HECKLER & KOCH USP: [ADP-HKSP-140](#)
HECKLER & KOCH USP COMPACT: [ADP-HKCP-140](#)
BERSA THUNDER: [ADP-BERS-140](#)

Now you can mount your favorite LaserLyte Laser System onto some very popular pistols: S&W Sigma, Heckler & Koch USP and Bersa Thunder. These adapters change the grooves on the receiver into a Picatinny/Weaver type rail, allowing you to mount any of our Lasers or FlashLytes.

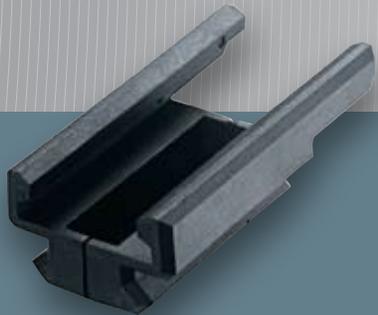

H&K USP with
H&K Rail Adapter

Bersa Thunder with
Bersa Rail Adapter

S&W Sigma Pistol with
Sigma Rail Adapter

SEMI AUTO RAILS

- Converts receiver into Picatinny accessory rail
- Attaches quickly with two mounting screws
- Precision design allows for a custom fit
- Available for select models of semi autos
- Made from aircraft grade aluminum (Bersa)
- Made from glass-filled nylon (HK USP and S&W Sigma)

REVOLVER RAIL ADAPTERS

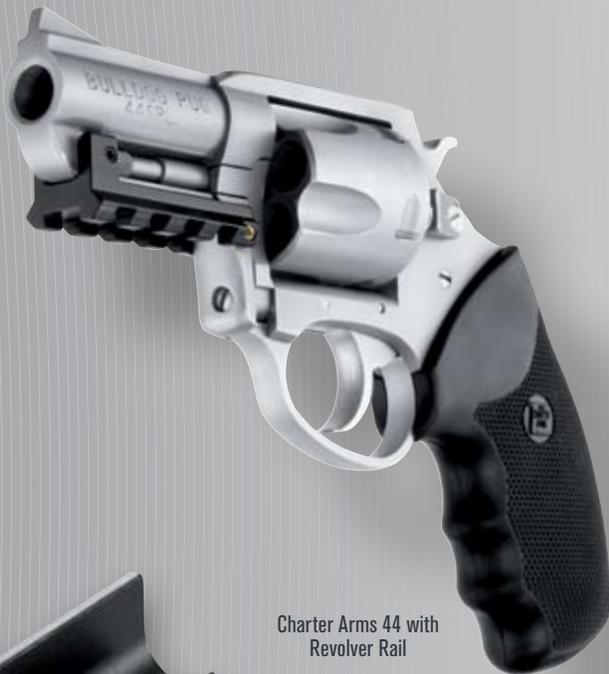

TAURUS JUDGE: [ADP-JUDG-140](#)
S&W J-FRAME: [ADP-S637-140](#)
CHARTER ARMS .44: [ADP-CH44-140](#)

LaserLyte's revolutionary rail adapter system turns your revolver into a tactical pistol. The adapter mounts under your barrel and creates a small Picatinny rail. The rail is just long enough to mount a LaserLyte Laser.

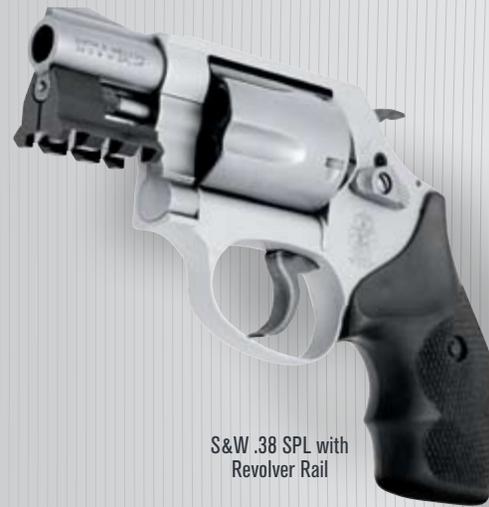

This design allows you to mount a laser on your gun but use any grip you want. The adapter rail securely locks into place with pins and brass-tipped set screws. Finally a laser solution that thinks outside the grip.

Taurus Judge with
Revolver Rail

Charter Arms 44 with
Revolver Rail

S&W .38 SPL with
Revolver Rail

REVOLVER RAILS

- Countless Picatinny accessory mounting options
- Precision design allows for a custom fit on revolvers
- Available for select models of revolvers
- Made from T6 aluminum for extra strength and durability

V2 Laser Mounted on a Revolver Rail

MULTI RAIL SYSTEMS

L-RAIL STANDARD: [ADP-LRLG-140](#)
L-RAIL SUBCOMPACT: [ADP-LRSM-140](#)
TRI-RAIL: [ADP-TRIR-140](#)

The dual L-shaped rail system (in standard and subcompact) allows countless accessory mounting options. If you have a laser and a flashlight there is no need to buy an expensive combo laser/light unit. The L-Rail system allows the perfect combination of a laser and light in a modular package.

LaserLyte's Tri-Rail Mounting System sets up your tactical or home defense shotgun for maximum versatility and low light performance. This system positions three Picatinny rails at the front end of the shotgun where flashlights and/or lasers are best located. Easily mounted on the magazine tube of most popular 12-gauge pump shotguns, the Tri-Rail attaches in minutes with two machine screws.

Mossberg 500 with V2 & Light Attached to Tri-Rail.

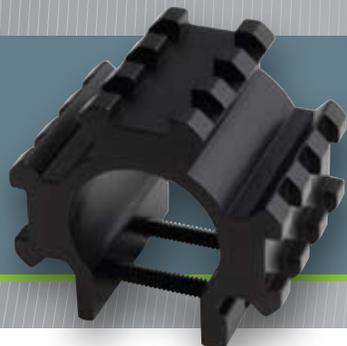

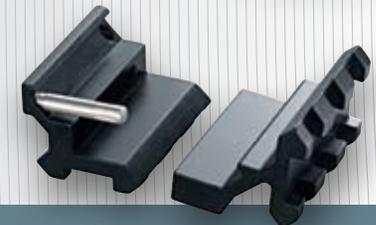

The Tri-Rail positions three Picatinny rails at the front of the shotgun for lights, lasers and other popular accessories.

SA XDP-45 Pistol with L-Rail

L-Rail Laser/Light Combo

TRI-RAIL

- Fits any 1 inch diameter shotgun tube
- Mounts lasers or FlashLytes
- Can be used with or without heat shield
- Can mount on magazine extension tubes or on stock tubes
- Only takes up 1.5 inches of space
- Made from aircraft grade aluminum

L-RAIL

- Countless Picatinny accessory mounting options
- Mounts ambidextrously for right- or left-handed shooters
- Attaches quickly with two mounting screws
- Low profile for holstering and concealment
- Made from aircraft grade aluminum

PISTOL BAYONET

PISTOL BAYONET: PB-1

Be the first to own a Pistol Bayonet that looks as good as it works. This razor-sharp Ka-Bar® blade fits any medium to large pistol with a rail and slides on and off easily with the press of two buttons. The blade handle is constructed from 30% glass-filled nylon for strength and durability. Its carbon steel blade is sharpened to a fine edge and finished with a black Teflon® coating for protection. A LaserLyte original, the Pistol Bayonet is ready for any situation—or just looking cool on your favorite gun.

Depress two buttons.
Slide onto rail.
Locks into place.

Taurus 24/7 OSS with Pistol Bayonet

BAYONET

- Universal Quick Detachable Design
- Steel Blade by Ka-Bar®
- Fits all medium to large frame pistols with rails
- Full tang design
- Custom polymer sheath included

NEW PRODUCT LASER TRAINING SYSTEM

LASER TRAINER: LT-1

The new LaserLyte Laser Trainer saves you time, money and ammunition. Now for the cost of one or two visits to your local range you can enjoy a lifetime of free training at the location that works best for you.

The LaserLyte Laser Trainer is safe and efficient, using a hammer-activated (sound activated) laser that appears on your target downrange, giving you instant results. Created with input from shooting expert Rob Pincus, the new LaserLyte Laser Trainer will improve your practice time and increase your confidence with your favorite pistol or rifle.

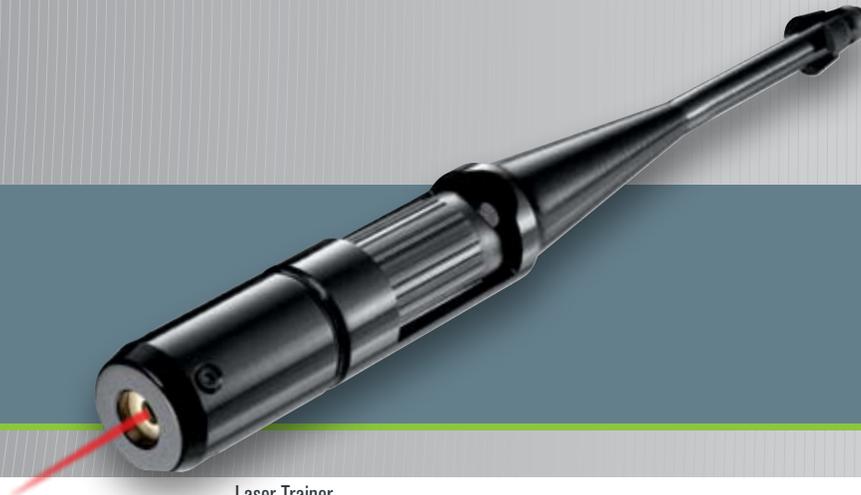

Rob Pincus is the owner and lead instructor of I.C.E. Training, a progressive, world-class, reality-based firearms training course. Rob and his staff instructors currently provide training to military special operations, law enforcement & security personnel as well as those interested in preparing for self defense around the world.

* Minimum 3" barrel required

DEFENSIVE TRAINING WITH ROB PINCUS

Learn how to improve your defensive shooting skills with the LaserLyte Laser Trainer and one of the world's premier instructors.

PRESENTATION FROM THE READY.

The Ready Position is an important staging position for the firearm. In the Ready Position, you should be able to search an area, assess a situation and perform just about any plausible weapons manipulation (reloading, clearing a malfunction, etc) efficiently.

A preferred Ready Position, such as the High Compressed Ready, will keep the firearm close to your body to increase retention, reduce fatigue and allow you to respond to threats in any direction from your body without swinging the firearm.

EXTENSION AND PRESS.

Orient yourself towards your target and rapidly extend your firearm into the shooting position, pressing a shot just as your firearm settles into the shooting position (reaches full extension in and parallel with your line of sight).

It is possible that your firearm will obscure the laser dot at the very end of this motion. Do not get into the habit of searching for the laser when you are at extension. At this point, your focus should be on the threat or on your sights, depending on the need for precision.

EVALUATION

After your shot, you should be looking for two things:

1. Does the laser dot appear in the target area that you have designated?
2. Does the laser dot appear as a line (extreme movement during trigger press) or as a dot?

If your dot is not appearing consistently inside of your target area, go back to the Presentation from Ready drill and refine your extension or take more time to settle the gun before your first shot.

Once you have become smooth and you start moving faster, it can be helpful to have a training partner watch the motion of the laser dot while you are extending.

NOTES

Remember that with many firearm designs, you will need to cycle the action of the firearm between each shot. Be sure to do this in a way that is consistent with your reloading and malfunction clearing techniques. To learn more defensive and marksmanship shooting techniques, visit icetraining.us.

SAFETY

When training, always be sure to clear your firearm of all ammunition and separate any ammunition from your LASER TRAINER practice area. You should always train with your pistol oriented in a safe direction as an additional safety measure. When working with a training partner or partners, all participants should check all firearms together before beginning your training session.
