

DROP TARGET SYSTEM

FFTS1

Inanimate target system provides different options for situational training. Faces are interchangeable, and hands can contain items that include firearms, knives, flashlights and cell phones. Targets drop only when hit in locations causing neurological damage or significant blood loss (head and torso). All other hits cause target to simply spin around.

REMOTE CONTROL RELEASE

Remote triggers the drop of the curtain revealing friend, foe, or civilian with the press of a button.

PORTABLE RANGE SYSTEMS

FFRG1, FFRG1B, FFRG2

Finding a place to affordably, practically and safely train your team just got a whole lot easier. With three range options from Force on Force™, you'll find exactly what you need. All ranges set up quickly and offer total containment. Heavy duty mesh covers the top and windows of ranges to help keep marker rounds inside the range. This allows safe and comprehensive assessment from the outside or above. Limited entry points help give Safety Officers total control of personnel and weapons that enter or exit these facilities.

REALITY BASED TACTICAL TRAINING SYSTEM

2010 PRODUCT CATALOG

ABOUT FORCE ON FORCE™

Speer® LE has taken law enforcement training to the next level with the new Force-on-Force™ training system. Engineered for safety and realism, Force-on-Force products allow officers to train in live-action scenarios for life and death decisions. From marker rounds that boast the most reliable ballistics and accuracy, to a full line of protective gear and portable ranges, Force-on-Force is the only choice for achieving true tactical realism.

MARKING WEAPONS

Force on Force™ rounds are designed to absorb the initial impact energy for clean, safe and consistent marks. Our robust design results in flawless load-ability. And consistent ballistics mean improved downrange performance. This year we've also added a marking knife perfect for "Isolation Exercises" and other training scenarios involving edged weapons.

MARKING KNIFE KIT

Safe molded plastic knife with felt edge leaves a distinct mark. It uses the same marking agent as our projectiles for superior performance. Includes marking knife, marking agent and nylon sheath.

FFMK1

MARKER ROUNDS

Force on Force™ marker rounds boast enhanced performance on soft targets, signature marking and reliable ballistics. Unlike other products on the market, Force on Force Marker rounds are lead-free and thus safer for indoor use, environmentally friendly and prevent lead contamination. The marking agent has an extended shelf-life and leaves a distinctive mark on target. Force on Force 9mm training ammunition also requires no special packaging to preserve the product. Marking agent on clothes doesn't dry out, making quick wipe downs a breeze and machine washes even easier.

FF9G2, FF9W2, FF9B2, FF9R2, FF9Y2

AVAILABLE IN 9mm FF9G2—Green • FF9W2—White • FF9B2—Blue • FF9R2—Red • FF9Y2—Yellow

PERSONAL PROTECTIVE EQUIPMENT

Force on Force™ is proud to offer a full line of protective gear. Train safely, comfortably and restriction free with this ensemble of unique clothing that gives the user protection from head to ankle. All gear is machine-washable, and comes in black on gray. Marking agent is quickly and easily washed off completely.

PADDED GLOVES

Feature adjustable strap and allow solid gripping.

- SM - FFHND1S
- M - FFHND1M
- L - FFHND1L
- XL - FFHND1XL

SHIRT

The Force on Force top provides users with multiple padded areas, including the torso, back and forearms. These protective regions prevent direct body hits when training with marker rounds.

- M/L - FFTOP1ML
- L/XL - FFTOP1LXL

PANTS

Train quietly and move freely in the Force on Force pants. Multiple padded regions offer users lower-body protection. These pants also come with a padded knee area for added durability.

- M/L - FFPT1ML
- L/XL - FFPT1LXL

VEST W/ GROIN PROTECTION

FFVGLSL, FFVGLXXL

Provides excellent torso protection without restricting movement. Two sizes available, both with generous adjustment range to fit a large variety of users. Groin protection is removable.
