

# EARPRO ACCESSORIES

COMMEAR<sup>®</sup>  
COMFORT (EP1)

Open design doesn't block the ear canal, allowing for hearing of normal ambient sounds and uncompromised directional hearing.

COMMEAR<sup>®</sup>  
BOOST (EP2)

Adjustable stem extends further into the ear canal, allowing for lower radio volumes which protect against potential hearing loss.

EARPRO OFFERS SIDE-MOUNT ADAPTERS THAT FIT MOST POPULAR RADIO MODELS USED BY TACTICAL PROFESSIONALS INCLUDING:

SIDE-MOUNT  
ADAPTER (EA17\*)

3.5mm threaded plug adapter compatible with: HT750 and GP Series radio models.

# THE KEY TO GREAT HEARING PRODUCTS IS LISTENING & BEING HEARD.

Especially to the pros who use them on a daily basis: police officers, machinists, military personnel—anyone whose job, or survival, depends on hearing vital communications.

At EarPro® by SureFire®, we listen carefully to our customers. And we engineer and build our products accordingly. Chalk it up to our obsession with producing gear that can withstand worst-case scenarios. Engineered for performance, designed for comfort, and built to withstand the rigors of day-to-day use.

## EARPRO RADIO COMMUNICATION WIRE SYSTEMS: DON'T MISS A SINGLE WORD

EarPro wire systems provide the ultimate combination of clarity, durability, and reliability, designed and manufactured to meet the demanding needs of tactical professionals. Communications go directly from your radio into your ear, so you hear every word and eliminate the possibility of others overhearing your important messages. An EarPro wire system also allows for lower radio volumes to be used, which can help guard against gradual hearing loss.

### EP210 LISTEN-TALK RADIO COMM SYSTEM

A professional single-cable system featuring an electronic ear coil (EA50) with direct-connect speaker that enhances voice frequencies and ensures crystal-clear, covert incoming communications. Outgoing transmissions are equally clear, thanks to a water-resistant, high-gain mic operated by the radio side-mount's PTT button.

### EP220 INLINE PUSH-TO-TALK (PTT) RADIO COMM SYSTEM

A professional inline single-cable system featuring an electronic ear coil (EA50) with direct-connect speaker for crystal-clear, covert incoming communications. An omni-directional mic, encased in a water-resistant aluminum pod with a PTT for fingertip control, ensures outgoing transmissions are equally clear.

## HEARING PROTECTION, WHILE STILL HEARING WHAT MATTERS.

EarPro earpieces provide effective hearing protection by blocking potentially dangerous sound levels (above 85 dB) from entering your ear, while conversations and safe sounds below 85 dB are allowed to enter and be easily heard. This permits you to protect your hearing without missing important communications or audio cues. A low-profile, ergonomic design and medical-grade polymer construction means you get a secure fit and can wear EarPro earpieces for hours without discomfort—even with a helmet or mask, or while using the phone or wearing headphones.

### SONIC DEFENDERS® (EP3)

Passive hearing protection reduces potentially damaging noises to safe levels, while allowing normal sounds to pass through.

### SONIC DEFENDERS® PLUS (EP4)

EP4 Sonic Defenders® Plus earpieces provide all the hearing protection and comfort of the EP3 Sonic Defenders but come with one additional flange to fit those with larger ear canals.

### EP6 SIGNATURE SERIES™ (EP6)

EP6 Signature Series earpieces, with their unique black-polymer construction, were designed to protect the hearing of racing professionals and fans alike. Ideal for the track or anywhere hearing protection is needed. Identical in size to EP3s.
