NEW. LIGHTGUARD™ PRODUCTS

The innovative line of Lightguard products gives you an instinctively activated white light option in an amazingly slim profile. See page 05.

NEW. PRO-CUSTOM LASERGRIPS®

The growing line of Pro-Custom 1911 grips. See page 09.

NEW. PRO-CUSTOM LASERGRIPS®

First Pro-Custom for the Smith & Wesson J-Frame. See page 20.

NEW. LASERGUARD® PRODUCTS

Five models fuel more growth for the Laserguard line. Including solutions for Ruger SR9c, Taurus TCP, HK45C, Diamondback DB380 and Taurus Slim. See page 24.

CRIMSON TRACE LIGHTS UP 2011 WITH A **NEW PLATFORM:** **LIGHTGUARD**. NOW AVAILABLE FOR SELECT POPULAR FULL-SIZE POLYMER SEMIS, LIGHTGUARD PUTS A **WHITE TACTICAL LIGHT** IN FRONT OF THE LASERGRIPS IN A SAFE, SLEEK WAY. BURSTING ONTO OUR PRODUCT SCENE ARE EXCITING EXTENSIONS OF LASERGRIPS AND LASERGUARD PRODUCTS.

HONORED SIX YEARS RUNNING.

Year after year Crimson Trace® has garnered awards from the firearms industry's prestigious **Academy of Excellence**. It's the industry's highest honor. And it's our sixth win in a row. [See page 10.]

[LTG-760] FOR SMITH & WESSON M&P. SEE PAGE 05.

LIGHTGUARD™: A STORY OF EMPOWERMENT. IMAGINE, IF YOU WILL, THE INSTANT YOU HAVE TO MAKE DECISIONS IN A SELF-DEFENSE SITUATION. SOMEONE MAY LIVE OR DIE. **YOU MUST IDENTIFY YOUR TARGET, QUICKLY.** ENTER THE NEW LIGHTGUARD LINE, FEATURING THE **SAME INSTINCTIVE ACTIVATION** CRIMSON TRACE LASER SIGHTS MADE FAMOUS. NOW, FAST ACTIVATION EXTENDS TO A SLEEK 100-LUMEN WHITE LIGHT THAT DOESN'T EXTEND PAST THE BARREL.

LIGHTGUARD™ FOR SMITH & WESSON M&P

Lightguard fits in front of the trigger guard, a powerful white light complement to Lasergrips.

LIGHTGUARD PAIRS PERFECTLY WITH CRIMSON TRACE LASERGRIPS, (LIGHTGUARD IS AVAILABLE FOR SELECT MODELS). ACTIVATE THE LIGHT. IDENTIFY THE THREAT. SIMULTANEOUSLY ACTIVATE THE LASER TO ACQUIRE THE TARGET. ALL WHILE KEEPING ONE HAND FREE FOR STEADIER AIM. INSTANT ACTIVATION, SPEED, ACCURACY, AND SAFETY IN SELF-DEFENSE SITUATIONS. WE CALL IT LIGHTGUARD. YOU JUST MIGHT CALL IT THE ULTIMATE IN EMPOWERMENT AND CONVENIENCE.

Fits Springfield Full-Size XDM and XD.

[LG-401 P14] CHAINMAIL III FOR KIMBER 1911. SEE PAGE 09.

CRIMSON TRACE STILL MAKES THE **WORLD'S ONLY GRIP-INTEGRATED LASER SIGHT**. SETTING US APART AS THE INDUSTRY LEADER DUE TO THE SEAMLESS INTEGRATION AND REPEATABLE ACCURACY OF OUR LASERS REMAINS A CRIMSON TRACE STANDARD. WHICH MEANS **FAST TARGET ACQUISITION AND PROVEN DEPENDABILITY**. WE NOW OFFER MORE PRO-CUSTOM MODELS, GIVING YOU MORE OPTIONS THAN EVER BEFORE.

LG-405 P20 PRO-CUSTOM FOR SMITH & WESSON J-FRAME.

LASERGRIPS ALSO STAND FOR **EASY INSTALLATION**, ALTER-FREE HOLSTER FIT, LONG BATTERY LIFE AND THE ABILITY TO HOLD ZERO FOR LONG STRETCHES OF SHOOTING. LASERGRIPS DEFINE INSTINCTIVE ACTIVATION: WHEN YOU'RE READY TO FIRE, THE LASER IS ON. THIS SIMPLE FACT SAVES LIVES TIME AFTER TIME IN SELF-DEFENSE AND TACTICAL SITUATIONS. PARTNER IT WITH THE FACT THAT LASERGRIPS TRULY ARE DESIGNED, ENGINEERED AND **BUILT IN THE USA**, AND YOU KNOW WHY IT'S BECOME A STANDARD IN THE SHOOTING WORLD.

INSTINCTIVE ACTIVATION

If you've yet to grasp the most basic difference between Lasergrips and other laser sights, here it is again: **Lasergrips activate when you simply grip your gun in the course of preparing to shoot.** There is no switch to flip. There is no decision to make. The laser activates by instinct...

HERE ARE SIX REASONS YOU NEED LASERGRIPS FOR **CONCEALED CARRY.**

LOW-LIGHT SIGHTING. Most self-defense situations happen at night. That's when Lasergrips earn their keep.

IMPROVED ACCURACY. Short-barrel snubbies and semi-autos are tough to aim beyond a few yards. Many lack sufficient iron sights. Lasergrips extend the effective range by projecting the point-of-impact onto the target.

QUICK TARGETING. Your advantage is immediate with Lasergrips, because you simply point in the direction of the threat. The laser instantly tells you where you're aiming.

MOTION AND COVER. Participants in armed conflicts are constantly on the move, either attacking or escaping. Lasergrips enhance speed and accuracy when moving and when aiming at moving targets. Plus, you can shoot from behind cover without achieving a traditional sight picture – the laser can find its target from any position.

HOLSTER & TACTICAL LIGHT COMPATIBILITY. Top flight manufacturers like Galco, DeSantis and Blackhawk make holsters to fit Lasergrips. Beyond that, Crimson Trace enjoys broad compatibility with the most popular holsters and tactical lights.

BIG BAD SELECTION. Lasergrips fit the most common concealed carry guns: Smith & Wesson, Ruger, Glock, CZ, Beretta, NAA, Taurus, Kahr, Walther, Kel-Tec, Kimber, Sig Sauer, Springfield Armory, Bersa, Full-Size and Compact 1911 models.

INSTALLING LASERGRIPS. Using Crimson Trace Lasergrips is easy and intuitive. So is installing them. It only takes a few minutes. In a nutshell:

- > Make Sure Your Gun Is Unloaded
- > Install Batteries
- > Follow The Simple Instructions
- > Install Your Lasergrips

They're presighted at 50 feet from the factory. No gun alteration needed. No gunsmith or special skills required. Enjoy.

1911 FULL-SIZE AND COMPACT FRONT ACTIVATION

[LG-401] FULL-SIZE [NSN: 5855-01-460-9153]

[LG-404] COMPACT

WHAT MAKES CRIMSON TRACE THE INDUSTRY LEADER?

INSTINCTIVE ACTIVATION

The pressure pad is ergonomically located so that the laser activates when using a normal firing grip. Pad location (front, side, rear) depends on the model.

WINDAGE AND ELEVATION ADJUSTMENT

Quickly and easily align the laser's point-of-impact with precision sighting screws.

PRECISION ENGINEERING

Our high-tech, micro-electronic components are designed by a skilled team of award winning engineers.

RUGGED, ERGONOMIC GRIP

Made with high-strength, fiberglass reinforced nylon substrate, and a comfortable rubber overmold for a dynamic grip and superior flexibility.

MASTER ON/OFF SWITCH

Most models have the ability to power down completely.

SEAMLESS INTEGRATION

Every model is designed and molded to fit the firearm frame exactly.

MADE IN THE USA

All products are proudly engineered and manufactured at our headquarters in Wilsonville, Oregon.

WORLD CLASS CUSTOMER SERVICE

Outside of our product features, our focus is Customer Service and maintaining relationships. We are always available to answer questions, take suggestions and assist in any way possible. See page 39 for complete information on how to reach our Customer Service Team.

HOLSTERABILITY

Most Crimson Trace Lasers are designed to work with your favorite holster. Your personal carry package is not complete without a holster to fit your laser of choice. See page 23 to learn more about our expanding holster line.

EASE OF INSTALLATION

Using Crimson Trace products is intuitive and effortless. It only makes sense that our installation is just as simple. No gunsmiths or gun alterations required.

Fits Airlight, Airweight, Bodyguard, Chief's Special, Centennial, Ladysmith, Models 36, 37, 38, 49, 60, 63, 317, 331, 332, 337, 340, 342, 351, 360, 442, 637, 638, 640, 642, 649, 651 and 940. Round butt only.

Available pre-installed as a package at your local dealer.

ROUND BUTT OR SQUARE BUTT?

All Smith & Wesson revolver frames are either Round or Square butt. Except for the LG-207, our grips are precisely designed to fit one or the other, but not both. To get the right Lasergrips model, you'll need to know which type you have. Fortunately, all you have to do is remove your stock grip panels and look at the frame.

SMITH & WESSON K, L AND N-FRAMES

[LG-207]

- > Polymer Grip
- > Front Activation Pressure Post
- > Master On/Off Switch
- > Two #2032 Lithium Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments

TAURUS Available pre-installed as a package at your local dealer.

NRA™

WE'RE AN NRA KIND OF COMPANY. HARD WORK AND SMART ENGINEERING ONLY GET YOU SO FAR DOWN THE ROAD. THEN IT COMES TIME TO REALIZE THAT TRUE SUCCESS CAN ONLY COME IF OUR INDUSTRY REMAINS STRONG AND VITAL. THAT'S WHY WE STRONGLY ENCOURAGE OUR CUSTOMERS AND FRIENDS TO SUPPORT THE NRA AND ITS ENERGETIC PROGRAMS TO PROTECT OUR 2ND AMENDMENT RIGHTS. 100% OF CRIMSON TRACE EMPLOYEES ARE NRA MEMBERS.

YOU HAVE YOUR GUN. YOU HAVE YOUR LASER. WE HAVE YOUR HOLSTER.

MOST LASERGRIPS FIT WITH YOUR FAVORITE HOLSTER. PERIOD.

AND LIKE NEVER BEFORE, YOU HAVE PLENTY OF SOLID HOLSTER CHOICES. WE'VE WORKED WITH MAJOR MANUFACTURERS TO CREATE HOLSTERS THAT ARE BOTH COMFORTABLE AND OFFER CONVENIENT, CONCEALED FIREARM ACCESS.

FROM GALCO® TO BLACKHAWK!® TO DESANTIS®, CRIMSON TRACE ENSURES YOU GET THE FINEST LEATHER, NYLON AND POLYMER HOLSTER OPTIONS AROUND. THE NEW SLIM-PROFILE LIGHTGUARD PRODUCT LINE IS HOLSTER-FRIENDLY; WE ENGINEERED IT SO THE LIGHT DOESN'T EXTEND PAST THE BARREL. IF YOU OWN A LASERGUARD, CRIMSON TRACE HAS A CUSTOM HOLSTER NOW READY FOR YOU. VISIT OUR HOLSTER SECTION ONLINE FOR MORE INFORMATION ON AVAILABLE HOLSTERS AND HOLSTER FITS.

When you see this icon rest assured there is a custom holster available from the industry's top holster manufacturers.

[LG-449] FOR RUGER SR9c. SEE PAGE 28.

THE LASERGUARD® LINE HAS ESTABLISHED DOMINANCE AS THE LASER SIGHT OF CHOICE FOR COMPACT POLYMER FRAME SEMI-AUTOMATICS. IT'S DUE TO A STABLE, SECURE, UNDER-BARREL PLATFORM FOR OUR LASER AND TO RELIABLE, REPEATABLE ACCURACY. DEMAND MOTIVATED US TO CREATE NEW LASERGUARD PRODUCTS FOR THE RUGER SR9C™, TAURUS SLIM AND TCP, DIAMONDBACK DB380 AND THE HK45C.

The growing LaserGuard family now has models for Taurus, Smith & Wesson, Kahr, Kel-Tec, Ruger, Glock, Diamondback and Heckler & Koch.

THE LASERGUARD PLATFORM CONTINUES TO RIDE THE WAVE OF POPULARITY OF THE COMPACTS WITH THE PROVEN SUCCESS OF LASERGUARD MODELS FOR RUGER, GLOCK, KEL-TEC AND KAHR. SLEEK, EFFICIENT DESIGN MAKES THE LASERGUARD PERFECTLY ADAPTED FOR CONCEALED CARRY. ADDITIONALLY, WE CONTINUE TO FIND WAYS TO KEEP THE LASERGUARD PLATFORM LIGHTWEIGHT AND IN TUNE WITH THESE HANDGUNS. SEAMLESS INTEGRATION IN FRONT OF THE TRIGGER GUARD IS KEY. IT'S WHAT MAKES OUR REPEATABLE ACCURACY POSSIBLE WITH SO LITTLE MASS. IN SHORT, THE LASERGUARD DELIVERS BIG-TIME PERFORMANCE IN A SMALL PACKAGE.

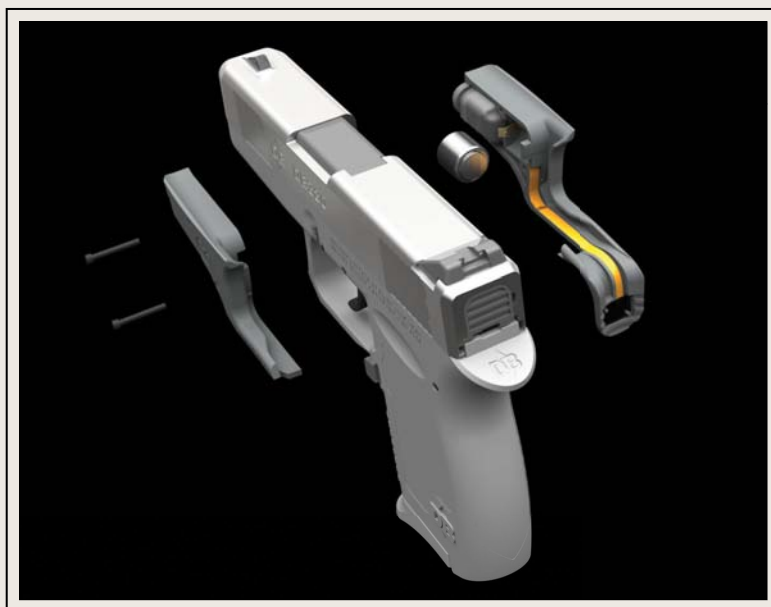

SEAMLESS INTEGRATION

The LaserGuard platform incorporates Crimson Trace's quality features into one compact package. Each LaserGuard is designed around the specific features of the firearms and attaches seamlessly around the trigger guard while keeping the profile and sleek form of these compact semi-automatic pistols.

INSTALLING A LASERGUARD? SIMPLE. First, know that you don't have to alter the trigger guard during installation. It's much easier than that.

- > Make Sure Your Gun Is Unloaded
- > Install Batteries
- > Attach The Two-Piece LaserGuard Around Trigger Guard
- > Simply Secure The LaserGuard In Place With The Existing Screw Panel On The Appropriate Gun Platform – Two Or Three Screws Does The Job

Each LaserGuard product is factory sighted in at 50 feet. With apologies to gunsmiths, you're just not needed for this little job.

DIAMONDBACK DB380

NEW

Fits Diamondback DB380.

[LG-491]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

Available pre-installed as a package at your local dealer.

GLOCK COMPACT AND SUB-COMPACT

Fits Glock 19, 23, 25, 26, 27, 28, 32, 33, 36, 38 and 39. Third generation only.

[LG-436]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Pressure Sensitive Master On/Off Switch
- > Ultra-Compact, 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

HK45C

NEW

Fits HK45C.

Exceeds MIL-STANDARD specifications for waterproof, high and low temperature operation.

[LG-645]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > External Battery Cap With Lanyard Attachment
- > Three-Screw, Tab Lock Attachment

OUR DVD IS FAR MORE THAN A SIMPLE LASER TRAINING TUTORIAL.

The Art of Survival illustrates ground-breaking tips and techniques that can help you prevail in a life-threatening situation.

Noted firearms experts use live-fire scenarios to demonstrate cutting-edge skills you need to know to **protect yourself and become a better shooter**. They'll show you why lasers have become a preferred training tool and they'll highlight the practical differences between what happens on the range and what happens in an actual conflict.

CALL, WRITE OR EMAIL TO GET YOUR FREE DVD. COMPLIMENTS OF CRIMSON TRACE.

KAHR .380

Fits Kahr P380.

[LG-433]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

Available pre-installed as a package at your local dealer.

KAHR .45

Fits Kahr PM45, P45, TP45 and CW45.

[LG-434]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

Available pre-installed as a package at your local dealer.

KAHR 9MM AND .40

Fits Kahr PM9, P9, PM40, P40, CW9, CW40, TP9 and TP40.

[LG-437]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

Available pre-installed as a package at your local dealer.

KEL-TEC PF9

Fits Kel-Tec PF9.

[LG-435]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

KEL-TEC P3AT

[LG 430]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

Fits P3AT and P32 Generations I & II.

RUGER SR9c™

NEW

[LG-449]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Three-Screw, Tab Lock Attachment

Fits Ruger SR9c Compact.

RUGER LCP

Seamless Integration With Firearm Frame

[LG-431]

- > Polymer Housing
- > Front Rubber Overmold Activation Pressure Pad
- > Ultra-Compact 3.3mm Diode
- > One 1/3N 3V Lithium Or Two 357 Silver Oxide Batteries; Over Four Hours Of Illumination
- > Precise Windage And Elevation Adjustments
- > Two-Screw, Tab Lock Attachment

Fits Ruger LCP.

User Adjustable Windage And Elevation

Rugged Design Made With High-Strength Reinforced Nylon

Finger-Grooved Activation Tab For Improved Grip On Short Pistol Frames

Fits Taurus TCP in .380.

CRIMSON TRACE CORPORATION HAS LAUNCHED A NEW DIVISION **EXCLUSIVELY FOR MILITARY CHANNELS: CTC DEFENSE™**. DIFFERENT FROM THE COMMERCIAL CRIMSON TRACE BRAND, ALL NEW PRODUCTS HAVE BEEN BUILT FROM THE GROUND UP USING NEW TECHNOLOGIES AND RESOURCES THAT ARE INNOVATIVE SOLUTIONS FOR TODAY'S HOSTILE ENVIRONMENTS REQUIRING WHITE LIGHT, IR (INFRARED) AND QUICK CHANGE DAY-TO-NIGHT SIGHTING SYSTEMS. WITH **SUPERIOR INNOVATION AND PATENTED TECHNOLOGIES**, CTC DEFENSE IS ABLE TO PROVIDE MILITARY AND LAW ENFORCEMENT AGENCIES WORLDWIDE WITH UNIQUE PRODUCTS THAT EXPAND AND ENHANCE THEIR ABILITY TO BE THE SUPREME FORCE ON THE BATTLEFIELD.

[MVF-515 GREEN] FOR PICATINNY RAIL LONG GUNS. SEE PAGE 32.

IT'S ALL ABOUT KEEPING FOCUSED ON THE THREAT. PRECISELY THE EDGE LASER SIGHTS FOR LONG GUNS GIVE YOU. WITH **BOTH TACTICAL LIGHT AND LASER** BUILT INTO A ROBUST FOREGRIP, CRIMSON TRACE LETS YOU TAKE AND MAINTAIN THE ADVANTAGE. WHATEVER THE SITUATION — GOOD LIGHT OR BAD — YOU'LL GET **FAST, ACCURATE TARGET ACQUISITION**. THESE RAIL-MOUNTED FOREGRIPS ARE CRAFTED IN THE USA TO SAVE LIVES EVERYWHERE.

THE MVF-515 RED

Expanded MVF line — now featuring red or green laser for this platform. Both lasers are stable, bright and features long battery life.

WHITE LIGHT PLUS GREEN, OR RED. OR BOTH. WHEN CRIMSON TRACE INTRODUCED THE **THREE-IN-ONE MODULARITY** OF THE MVF-515 LONG GUN PLATFORM, WE CREATED A WAY FOR SHOOTERS TO CUSTOMIZE THEIR LIGHT AND SIGHT OPTIONS. THE MODULAR VERTICAL FOREGRIP PLATFORM LETS SERIOUS SHOOTERS CHOOSE RED OR GREEN LASER, COMBINED WITH TACTICAL WHITE LIGHT AND A VERTICAL FOREGRIP. GREEN IS AN EXCEPTIONAL ADDITION TO YOUR ARSENAL. IT EXTENDS OUR TRADITION OF **FAST, ACCURATE, HEADS-UP SHOOTING**. THE MVF LINE ENHANCES ANY LEVEL OF SHOOTING SKILL, IN ANY LIGHT CONDITION. GREEN LASERS HAVE A HIGHER LEVEL OF VISIBILITY TO THE HUMAN EYE IN DAY LIGHT, LOW LIGHT, AND LONGER RANGE DISTANCES.

USERS LIKE GREEN FOR DAYLIGHT DEFENSE OR TACTICAL TRAINING, OR LONGER RANGE TARGETING SITUATIONS. TECHNOLOGICAL ADVANCES IN THIS FIELD OVER THE LAST YEAR HAVE MADE GREEN LASER BOTH MORE EFFICIENT AND FAR LESS TEMPERATURE SENSITIVE. BEAM STABILITY, WEIGHT AND ADAPTABILITY TO WEATHER ALSO MEET OUR DEMANDING STANDARDS. RED OR GREEN, THE LASER DIODE HOLDS ZERO. PERIOD.

GREEN TECHNOLOGY

Our products encompass the latest technology and provide the best sighting solution for your firearms. This is one reason we took our time developing our green laser platform. Our customers deserve nothing but the

best, and that is what we aim to provide. Our green laser stands up to the widest range of temperatures and the battery life, well — take a look, the data speaks for itself. See page 33.

MODULARITY.

WHEN YOU PURCHASE AN MVF PRODUCT YOU'RE GETTING A CUSTOM VERTICAL FOREGRIP OF INCREDIBLE QUALITY AND ADAPTABLE MODULARITY. ESSENTIALLY, IT'S COMPOSED OF A TANG, BUTT CAP AND TWO MODULE PANELS: A TACTICAL WHITE LIGHT AND RED OR GREEN LASER. THE "MODULAR" STORY COMES INTO PLAY WHEN YOU WANT TO CHANGE LASER COLORS AFTER INITIAL PURCHASE. SIMPLY ADD THE THIRD MODULE PANEL — RED LASER, OR GREEN.

RAIL-EQUIPPED LONG GUNS

Fits Picatinny 1913 or similar accessory rails measuring at least 4" in length.

Available pre-installed as a package at your local dealer.

2010 Self Defense Product of the Year Award Winner

RAIL-EQUIPPED LONG GUNS

Fits Picatinny 1913 or similar accessory rails measuring at least 4" in length.

[MVF-515 GREEN] MODULAR VERTICAL FOREGRIP

- > Polymer Grip Panels With Overmolded Activation Pads
- > Dual-Side Activation Switches
- > Master On/Off Switches
- > Independent Momentary, Strobe And Constant-On Programmability For Laser & Light Components
- > Two CR 123 Batteries
 - Over 4 Hours Light Illumination
 - Over 6 Hours Of Laser Illumination
- > Full-Length 6061-T6 Aircraft Aluminum, Hard-Anodized Tang
- > Replaceable, 150/200-Lumen LED Light Module
- > Weight: 10.2 Ounces
- > Infrared Laser Available To Qualified Agencies

MVF LASER PANELS

Fits on MVF-515 tang.

[MVF-515 MOD R]

- > Red Laser Panel
- > Independent Momentary, Strobe And Constant-On Modes
- > Laser Master On/Off Switch
- > Minimum 48 Hours Of Laser Illumination

[MVF-515 MOD G]

- > Green Laser Panel
- > Independent Momentary, Strobe And Constant-On Modes
- > Laser Master On/Off Switch
- > Minimum 6 Hours Of Laser Illumination

Fits on MVF-515 tang.

INSTALLATION SIMPLICITY MEANS REPEATABLE ACCURACY.

ATTACHING THE MVF-515 TO A PICATINNY RAIL.

It's simple. It's quick. It's stable.

Hold light side at angle lining up lugs to fit into slots in picatinny rail.

Bring perpendicular by rotating lugs into rail slots.

Tighten foregrip onto rail by turning nuts. Use screwdriver or nut driver to tighten. (50-55 inch/lbs.)

UNDERSTANDING GREEN LASERS

IT'S IMPORTANT TO UNDERSTAND THE ADVANTAGES AND DIFFERENCES BETWEEN RED AND GREEN LASER SIGHTS. AS THE CHART SHOWS, GREEN IS CLOSE TO THE CENTER OF THE VISIBLE SPECTRUM. IT'S THE COLOR WE PERCEIVE MOST EASILY.

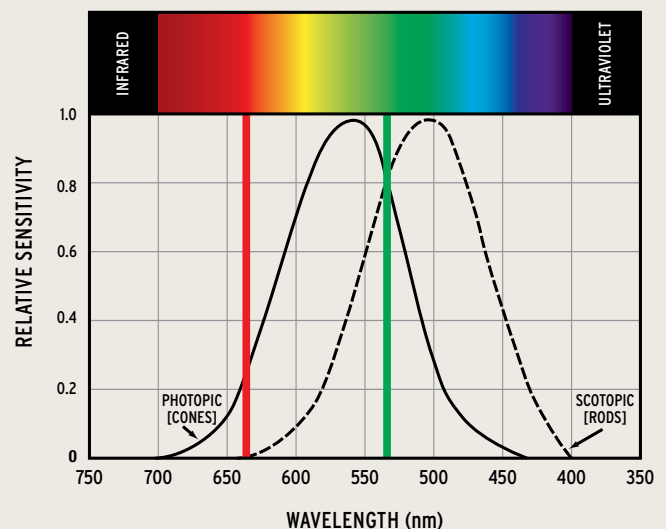

GREEN LASER SIGHTS OR RED LASER SIGHTS?

BOTH RED AND GREEN LASERS ARE HIGHLY VISIBLE IN LOW LIGHT. THE PEAK OUTPUT IN MW IS THE SAME, YET THE HUMAN EYE IS MORE SENSITIVE TO THE COLOR GREEN.

THIS IS WHY A GREEN LASER APPEARS BRIGHTER IN BOTH

LOW LIGHT AND FULL SUNLIGHT CONDITIONS. THE DIFFERENCE BETWEEN A RED LASER AND A GREEN LASER IS APPARENT, BUT **BOTH CAN BE BROUGHT TO BEAR ON A TARGET QUICKLY** GIVING THE SHOOTER A DECISIVE MARKER.

THE SAME PHENOMENON THAT MAKES THE DOT FROM A GREEN LASER SIGHT APPEAR TO BE BRIGHTER TO THE SHOOTER MAKES THE FULL LENGTH OF THE BEAM MORE VISIBLE AS WELL.

RETAIL MERCHANDISING TOOLS THAT DO THE JOB.

PISTOL PAD DISPLAYS

Large Size: 6" x 6" x 1"

TECHNOLOGY THAT MAKES UP FOR EVERY BAD SHOT YOU EVER TOOK.

THE VALUE OF INSTINCTIVE ACTIVATION.

The beauty of CTC Laser Sight activation is that it requires no thought. With a reasonable amount of practice on the firing range, the shooter's response to a threat is to act on instinct, pulling up the gun and sending a laser beam directly onto your target — with no more effort than is normally associated with gripping the gun in a traditional manner. This translates into sheer speed.

The pressure pad is ergonomically located — sometimes on the front of the grip, sometimes on the back, sometimes on the side — for instantaneous response. No other laser aiming device even comes close.

AMERICAN ENGINEERING AT ITS FINEST.

Crimson Trace is something of a rarity these days: An American company that chooses not to manufacture overseas. And why should we? After all, our new high-tech, microelectronics facility in Wilsonville, Oregon assembles a best-in-class product. Highlighted by a rugged, ergonomic design. Not to mention exacting tolerances that retrofit perfectly onto specific gun frames.

That's why installation is extremely easy: Just remove the factory grips and then screw on ours. Crimson Trace Laser Sights do not alter or replace operating parts of the firearm. The attachment is solid and secure, which delivers the Holy Grail of all aiming devices: Repeatable accuracy.

THE WORLD'S ONLY GRIP-INTEGRATED LASER SIGHT.

It's a classic success story, really. Our engineers came up with a design that allowed for the power source, laser emitter, pressure pad and all circuitry to be integrated into the grip. No external components were necessary. So no changes were imposed on the original profile or physical characteristics of a given gun.

AS ADJUSTABLE AS THEY COME.

A full range of adjustability is central to the laser concept. Our windage and elevation adjustment system uses precision screws that can be adjusted to make refinements to your point-of-aim. Once sighted they hold zero for thousands of rounds.

SIGHTING IN ON ACCURACY.

Laser Sights are factory-sighted to approximate point-of-impact at 50 feet. But if adjustment becomes necessary, all that's needed is the hex wrench included with product.

A good starting point is to establish a normal sight picture and line up the laser dot with the iron sights — this may be all the adjustment needed. ("Sight picture" simply means evenly aligning the notch in your back sights with the post in your front sight in a level, straight line.)

For further tuning on the range, fire a few rounds at the target. After seeing where the bullets are hitting, adjust the laser to the actual point of impact. For example, if the laser is pointing at the center of the target, but the bullets are impacting low and right, move the laser down and to the right.

POWER UP, POWER DOWN.

Most models come with a master switch that shuts the system down completely. Our lithium batteries provide more than four hours of "on" time and have a five-year shelf life. Batteries are available at most stores, but can be ordered directly from Crimson Trace. Leaving your grip in the "on" position will not drain batteries.

LASERGUARD™ STANDS TALL FOR TINY GUNS.

Laserguard is the ultimate laser sight for compact semi-automatic handguns. The design is the most compact, instinctively activated, full-featured, user-adjustable laser sighting system available. It was designed to overcome the design challenges posed by very small, polymer-framed handguns. An innovative, tab-and-groove interlocking system attaches securely to the trigger guard for repeatable accuracy. A lip added to the base of the Laserguard below the activation button acts as an added finger groove while shooting. Installation does not require any pin removal, the use of firearm screws, or the disassembly of the firearm.

PRO-CUSTOM FINISHES LOOK SHARP.

A recent development at Crimson Trace is the advent of realistic finishes applied directly to certain Lasergrips. This process allows us to offer carbon fiber, burlwood and chainmail finishes, among others.

TECHNICAL SPECIFICATIONS.

BEAM INTENSITY: Red: 5mW peak, 633nm, Class 3R laser.

The maximum output that federal law and technology allow.

Green: 5mW peak, 532 nm, Class 3R laser. Infrared laser diodes are available for military and law enforcement only.

POWER SOURCE: Most models use two #2032 lithium batteries

(included); more than four hours of illumination and a five-year shelf life. LG-344: One #123 lithium battery; over 20 hours of illumination.

LG-438: #2025 lithium battery. Laserguard models: One 1/3N 3V lithium or Two 357 silver oxide batteries. MVF-515 Red uses two CR123 batteries, with 4 hours of light and 48 hours of laser illumination.

MVF-515 Green uses two CR123 batteries, with 4 hours of light and 6 hours of laser illumination.

DOT SIZE: Approximately 0.50 inches diameter at 50 feet.

ACTIVATION: Integrated momentary pressure pad (all models) and master on/off switch on many models. Laserguard and Lightguard platforms excluded. *LG-436 does have a master on/off switch.

ADJUSTMENT: Dual adjustment screws using either 0.028" or 0.05" allen wrench, depending on the model.

WARRANTY: Three-year full warranty. Pro-Custom grip finishes are not warranted for normal wear and tear.

CRIMSON TRACE CUSTOMER SERVICE:

AT CRIMSON TRACE, OUR GOAL IS TO ALWAYS **EXCEED CUSTOMER EXPECTATIONS**. WE SUPPORT OUR CUSTOMERS WITH HIGHLY-TRAINED, CUSTOMER-CENTRIC PROS THAT ARE AVID SHOOTERS AND NRA MEMBERS. THEY VALUE OUR **"MADE IN THE USA"** PRODUCT AND OFFER QUALITY SUPPORT SHOULD IT BE NEEDED. CRIMSON TRACE UTILIZES PROVEN CUSTOMER SERVICE VALUES WE CALL "THE FIVE A'S":

- AVAILABLE** WE RECOGNIZE THAT YOUR TIME IS VALUABLE...WE'RE HERE WHEN YOU NEED US
- ATTENTIVE** WE'RE GOOD LISTENERS WHO OFFER SOLID SOLUTIONS TO YOUR PROBLEMS OR QUESTIONS
- ACCOUNTABLE** WE DO WHAT WE SAY WE'LL DO, EVERY TIME
- ACCURATE** WE GET THINGS RIGHT, THE FIRST TIME
- ADVISE** OUR EXPERIENCED CUSTOMER SERVICE AGENTS ARE TRULY PRODUCT EXPERTS

"THE QUALITY OF OUR PRODUCT IS EQUALED ONLY BY THE QUALITY OF OUR PEOPLE."

- NATE HOKE *DIRECTOR OF CUSTOMER SERVICE*

CRIMSON TRACE WARRANTY

Crimson Trace® (CT) warrants that this product will be free from defects in materials and workmanship for a period of three years from the original retail purchase. CT will repair or replace with an item of equivalent value, at its option, any product or part which is found to be defective under normal use and service, without charge during the warranty period. CT's obligation to repair or replace shall be the purchaser's sole and exclusive remedy under this warranty. This warranty does not cover normal maintenance and service and does not apply to any products or parts which have been subject to modification, misuse, carelessness, accident, improper maintenance or repair other than CT.

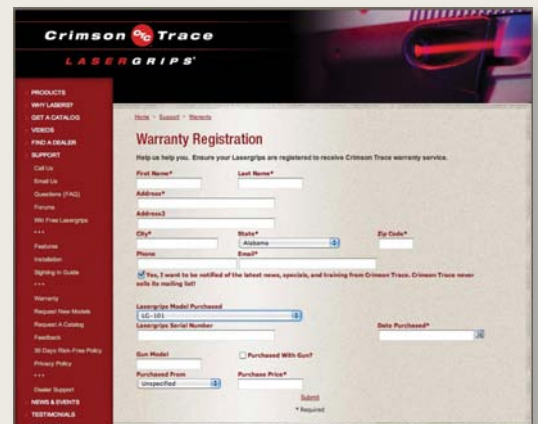

This limited warranty is in lieu of any and all other warranties, expressed or implied, including but not limited to, merchantability and fit for particular purpose. CT shall not be responsible for indirect, incidental, consequential or special damages arising out of, or in connection with, product use and performance, even if it has been informed of the possibility of such damages. This warranty does not cover the finish of any Pro Custom products cosmetics, batteries or problems arising from faulty batteries.

VISIT US ONLINE AT WWW.CRIMSONTRACE.COM OR CONTACT US AT 1.800.442.2406 TO REGISTER YOUR PRODUCT.

For warranty service call Customer Service at 800-442-2406 or email customer@crimsontrace.com for a Return Authorization Number (RMA). For warranty service, carefully package the unit along with dated proof of purchase and an explanation of the problem, and mail it to:

FIFTEEN KEY QUESTIONS, ASKED AND ANSWERED.

1. HOW ARE CRIMSON TRACE LASER SIGHTS ACTIVATED? DO THEY WORK BOTH RIGHT- AND LEFT-HANDED?

A great feature of Crimson Trace laser sights is that they turn on simply by holding your gun in a natural firing grip. There's no need to flip a switch or do anything differently.

A natural grip on the firearm will activate the laser/light. Depending on the model, laser sights have either a front, rear or dual-side activation button. Either style works equally well for right- and left-handed shooting.

2. HOW FAR IS THE LASER VISIBLE?

Crimson Trace has the most powerful laser allowed by law, a Class 3R visible laser diode. At night, in reduced light and indoors the laser is highly visible up to several hundred yards. Under bright sunlight, the dot can be seen 15 – 25 feet away.

Lighter-colored surfaces reflect laser light better than darker surfaces. The lighter the surface, the brighter the laser dot will appear.

3. HOW LONG WILL MY BATTERIES LAST? WHERE CAN I GET THEM?

All Crimson Trace products use commonly available powerful lithium batteries. They provide over four (4) hours of "ON" time for Lasergrips and Laserguard models. Batteries for the MVF line provide a minimum of: six (6) hours for Green and forty-eight (48) hours for Red of "ON" time. Turning the master switch "off" will not increase battery life. No power is used until the activation button is depressed. Lightguard models provide over two (2) hours of illumination. These batteries are readily available and inexpensive. Required batteries are listed next to each product.

4. WHAT HAPPENS IF MY BATTERIES DIE?

When batteries are low, the laser does not just stop working. It fades in intensity and gives plenty of warning. A low battery is indicated when the laser emits a bright laser that slowly fades after several seconds. Most heavy users change their batteries once a year, just to be safe.

5. ARE CRIMSON TRACE PRODUCTS WEATHERPROOF?

All sights are weatherproof so there's no risk taking them in the heavy rain or splashing them. Submerging them in water, while not recommended, will not destroy the laser sight. If they are submerged, take them off, remove the batteries and allow to air dry.

6. ARE CRIMSON TRACE SIGHTS ADJUSTABLE?

Yes, they can be easily adjusted for windage (side to side) and elevation (up and down). A small hole on the top and side of the diode housing contains a screw that turns with a supplied hex wrench. Page 33 indicates what direction to turn the windage or elevation adjustment to sight in your laser. DO NOT overturn adjustment screws; a little adjustment goes a long way. Rarely is more than one complete turn required.

7. WHAT IF I DON'T SEE MY FIREARM LISTED IN THE CATALOG?

Make a future model request by phone call, email or visit our website to submit your request. Such requests help us determine what products to offer next. We are constantly adding new innovative products to the lineup.

8. WILL LASERGRIPS FIT MY 1911 WITH AMBIDEXTROUS SAFETY?

A standard right-side safety lever will interfere with the laser diode housing. Simply remove the factory right-side paddle and shorten it slightly to clear the laser housing. Or, buy pre-modified safeties that

have the slim "tactical" lever on the left side and a shorter paddle on the right. Any modification should be performed by a gunsmith.

9. WHAT IS THE EFFECT OF THE LASER BEING OFFSET FROM THE BARREL?

Extremely minor. At point blank, the laser is about 1" low and to the right of the barrel's center line. We recommend sighting in at 50' so that for any distance between point blank and 50', the point-of-aim (POA) is within 1" of point-of-impact (POI).

10. WHAT'S THE WARRANTY?

Every Crimson Trace product is fully warranted against defects in materials and workmanship for three years from the date of purchase. Pro-Custom grip finishes are not warranted for damage due to normal wear and tear. See page 39 for additional information or visit our website.

11. WHAT DO "RUBBER OVERMOLD" AND "POLYMER" MEAN?

These are two type of molding processes we use to make laser sights. Each set of sights is made out of molded grip substrates into which the electronics are embedded. Polymer grips are molded from a rugged single-density material throughout. Rubber overmold grips are made with a dual-density material, meaning the grip substrates are first molded from hard polymer and then softer material is molded over the hard polymer.

12. WHERE CAN I GET A HOLSTER TO ACCOMMODATE MY LASER SIGHT?

Due to the seamless integration of our laser sights, holsterability is an ease with most common holsters. However, Crimson Trace also teamed up with several trusted names in the holster business to create custom holsters to accommodate your laser equipped pistol. Please see page 23 for a full list of holster manufacturers Crimson Trace partnered with. Visit our website to download our Holster Resource Guide with more suggested holsters.

13. WHAT IS THE DIFFERENCE BETWEEN A RED LASER AND A GREEN LASER?

A red laser is highly visible in low light. The output peak for both lasers is the same yet the human eye naturally detects the color green, hence the green laser appearing brighter in natural bright day light. Both the green and red laser Crimson Trace produces emit the maximum output allowed by law — a Class 3R laser. For additional information on green lasers, see page 33.

14. DO I HAVE TO ALTER MY FIREARM IN ORDER TO INSTALL A LASERGUARD?

No. All Crimson Trace laser sights are easily installed by the user without the assistance of a gunsmith while no firearm alterations are necessary, or suggested. The Laserguard platform attaches to the trigger guard and is held in place by 2 or 3 screws, depending on model. See page 25 or visit our website for additional information.

15. WILL THE LIGHTGUARD WORK WITH MY CURRENT CRIMSON TRACE LASER?

At this time, only the LTG-736 and LTG-760 work in conjunction with existing Crimson Trace laser sights. See page 05 for detailed information outlining compatibility. Due to attachment and activation location, the LTG-746 cannot be used in conjunction with a Crimson Trace laser.

.....

CUSTOMER SERVICE IS ONE ASPECT OF CRIMSON TRACE THAT CANNOT BE QUESTIONED. OUR DAILY GOAL IS TO BE THE BEST IN THE BUSINESS. WE ARE RESPONSIVE AND INFORMATIVE. AND WE'LL NEVER SETTLE FOR ANYTHING LESS. NOR SHOULD YOU.
